This publication provides information on the number of Military Personnel in (defined as the strength), joining (intake) and leaving (outflow) the UK Armed Forces. Detail is provided for both the Full-time Armed Forces and Reserves. Further statistics can be found in the Excel tables.

The recent trends in personnel numbers in this report relate to the targets outlined in the Strategic Defence and Security Review (SDSR) 2015 and the Future Reserves 2020 (FR20) programme. Prior to SDSR 2015, publications reported against SDSR 2010, the Three Month Exercise (3ME), Army 2020 and the Future Reserves 2020 (FR20) programme.

Some of the statistics previously published in the following publications can now be found in this release: Monthly, Quarterly and Annual Personnel Reports, UK Reserve Forces and Cadets, Service Personnel Bulletin 2.01 and Service and Civilian Bulletin 2.03.

Key Points and Trends

▲ 196 410 Strength of UK Forces Service Personnel at 1 January 2017
an increase of 380 (0.2 per cent) since 1 January 2016

▼ 139 420 Full-time Trained Strength (RN/RM & RAF) and Full-time Trade Trained Strength (Army) at 1 January 2017
a decrease of 1 850 (1.3 per cent) since 1 January 2016

▲ - 4.2% Deficit against the planned number of personnel needed (Liability) at 1 January 2017
an increase in the deficit from –4.0 per cent as at 1 January 2016

30 960 Strength of the Trained Future Reserves 2020 at 1 January 2017
a comparison is not currently available (for more information see page 9)

▼ 13 440 People joined the UK Regular Armed Forces in the past 12 months (1 January 2015 – 31 December 2016)
a decrease of 440 (3.2 per cent) compared with the previous 12 month period

▼ 15 100 Regular personnel left the Armed Forces in the past 12 months (1 January 2015 – 31 December 2016)
a decrease of 2 130 (12.3 per cent) compared with the previous 12 month period

▼ 6 850 People joined the Future Reserves 2020 in the past 12 months (1 January 2015 – 31 December 2016)
a decrease of 1 710 (20.0 per cent) compared with the previous 12 month period

▲ 5 010 Future Reserves 2020 personnel left the Armed Forces in the past 12 months (1 January 2015 – 31 December 2016)
an increase of 1 040 (26.0 per cent) compared with the previous 12 month period

Published 9 February 2017
Introduction

This publication contains information on the strength, intake and outflow for the UK Armed Forces overall and each of the Services; Royal Navy/Royal Marines (RN/RM), Army and Royal Air Force (RAF) and Applications to each of the Services.

The Ministry of Defence (MOD) announced on 29 June 2016 that it was changing the Army trained, disciplined manpower by changing the definition of trained strength to include those in the Army who have completed Phase 1 training. This affects some Tri-Service totals. This does not affect the Naval Service or the RAF in any way. The MOD held a public consultation on SDSR Resilience: Trained strength definition for the Army and resultant changes to Ministry of Defence Armed Forces personnel statistics, between 11 July and 21 August 2016. A consultation response was published on 7 November 2016. The changes outlined in the consultation and response have been incorporated into this publication from the 1 October 2016 edition onwards. This affects statistics in some of the accompanying Excel tables, specifically tables: 3a, 3e, 5a, 5b, 5c, 5d, 6a, 6b, 7a, 7b and 7c. Terminology has also been updated in Excel tables 3c and 4.

Whilst the total RAF liability has been agreed, the composition is undergoing review. The Officer and Other Rank breakdown is currently marked as provisional for RAF, for 1 April 2016 - 1 January 2017, along with the Tri-Services Officer and Other Ranks breakdown (see page 13 for further information).

Detailed statistics, including unrounded figures, and historic time series can be found in the Excel tables. These include quarterly statistics on the number of Applications to each of the Services, Service and Civilian Personnel, Separated Service (the proportion of personnel breaching harmony guidelines) and Military Salaries. Further historic statistics will be added in due course; in the meantime, historic statistics can be found in the following archived publications: Monthly, Quarterly and Annual Personnel Reports, UK Reserve Forces and Cadets, Service Personnel Bulletin 2.01, Service and Civilian Bulletin 2.03, UK Armed Forces Maternity Report, Diversity Dashboard and Quarterly Location Statistics. The glossary contains definitions of terminology used in this publication.

