

## **Seasonal influenza vaccine uptake amongst GP Patients in England**

**Provisional monthly data for 1 September 2017 to 31 January 2018**  
By 'Old' Area Team and Clinical Commissioning Group

The DCB2205 Seasonal Influenza Uptake (GP Patient) Survey has received full approval from the Data Coordination Board for the 2017 to 2018 influenza season.

The DCB2211 Seasonal Influenza Uptake in Children (GP Patient) Survey has received full approval from the Data Coordination Board for the 2017 to 2018 influenza season.

## Seasonal Flu Vaccine Uptake (GP) 2017/18 - DATA ON GP REGISTERED PATIENTS

Provisional end of January 2018 cumulative uptake data for England on influenza vaccinations given from 1 September 2017 to 31 January 2018

### FOOTNOTES

This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.
2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2017. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

#### FOOTNOTES

*This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.*

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.
2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)
5. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

**All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.**

**Data Source: ImmForm website: Registered Patient GP practice data**

**Influenza Immunisation Vaccine Uptake Monitoring Programme**

**Public Health England (PHE)**

Seasonal Flu Vaccine Uptake (GP) 2017/18 - DATA ON GP REGISTERED PATIENTS

Provisional end of January 2018 cumulative uptake data for England on influenza vaccinations given from 1 September 2017 to 31 January 2018

#### FOOTNOTES

This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.

2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.

3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.

4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at:

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)

5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2017. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

7. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

**All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.**

**Data Source: ImmForm website: Registered Patient GP practice data**

**Influenza Immunisation Vaccine Uptake Monitoring Programme**

**Public Health England (PHE)**

Seasonal Flu Vaccine Uptake (GP) 2017/18 - DATA ON GP REGISTERED PATIENTS

Provisional end of January 2018 cumulative uptake data for England on influenza vaccinations given from 1 September 2017 to 31 January 2018

#### FOOTNOTES

*This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.*

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.

2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.

3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.

4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at:

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)

5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2017. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

7. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

**All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.**

**Data Source: ImmForm website: Registered Patient GP practice data**

**Influenza Immunisation Vaccine Uptake Monitoring Programme**

**Public Health England (PHE)**

**Seasonal Flu Vaccine Uptake (GP) 2017/18 - DATA ON GP REGISTERED PATIENTS**

Provisional end of January 2018 cumulative uptake data for England on influenza vaccinations given from 1 September 2017 to 31 January 2018

#### FOOTNOTES

*This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.*

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.
2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)
5. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

**All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.**

**Data Source: ImmForm website: Registered Patient GP practice data  
Influenza Immunisation Vaccine Uptake Monitoring Programme  
Public Health England (PHE)**

**Seasonal Flu Vaccine Uptake (GP) 2017/18 - DATA ON GP REGISTERED PATIENTS**

Provisional end of January 2018 cumulative uptake data for England on influenza vaccinations given from 1 September 2017 to 31 January 2018

#### FOOTNOTES

*This collection has received approval from the Data Coordination Board (DCB) for the 2017 to 2018 influenza season.*

1. Data is provisional and represents 99.5% of all GP practices in England responding to the January 2018 Main GP survey (purple) compared with 97.3% of practices in the same survey month in 2016/17.
2. Data is provisional and represents 99.3% of all GP practices in England responding to the January 2018 Child GP Flu Survey (green) compared with 96.7% of practices in the same survey month in 2016/17.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 99.5% GP practice sample for the main survey and 99.3% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/600880/annual\\_flu\\_letter\\_2017to2018.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/600880/annual_flu_letter_2017to2018.pdf)
5. Please note the total number of practices in the GP main survey will NOT be equivalent to the total number of practices in the GP child survey. This is due to a practice which consists of adult patients only.

**All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.**

**Data Source: ImmForm website: Registered Patient GP practice data  
Influenza Immunisation Vaccine Uptake Monitoring Programme  
Public Health England (PHE)**
