

This summary contains official statistics on PIP registrations, clearances, awards, clearance & outstanding times, mandatory reconsiderations and numbers of claims in payment for both new claims and claims made by those with an existing claim for Disability Living Allowance (known as Reassessments).

Personal Independence Payment (PIP) helps with some of the extra costs caused by long-term disability, ill-health or terminal ill-health. From 8th April 2013 DWP started to replace Disability Living Allowance (DLA) for working age people with PIP. The latest statistics to the end of January 2018 show:

Main stories

As PIP roll out continues, nearly 3.2 million claims to PIP have been cleared.

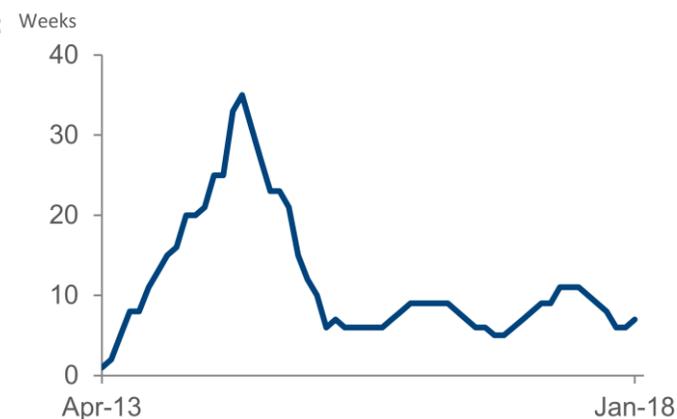

Between the introduction of PIP in April 2013 and January 2018:

3,387,000 registrations, up 202,000 from October 2017

3,215,000 clearances, up 217,000 from October 2017

1,702,000 claims in payment, 96,000 up from October 2017

Average actual clearance times (weeks, median), have decreased compared to the end of last quarter (New claims - Normal rules from referral to the Assessment Provider to DWP decision).

For claims cleared in January 2018:

7 weeks - New claims for normal rules (from referral to the Assessment Provider to DWP decision).

6 working days - New claims for terminally ill people (from registration to DWP decision).

What you need to know

This release summarises the published official statistics relating to PIP. The statistics cover the PIP customer journey from registration through to payment. Key information is included on average clearance and outstanding times and award rates, on the nature of the award and characteristics of claims in payment.

The claims process:

* The "Part 2" form is referred to in the application process as the "How your disability affects you" form

We measure the full end-to-end process (from claim registration to DWP decision) and the Assessment Provider (AP) referral to DWP decision (which excludes the time the claim is with the claimant). For more details see the notes section.

Terminology:

Registration - Claimant registers an application to claim PIP.

Clearance - DWP decision maker has determined whether the claimant should or should not be awarded PIP.

Clearance time - The time between registration or referral to the AP and clearance of the case.

Outstanding time - Relates to cases where DWP has yet to make a decision.

Awards - Claimant has been awarded PIP.

Mandatory reconsiderations - Claimant wishes to dispute a decision made on their claim and requests DWP to reconsider the decision.

Reassessment - DLA claim that has been reassessed for PIP, as opposed to a new claim.

Normal rules - Claims not being processed under 'special rules for the terminally ill (SRTI)'.

Caseload - Claims in payment at a point in time (end of reporting month).