The next edition of this publication will be published on GOV.UK at 9:30am on 9 March 2017. A calendar of upcoming MOD statistical releases can be found on GOV.UK.
Policy background

The main factors affecting decisions about the size of the Armed Forces required by the MOD to achieve success in its military tasks include:

- An assessment of current and future threats to UK national security;
- The need for contingent / reactive capability – the requirement to be able to respond immediately to domestic or international crisis;
- Current operational and international obligations (e.g. NATO, UN);
- Changes in technology, the introduction of new equipment and restructuring that leads to equipment becoming obsolete or surplus to requirements;
- The need to deliver against the military tasks as efficiently as possible, maintaining a balanced, affordable defence budget.

The Service personnel statistics in this publication are reported against the 2015 Strategic Defence and Security Review (SDSR), released in November 2015. Prior to SDSR 2015, publications reported against the planned Future Force 2020, as set out in the SDSR 2010 which planned to reduce the size of the Armed Forces.

Army Trained Strength

On 29 June 2016, the MOD announced that the Army planned to use Regular and Reserve Phase 1 trained personnel in response to crises within the UK. Following this, the term ‘Trained Strength’ would include all Army personnel trained in the core function of their Service (i.e. those who have completed Phase 1 training). The MOD has consulted on these changes and the resultant impact it will have on this publication and a consultation response were published on 7 October 2016.

From the 1 October 2016 edition onwards, Army personnel who have completed Phase 1 training (basic Service training) but not Phase 2 training (trade training), are considered Trained personnel. This change will enable the Army to meet the SDSR 15 commitment to improve support to UK resilience. The Trained Strength definition for the Royal Navy, RAF, Maritime Reserve and RAF Reserves has not changed, reflecting the requirement for their personnel to complete Phase 2 training to be able to fulfil the core function of their respective Services.

Army personnel who have completed Phase 2 training are now called ‘Trade Trained’. This population aligns with the old definition of trained personnel, therefore maintaining the continuity of the statistical time series and will continue to be counted against the liability and SDSR target for 2020.

Full-time Armed Forces personnel

In order to meet the manpower reduction targets set out in SDSR 2010, the Three Month Exercise (3ME) and Army 2020 (A2020), a redundancy programme coupled with adjusted recruiting (intake) and contract extensions were set. The redundancy programme is now complete.

On 23 November 2015, the Ministry of Defence published the National Security Strategy and Strategic Defence and Security Review 2015. SDSR 2015 outlines plans to uplift the size of the Regular Armed Forces, setting targets for a strength of 82,000 for the Army, and increasing the Royal Navy/Royal Marines and Royal Air Force by a total of 700 personnel. The SDSR 2015 Defence Key Facts booklet announced new targets for 2020 for each of the Services.

Future Reserves 2020 (FR20) Programme

The Future Reserves 2020 (FR20) programme aims to increase the size of the Reserve Forces. Further information on the growth of the Reserves can be found in the Policy Background section of previous Monthly Service Personnel Statistics publications.

As a result of the changes to Army Trained Strength (referred to above) and their impact on the Army Reserve, the MOD released a Written Ministerial Statement containing revised Future Reserves 2020 strength growth profiles on 8 November 2016. Reporting of the growth of the Reserves will be based on strength profiles only.

