AUTHORIZED AMENDMENT

Note to provide a summary/overview of the amendment and to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.

The input here should be your 'one minute' to explain what, why and how.

As part of the MAA's continuing improvement, RA 1230 required the inclusion of Airworthiness Demonstration, and the provision of more detailed design safety targets for Military and Civil derived Air Systems, which were a part of NPA 15/08.

Whilst the feedback received from NPA 15/08 was reviewed and the comments sentenced, there were additional changes to key areas of the RA outwith the scope of the NPA comments. The additional changes built on the previous NPA by providing clarity on the use of design criteria for Civil Air System types and applying Airworthiness principles to historic aircraft.
