

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
1	Alde, Ore and Butley Estuaries	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Estuaries Mudflats and Sandflats Atlantic Salt Meadows		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance is highlighted as a risk to the site. Some management currently in place by National Trust and current EU funded project to look at recreational activities. MMO and Natural England will continue to monitor risk.
2	Alde Ore Estuary	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance is highlighted as a risk to the site. Some management currently in place by National Trust and current EU funded project to look at recreational activities. MMO and Natural England will continue to monitor risk.
3	Aln Estuary	Inshore (0 to 6 nautical miles)	Northern	Northumberland IFCA	MCZ	MCZ factsheet	Coastal saltmarshes and saline reedbeds Intertidal mud Estuarine rocky habitats Sheltered muddy gravels		Northumberland IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
4	Bassurelle Sandbank	Offshore (12 to 200 nautical miles)	South Eastern	Not Applicable	cSAC	Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Sandbanks		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC.
5	Beachy Head West	Inshore (0 to 6 nautical miles)	South Eastern	Sussex IFCA	MCZ	MCZ factsheet	Littoral chalk communities Subtidal mixed sediments Short-snouted seahorse (Hippocampus hippocampus) Intertidal coarse sediment Subtidal mud Subtidal sand Blue Mussel (Mytilus edulis) Beds Subtidal chalk Native oyster (Ostrea edulis) Infralittoral muddy sand Low energy infralittoral rock and thin sandy sediment Infralittoral sandy mud		Sussex IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
6	Benacre to Easton Bavents	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance highlighted as risk to the site. The NNR has Shorebird Protection Areas to offer areas with lessened public pressure. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
7	Benfleet and Southend Marshes	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance highlighted as a risk to the site and is being considered by Thames Estuary Partnership. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
8	Berwickshire and North Northumberland Coast	Inshore (0 to 6 nautical miles)		Northumberland IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Mudflats and sandflats Shallow Inlets and Bays Reefs Sea Caves Grey Seals	Northumberland IFCA Prohibition of the use of Mobile Fishing gear within the English Section of the Berwickshire and North Northumberland Coast Special Area of Conservation (SAC) Seagrass protection byelaw within the English Section of the Berwickshire and North Northumberland Coast Special Area of Conservation (SAC)	Northumberland IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features. An active management scheme is in operation at this site http://www.xbordercurrents.co.uk/

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
9	Berwickshire and North Northumberland Coast - Lindisfarne	Inshore (0 to 6 nautical miles)	Northern	Northumberland IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Northumberland IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance is highlighted as a risk to the site. Initiatives established through EMS management scheme. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features. An active management scheme is in operation at this site http://www.xbordercurrents.co.uk/
10	Blackwater, Crouch, Roach and Colne Estuary	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	MCZ	MCZ factsheet	Native oyster (Ostrea edulis) Native oyster (Ostrea edulis) beds Clacton Cliffs and Foreshore Intertidal mixed sediments		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
11	Braunton Burrows	Inshore (0 to 6 nautical miles)	South Western	Devon and Severn IFCA	SAC	Conservation advice	White Dunes Grey Dunes Dunes with Salix Humid Dune Slack		Devon and Severn IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
12	Breydon Water	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Mudflats and Sandflats Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational activities (eg kite surfing) has been highlighted as a potential risk to the site. NE and RSPB in discussion regarding addressing this risk. MMO and Natural England will continue to monitor risk of recreational activities on qualifying features.
13	Chesil and the Fleet	Inshore (0 to 6 nautical miles)	South Eastern / South Western	Southern IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Coastal Lagoons Drift lines Stony banks Mediterranean and thermo-Atlantic halophilous scrubs Atlantic Salt Meadows	Southern IFCA - Bottom Towed Fishing Gear Byelaw Southern IFCA Prohibition of Gathering (Sea Fisheries Resources) in Seagrass Beds Byelaw	Southern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Visitor activities potentially posing a risk of disturbance to lagoon communities and trampling identified as a risk. MMO and Natural England will continue to monitor risk.
