1. Introduction

This quality and methodology document provides an overview of the key stage 4 attainment data used in the production of the key stage 4 statistical first releases (SFRs) and the secondary school performance tables. It provides information on the methodology used to calculate pupil attainment, as well as information on the data sources, their coverage and quality, and how the data is validated and processed.

This document is based on the Office for National Statistics' [guidelines for measuring statistical quality](#).

Changes from the 2014/15 release

New accountability measures

In 2016 a new secondary school accountability system was implemented. It will include two new headline measures: Attainment 8 and Progress 8. Schools had the option to adopt the new performance measures a year early in 2015. A list of schools that opted in early to the Progress 8 measure can be found [here](#). From 2016, the headline indicator of school performance determining the floor standard will be Progress 8. This replaces the previous headline measure, 5+ A* to C including English and maths.

Progress 8 aims to capture the progress a pupil makes from the end of primary school to the end of secondary school. It is a type of value added measure, which means that pupils' results are compared to the actual achievements of other pupils with the same prior attainment. As Progress 8 is a relative measure, the average Progress 8 score for all pupils nationally is zero, and it is therefore not published in the key stage 4 SFR.

Attainment 8 will measure the achievement of a pupil across 8 subjects including maths (double weighted) and English (double weighted), 3 further qualifications that count in the English Baccalaureate (EBacc) measure and 3 further qualifications that can be GCSE qualifications (including EBacc subjects) or any other non-GCSE qualifications on the DfE approved [list](#).

Detailed guidance on the new Progress 8 and Attainment 8 measures can be found in the [Progress 8 and Attainment 8 guidance](#).

Further changes to the performance tables and measures include:

- publication of the percentage of pupils achieving English and maths GCSEs at grades A* to C as a headline measure
- publication of the percentage of pupils entering English Baccalaureate as a headline measure
- two new indicators will be published as additional information, looking at the percentage of pupils entering more than one language qualification and the percentage of pupils entering physics, chemistry and biology
- for the English requirement of the English Baccalaureate, pupils on the English Language/Literature pathway must take exams in both English Language and English Literature, and achieve a C grade or better in at least one of these qualifications.
- for the threshold measure on percentage of pupils achieving English and maths, a C grade or above must be achieved in maths and either English literature or language. There is no requirement to enter both English literature and English language

- the point score scale for performance table measures in 2016 will change from the current 16 to 58 scale to a 1 to 8 point scale, where 1 is equivalent to a grade G GCSE and 8 equivalent to an A* GCSE
- the removal of disadvantage gap measures (measures of “in-school” performance gaps are removed, however the tables will still include measures on the difference between disadvantaged pupils at the school and other pupils nationally).
- changes to expected standards for schools (see annex D for further details)

Methodology

The measures covered in the key stage 4 SFRs include qualifications which count towards the secondary performance tables. Following reforms to the performance tables in 2014, only a pupil’s first attempt at a qualification is counted.

A list of qualifications that count in the performance tables each year up to 2018 can be found [here](#). Further information on methodology used in the performance tables can be found on the performance tables [guidance page](#). A timeline of changes in key stage 4 attainment measures can be found in Annex A.

For more information on coherence and comparability, see section 6 of this document.

Publication of provisional data at school level in the performance tables

In October 2015, we published for the first time provisional school level results for state-funded schools alongside the SFR. In 2016 we will continue to publish provisional school level data; however the performance measures will be amended to reflect the changes to accountability. The publication of provisional data in advance of the 31 October deadline for secondary school admission applications will continue to support parents who may wish to use the information when applying for a secondary school place for their child. As in previous years, any amendments made after August 2016 will be reflected in the full performance tables release in January 2017. School level figures will not be published in the key stage 4 SFR.

The decision to publish the provisional results at school level, for state-funded schools only, was based on analysis of previous years’ data which showed that provisional data is an accurate reflection of revised data for the vast majority of state-funded secondary schools. This is explained in more detail in section 4 of this document: [reliability](#). Provisional results have not been released for independent schools because the level of change between provisional and revised data is higher as the current process means that independent schools are unable to check their data until September.

2. About the output

National and local authority (LA) information on pupil’s attainment at the end of key stage 4 in 2015/16 for secondary school pupils in England will be published in the following [SFRs](#) :

- Provisional GCSE and equivalent results in England 2015 to 2016 (October 2016)
- Revised GCSE and equivalent results in England 2015 to 2016 (January 2017)

GCSE and equivalent results for previous years can be found on the [Statistics: GCSEs \(key stage 4\)](#) section of gov.uk

School level information for the end of key stage 4 is published in the secondary school [performance tables](#).