This statement outlined trained strength targets for FY18/19 as follows: Maritime Reserve 3,100, Army Reserve 30,100 and RAF Reserves 1,860.
UK Service Personnel

UK Service Personnel comprise the total strength of the military personnel employed by the Ministry of Defence (Excel tables, Table1). The current strength of the UK Service Personnel is 196,410, which includes:

- All **UK Regular** personnel and all **Gurkha** personnel (which at 1 January 2017 comprised 77.4 per cent of UK Service Personnel);
- **Volunteer Reserve** personnel (which at 1 January 2017 comprised 18.4 per cent of UK Service Personnel);
- **Other Personnel** including the Serving Regular Reserve, Sponsored Reserve, Military Provost Guard Service, Locally Engaged Personnel and elements of the Full Time Reserve Service (FTRS) (which at 1 January 2017 comprised 4.2 per cent of UK Service Personnel).

The strength of the UK Forces\(^1\) has increased between 1 January 2016 and 1 January 2017, by 0.2 per cent (380 personnel). Over the same period, there has been a decrease in the strength of UK Regular Forces and there have been increases in the Reserves populations. The total strength of the UK Regular Forces has decreased by 1,630 (1.1 per cent) between 1 January 2016 and 1 January 2017. The total strength of the Volunteer Reserve has increased by 1,750 (5.1 per cent) between 1 January 2016 and 1 January 2017.

Source: Defence Statistics (Tri-Service)

1. UK Forces comprises all UK Regular, Gurkha, Volunteer Reserve and Other personnel. The constituents of “Other personnel” are reported towards the top of this page.
Following public announcement and public consultation the definition of Army Trained Strength has changed. From 1 October 2016, UK Regular Forces and Gurkha personnel in the Army who have completed Phase 1 training (basic Service training) but not Phase 2 training (trade training), are now considered Trained personnel. This change will enable the Army to meet the SDSR 15 commitment to improve support to UK resilience. Previously, only personnel who had completed Phase 2 training were considered trained.

This change does not affect the Royal Navy/Royal Marines (RN/RM) or the Royal Air Force (RAF).

As a result of this change, the Full-time Trained Strength (FTTS) includes:

- UK Regular Forces who have passed Phase 1 and Phase 2 training, in the RN/RM & RAF, and UK Regular Forces and Gurkha personnel who have passed Phase 1 training in the Army;
- Those elements of the Full Time Reserve Service (FTRS) who are counted against the liability, for all three Services.

This change was implemented in the 1 October 2016 edition of this publication.

As at 1 January 2017, the Tri-Service Full-time Trained Strength was 143,610. A Service breakdown is shown below in Table 3. Comparisons prior to October 2016 are not available for the Army because it is not possible to identify a split between Phase 1 and Phase 2 training prior to that.

Full-time Trained Strength (RN/RM & RAF) and Full-time Trade Trained Strength (Army) and Liability

The Full-time Trained Strength (FTTS) (RN/RM & RAF) and Full-time Trade Trained Strength (FTTTS) (Army) (which comprises military personnel who have completed ‘Phase 1’ and ‘Phase 2’ training) is counted against the Liability. The difference between the two is measured as either a surplus or deficit. This is one indicator of the Service’s ability to execute military tasks. Other indicators include the surplus / deficit within key trades or in specific Ranks.

- The FTTS (RN/RM & RAF) and FTTTS (Army) is 139,420, a decrease of 1.3 per cent (1,850 personnel) since 1 January 2016.
- The FTTS for the RN/RM is 29,500 and 30,850 for the RAF. The FTTTS is 79,060 for the Army.
- The FTTS (RN/RM & RAF) and FTTTS (Army) comprises: 136,280 Regular personnel (97.8 per cent); 2,590 Gurkhas (1.9 per cent); and 540 Full Time Reserve Service personnel (0.4 per cent) who are filling Regular posts and count against the liability.

Source: Defence Statistics (Tri-Service)

- The current deficit against the Liability is 4.2 per cent for the UK Armed Forces. There is a deficit of 2.2 per cent in the Royal Navy/Royal Marines (RN/RM), 4.3 per cent in the Army and 5.6 per cent in the Royal Air Force (RAF).
- The SDSR 2015 envisaged that by 2020 the UK Armed Forces would have 144,200 personnel, comprising 30,450 for the RN/RM, 82,000 for the Army and 31,750 for the RAF.

