(3) Year to date comprises of July 2016 to January 2017 data

(4) April 2016 is a 5 week reporting period & 2016 a 53 week year

Usage of the Statistics

The UK government and the European Commission use these statistics to monitor and assess stocks of cereals as a key component of our food security. The estimates contribute to the UK cereal balance sheets published by the Agricultural and Horticultural Development Board [AHDB](#). Animal feed processors and grain traders use the estimates to help assess market conditions and inform business decisions.

Revisions

We have reviewed some IPU's (Integrated Poultry Units) which produce both feed for their own use and feed for retail sale. We have adjusted the data from August 2015 which has resulted in an increase in compound poultry feed and a decrease in IPU feed.

Further information

1. Data are from Defra's monthly animal feed surveys which cover all animal feed processors and integrated poultry units in Great Britain.
2. The next release will be on 06 April 2017 at 9.30am.
3. Related statistics are available on [animal feed prices](#) and cereal usage by [millers and brewers](#) and [cereal stocks](#).