14	Chesil Beach and the Fleet	Inshore (0 to 6 nautical miles)	South Eastern / South Western	Southern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat	Southern IFCA - Bottom Towed Fishing Gear Byelaw Southern IFCA Prohibition of Gathering (Sea Fisheries Resources) in Seagrass Beds Byelaw	Southern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Visitor activities causing disturbance of lagoon communities and trampling identified as a risk. Beaches closed during breeding season. MMO and Natural England will continue to monitor risk.
15	Chesil Beach & Stennis Ledges	Inshore (0 to 6 nautical miles)	South Eastern / South Western	Southern IFCA	MCZ	MCZ factsheet	Pink sea-fan (Eunicella verrucosa) Native oyster (Ostrea edulis) Intertidal coarse sediment High energy intertidal rock	Southern IFCA have engaged with the industry and there is a voluntary agreement in place for vessels to avoid scallop dredging activity within the Stennis Ledges section of the MCZ	Southern IFCA are currently assessing the risk of fishing gears on site interest features. Visitor activities causing disturbance of lagoon communities and trampling identified as a risk. Beaches closed during breeding season. MMO and Natural England will continue to monitor risk.
16	Coquet Island	Inshore (0 to 6 nautical miles)	Northern	Northumberland IFCA	SPA	No advice package - Site Improvement Plan	Birds and supporting habitat		Northumberland IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
17	Croker Carbonate Slabs	Offshore (12 to 200 nautical miles)	Northern	Not Applicable	cSAC	Regulation 18 of the Offshore Marine Conservation (Natural Habitats &c.) Regulations 2007	Submarine structures made by leaking gases		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC.
18	Cumbria Coast	Inshore (0 to 6 nautical miles)	Northern	North Western IFCA	MCZ	MCZ factsheet	Honeycomb worm (Sabellaria alveolata) reefs Intertidal biogenic reefs Moderate energy infralittoral rock High energy intertidal rock Intertidal sand and muddy sand Intertidal underboulder communities Peat and clay exposures		North Western IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
19	Deben estuary	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Recreational disturbance is highlighted as a risk to the site. An Estuary Plan being prepared with NE leading. MMO and Natural England will continue to monitor risk posed by recreational activities.
20	Dee Estuary/Aber Dyfrdwy	Inshore (0 to 6 nautical miles)	Northern	North Western	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Mudflats and Sandflats Salicornia Salt Meadows Estuaries Drift Lines Sea Cliffs Shifting/Fixed Dunes Humid Dune Slacks Sea/River Lamprey Petalwort	North Western IFCA Protection for European Marine Site Features	North Western IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
21	The Dee Estuary	Inshore (0 to 6 nautical miles)	Northern	North Western	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat	North Western IFCA Protection for European Marine Site Features	North Western IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. Kite surfing identified as a risk. This activity can only take place in zoned areas, away from the birds. MMO and Natural England will continue to monitor risk posed by recreational activities.
22	Dogger Bank	Offshore (12 to 200 nautical miles)	Northern	Not Applicable	cSAC	Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Sandbank		The UK is working with Germany and the Netherlands on a joint management proposal and will submit final proposals to the European Commission. The European Commission will then decide whether to bring the measures into force through a Commission Regulation.
23	Drigg Coast	Inshore (0 to 6 nautical miles)	Northern	North Western IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Estuaries Atlantic decalcified fixed dunes Dunes with Salix Mudflats and sandflats Salicornia Salt Meadows Shifting dunes/Fixed dunes Humid dune slacks		North West IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
24	Duddon Estuary	Inshore (0 to 6 nautical miles)	Northern	North Western IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		North West IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
25	Dungeness	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Drift Lines Stony Banks Great Crested Newt		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Vehicles and walkers damage identified as a risk to the site. Boardwalks and wardens in place as a management measure. MMO and Natural England will continue to monitor risk posed by recreational activities.
26	Dungeness to Pett Level	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Vehicles and walkers damage identified as a risk to the site. Boardwalks and wardens in place as a management measure. MMO and Natural England will continue to monitor risk posed by recreational activities.