Figure 1: FTTS (RN/RM & RAF) and FTTTS (Army) against Liability and 2020 target derived from SDSR 2015
UK Regular Personnel

As at 1 January 2017, the trained and untrained strength of the UK Regular Forces (which excludes Gurkhas) was 149,280.

There are 8,970 untrained personnel in the UK Regular Forces, of which 3,320 are in the Army. The untrained strength reflects the number of personnel who can potentially join the trained strength.

Note: || Denotes break in series; the definition of ‘Trained’ for Army has changed from the 1 October 2016 edition onwards (see page 5). Hence the 1 January 2017 Army Trained Strength figures cannot be compared to earlier figures. However, the 1 January 2017 Army trade trained figure is comparable to the 1 January 2016 Trained figure.

Intake and Outflow since 2010

Intake and Outflow over the past six years are presented in Figure 2. Since 2010 outflow has exceeded intake for each 12 month period.

- Excluding personnel who left on redundancy, in the 12 months to 31 December 2016, there was a net outflow of 1,660 personnel from the UK Regular Forces. This difference has reduced compared with the 12 months to 31 December 2015, when 3,200 more personnel left the UK Regular Forces than joined.

Intake

- Intake into the trained and untrained UK Regular Forces was 13,440 in the 12 months to 31 December 2016. This has decreased from 13,890 in the 12 months to 31 December 2015.
- Of the current intake, 10.2 per cent was into Officers and 89.8 per cent was into Other Ranks.
- Compared to the 12 months to 31 December 2015, intake to the RN/RM has increased by 7.2 per cent, intake to the Army has decreased by 5.8 per cent and the RAF has decreased by 6.2 per cent.

Figure 2: Net Flow, Intake to and Outflow from the UK Regular Forces over a 12-month period
UK Regular Personnel

Outflow

- Outflow from the trained and untrained UK Regular Forces was 15,100 in the 12 months to 31 December 2016; down from 17,230 in the 12 months to 31 December 2015.
- In the 12 months to 31 December 2016, less than 5 trained and untrained personnel left the UK Regular Forces as part of the UK Armed Forces Redundancy Programme. This compares to 140 in the 12 months to 31 December 2015.

Armed Forces Redundancy Programme Tranche 1-4 statistics are available at:

https://www.gov.uk/government/collections/uk-armed-forces-redundancy-program-statistics-index

Voluntary Outflow encompasses all trained (RN/RM & RAF) and Trade Trained (Army) personnel who voluntarily exit before the end of their agreed engagement or commission period.

Time Expiry is a term used to describe those in the Armed Services who reach the end of their engagement or commission and then leave.

Other includes outflow from the trained (RN/RM & RAF) and trade trained (Army) strength due to, amongst others, medical reasons, misconduct, compassionate, dismissals and death.

At a Tri-Service level, in the 12 months to 31 December 2016, more personnel left the trained (RN/RM & RAF) and trade trained (Army) UK Regular Forces by Voluntary Outflow (VO) than for any other reason (Figure 3).

- In the 12 months to 31 December 2016, 7,350 trained (RN/RM & RAF) and trade trained (Army) personnel left through VO; the VO rate was 5.4 per cent. This is a decrease from 7,920 in the 12 months to 31 December 2015 and a VO rate of 5.7 per cent.
- In the 12 months to 31 December 2016, the VO rate is higher amongst Other Ranks (5.6 per cent), compared to Officers (4.3 per cent).

There is no single reason why personnel leave on Voluntary Outflow, but the personnel who completed the Armed Forces Continuous Attitude Survey indicated reasons for leaving the Armed Forces included the impact of Service life on family and personal life and opportunities outside the Armed Forces.

Figure 3: Outflow of trained (RN/RM & RAF) and trade trained (Army) UK Regulars by exit reason (12 months to 31 December 2016)

In this chart, personnel leaving on Redundancy have been included in the “Other” category. There were less than 0.1 per cent of personnel leaving on redundancy in the 12 months to 31 December 2016.
Future Reserves 2020 (FR20) programme monitoring

The Ministry of Defence (MOD) has consulted on changes to the Army trained strength definition and the removal of the FR20 intake targets.

