

Question 1: To what extent do you think our proposed approach to providing national-scale existing information about geology relevant to long-term safety is appropriate? Please give your reasons.

This is very appropriate as it will give communities assistance in what is known about the geology in their locality

Question 2: To what extent do you think that the proposed national information sources are appropriate and sufficient for this exercise? Please give your reasons.

It appears that these are the best sources available on a consistent basis

Question 3: To what extent do you agree or disagree with the proposed form of the outputs from geological screening? What additional outputs would you find useful?

I think the outputs give sufficient information but this should be expanded where possible and made available in lay mans terms

Question 4: Do you have any other views on the matters presented in the draft Guidance?

No

Name: Nick Clarke

Email address: [REDACTED]

Telephone number: [REDACTED]

Organisation/affiliation [REDACTED]

Do you agree to your responses to this consultation being published?

Yes
