Appendix B: Reasons for Non-completion

To enable subsequent analysis reasons for non completion are categorised under a relatively small number of generalised headings. Typically these may include:

**Directive** - For example a required permit is not in place

**Labour** - Insufficient labour was available

**Prerequisite** - Something that needed to be in place wasn’t

**Information** - Drawings or specifications were not available

**Material** - The necessary material was not available

**Site Access** - The site was not ready

**Plant** - The necessary plant was being used elsewhere

**Weather** - The weather made work impossible

**Unforeseen** - An unforeseeable event prevented work