MOD has released revised Future Reserves 2020 trained strength growth profiles in the Written Ministerial Statement released on 8th November 2016. Reporting of the growth of the Reserves will be based on trained strength profiles only.

Future Reserves 2020 Strength

Progress against FR20 population trained strength targets is reported in table 6a of the Excel tables.

The total trained and untrained strength of the Tri-Service Future Reserves 2020 was 35,860; an increase of 1,830 or 5.4 per cent since 1 January 2016.

Figure 4: Maritime Reserve trained strength

The Maritime Reserve total strength as at 1 January 2017 was 3,480. This is an increase of 60 personnel (1.6 per cent) since January 2016.

Figure 4 shows that the Maritime Reserve trained strength was 2,430 as at 1 January 2017. This is an increase of 160 personnel (7.1 per cent) since 1 January 2016.

Figure 5: Army Reserve FR20 trained strength

The Army Reserve total strength as at 1 January 2017 was 29,690. This is an increase of 1,590 personnel (5.7 per cent) since 1 January 2016.

The Army changed its definition of trained strength to include phase 1 trained personnel from 1 October 2016 (see Policy Background for more information). Figure 5 shows that the Army Reserve trained strength was 26,450 as at 1 January 2017.

Figure 6: RAF Reserves trained strength

The RAF Reserves total strength as at 1 January 2017 was 2,690. This is an increase of 190 personnel (7.6 per cent) since 1 January 2016.

Figure 6 shows that as at 1 January 2017 the RAF Reserves trained strength was 2,080. This is an increase of 260 personnel (14.0 per cent) since 1 January 2016.
Future Reserves 2020 (FR20) programme monitoring

FR20 Intake

Intake statistics report how many people have joined the trained or untrained strengths. As well as new recruits, this can include personnel transferring from the Regular Forces, other Reserve populations, or Reserve re-joiners. In the 12 months between 1 January 2016 and 31 December 2016, intake to the Tri-Service Future Reserves 2020 population was **6,850 people**; a **20.0 per cent decrease** on the same 12 month period in the previous year.

Source: Defence Statistics (Tri-Service)

FR20 Outflow

Outflow statistics report how many personnel have left the trained or untrained strengths. The majority of outflow is personnel leaving the Armed Forces, though around 15 percent do transfer to another part of the Armed Forces, such as the Regulars or another Reserve Force.

In the 12 months between 1 January 2016 and 31st December 2016 outflow from the Tri-Service Future Reserves 2020 population was **5,010 people**; a **26.0 per cent increase** compared with the same 12 month period in the previous year.

All three services have seen an increase in total number of personnel leaving (total outflow) in the 12 months to 31st December 2016 compared to the same time period last year. Increases in outflow are expected following the FR20 programme’s aim to increase the size of the Reserve Forces.

**Figure 7: Total Outflow rate by service**

**Total outflow rate**

12 months total outflow divided by the mean average strength.

Outflow includes personnel moving to any other part of the Armed Forces including the UK Regulars or another Reserve population not in the FR20.

Figure 7 shows the total outflow rate which takes into account the growth of total strength. The total outflow rates for each service in the 12 months to 31st December 2016 are as follows:

- The Maritime Reserve total outflow rate was **25.0 per cent**; an increase of 4.0 percentage points since 12 months to 31st December 2015.
- The Army Reserve total outflow rate was **12.6 per cent**; an increase of 1.8 percentage points since the 12 months to 31st December 2015.
- The RAF Reserves total outflow rate was **18.8 per cent**; an decrease of 0.2 percentage points since the 12 months to 31st December 2015.
Applications to the Armed Forces

The figures in this publication include applications to the UK Regular and Volunteer Reserve Forces. They are broken down by Service, and by Officers and Other Ranks.