Published 21st March 2018

Next edition 12th June 2018

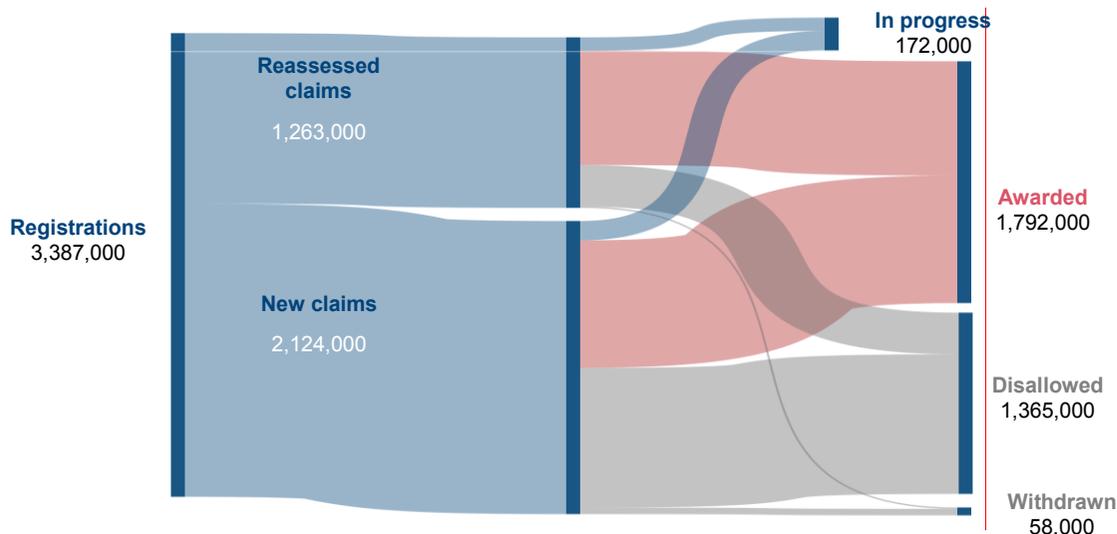

Registrations, clearances and awards

Nearly 3.2 million claims to PIP have been cleared

Monthly registrations, clearances and awards, all claims (thousands) to January 2018

All registrations, clearances and awards up to January 2018

By the end of January 2018, a total of 3,387,000 claims to PIP had been registered. Of these, 102,000 (3%) were registered under special rules for the terminally ill, and 1,263,000 (37%) were reassessed DLA registrations.

From October 2015 to January 2017 the increase in registrations mostly reflects the reassessment of DLA cases as it was rolled out to more areas. Of those claims registered since October 2015, almost half (48%) were DLA reassessment claims. Since April 2017 new claims and reassessment registrations have risen, except from the usual seasonal dip in December 2017.

By the end of January 2018, 3,215,000 claims to PIP had been cleared. Of these, 106,000 (3%) were under special rules for the terminally ill, and 1,185,000 (37%) were reassessed DLA claims.

From December 2015 to October 2016 clearances per month increased due to the wider roll out of reassessments. Over the past nine months clearances have fluctuated within expected levels, with a seasonal dip in December 2017.

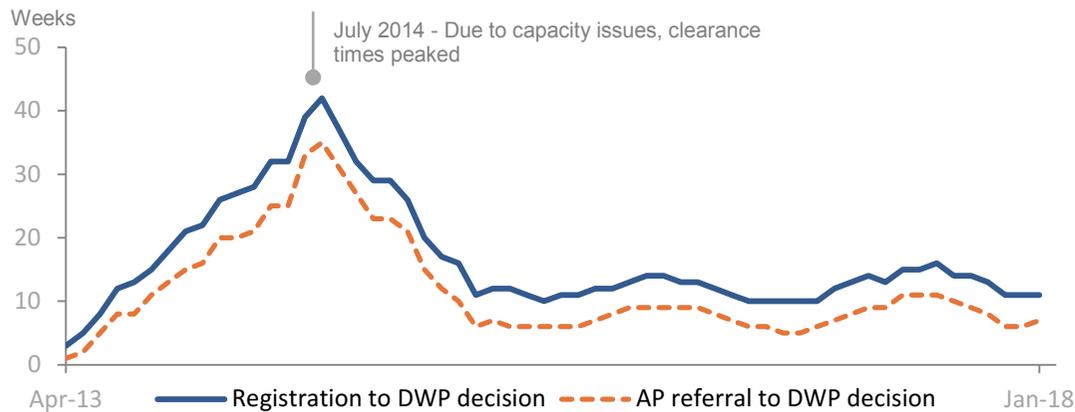

More information on registrations and clearances is available from [StatXplore](#) and information on awards can be found in the Excel tables that accompany this release.

Award rates (normal rules, excluding withdrawn claims) for new claims are 45% and 72% for DLA reassessment claims. This covers awards made between April 2013 and January 2018. Nearly all special rules (terminally ill) claimants are awarded PIP.

The award rate includes all types of clearances, including disallowances, both pre-referral and post-referral to an Assessment Provider.

Customer journey details – clearance and outstanding times

Clearance times new claims normal rules (median weeks)

Current average clearance times from registration to DWP decision for the terminally ill are **6 working days** for both new and reassessment claims.