27	East of Haig Fras	Offshore (12 to 200 nautical miles)	South Western	Not Applicable	MCZ	MCZ factsheet	Moderate energy circalittoral rock Subtidal coarse sediment Subtidal sand Subtidal coarse/mixed sediments mosaic Subtidal mud		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). Defra leads on this work, with support from MMO and JNCC.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
28	Essex Estuaries	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Estuaries Mudflats and sandflats Salicornia Spartina Swards Salt Meadows Mediterranean and thermo-Atlantic halophalous scrubs Sandbanks	Kent & Essex IFCA Bottom Towed Gear Byelaw	Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
29	Essex Estuaries - Colne	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
30	Essex Estuaries - Blackwater,	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
31	Essex Estuaries - Crouch & Roach	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
32	Essex Estuaries - Dengie	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
33	Essex Estuaries - Foulness	Inshore (0 to 6 nautical miles)	Eastern / South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
34	Exe Estuary	Inshore (0 to 6 nautical miles)	South Western	Devon and Severn IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Devon and Severn IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance and presence of dog walkers identified as a risk to features. An active management scheme is in operation at this site.
35	Fal and Helford	Inshore (0 to 6 nautical miles)	South Western	Cornwall IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Sandbanks Mudflats and Sandflats Inlets and Bays Atlantic Salt Meadows Estuaries Reefs Shore Dock	Cornwall IFCA Closed Areas (European Marine Sites) No 2	Cornwall IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. An active management scheme is in operation at this site.
36	Falmouth Bay to At Austell Bay	Inshore (0 to 6 nautical miles)	South Western	Cornwall IFCA	pSPA	Site proposal	Birds and supporting habitat		Cornwall IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance and presence of dog walkers identified as a risk to features.
37	Flamborough Head	Inshore (0 to 6 nautical miles)	Northern	North Eastern IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Reefs Vegetated Sea Cliffs Sea Caves	North Eastern IFCA Byelaw XXVI: Flamborough Head Fishing Byelaw	North Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. Code of Conduct in place, posters and letters to be issued by NE in Jet Ski season. MMO and Natural England will continue to monitor risk posed by recreational activities. An active management scheme is in operation at this site.
38	Flamborough and Filey Coast	Inshore (0 to 6 nautical miles)	Northern	North Eastern IFCA	pSPA	No advice package - Site Improvement Plan	Birds and supporting habitat		North Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
39	Folkestone Pomerania	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	MCZ	MCZ factsheet	Fragile sponge and anthozoan communities on subtidal rocky habitats Ross worm (Sabellaria spinulosa) reefs High energy circalittoral rock Honeycomb worm (Sabellaria alveolata) reefs	Amended Kent & Essex IFCA Bottom Towed Gear Byelaw including Folkestone Pomerania MCZ has been signed off by the Secretary of State (2015).	Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
40	Fylde	Inshore (0 to 12 nautical miles)	Northern	North Western IFCA	MCZ	MCZ factsheet	Subtidal sand		MMO and North West IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
41	Great Yarmouth and North Denes	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
42	Haig Fras	Offshore (12 to 200 nautical miles)	South Western	Not Applicable	cSAC	Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Reefs		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC.
43	Haisborough, Hammond and Winterton	Offshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	cSAC	Regulation 35 of the Conservation of Habitats and Species Regulations 2010 Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Sandbanks Reefs	MMO Byelaw - Haisborough, Hammond and Winterton European Marine Site (Specified Areas) Bottom Towed Fishing Gear Byelaw	Defra, MMO and Eastern IFCA are working together on the management of this site. Inshore (<6nm) EIFCA is assessing the risk of fishing gears on site interest features. For areas of the site accessed by fishing vessels from other Member States, delivery of fisheries management measures is set out in Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC. MMO and Natural England will continue to monitor risk posed by recreational activities
44	Hamford Water	Inshore (0 to 6 nautical miles)	Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
45	Humber Estuary	Inshore (0 to 6 nautical miles)	Eastern	North Eastern IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Estuaries Mudflats and sandflats Sandbanks Coastal Lagoons Salicornia Salt Meadows Shifting/Fixed Dunes Sea/River Lamprey Grey Seal	North East and Eastern IFCA Protected Areas Byelaw North Eastern IFCA byelaw XXIX: Humber Estuary Fishing Byelaw	North Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Physical damage to saltmarsh due to recreational activities identified as a risk. Measures implemented through Humber Management Scheme. Recreational disturbance study to gather more evidence is ongoing. MMO and Natural England will continue to monitor risk posed by recreational activities.