Data sources

The key stage 4 datasets are compiled using information matched together from three data sources:

- i. prior attainment records (key stage 2 results)
- ii. school census records
- iii. qualification entries and results collected from awarding bodies

Attainment data for all pupils at the end of key stage 4 is collected from the awarding bodies by the department's contractor.

Relevance

This section describes the degree to which the statistics meet current and potential needs of the users.

The key strength of the data is that it is derived from an administrative data collection. This means that it can supply accurate data down to small geographical areas (school level). In addition, the data is merged with other administrative data held by the department (the school census) to provide detailed information on sub-groups of the school population. Pupil level data from different key stages can also be merged together so that we can produce precise measures of pupil progress between one key stage and another.

Key users

| | |
|--------------------------|--|
| Department for Education | Used to monitor national standards of key stage 4 attainment in secondary schools in England. The national figures are used to determine whether standards are improving or declining. Data for sub-groups of the population are also analysed to inform departmental policies aimed at closing gaps in attainment. School level figures are used to identify schools where intervention may be needed to bring standards up to an acceptable level. |
| Ofsted | Used as part of the background information to inform school inspections. For example, it enables inspectors to identify areas of the curriculum or groups of pupils where a school appears to be doing less well. This would then form part of the focus during the inspection. |
| Ofqual | Used as part of the evidence it reviews on the setting and maintenance of standards in key stage 4 examinations. |
| Local authorities | National data and that for other local authorities is used to set the attainment of their area into context. School level information is used to hold maintained schools to account. |

| | |
|----------------------------|---|
| Schools | <p>Used to evaluate their own performance against national standards and other local schools.</p> <p>Used to identify high performing schools with similar circumstances to their own that they can work with to improve their own standards.</p> |
| School governors | <p>Used to hold schools to account, to identify strengths and weaknesses and to support school improvement.</p> |
| Teachers and head teachers | <p>Used for analysis and self-evaluation, and to aid planning of school improvement strategies.</p> <p>Used to inform decisions about whether to apply for vacancies in particular schools and also as background information when preparing for interviews.</p> |
| Parents | <p>Used to compare their own children's performance to others in their school, local authority and nationally.</p> <p>Used to hold their children's schools to account and identify areas where they feel the school needs to improve.</p> <p>Used to inform choice of a secondary school for their child.</p> <p>Performance of schools in the local area is also a key consideration for parents and prospective parents when moving house.</p> |
| Others | <p>Used by researchers from this country and abroad. Used by others to identify schools with particular levels of attainment that they may wish to market their services to.</p> |

Timeliness and punctuality

Timeliness refers to the lapse of time between the period to which the data refer and the publication of the estimates.

The timeline of the key stage 4 data cycle is as follows:

May and June

Main GCSE examinations taken

Secondary schools performance tables June checking exercise takes place – this allows state-funded schools to check the pupils we have recorded as being on their roll

August

The Joint Council for Qualifications (JCQ) collects results data from the awarding bodies

JCQ publish GCSE results in the third week in August

The department's contractor receives results from the awarding bodies (data is collected throughout the year but the majority is collected in the summer)

September

Department receives provisional data from the contractor

Secondary schools performance tables checking exercise takes place

October

Provisional SFR containing headline figures published alongside the provisional performance tables (published on 13 October in 2016 – around four weeks after the department receives the unamended data from the contractor)

Scrutiny of amendment requests following checking exercise

November and December

Department receives three sets of revised data which includes further late results and later re-marks received from awarding organisations

January

Revised SFR published alongside the secondary school performance tables. Figures are also broken down by pupil characteristics. The performance tables include full breakdowns of school level data.

Errata period commences for schools to request additional amendments to data

February

Scrutiny of amendment requests made during the errata period

March

Department receives final data from the contractor and updates the performance tables and downloadable data file. The revised SFR is not updated; however the final data will be used to update any time series in the following year's SFR

Punctuality refers to the time lag between the actual and planned dates of publication.

The proposed month of publication is announced on gov.uk at least twelve months in advance and precise dates are announced in the same place at least four weeks prior to publication. In the unlikely event of a change to the pre-announced release schedule, the change and the reasons for it would be announced.

How the output is created

Data on pupils' attainment is collected from awarding bodies via the department's contractor. This information is linked with information on pupil characteristics taken from the [school census](#) and information on pupils' prior attainment. This data is used to produce the provisional SFR and provisional performance tables.

The data is checked with schools during the performance tables checking exercise. The revised pupil attainment data is then linked again with information on pupil characteristics and prior attainment to produce the revised/final datasets and all derived variables recalculated. This data is published in the revised SFR and the performance tables. Following publication of the performance tables, there is a short errata process where schools can inform us of any additional changes that should be made to the data. Following this process, the performance tables data is finalised and the performance tables website updated. The final data is used to update the time series in the following year's SFR.

