RE: Re-determination for Llanbrynmair and Carnedd Wen Wind Farms – OBJECTION LETTER

Dear Sir/Madam

I worked for a well-known Welsh company selling Welsh tourism around the world, and although I am not directly impacted by these two proposals, I do feel that I can comment with “hand on heart”.

Tourism IS a vital part of the economic health of Montgomeryshire and the surrounding area. One of the most validated real estate precepts is that prominent natural views and historic scenery have premium value, and intrusions restricting those views erode value. I was part of the selling team, and quickly found out what aspects of Montgomeryshire are crucial – landscape, mountains and our rural countryside most definitely are!

Do you honestly believe industrial sized structures with associated steel infrastructures are NOT going to negatively affect tourism (and property value) for Montgomeryshire? Do you honestly think any Developer can “mitigate” this?

Please think again.

Regarding the re-determinations, please consider the accumulative impact of both windfarms. Combined these two windfarms will have a immense effect on visual impact of the area.

Please also consider how the power is to be transferred from the site to the National Grid.

Kind regards