46	Humber Estuary	Inshore (0 to 6 nautical miles)	Eastern	North Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		North Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Physical damage to saltmarsh due to recreational activities identified as a risk. Measures implemented through Humber Management Scheme. Recreational disturbance study to gather more evidence is ongoing.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
47	Inner Dowsing, Race Bank and North Ridge	Inshore (0 to 200 nautical miles)	Eastern	Eastern IFCA	cSAC	Regulation 35 of the Conservation of Habitats and Species Regulations 2010 Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Sandbanks Reefs	MMO Byelaw - Inner Dowsing, Race Bank and North Ridge European Marine Site (Specified Areas) Bottom Towed Fishing Gear Byelaw	Defra, MMO and EIFCA are working together on the management of this sites. MMO and Eastern IFCA are currently assessing the risk of fishing gears on site interest features lying inshore (with 12nm). The delivery of fisheries management measures for the offshore section is set out in Articles 11 and 16 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC.
48	Isle of Portland to Studland Cliffs	Inshore (0 to 6 nautical miles)	South Eastern	Southern IFCA	SAC	Conservation advice	Vegetated Sea Cliff Semi-Natural dry grassland Drift lines Early Gentian		Southern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
49	Isles of Scilly Complex	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Sandbanks Mudflats and Sandflats Reefs Shore dock Grey seal	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
50	IoS - Bishop to Crim	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Spiny lobster (Palinurus elephas)	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
51	IoS - Bristows to the Stones	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Pink sea-fan (Eunicella verrucosa) Fragile sponge and anthozoan communities on subtidal rocky habitats* Spiny lobster (Palinurus elephas) High energy circalittoral rock		Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
52	IoS - Glistone to Gorregan	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Spiny lobster (Palinurus elephas) High energy intertidal rock Moderate energy intertidal rock	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
53	IoS - Hanjague to Deep Ledge	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Spiny lobster (Palinurus elephas) High energy intertidal rock Moderate energy intertidal rock Intertidal coarse sediment Intertidal underboulder communities	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
54	IoS - Higher Town	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Stalked jellyfish (Halcythus auricula) Moderate energy intertidal rock Low energy intertidal rock Intertidal coarse sediment Intertidal sand and muddy sand Intertidal underboulder communities	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
55	IoS - Lower Ridge to Innisvouls	Inshore (0 to 6 nautical miles)	South Western	Isles of Scilly IFCA	MCZ	MCZ factsheet	Spiny lobster (Palinurus elephas) Moderate energy intertidal rock	Isles of Scilly IFCA Towed Fishing Gear Byelaw	Isles of Scilly IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions

Regulations 1994	Birds and supporting habitat		North Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance (esp. kite surfing and walking) identified as a risk to the site. Management measures being implemented by local Council. An active management scheme is in operation at this site.
110	Thames Estuary and Marshes	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
111	Thanet Coast	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Reefs Sea Caves	Kent and Essex IFCA Bottom Towed Gear Byelaw	Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. An active management scheme is in operation at this site. Recreational damage and boat anchoring identified as a risk. Various management measures e.g. codes of conduct and Zoning implemented by Thanet Coast project.
112	Thanet Coast	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	MCZ	MCZ factsheet	Ross worm (Sabellaria spinulosa) reefs Subtidal mixed sediments Stalked jellyfish (Halicystus auricula) Stalked jellyfish (Lucernariopsis cruxmelitensis) Moderate energy infralittoral rock Moderate energy circalittoral rock Subtidal coarse sediment Peat and clay exposures Subtidal chalk Subtidal sand Blue mussel (Mytilus edulis) beds	Kent and Essex IFCA Bottom Towed Gear Byelaw	Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
113	Thanet Coast and Sandwich Bay	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance to birds identified as a risk. Thanet Coast project management to look at bird disturbance study by Kent Wildlife Trust.
