

Dear Radioactive Waste Management Team

Thank you for your consultation and seeking the views of United Utilities Water Limited in this process.

We have reviewed your National Geological Screening Guidance and have no specific comments or opinions to make at this stage, but wish to be included in further consultations and where necessary, the development of your future plans and supporting policies, to ensure we can facilitate the delivery of the necessary sustainable infrastructure in line with your delivery targets, whilst safeguarding our service to customers.

If you wish to discuss this in further detail please do not hesitate in contacting me or Jenny Hope.

Regards

Dave