A large number of variables are derived for publication in the key stage 4 SFR and in the secondary school performance tables. Annex B contains a summary of the key variables used in the publications.

Data added from other sources

Pupil characteristics

Information on pupil characteristics is taken from the school census. Details will be provided when 2016 breakdowns by characteristics are published in January 2017.

School characteristics

Information on school characteristics is taken from Edubase. Annex C contains further information on the school characteristics used in the publication.

3. Accuracy

Accuracy describes the closeness between an estimated result and the (unknown) true value.

Data coverage

The target population for the key stage 4 data collection is all pupils who are at the end of key stage 4, typically those pupils starting the academic year aged 15.

We produce a provisional SFR in October based on the provisional data covering headline national and local authority information, alongside the provisional performance tables. Amendments made during the June checking exercise (for state-funded schools only) are reflected in the provisional SFR and provisional performance tables. The provisional SFR does not contain any characteristics breakdowns (other than gender) as these are more subject to change, particularly at local authority level.

We update this SFR with revised data early the following calendar year when the full breakdown of school level information is published in the performance tables. During the September checking exercise schools are required to check the data and notify the department of any pupils that are included in their school in error, or of any missing pupils. Schools can also notify us of any other errors in the data such as errors in matching prior attainment results. Any changes requested are validated to ensure that they comply with the rules before being accepted. They are also able to apply for pupils to be removed from their figures, if they have recently arrived from overseas and their first language is not English. We allow the removal of these pupils from the school and local authority figures as they can have an impact on some schools figures (since some schools have significant numbers of such pupils). However, we continue to include these pupils in the national figures so that they reflect the attainment of all pupils. Schools can also apply for pupils to be removed if a pupil has been admitted following a permanent exclusion from another school, if the pupil is not at the end of key stage 4, if the pupil has permanently left England, the pupil has left the school before exams or the pupil is deceased. Schools cannot be accountable for these pupils and therefore we allow the removal of them so they are not included in their performance measures.

Schools cannot remove pupils in certain circumstances, for example: pupil has been excluded from school after the January school census; the pupil left to go to another school in England; or the pupil is a persistent non-attender.

Following the checking exercise the revised data is produced. This includes changes requested by schools during the checking exercise, changes resulting from any successful marking reviews and any late results. The data is then published in the revised key stage 4 SFR and in the secondary school performance tables.

Characteristic breakdowns such as ethnicity, special educational needs and first language will be published alongside the revised national and local authority figures in the same SFR.

There are a small number of further changes to the data following publication of the performance tables. These changes are validated in the same way as those which are received during the checking exercise. The performance tables (national, local authority and school level figures) are updated with these changes but the SFR is not updated because the extent of the changes does not usually affect the national or local authority figures. However the final data will be used to update any time series in the following year's statistical first release.

Measurement error

Measurement error is the difference between the actual value of a quantity and the value obtained by a measurement. Repeating the measurement will reduce the random error caused by the accuracy of the measuring instrument but not any systemic error caused by incorrect calibration of the measuring instrument.

This section describes the administration and marking of key stage 4 examinations, the re-marking process and the regulation of qualifications, all of which can affect the accuracy of key stage 4 attainment measures.

Clear guidance is provided to schools regarding the administration of the GCSE papers, including instructions for keeping the exam materials secure prior to the exams and storage of completed papers until they are collected for marking.

The exam papers are externally marked by the awarding bodies to ensure that marking is consistent between schools.

After marking, results are returned to schools. If schools have concerns over the marking of an exam paper, they may request for it to be re-marked. Outcomes of appeals are not reflected in the provisional data but are included in the revised data.

Further information on the general regulations for schools and how exams are conducted/marked can be found on the JCQ website: [Joint Council for Qualifications \(JCQ\) website](#).

Ofqual sets the standards and rules that awarding bodies need to meet when they design, deliver and award regulated qualifications. They monitor awarding bodies and qualifications to make sure that standards are maintained. They are a risk-based regulator and concentrate their resources to where they are most needed. For example, they may discover that an awarding body's processes need updating or that there are risks connected to a qualification taken by thousands of students every year. Further guidance on the role of Ofqual can be found at: [How Ofqual regulate](#).

Further checks are done during the checking exercise and these are outlined in the [data coverage](#) section above.

Validation and quality assurance of source data

Once schools have completed their key stage 4 exams they are required to send their exam materials and attendance registers to the awarding bodies for external marking and data capture.

Key stage 4 results are made available to schools on results day: in 2016 this was 25 August. This data is then passed from the awarding bodies to the department's contractor who carries out checks on the data (eg checking the validity of Qualification Numbers). Depending on the volume and nature of discrepancies, the contractor reports these back to awarding organisations for review. Once these checks are completed the data is uploaded onto the contractor's main database and further checks are carried out.