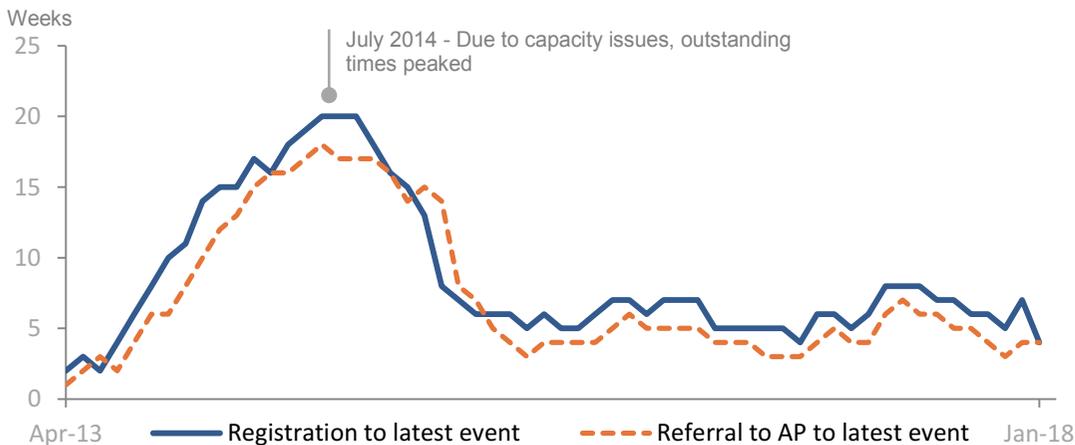

‘Clearance times’ relate to the time taken for DWP to process and make a decision on a case.

In January 2018, of those **new claims cleared** under normal rules, the average PIP claim, in Great Britain (GB), took:

- 11 weeks from the point of registration to a decision being made on the claim;
- 7 weeks from the point of referral to the assessment provider to a decision being made on the claim.

These times have reduced significantly from the peak in July 2014 (42 and 35 weeks respectively). Clearance times from the point of referral to the assessment provider to a decision being made have recently decreased from 11 weeks in July 2017 to 7 weeks in January 2018, and are now at the same levels as this time last year.

Outstanding times new claims normal rules (median weeks)

‘Outstanding times’ relate to cases where DWP has yet to make a decision.

In January 2018, of those normal rules **new claims** that were still being processed, the average PIP claim, in GB, was outstanding for:

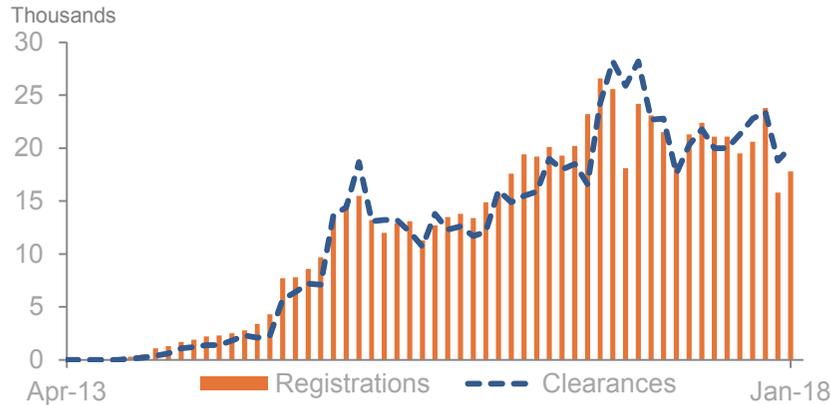

- 4 weeks from the point of registration;
- 4 weeks from the point of referral to the assessment provider.

These times have reduced significantly from the peak in July 2014 (20 and 18 weeks respectively). Outstanding times from the point of referral to the assessment provider have remained stable at 4 weeks since the previous quarter. The slight peak in outstanding times from registration to the latest event in December is due to the seasonal period.

Information on clearance and outstanding times, for both new claims and DLA reassessments, can be found in tables 5 and 6 of the Excel tables that accompany this release. Regional clearance times can also be found here.

Mandatory reconsiderations (MR)

Monthly reconsiderations: Registrations and clearances, normal rules (thousands)

