Whooping cough and pregnancy

Help protect your baby

There is a lot of whooping cough around at the moment. Babies are at most risk, especially in their first weeks of life.

Expectant mothers can help protect their baby by getting themselves vaccinated against whooping cough, from 16 weeks of pregnancy.

Don't take the risk. Act now to protect your baby from whooping cough from birth. Contact your GP or midwife to get the vaccination.

immunisation

the safest way to protect yourself and your baby