After the contractor has finished processing the data, it is then passed onto the department for use in the SFRs and performance tables.

Data Processing

Key stage 4 data received from awarding bodies are combined with pupil characteristics from the school census and prior attainment by the department's contractor. Records are matched, using identifiers such as surname, forename, date of birth, UPN, gender and postcode. This successfully matches around 98 per cent of results.

At every stage in the data cycle, the department checks all calculations used in the production of the figures. The department carries out checks on the data to ensure that the files produced by the contractor comply with the specified format and contain the correct information. All indicators at school level, local authority level and national level are re-derived to ensure the contractor's systems are programmed correctly.

The entire process is subject to a 'dry run' during the summer. This involves producing a dummy dataset, from the previous year's dataset, which conforms to how the current year's data will be supplied (eg if new qualifications have been introduced, then dummy data would be added to last year's data to simulate these). This dummy dataset is used to test the contractor's systems and the department's checking processes. This allows potential problems to be resolved prior to the receipt of the live data.

Statistical first release production

All data in the SFR tables are produced by one person and quality assured by another. Any discrepancies in the data produced are discussed and resolved prior to publication. Examples of quality assurance are provided in the box below.

Examples of further quality assurance

Comparisons with previous year's figures to identify any large unexpected changes

Comparisons with provisional data to identify any large changes (revised/final data only)

Check totals are consistent across tables

Check patterns in the data (eg expected differences between subjects, high/low performing local authorities)

Check figures against those produced for the performance tables

4. Reliability

The extent to which a figure changes over different versions of the same data.

The key stage 4 data can change between provisional and revised data as the revised data contains:

- outcomes of the appeals process where schools ask for reviews for one or more of their pupils in the belief that a clerical error has been made or the mark scheme has not been correctly applied
- late results – where results were received after the data was provided in August to the contractor by awarding organisations
- changes resulting from requests from schools to remove pupils who have recently arrived from overseas, have been admitted following a permanent exclusion for another school, if the pupil is not

at the end of key stage 4, if the pupil has permanently left England, the pupil has left the school before exams or the pupil is deceased

The national figures usually change by no more than plus or minus one percentage point or one decimal point between provisional, revised and final data. Table 1 shows the change in some key figures at national level in 2014/15. Changes in the local authority and school level figures can be slightly larger. Figures do not typically change at a national level between revised and final data and changes in local authority and school level data are small.

Table 1: Change in national key stage 4 data, 2014/15

| All schools | 2014/15 | | |
|--|-------------|---------|-------|
| | Provisional | Revised | Final |
| Average Attainment 8 score per pupil | 47.0 | 47.4 | 47.4 |
| Percentage of pupils achieving A* to C in both English and mathematics GCSEs | 54.9 | 55.8 | 55.8 |
| Percentage of pupils achieving the English Baccalaureate | 22.5 | 22.9 | 22.9 |
| Percentage of pupils entering the English Baccalaureate | 36.0 | 36.2 | 36.2 |

A longer time series showing change in the previous headline measure, 5+ A* to C including English and maths, is shown below.

Table 2: Change in national key stage 4 data

| All schools | | 2011/12 | 2012/13 | 2013/14 | 2014/15 |
|---|-------------|---------|---------|---------|---------|
| Percentage of pupils achieving 5 or more GCSEs or equivalent at grades A* to C (including English and maths): | Provisional | 58.6 | 58.6 | 52.6 | 52.8 |
| | Revised | 59.4 | 59.2 | 53.4 | 53.8 |
| | Final | 59.4 | 59.2 | 53.4 | 53.8 |

In October 2016 provisional results will be published at school level, for state-funded schools only, so that parents can use the latest performance data to inform their choice of secondary school for 2017/18.

For the vast majority of state-funded schools, provisional data is a reasonably accurate reflection of revised data.

Table 3 shows the percentage of schools whose provisional results were very close to their revised published results in 2015. For state-funded mainstream schools, this was above 90 per cent across each of the headline measures.

Table 3: Difference between provisional and revised data in 2015

| Measure | Difference between provisional and revised data in 2015 | Percentage of state-funded schools ¹ | Percentage of independent schools |
|--|---|---|-----------------------------------|
| Average Progress 8 score ¹ | within 0.05 decimal points | 91% | N/A |
| Average Attainment 8 score per pupil | within 1 point | 93% | 71% |
| Percentage of pupils achieving A* to C in both English and mathematics GCSEs | within 2 percentage points | 92% | 79% |
| Percentage of pupils achieving the English Baccalaureate | within 1 percentage point | 96% | 86% |
| Percentage of pupils entering the English Baccalaureate | within 1 percentage point | 99% | 87% |

1. Average Progress 8 score is provided for state-funded mainstream schools only.

Provisional results have not been released for independent schools because the level of change is higher (as shown in table 3). This is mainly because independent schools are not included in the June checking exercise and are therefore more reliant on the September checking exercise for making changes to their pupil cohort.

