

Monthly publication of Official Statistics on the incidence and prevalence of tuberculosis (TB) in Cattle in Great Britain – to end October 2016

These statistics and accompanying datasets were released on Wednesday 18 January 2017 at 9:30. The next monthly notice will be published on Wednesday 15 February 2017.

The next quarterly statistical notice which includes headline measures and charts will be published on Wednesday 15 March 2017.

Short term changes in these statistics should be considered in the context of long term trends.

Key tables summarising data to October 2016

Table 1: New herd incidents¹ and incidents where OTF status has been withdrawn²

	New herd incidents			New herd incidents where OTF status is withdrawn (OTFW)		
	12 months to end	12 months to end	Year-on-year	12 months to end	12 months to end	Year-on-year
	October 2015	October 2016	change	October 2015	October 2016	change
England	3,905	3,801	-3%	2,889	2,552	-12%
High risk area	3,431	3,277	-4%	2,672	2,319	-13%
Edge area	327	388	19%	169	194	15%
Low risk area	147	136	-7%	48	39	-19%
Scotland	41	41	0%	13	9	-31%
Wales	876	695	-21%	513	368	-28%

Table 2: Herds not officially TB free at the end of the period due to a bovine TB incident (non-OTF herds)³

		12 months to end	•
	October 2015	October 2016	change
England	2,867	2,801	-2%
High risk area	2,585	2,518	-3%
Edge area	222	235	6%
Low risk area	60	48	-20%
Scotland	25	26	4%
Wales	632	576	-9%

Table 3: Total animals slaughtered⁴

		12 months to end	-
	October 2015	October 2016	change
England	27,539	29,708	8%
High risk area	23,999	26,001	8%
Edge area	2,925	3,063	5%
Low risk area	615	644	5%
Scotland	117	188	61%
Wales	7,462	9,934	33%

An **Official Statistics** publication. These statistics have been produced to the high professional standards set out in the Code of Practice for Official Statistic. See https://www.statisticsauthority.gov.uk/monitoring-and-assessment/code-of-practice

Footnotes

- Herds which were previously Officially TB free (OTF) but either had cattle that reacted to a tuberculin test or had a tuberculous animal disclosed by routine meat inspection at slaughter, during the period shown. This is the preferred figure to measure the number of new breakdowns. Figures for Wales include incidents where OTF status has been withdrawn for epidemiological reasons only.
- 2. New herd incidents where OTF status was withdrawn from the herd due to the detection of typical lesions of TB during post-mortem examination of one or more test reactors or inconclusive reactors, or where samples from one or more reactor, inconclusive reactor or a slaughterhouse case produce positive culture results for *Mycobacterium bovis* (the causative bacterium of bovine TB). Figures for Wales do not include incidents where OTF status has been withdrawn for epidemiological reasons only, in the absence of post-mortem confirmation.
- 3. Herds which were not officially TB-free (i.e. herds with an open breakdown with OTF status suspended or withdrawn) due to a TB incident, at the end of the period shown.
- 4. Reactors slaughtered + Inconclusive reactors slaughtered + Direct contacts Slaughtered.

Further information

The publication 'quarterly headline statistics on TB in cattle in GB' contains charts on trends in TB as well as data tables, detailed commentary and background information. This and the related datasets can be found at <u>https://www.gov.uk/government/publications/incidence-of-tuberculosis-tb-in-cattle-in-great-britain</u>

A wide range of other statistics is available on the internet at: <u>https://www.gov.uk/government/organisations/department-for-environment-food-rural-affairs/about/statistics</u>

Data

These statistics are obtained from the Animal and Plant Health Agency (APHA) work management IT support system (Sam), used for the administration of TB testing in GB. They are a snapshot of the position on the date on which the data were extracted. These statistics may be subject to regular revision until all test results are available. In particular figures from 2014 onwards will be subject to further revision as test and incident records are completed.

Methodology

For a description of the data sources and methodology used in the calculation of the TB statistics, together with notes on data revisions policy etc., please refer to the 'Background and Methodology' annex document at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/483748/bovinetb-annex-09dec15a.pdf
