- CCS has got it covered

**transparent
costs**

**wide
range of
suppliers**

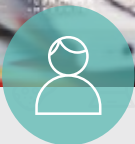

**great
choice**

**SME
friendly**

Why work with us

If you're a public sector buyer our Technology Products 2 framework is the perfect solution for all your ICT commodity requirements. Whatever your technology needs we're confident that we have got it covered.

we select the best suppliers and ensure they're able to meet your needs

we're completely transparent about all our costs and invoicing – there are no hidden extras or nasty surprises

we manage all our suppliers, so you can rest assured that you'll always get access to the best deals at the best prices

What's on offer

The Technology Products 2 framework agreement offers you **6 routes** to place your business. Find out which one best meets your needs:

1 Hardware

Your route to the best deals for buying products like laptops, computer hardware, tablets and telephones. Limited software can be included if already installed on the associated hardware (e.g. operating systems, bundled utility software or customer-supplied image loads where the software is already separately-licenced).

2 Software

This option is right for you if you want to purchase software for your devices and IT infrastructure, including support and maintenance for that software. Hardware is excluded from this Lot.

3 Combined Hardware and software

This route is for customers whose requirement includes combined elements of hardware and software and want to place a single order with one supplier.

4 Information Assured Products

Security is paramount for all public sector organisations, so if you want to buy products with a security wrap or dispose of information or assets safely and securely we can help. For peace of mind, we only work with suppliers that are compliant with relevant CESG standards.

5 Volume Hardware Requirements

If you have a large requirement or need tailor made equipment then this option enables you to go straight to the manufacturer of the hardware. This Lot supports aggregation to increase demand volumes and can mean significant price savings.

6 Catalogue

Online dynamic catalogue offering an extensive range of commoditised technology hardware and software products sourced at competitive prices through a compliant direct award route.