5. Accessibility

Accessibility is the ease with which users are able to access the data. It also relates to the format(s) in which the data are available and the availability of supporting information.

The SFR text is published in pdf format so that it is accessible to all users irrespective of their choice of software. Care is also taken to ensure that the document meets accessibility guidelines. Key figures are highlighted in the SFR text which draws out the key messages such as changes over time and differences between groups of pupils. Small tables or charts illustrating key figures are also included in the text.

Each SFR is accompanied by formatted Excel tables with clear titles which allow general users to find more detail than can be provided in the SFR text. Any important limitations or inconsistencies in the data are mentioned in footnotes so that users do not have to refer to the text or this document. Where there are large numbers of tables, these are split into manageable sections (eg national tables in one file, local authority tables in a separate file) so that users do not need to download larger files than necessary for their needs.

The performance tables website provides a number of ways of searching for schools of interest (eg by name of school, by town, within x miles of a postcode or all schools within a local authority) and presents

the data in a series of web pages showing different aspects of the data. The selected schools are shown in alphabetical order by default but can be sorted by any measure if the user requires ranked data.

Key stage 4 information also forms part of the national pupil database (NPD) which is an education dataset holding a wide range of information about pupils and students and has provided invaluable evidence on educational performance to inform independent research, as well as studies commissioned by the department. Any user wishing to conduct more detailed research or analysis may request an anonymised pupil level extract of the [national pupil database](#) (NPD).

Disclosure Control

The Code of Practice for Official Statistics requires us to take reasonable steps to ensure that our published or disseminated statistics protect confidentiality.

In the statistical first releases, an 'x' indicates that a figure has been suppressed due to small numbers. Values of 1 or 2 or a percentage based on 1 or 2 pupils who achieved a particular level are suppressed. Percentages based on 1 or 2 pupils who did not achieve a particular level are suppressed in circumstances where non-suppression would lead to disclosure of pupils. Some additional figures have been suppressed to prevent the possibility of a suppressed figure being revealed. This suppression is consistent with the [departmental statistical policy on confidentiality](#).

In the school level data, any figures relating to a cohort of 5 pupils or fewer will be suppressed. This applies to sub-groups of pupils as well as the whole cohort; for example, if there were 5 boys and 3 girls in a school, we would not publish attainment for boys or girls separately but would publish attainment for all pupils (as this is based on 8 pupils).

6. Coherence and comparability

Coherence is the degree to which the statistical processes, by which two or more outputs are generated, use the same concepts and harmonised methods. Comparability is the degree to which data can be compared over time, region or other domain.

We use the same methodology to produce the data within our SFRs and the performance tables. We also use a dataset produced at the same time for the performance tables and the provisional and revised SFRs. As a result, the national and local authority figures included in both the provisional and revised SFRs and the performance tables will match when comparing measures with the same definition.

There have been a number of changes to key stage 4 data which can make comparisons over time difficult. These changes are listed in annex A. Where time series are shown in the tables, any discontinuities will be indicated in the tables by the use of a dotted line and footnotes will be included to explain the reason for the discontinuity. Where possible (for example, when methodology rather than test structures change), figures for previous years will be recalculated using the current methodology following major changes in methodology.

Care should be taken when comparing results between years. This is because changes to methodologies means that different rules have been applied meaning that direct comparisons are not always possible.

Annex A: Timeline of changes in key stage 4 attainment

| | |
|---------|--|
| 2009/10 | <p>Publish per cent attaining the new English Baccalaureate.</p> <p>Publish per cent attaining the “Basics” (A*-C English and maths).</p> <p>Count accredited International GCSEs (and their precursors) for first time¹</p> |
| 2010/11 | <p>GCSE only measures introduced to performance tables.</p> <p>AS levels counted in English Baccalaureate</p> |
| 2011/12 | <p>First cohort to know of English Baccalaureate measure when making course choices</p> |
| 2012/13 | <p>New biology, chemistry, physics and additional science GCSEs.</p> <p>Marks awarded for spelling, punctuation and grammar in English literature, history, geography and religious studies exams</p> |
| 2013/14 | <p>Wolf Review recommendations come into force in performance tables:</p> <ul style="list-style-type: none">• only Wolf-approved qualifications counted• each equivalent of one GCSE only• no more than two non-GCSE qualifications• new discounting rules <p>Only the first attempt at a qualification counts in the performance tables and SFR in English Baccalaureate subjects.</p> <p>GCSEs no longer unitised (modular) but linear.</p> <p>New GCSE geography exam.</p> <p>Unregulated International GCSEs no longer counted¹</p> <p>Further information on the Wolf Review can be found here: www.gov.uk/government/publications/review-of-vocational-education-the-wolf-report</p> <p>Further guidance on discounting and early entry rules can be found in the RAISEonline document library.</p> |
| 2014/15 | <p>Early entry policy expanded to include all subjects.</p> <p>Schools had the option to adopt a new accountability system a year early in 2015. It included two new headline measures: Attainment 8 and Progress 8. 327 schools chose to adopt the new accountability system early and for these schools Attainment 8 scores were published in the 2015 performance tables.</p> <p>AS level computer science now contributes towards the EBacc science pillar.</p> <p>Provisional performance tables published for the first time.</p> <p>Key stage 2 attainment data was affected by the 2010 boycott and Single Level Tests pilot - see the 2015 quality and methodology document for further details.</p> |
| 2015/16 | <p>New headline measures from 2016 onwards include:</p> <ul style="list-style-type: none">• Progress 8• Attainment 8• Percentage of pupils achieving the threshold in English and maths• Percentage of pupils achieving the English Baccalaureate• Percentage of pupils entering the English Baccalaureate <p>The English requirement for the threshold measure on percentage of pupils</p> |

