Correction:

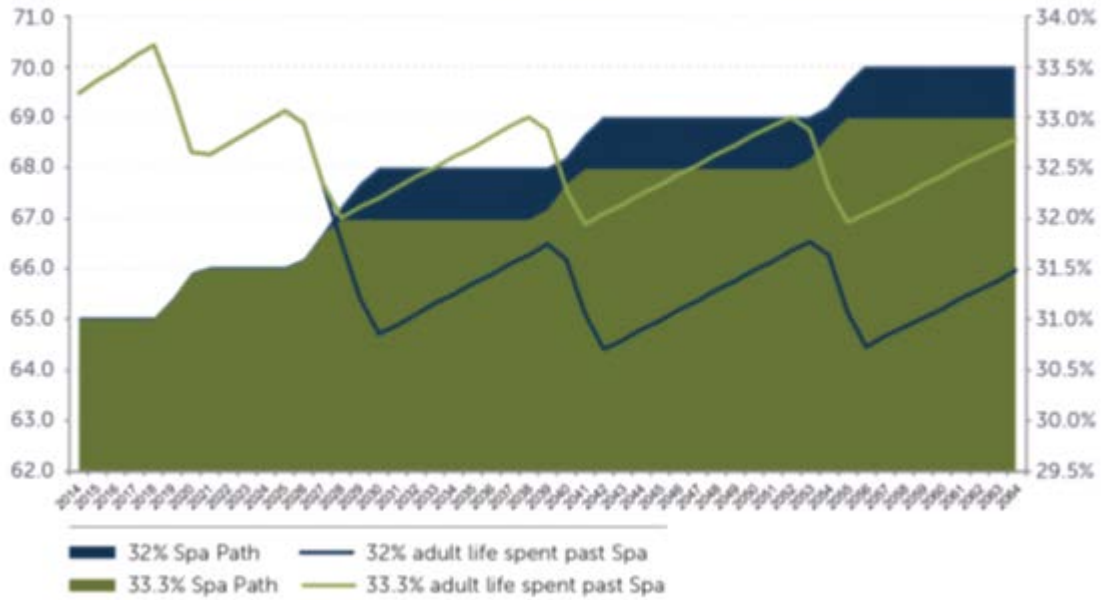

1. On page 76 Chart “*State Pension age timetable & proportion of adult life spent past State Pension age (32% vs. 33.3%)*”, the design process has shifted secondary axis labels relative to the data series, meaning the series values appear 0.5% points lower than the correct value.
2. Chart currently shows:

State Pension age timetable & proportion of adult life spent past State Pension age
(32% vs. 33.3%)

3. Chart should show

State Pension age timetable & proportion of adult life spent past State Pension age (32% vs. 33.3%)