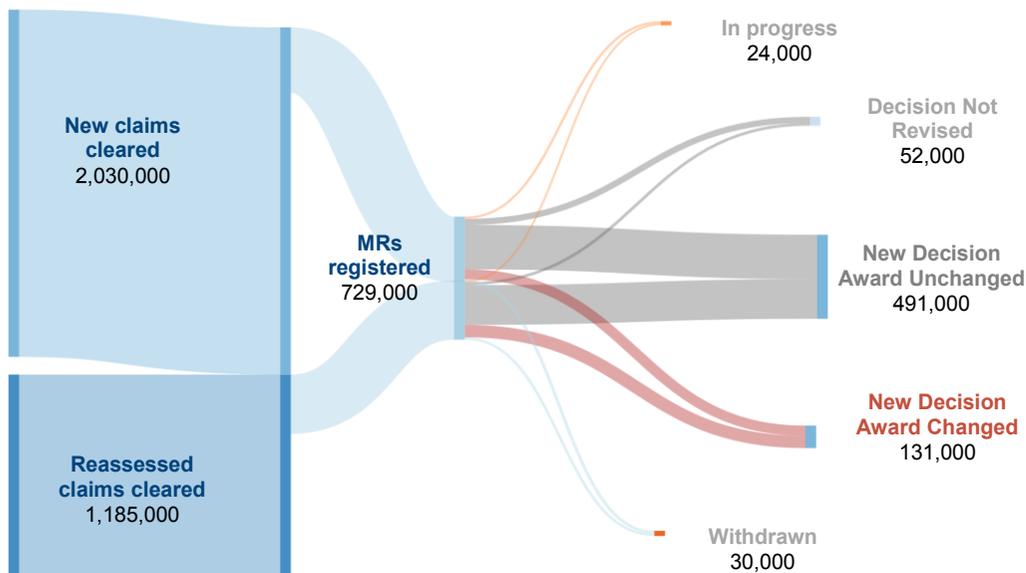

Claimants who wish to dispute a decision on their PIP claim can ask DWP to reconsider the decision. This is a 'mandatory reconsideration' (MR). Its purpose is to consider the grounds for the dispute and complete a review of the initial decision.

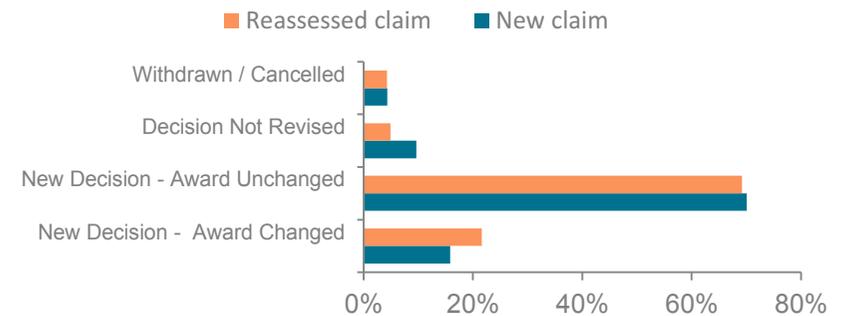

The number of registrations has fallen since the last quarter driven by the downward trend in the number of claim clearances.

By the end of January 2018, 729,000 MRs had been registered against normal rules claims. Of these, 383,000 (53%) related to new claims, and 346,000 (47%) to reassessed DLA claims. In total, 705,000 MRs for normal rules claims had been cleared by the end of January 2018 (370,000 new claims and 336,000 reassessed DLA claims).

MR outcome flow for all normal rules claims cleared

MR outcome for normal rules, new claims and reassessed claims (percentage)

By the end of January 2018, 84% of new claims mandatory reconsiderations and 78% of reassessed DLA mandatory reconsiderations for normal rules resulted in [no change to the award](#).

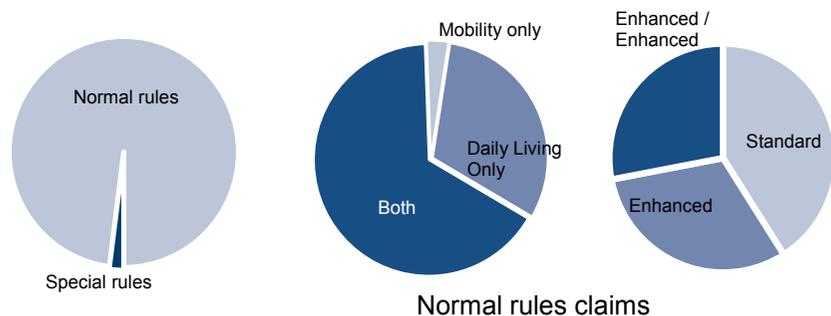

Information on mandatory reconsiderations can be found in tables 7A and 7B of the Excel tables that accompany this release.

An MR must be completed before an appeal is made and lodged with Her Majesty's Courts and Tribunals Service. Statistics on appeals can be found [here](#).