achieving English and maths, and the English requirement for the English Baccalaureate will change.

The point score scale for performance table measures will change from the 16-58 scale used in 2015 and earlier to a 1-8 scale

Expected standards for schools have changed (see annex D for further details)

1. In 2010, new regulated versions of International GCSEs were approved. This allowed them to be taken in state-funded schools and included in the performance measures for the first time. At the same time, any results achieved by pupils in the legacy unregulated IGCSEs in these subjects were also valid for inclusion in performance indicators.

The period for inclusion of the unregulated legacy International GCSEs in measures was set for two years, commencing from the point at which the replacement regulated certificates became available for teaching, with the expectation being that pupils should be moved to the regulated certificates after this period. In independent schools, pupils have continued to be entered for unregulated International GCSEs that do not count in performance measures and they have not been moved across to the regulated certificate versions.

Annex B: Derived variables

A large number of variables are derived for publication in the key stage 4 SFRs and in the secondary school performance tables. The performance measures contained within the SFR are based on the same rules used to produce the measures shown in the secondary school performance tables.

A full list of the derived variables that will be published in the provisional performance tables can be found in the [2016 performance tables statement of intent](#).

The table below summarises key variables used in the publications:

| | |
|-----------------------------------|---|
| Total pupils | Number of pupils at the end of key stage 4 |
| Eligible pupils | Used to identify the pupils to be included in school, local authority and national level calculations |
| Progress 8 | <p>Progress 8 aims to capture the progress a pupil makes from the end of primary school to the end of secondary school. It is a type of value added measure, which means that pupils' results are compared to the actual achievements of other pupils with the same prior attainment.</p> <p>School scores should be interpreted alongside their associated confidence intervals. If the lower bound of the school's confidence interval is greater than zero, it can be interpreted as meaning that the school has achieved greater than average progress compared to pupils nationally, and vice versa if the upper bound is negative.</p> <p>Further guidance can be found in the Progress 8 and Attainment 8 guidance</p> |
| Attainment 8 | <p>Attainment 8 scores form the basis of Progress 8. It will measure the achievement of a pupil across 8 subjects including maths (double weighted) and English (double weighted), 3 further qualifications that count in the English Baccalaureate (EBacc) measure and 3 further qualifications that can be GCSE qualifications (including EBacc subjects) or any other non-GCSE qualifications on the DfE approved list.</p> <p>To calculate a pupils' Progress 8 score, their Attainment 8 score is compared with the average Attainment 8 score of all pupils nationally who had a similar starting point (or 'prior attainment')</p> |
| A* to C in both English and maths | Number/percentage of pupils achieving grades at A* to C in both English and maths GCSEs. |
| English Baccalaureate (EBacc) | <p>Percentage of pupils entering and achieving a core of selected academic subjects which are English, maths, sciences, a humanities subject (history or geography) and a language.</p> <p>A list qualifications included in the English Baccalaureate is available at EBacc List</p> |

Low/middle/high prior attainment

Pupils are grouped based on their performance in English and maths at key stage 2. Indicators are shown for:

Low attainers = those below the expected level (level 4) at key stage 2

Middle attainers = those at the expected level (level 4) at key stage 2

High attainers = those above the expected level (level 4) at key stage 2

Further guidance can be found on:

[Defining high, middle and low attainers](#)

Annex C: Further detail on school characteristics

This annex provides further details of school characteristics taken from [Edubase](#).