114	The Canyons	Offshore (12 to 200 nautical miles)	South Western	Not Applicable	MCZ	MCZ factsheet	Subtidal coarse sediment Subtidal sand Deep-sea bed Cold-water coral reefs		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). Defra leads on this work, with support from MMO and JNCC.

Marine protected areas (MPAs): MMO strategic management table: March 2016

	Site name	Location	MMO Marine area	Relevant IFCA district	MPA type	Advice available from statutory nature conservation bodies (SNCB) on conservation objectives and operations	Interest / Qualifying features	Some key recently implemented management measures	Current management actions
115	The Manacles	Inshore (0 to 6 nautical miles)	South Western	Cornwall IFCA	MCZ	MCZ factsheet	Maeri beds Spiny lobster (<i>Palinurus elephas</i>) Subtidal macrophyte dominated sediment Stalked jellyfish (<i>Halicystus auricula</i>) Sea-fan anemone (<i>Amphianthus dohrnii</i>) Intertidal coarse sediment Moderate energy circalittoral rock Moderate energy infralittoral rock Moderate energy intertidal rock Subtidal sand		Cornwall IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
116	The Swale	Inshore (0 to 6 nautical miles)	South Eastern	Kent and Essex IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Kent and Essex IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
117	The Wash and North Norfolk Coast	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SAC	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Sandbanks Mudflats and Sandflats Inlets and Bays Reefs Salicornia Salt Meadows Mediterranean and thermo-Atlantic halophilous scrubs Coastal Lagoons Common Seals Otter	Eastern IFCA Protected Areas Byelaw	Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
118	The Wash - North Norfolk Coast	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance to birds from pleasure craft identified as a risk.
119	The Wash	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance to birds from pleasure craft identified as a risk. An active management scheme is in operation at this site.
120	The Wash - Gibraltar Point	Inshore (0 to 6 nautical miles)	Eastern	Eastern IFCA	SPA	Regulation 33 of The Conservation (Natural Habitats &c.) Regulations 1994.	Birds and supporting habitat		Eastern IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities. Recreational disturbance to birds from pleasure craft identified as a risk.
121	Torbay	Inshore (0 to 6 nautical miles)	South Western	Devon and Severn IFCA	MCZ	MCZ factsheet	Seagrass beds Subtidal mud Seagrass beds Subtidal mud Long-snouted seahorse (<i>Hippocampus guttulatus</i>) Long-snouted seahorse (<i>Hippocampus guttulatus</i>) Intertidal mud Intertidal coarse sediment	Devon and Severn IFCA Mobile Gear Permit Byelaw Devon and Severn IFCA Potting Gear Permit Byelaw Devon and Severn IFCA Diving Permit Byelaw	Devon and Severn IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
122	Tweed Estuary	Inshore (0 to 6 nautical miles)	Northern	Northumberland IFCA	SAC	Conservation advice	Estuaries Mudflats and Sandflats Sea/River Lamprey		Northumberland IFCA are currently assessing the risk of fishing gears on site interest features. Appropriate management of fisheries to be in place by Dec 2016. MMO and Natural England will continue to monitor risk posed by recreational activities.
123	Upper Fowey and Pont Pill	Inshore (0 to 6 nautical miles)	South Western	Cornwall IFCA	MCZ	MCZ factsheet	Coastal saltmarshes and saline reedbeds Intertidal mud Intertidal coarse sediment Low energy intertidal rock Estuarine rocky habitats Sheltered muddy gravels		Cornwall IFCA are currently assessing the risk of fishing gears on site interest features. MMO and Natural England will continue to monitor risk posed by recreational activities.
124	Wight-Barlfeur Reef	Offshore (12 to 200 nautical miles)	South Eastern	Not Applicable	cSAC	Regulation 18 of the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007	Bedrock Reefs		The delivery of fisheries management measures for offshore sites is set out in Articles 11 and 18 of Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy (CFP). It is the intention that any fishery measures needed for existing EMS in the offshore are will be identified by the end of 2016. Defra leads on this work, with support from MMO and JNCC.