Characteristics of claims in payment

Over one quarter of normal rules claims receive the highest level of award

Proportion of people in receipt of PIP by special rules indicator, component and award type, as at January 2018

At the end of January 2018, 1,702,000 people had a PIP claim in payment, an increase of 96,000 (6%) on the previous quarterly figure (October 2017). 1,678,000 (99%) were assessed under normal rules.

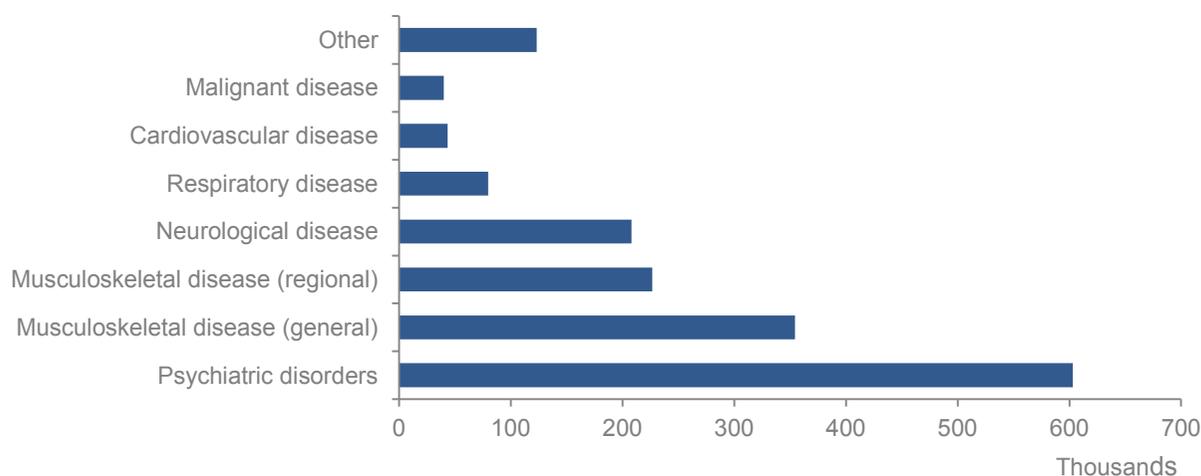

For normal rules claims:

- 31% received Daily Living Award only, 3% received Mobility Award only, and 66% received both.
- 59% received at least one component at the enhanced rate, with 28% of these receiving the highest level of awards ('enhanced/enhanced' rates) for both Mobility and Daily Living components.
- 34% have been in payment for less than one year.

View an interactive [dashboard of the latest award statistics by region](#).

The most commonly recorded disabling condition is 'Psychiatric disorder'

Claims (normal rules) by main disabling condition, thousands, as at January 2018

Main disabling condition for people in receipt of PIP (normal rules):

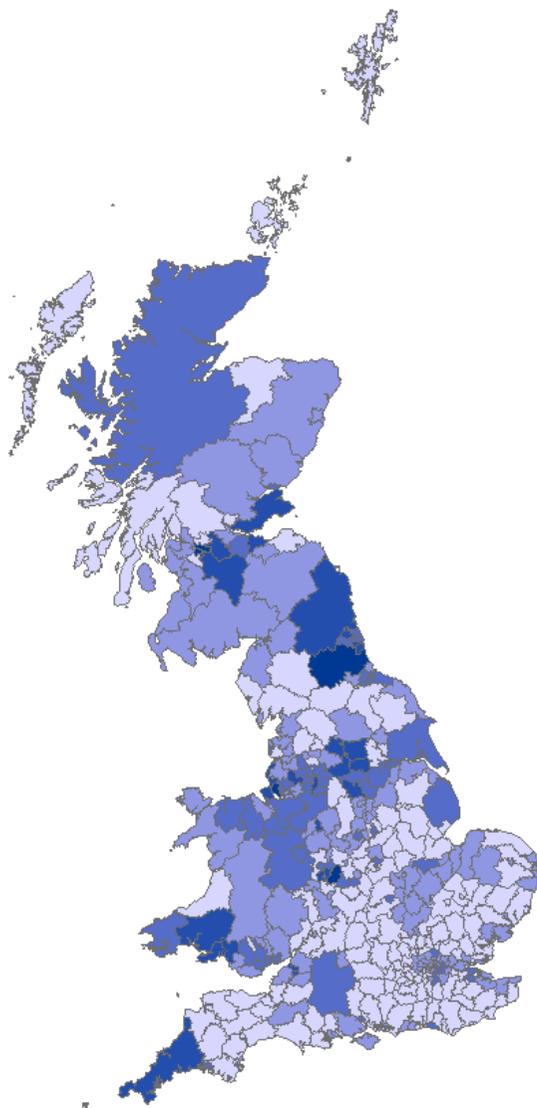

- 603,000 (35%) were recorded with 'Psychiatric disorders' (which includes 'Mixed anxiety and depressive disorders' and 'Mood disorders').
- 354,000 (21%) were recorded with 'Musculoskeletal disease (general)' (which includes 'Osteoarthritis').