School Admission Basis

The school admission basis is taken from [Edubase](#) and is self-declared by the school. They are given as at 11 September at the start of the academic year and are defined as follows:

| | |
|-----------------------|--|
| Comprehensive schools | Takes all pupils, usually regardless of their ability, aptitude or whether they have been selected for a place at a selective school |
| Modern schools | Takes pupils regardless of their ability or aptitude, including those who have not been selected for a place at a local selective school |
| Selective schools | Admits pupils wholly or mainly with reference to ability. These schools were formally designated as grammar schools |

School Type and groupings

The school types are taken from [Edubase](#) and are given as at 11 September at the start of the academic year. They are defined as follows:

School types

| | |
|------------------------------------|---|
| Academy sponsor led | Sponsored academies are all-ability, state-funded schools established and managed by sponsors from a wide range of backgrounds, including high performing schools and colleges, universities, individual philanthropists, businesses, the voluntary sector, and faith communities |
| Academy converter | Schools that have chosen through Governing Body Resolution and application to the Secretary of State to become an academy under the Academies Act 2010 |
| Free school | Free schools are all-ability state-funded schools set up in response to what local people say they want and need in order to improve education for children in their community. They have the same legal requirements as academies and enjoy the same freedoms and flexibilities |
| University technical college (UTC) | UTCs are all-ability and mixed sex state-funded schools, independent of local authorities. They are not extensions of or conversions from existing provision, but new 14 to 19 academies, typically with 500 to 800 pupils. UTCs specialise in subjects that need modern, technical, industry-standard equipment, such as engineering and construction, and teach these disciplines alongside business skills and a broad, general education. Pupils integrate academic study with practical learning, studying core GCSEs alongside technical qualifications |

| | |
|---|---|
| Studio school | Studio schools are all-ability and mixed sex state-funded schools, independent of local authorities. They are an innovative new model of educational provision, delivering mainstream qualifications through practical project-based learning. They are not extensions or conversions from existing provision, but are new 14 to 19 academies, typically with around 300 pupils |
| City technology college (CTC) | Independent all-ability, non-fee-paying schools offering pupils the opportunity to study a curriculum geared, with the help of private sector sponsors, towards the world of work. There are currently only three CTCs as most converted to sponsor led academies a few years ago |
| Further education college with provision for 14 to 16 year olds | General further education colleges and sixth-form colleges with provision for 14 to 16 year olds who wish to study high-quality vocational qualifications alongside general qualifications including English and maths within the key stage 4 curriculum. 2015 was the first year in which colleges have pupils at the end of key stage 4 |
| Pupil referral unit (PRU) | A PRU is established and maintained by a local authority which is specially organised to provide education for children who are excluded, sick or otherwise unable to attend mainstream school and is not a special or other type of school |
| Alternative Provision (AP) | Alternative provision takes place when a local authority takes direct responsibility for the education of a young person who is unable to attend a mainstream school. Common reasons for a young person receiving alternative provision include exclusion, medical needs or school refusal |
| Non-maintained special schools | A school which has been approved as a special school and is not maintained by a LA |
| Independent school | Any school which provides full time education for 5 or more pupils of compulsory school age, which is not state-funded or a non-state-funded special school |
| Independent special schools | Approved by the Secretary of State for Education. They are run on a not-for-profit basis by charitable trusts and normally cater for children with severe and/or low incidence special educational needs. This group includes non-maintained special schools |
| State-funded mainstream schools | Includes local authority maintained mainstream schools, academies, free schools, city technology colleges (excluding all special schools, pupil referral units, alternative provision and independent schools) |
| LA maintained school | Schools fully or partially under local authority control that are state-funded, mainly by the Dedicated Schools Grant. These include community schools, foundation schools, voluntary aided school and voluntary controlled schools and also local authority maintained special schools |

| | |
|------------------------------|---|
| State-funded special schools | Includes local authority maintained special schools, academy sponsored special schools, academy special schools and special free schools |
| State-funded school | Includes local authority maintained schools, academies, free schools, city technology colleges and state-funded special schools (excluding hospital schools, pupil referral units, alternative provision and independent schools) |
| All independent | Includes independent schools, independent special schools and non-maintained special schools |

Religious character

Religious character is taken from Edubase and is the legal designation of each school.

Annex D: Floor standard and coasting schools

Floor standard

The floor standard is the minimum standard for pupil attainment and/or progress that the government expects schools to meet.

In 2016 a school will be below the floor standard if its Progress 8 score is below -0.5, and the upper band of the 95% confidence interval is below zero. If a school's performance falls below this floor standard, then the school may come under scrutiny through inspection. Confidence intervals are explained in more detail in the [Progress 8 and Attainment 8 guidance](#).

Floor standards do not apply to special schools, independent schools, pupil referral units, alternative provision or hospital schools. Schools will be excluded from a Progress 8 floor standard in a particular year where they have fewer than 6 pupils at the end of key stage 4, or where less than 50% of pupils have key stage 2 assessments that can be used as prior attainment in the calculations of Progress 8.

