

# UK Digital Health Sector Strength & Opportunity 2015

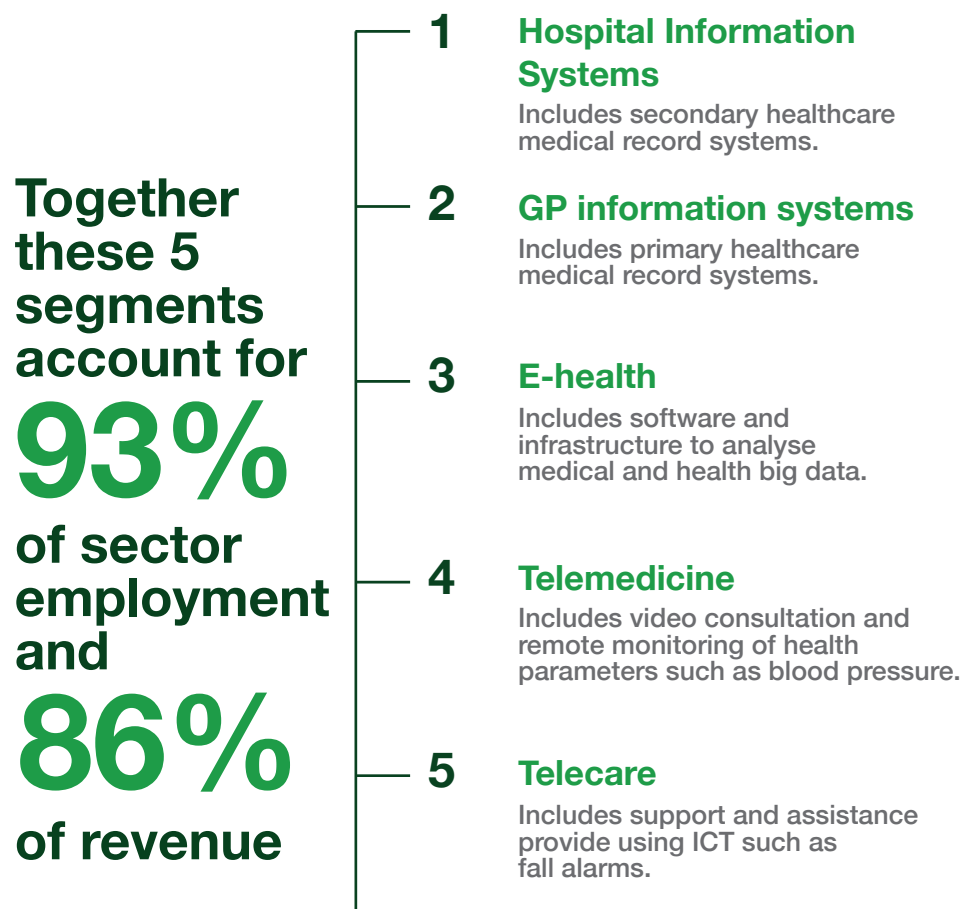

## Companies, Employment and Turnover

Includes companies whose main activity involves the application of digital technology to deliver health or wellbeing services and products. These companies typically provide software or other IT related products. Companies that earn most of their revenue from equipment are not included in the digital health sector but under segments related to the equipment (e.g. Producers of MRI scanners, laboratory based diagnostic equipment)

## Largest Segments by Employment and Revenue

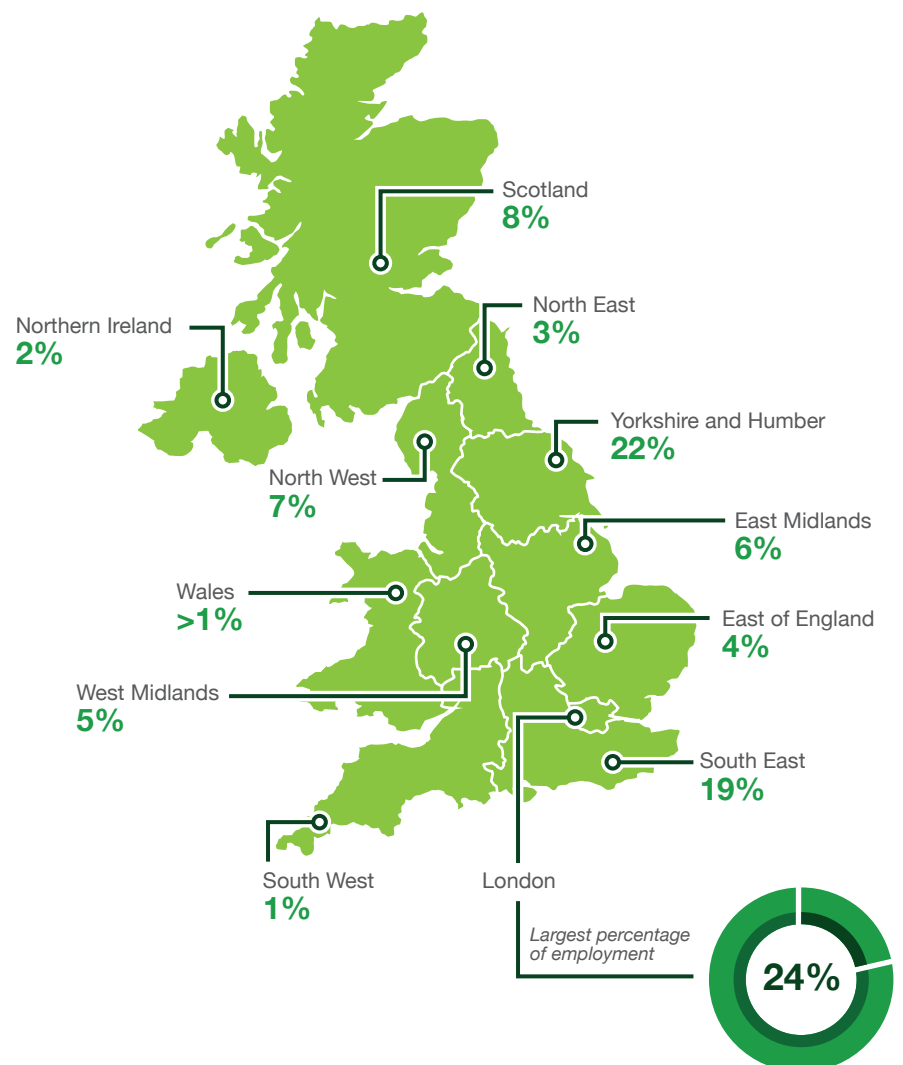

## Growth Trends

Between 2011 and 2015 employment at a sample of 51 digital health companies grew at 28%, and revenue declined by 3.9%, using compound annual growth rate (CAGR)

## Distribution of Employment Across UK