Due to differences in the application process for each Service, the three Services do not currently adopt the same definition of an 'application'. Therefore, application numbers cannot be added together across the Services to show total Armed Forces applications (hence separate tables and graphs are provided).

The number of applications received does not directly relate to intake figures, since:
Figures relate to the number of applications received and not the number of applicants, as one applicant may submit several applications;
For successful applicants who accept an offer to join the Services, there is a substantial processing time between their application being received and the applicant joining the Services. Therefore, the intake figures for Dec 15 are not comparable with the number of applications received in Dec 15, as the numbers apply to different cohorts of people;
Applications will not result in intake if, for example, they are withdrawn by the applicant during the recruitment process, rejected by the Services, or if an offer to join the Services is declined by the applicant. See below for further information.

Applications that do not result in intake
The main causes of applicant failure (i.e. no offer to join the Services given) include:

- Failing security clearance;
- Not having the required residency;
- Not achieving the required recruiting test score for the desired branch/trade;
- Failing the medical scrutiny;
- Not achieving fitness entry standards;
- Applicants withdraw for their own reasons (e.g. change of mind) during the process

The main causes of application failure (i.e. the applicant declines an offer to join):

- Applicants may have submitted other applications for employment (including multiple applications to join the Armed Forces) and accept another offer;
- Applications may be submitted with no intention to join (e.g. to satisfy the requirements of job seeking).

NOTE: Application numbers cannot be added together across the Services to show total Armed Forces applications due to differences in definitions.
Applications to the Armed Forces

The number of applications to join the RN/RM Regular Forces has decreased slightly since last quarter. There was an overall decrease of 470 applications in the 12 months to 31 December 2016 compared with the same period last year.

There has been a large increase in the number of applications to join the Army Regular Forces in the last three quarters. The increase is, in part, due to a rise in Commonwealth applicants as a result of the announcement that residency requirements would be waived to allow 200 Commonwealth citizens per annum to be recruited to fill a limited number of roles in the Regular Armed Forces which require specialist skills. In addition to this, the introduction of the Army Quick application process (‘Quick App’) in November 2016 may have resulted in increases in applications following this period. Since the same period last year, there has been an overall increase of 23,840 applications to join the UK Regular Forces.

There has been a net increase of 130 applications to the RAF as a whole in the 12 months to 31 December 2016 compared with the same period last year. The RAF Regulars have seen a large 1,360 increase in applications offset by a 1,240 decrease in Reserves applications for the same time period.

Rounding

Figures in this publication have been rounded to the nearest 10, though numbers ending in a “5” have been rounded to the nearest multiple of 20 to prevent the systematic bias caused by always rounding numbers upwards. For example; a value of “25” would be rounded down to “20” and a value of “15” would be rounded up to “20”.

Additionally, totals and sub-totals are rounded separately and so may not equal the sums of their rounded parts.

Percentages are calculated from unrounded data and presented to one decimal place.

The MOD Disclosure Control and Rounding policy is published on GOV.UK and we have applied this policy to the statistics in the accompanying Excel tables. The policy is available here: https://www.gov.uk/government/publications/defence-statistics-policies.

Revisions

There are no revisions in this release.

Whilst the total RAF liability has been agreed, the composition is undergoing review. The Officer and Other Rank breakdown is currently marked as provisional for RAF, from 1 April 2016 to 1 January 2017, along with the Tri-Service Officer and Other Rank breakdown. As a result, the associated surplus / deficit figures are also provisional. These figures will be finalised in due course.

Corrections to the published statistics will be made if errors are found, or if figures change as a result of improvements to methodology or changes to definitions. When making corrections, we will follow the Ministry of Defence Statistics Revisions and Corrections Policy. All corrected figures will be identified by the symbol “r”, and an explanation will be given of the reason for and size of the revision. Corrections which would have a significant impact on the utility of the statistics will be corrected as soon as possible, by reissuing the publication. Minor errors will also be corrected, but for efficient use of resource these corrections may be timed to coincide with the next annual release of the publication.

There are no regular planned revisions of this Bulletin.
