

Data type:

Residence: Data represent chlamydia tests and diagnoses among people accessing services in England, who are residents of England.

Contents:

Notes: Information detailing the contents of the data presented

Geography: Information detailing the relationships between PHE geographies:
PHE Region, PHE Centre, Local Authority-Upper Tier (LA-UT) (including unitary authorities), Local Authority (LA)

Data: Table 1 Chlamydia testing data for 15-24 year olds, Non GUM and GUM data, January to December 2012

Table 2 Chlamydia testing data for 15-24 year olds, sex and age groups, January to December 2012

Table 3 Chlamydia testing data for 15-24 year olds, testing service type, January to December 2012

Table 4 Chlamydia testing data for 15-24 year olds, ethnicity, January to December 2012

Missing data: Information on missing data from GUM clinics (GUMCAD data) and laboratories (CTAD data).

Data supplied by:

Public Health England
CTAD: Chlamydia Testing Activity Dataset
GUMCAD: Genito-Urinary Medicine Clinic Activity Dataset

Data prepared by:

HIV and Sexually Transmitted Infections Department
Public Health England
National Infection Service, Colindale
61 Colindale Avenue
London

Tel: 020 8327 6468

Email: ctad@phe.gov.uk

Website: <https://www.gov.uk/government/statistics/national-chlamydia-screening-programme-ncsp-data-tables>

Notes on using data tables:

1. Data include chlamydia tests carried out on people aged 15 to 24 years inclusive.
2. Data include tests where sex is male, female, and indeterminate/unspecified. Persons totals include those with indeterminate/unspecified sex and therefore may not be the sum of male and female figures.
3. Data include all screening tests, diagnostic tests and tests on contacts.
4. Data are presented by patient area of residence. Chlamydia data published in the STI annual data tables are based on location of services thus will not match the figures presented here.
5. There are two totals for England. 'ENGLAND' is the total of all tests attributed to a local authority in England. The England total shown in red includes tests which did not have sufficient location information to be attributed to a local authority of residence.
6. Data represent the number of tests and diagnoses reported, and not the number of unique people tested or diagnosed.
7. Data presented are based on tests with confirmed positive and negative results only. Tests with equivocal, inhibitory and insufficient results have been excluded as most of these people are retested.
8. If the same patient is tested more than once on the same day and samples have been taken from different sites, only one test is counted.
9. A maximum of one chlamydia test (positive or negative) per individual is counted within a six week period. Any further tests or diagnoses within the six week period are not counted. This applies to all tests from GUM and non-GUM services.
10. This publication includes data on internet testing. Data may not yet reflect true volumes of internet testing whilst reporting provider and/or lab algorithms are amended. Validation of these figures is ongoing. Prior to 2015 chlamydia tests ordered through the internet were reported as 'other' testing service type. However, due to resubmissions of retrospective data, some areas may have internet testing data for 2012-2014 also.
11. The data for CTAD and GUMCADv2 were extracted on 4th May 2016.

Changes since January 2012

12. Data are presented by calendar year (January-December). Prior to 2012 data were presented by financial year (April-March).

Chlamydia testing activity dataset (CTAD)

13. The data presented are aggregated to PHE Centre level after LA attribution

Combining GUM and non-GUM chlamydia data

14. CTAD data from GUM clinics has been removed and replaced with GUM clinic data sourced from GUMCADv2. This is because, unlike CTAD sourced GUM data, GUMCADv2 data contains information on patients' areas of residence.

15. This data substitution relies on accurate coding of testing service type by laboratories reporting CTAD data. Inaccurate coding may lead to over or under counting.

Sharing data which involves small numbers

16. Numbers between 1 & 4 with a population <10,000 are presented as '<5'. Associated detection rates are rounded up to the nearest 10 and are presented as '<10'. Where numbers can be deduced from group totals, the next smallest cell size within the group is rounded up to the nearest 10 and presented as '<10'.

For example, where the population is <10,000 with a value of 3 and a rate of 122.2 data are presented as '<5' and '<130.0' (see link below for further details on data sharing & data confidentiality)

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/423828/20150424_PHE_HIV_STI_Data_Sharing_Policy_v4.1.pdf

Population data

17. Detection and coverage rates have been calculated using ONS 2012 population estimates based on the 2011 census. Prior to this, rates were calculated using ONS population estimates based on the 2000 census.
