

Seasonal flu vaccine uptake (GP) 2012/13 - DATA ON GP REGISTERED PATIENTS

PROVISIONAL end of November 2012 cumulative uptake data for England on flu vaccinations given from 1st September 2012 to 30th November 2012.

National	Response Summary						65 years and over					
	2012/13			2011/12			2012/13			2011/12		
	Number of practices	Number of practices responding	% of practices responding	Number of practices	Number of practices responding	% of practices responding	Patients registered	Number vaccinated	% Vaccine Uptake	Patients registered	Number vaccinated	% Vaccine Uptake
England Total	8,060	7,690	95.4%	8,167	7,823	95.8%	9,134,512	6,335,660	69.4%	8,880,805	6,232,049	70.2%

Footnotes

This collection has been approved as mandatory (with some optional dataset items to complete) by the Review of Central Returns Steering Committee (ROCR) under license ROCR/OR/0113/FT6/005PMAND

1. Data are provisional and represent 95.4% of all GP practices in England responding to the November 2012 survey compared with 95.8% of practices in the same survey month in 2011/12. Where a total for England is quoted, (eg sum of number of patients registered and number vaccinated) this is taken from the 95.4% GP practice sample and is therefore NOT an extrapolated figure for all of England.
2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see CMO Letter published on the DH website at; http://www.dh.gov.uk/en/Publicationsandstatistics/Lettersandcirculars/Professionalletters/DH_133888
3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional during 1 September 2012 to 31 January 2013. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or PCTs.

Footnotes

This collection has been approved as mandatory (with some optional dataset items to complete) by the Review of Central Returns Steering Committee (ROCR) under license ROCR/OR/0113/FT6/005PMAND

- Data are provisional and represent 95.4% of all GP practices in England responding to the November 2012 survey compared with 95.8% of practices in the same survey month in 2011/12. Where a total for England is quoted, (eg sum of number of patients registered and number vaccinated) this is taken from the 95.4% GP practice sample and is therefore NOT an extrapolated figure for all of England.
- For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see CMO Letter published on the DH website at: http://www.dh.gov.uk/en/Publicationsandstatistics/Lettersandcirculars/Professionalletters/DH_133888
- The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
- These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional during 1 September 2012 to 31 January 2013. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or PCTs.
