

Instructions for Use

KEYMAT Loading Certificate - MOD Form 705(AAC)(KEYMAT)

1. MOD Form 705(AAC)(KEYMAT) is used to record and certify the entry and expiry Date, Time, Group (DTG) of equipment codes on the aircraft.
2. The operative is to enter the serial No of the Crypto equipment being filled, in the relevant equipment box.
3. The operative is to enter the expiry DTG of the code loaded, in the relevant equipment box.
4. Unused DTG boxes are to be scored through.
5. The operative entering the code is to print their name and DTG.
6. Equipments whose codes are still current should be brought forward as required to the current certificate.
7. The recording of any additional codes entered should be annotated on the current certificate.
8. Codes that are deleted before their expiry date, are to have their DTG scored through.
