Environment Policy

Policy Statement

Sellafield Ltd will protect the environment by operating in an environmentally responsible manner. We shall achieve this by ensuring environmental management is integral to our decision making processes, so that we can enhance our environmental performance demonstrating continual improvement.

Commitments

We shall be a company that:

1. Ensures our operations are carried out in accordance with our compliance obligations.
2. Enhances our environmental performance as we progress Environmental Remediation, through the continuous improvement of an accredited Environmental Management System, driven by the leadership and commitment of top management.
3. Ensures decision making processes are cognisant of our environmental commitments.
4. Embeds an ‘environmental mindset’ across the business by developing a culture of environmental responsibility and leadership amongst employees, contractors and our supply chain.
5. Maintains an environmentally aware workforce, by ensuring personnel are appropriately trained and demonstrably competent.
6. Prevents or minimises pollution through application of the principles of Best Available Techniques.
7. Minimises waste generation and consumption of natural resources through the application of the Waste Hierarchy.
8. Identifies and manages the impact of our significant environmental aspects, proportionate to risk.
9. Communicates our Environment Strategy, including our management system obligations, across the business.
10. Measures and reviews our environmental performance and embeds in our working life the learning that arises from both our and others experience.
