AUTHORIZED AMENDMENT

Note to provide a summary/overview of the amendment and to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.

The input here should be your 'one minute' to explain what, why and how.

RA 1440 has been the subject of a major review in order to adequately Regulate the Air Safety (AS) training of all relevant personnel in the Defence Air Environment (DAE), including civilian organizations responsible for the safe operation, design or maintenance of military registered Air Systems. There is significant importance and support attached to Human Factors and it is considered mandatory AS training for everyone within the DAE, as the re-written RA 1440 explicitly states. The publishing of this amended RA and the supporting Training Requirement document should provide clear direction, clarity and guidance. In addition, the new Regulation has updated course names and all associated terminology.

There is no impact on the military cohort of the Regulated Community following this review. However, there could be some impact on DE&S and the contracted organizations that will have to deliver against this RA. There has already been significant engagement with DE&S to assess the extent of this impact. There are available places on the HF Facilitators' Course and HF Supervisors' Course at RAFC Cranwell.
