09 November 2016

Key messages

During week 44 there were further increases in ED attendances for bronchitis/bronchiolitis, particularly in infants aged <1 year (figures 10 and 11), in line with laboratory reports for respiratory syncytial virus (RSV).

A Cold Watch System operates in England from 1 November to 31 March each year. As part of the Public Health England Cold Weather Plan for England the PHE Real-time Syndromic Surveillance team will be monitoring the impact of cold weather on syndromic surveillance data during this period.

Cold weather alert level (current reporting week): Level 1 Winter Preparedness and Action

http://www.metoffice.gov.uk/weather/uk/coldweatheralert/

Diagnostic indicators at a glance:

Further details on the syndromic indicators reported can be found on page 9.

Total 52,596 37,143 70.6 40,890 77.7 (max)* 35

*Data from the new EDs will be presented in charts following a 14 day data validation.
1: Total attendances.
Daily number of total attendances recorded across the EDSSS network.

2: Daily attendances by age: Numbers.
Daily number of total attendances, by age group, recorded across the EDSSS network.

3: Daily attendances by age: Percentages.
Daily percentage of total attendances by age group, recorded across the EDSSS network.
4: Triage category: severity of illness.
Triage category is assigned according to the clinical priority of each presenting patient.
Includes 33/35 EDs.

5: Triage category severity ratio.
The ratio of patients classified as very urgent or urgent to those classified as standard or non-urgent.
Includes 33/35 EDs.

6: Triage presentation.
Triage presentation indicators are based on the triage descriptors recorded in each ED. Data are displayed as the number of attendances recorded with triage information.
Includes 21/35 EDs which report standard terms, not using free text.
7: Respiratory.
Daily percentage of all attendances recorded as respiratory attendances across the EDSSS network.
Includes 35/35 EDs.

8: Acute Respiratory Infection.
Daily percentage of all attendances recorded as acute respiratory infection attendances across the EDSSS network.
Includes 20/35 EDs.

9: Acute Respiratory Infection by age group.
7 day moving average of ARI attendances presented as a proportion of the attendances within each age group.
Includes 20/35 EDs.
10: Bronchitis/Bronchiolitis.
Daily percentage of all attendances recorded as bronchitis/bronchiolitis attendances across the EDSSS network.
Includes 20/35 EDs.

11: Bronchitis/Bronchiolitis by age group
7 day moving average of bronchitis/bronchiolitis attendances presented as a proportion of the attendances within each age group.
Includes 20/35 EDs.

12: Influenza-like Illness.
Daily percentage of all attendances recorded as influenza-like illness attendances across the EDSSS network.
Includes 20/35 EDs.
13: Pneumonia.
Daily percentage of all attendances recorded as pneumonia attendances across the EDSSS network.

Includes 20/35 EDs.

14: Pneumonia by age group.
7 day moving average of pneumonia attendances presented as a proportion of the attendances within each age group.

Includes 20/35 EDs.

Intentionally left blank.
15: Asthma/Wheeze/ Difficulty Breathing.
Daily percentage of all attendances recorded as asthma/wheeze/ difficulty breathing attendances across the EDSSS network.
Includes 20/35 EDs.

16: Asthma/Wheeze/ Difficulty Breathing by age group.
7 day moving average of asthma/wheeze/ difficulty breathing attendances presented as a proportion of the attendances within each age group.
Includes 20/35 EDs.

Intentionally left blank
17: Gastrointestinal.
Daily percentage of all attendances recorded as gastrointestinal attendances across the EDSSS network.
Includes 35/35 EDs.

18: Gastroenteritis
Daily percentage of all attendances recorded as gastroenteritis attendances across the EDSSS network.
Includes 20/35 EDs.

19: Gastroenteritis by age group.
7 day moving average of gastroenteritis attendances presented as a proportion of the attendances within each age group.
Includes 20/35 EDs.
20: Cardiac.
Daily percentage of all attendances recorded as cardiac attendances across the EDSSS network.

Includes 35/35 EDs.

21: Myocardial Ischaemia.
Daily percentage of all attendances recorded as myocardial ischaemia attendances across the EDSSS network.

Includes 20/35 EDs.

Intentionally left blank
During July/August 2016 there were changes in clinical working practices at selected EDs which may impact on coding, and therefore the graphs/data presented in this report. Where appropriate, caveats will be included.

Participating Hospital Emergency Departments (EDs) report to EDSSS through the automated daily transfer of anonymised data to PHE, for analysis and interpretation by the PHE Real-time Syndromic Surveillance Team (ReSST).

Several EDSSS contributing departments are now using the new RCEM Unified Diagnostic Dataset (UDDA) to record diagnoses. Where UDDA is in place the ICD-10 or Snomed CT code is extracted for EDSSS reporting.

The syndromic indicators presented in this bulletin are based on the WHO recommendations for syndromes to be used for mass gatherings. Each code system has been mapped to the syndromes described:

**Level 1:** Broad, generic indicator, available using all ED coding systems reported.
- **Respiratory:** All respiratory diseases and conditions (infectious and non-infectious).
  - **Acute Respiratory Infections (ARI):** All acute infectious respiratory diseases.
  - **Asthma/Wheeze/Difficulty Breathing:** As indicated by title, including dyspnoea & stridor.
  - **Bronchitis/ Bronchiolitis:** As indicated by title (excluding ‘chronic’).
  - **Influenza-like Illness (ILI):** As indicated by title.
  - **Pneumonia:** As indicated by title.

**Level 2:** More specific indicator, available from EDs using ICD-10 and Snomed CT.
- **Cardiac:** All cardiac conditions (including ‘chest pain’).
  - **Myocardial Ischaemia:** All Ischaemic heart disease.

**Level 3:** Very specific indicator, available from EDs using ICD-10 and Snomed CT.
- **Gastrointestinal:** All gastrointestinal diseases and conditions (infectious and non infectious).
  - **Gastroenteritis:** All infectious gastrointestinal diseases.

**Other (chart only presented when a public health need):**
- **Meningitis:** All cause meningitis (exc. meningococcal disease with no mention of meningitis).
  - **Heat/ sunstroke:** As indicated by title.

Details on diagnosis are not consistently recorded for all ED attendances and the levels of attendances coded vary considerably between each ED.

Where the diagnosis codes used in an individual ED cannot be matched to level 2 and 3 syndromic indicators, the ED is excluded from the analysis of those indicators.

If you are interested in joining the EDSSS please contact ReSST using the details below.

We are grateful to the clinicians in each ED and other staff within each Trust for their help and continued involvement in the EDSSS.

We thank L2S2 Ltd for undertaking the daily extraction and transfer of anonymised attendance data from all participating EDs.

We thank EMIS Health for facilitating data extraction at the relevant EDSSS sites.

---

**Notes and caveats:**

- Weekends and Bank holidays are marked by vertical grey lines (bank holidays darker).
- The entry of each new ED is marked by a vertical red line.
- A new site is not included in charts until it has reported a minimum of 14 days.
- A 7 day moving average is overlaid on the daily data reported in each chart, unless specified.
- Where the percentage attendances related to an individual syndromic indicator is given, the denominator used is the total number of attendances with a diagnosis code recorded.
- Baselines represent seasonally expected levels of activity and are constructed from historical data. Furthermore, they take into account any known substantial changes in data collection, population coverage or reporting practices. Baselines are refreshed using the latest data on a regular basis.

- During July/August 2016 there were changes in clinical working practices at selected EDs which may impact on coding, and therefore the graphs/data presented in this report. Where appropriate, caveats will be included.