Coasting schools

The coasting schools definition considers schools' performance over a three year period. A school must fall below the defined standard in each of the three years to be classed as coasting. Coasting schools are those that consistently fail to ensure pupils reach their potential.

In 2016, the definition will apply to schools which:

- in 2014 and 2015 had fewer than 60% of children achieving 5+ A* to C GCSEs including English and maths, and below the median percentage of pupils making expected progress in English and mathematics; and
- in 2016 fall below a level set against the new Progress 8 measure. This level will be announced in the autumn once the coasting regulations have been approved by Parliament.

Annex E: Glossary

| | |
|--------------------------------|--|
| Attainment 8 score | The achievement of a pupils across 8 subjects including maths (double weighted) and English (double weighted), 3 further qualifications that count in the English Baccalaureate (EBacc) measure and 3 further qualifications that can be GCSE qualifications (including EBacc subjects) or any other non-GCSE qualifications on the DfE approved list . |
| Checking exercise | In September each year, schools are asked to check the provisional KS4 data that we hold for their school during the performance tables checking exercise. The data is uploaded to a secure website and schools can inform us via this website of any pupils that are included in their school in error, or of any missing pupils. They can also notify us of any other errors in the data such as errors in matching prior attainment results and apply for pupils to be discounted from their figures, if they have recently arrived from overseas and their first language is not English. Any changes requested are validated to ensure that they comply with the rules before being accepted. |
| Designated religious character | An Order made by the Secretary of State for Education under section 69(3) of the School Standards and Framework Act 1998(a), as applied in relation to independent schools by section 124B(1)(b) of that Act. |
| English Baccalaureate (EBacc) | A school performance measure. It allows people to see how many pupils get a grade C or above in the core academic subjects at key stage 4. |
| Edubase | EduBase is a register of educational establishments in England and Wales, maintained by the department. It provides information on establishments providing compulsory, higher and further education. The information included is provided from the establishments themselves and also from LAs and teams within the department. |
| Floor Standard | The floor standard is the minimum standard for pupil attainment and/or progress that the Government expects schools to meet. In 2016 a school will be below the floor standard if its Progress 8 score is below -0.5, and the upper band of the 95% confidence interval is below zero. If a school's performance falls below this floor standard, then the school may come under scrutiny through inspection. Confidence intervals are explained in more detail in the Progress 8 and Attainment 8 guidance. |
| JCQ | Joint Council for Qualifications . A membership organisation comprising the seven largest providers of qualifications in the UK. |
| KS2 | Key stage 2. This covers years 3 to 6 in primary schools. Pupils are normally 10 or 11 years old at the end of key stage 2. |
| KS4 | Key stage 4. This covers years 10 and 11 in secondary schools. Pupils are normally aged 15 years old at the end of key stage 4. |
| LA | Local authority |
| National Pupil Database (NPD) | The NPD contains detailed information about pupils in schools and colleges in England. It includes test and exam results, prior attainment and progression at different key stages and also includes information about pupils' characteristics. |

| | |
|--------------------|--|
| Ofqual | The Office of Qualifications and Examinations Regulation. Regulates qualifications, examinations and assessments in England. |
| Performance tables | <p>Secondary school performance tables are published in October (provisional, state-funded schools only) and January (revised, all schools) each year.</p> <p>Primary school performance tables are published in December and post-16 performance tables are published in January each year. They give information on the achievements of pupils in primary, secondary and 16-18 provision in schools and colleges, and how they compare with other schools and colleges in the Local Authority (LA) area and in England as a whole.</p> |
| Progress 8 score | The progress a pupil makes from the end of primary school to the end of secondary school. It is a type of value added measure, which means that pupils' results are compared to the actual achievements of other pupils with the same prior attainment. As Progress 8 is a relative measure, the average Progress 8 score for all pupils nationally is zero, and it is therefore not published in the key stage 4 SFR. |
| Provisional data | Provisional KS4 data is published in October of each year. The provisional data is subject to change though the impact on national data is usually minimal. |
| Reviews | If schools believe that the mark scheme has not been correctly applied or a clerical error has been made, they may ask for a paper to be re-marked. This may result in a change to the mark or scaled score awarded. |
| Revised data | Revised KS4 data is published in January each year. This updates the national and local authority information published in the provisional SFR and also includes school level information in the performance tables. |
| School census | A statutory census which takes place during the autumn, spring, and summer terms. |
| SFR | Statistical First Release. All of the department's SFRs are published on gov.uk . |
| Threshold measures | 'Threshold measures' refer to any figures where we show the percentage of pupils who have achieved a particular standard in a subject or combination of subjects, for example, the percentage achieving A*-C in English and maths. |