The main disabling condition of the claimant is reported by disability category and subcategory level. Further breakdowns are available from [StatXplore](#).

DLA reassessed claims

The North West and West Midlands regions have the largest number of reassessed DLA claimants

People with reassessed DLA claims now claiming PIP

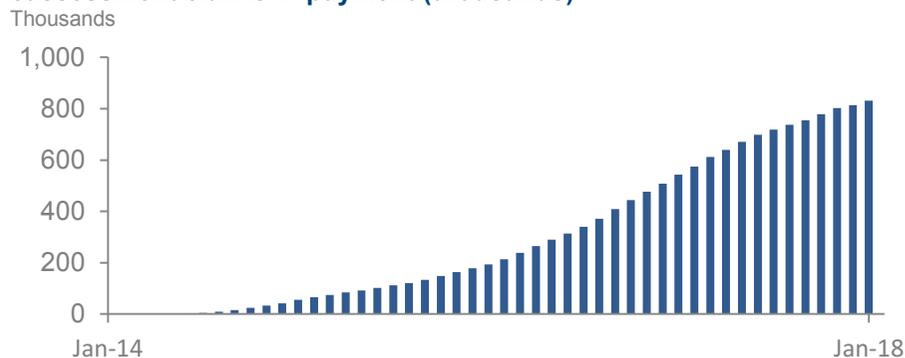

DLA reassessment roll out

On 28th October 2013, DWP began inviting DLA working age claimants whose fixed short term awards had come to an end or claimants whose medical circumstances had changed to claim PIP (see Further Information, below, for details on the roll out). From October 2015, the remaining DLA working age recipients have started to be invited to claim PIP.

At the end of January 2018, 832,000 claims in payment were reassessment claims from DLA (49% of the total PIP caseload).

Reassessment claims in payment (thousands)

Of these:

- 587,000 (71%) received an award at the enhanced rate.
- 323,000 (39%) received the highest level of award i.e. both enhanced rate for daily living and enhanced rate for mobility.

The darker areas of the map show local authorities with higher levels of reassessed claims.

About these statistics

This summary contains official statistics on PIP registrations, clearances, awards, clearance and outstanding times, mandatory reconsiderations and numbers of claims in payment for both new claims and claims made by those with an existing claim for DLA (known as Reassessments).

Monthly caseload refers to the number of PIP claims in payment at the end of the reporting month. The monthly caseload will not include claims that are backdated for an earlier period and so will not be subject to retrospection. These claims will be included from the month they are paid.

Caseload is further broken down by:

- Geography: Region, Local Authority and Parliamentary Constituency;
- Assessment status: Special Rules for Terminally Ill people, Mobility component award level, Daily Living component award Level.
- Primary disability category / sub category / low level disability category, age, gender, DLA reassessment indicator;
- Duration of current claim.

Data Quality Statement

The experimental badging of these PIP statistics was removed from the December 2016 release. The statistics were originally badged as experimental to reflect the fact that methodologies and definitions for the statistics may develop over time, and that the source data was subject to user acceptance testing. Though the methodology may still be developed, the statistics are now derived from a stable source system with recognised definitions and derivations of the statistical measures. Consequently, the statistics now form official statistics.

PIP payment statistics exclude a small number of successful claims that are not in payment (because, for example, the initial payment has been suspended for hospitalisation or other reasons), but will include a small number of cases where a payment has been made but subsequently been suspended temporarily.

The data is subject to some minor retrospection. When a claim is first registered, it is assumed to be a new claim unless there is evidence to suggest that it is a reassessment. If evidence is presented between registration and clearance, the claim will then show as a reassessment clearance and will move from being a new claim registration to being a reassessment registration.

Also, it should be noted that some claims may not be marked as claims under special rules for terminally ill people (SRTI) at the point of registration but become an SRTI claim prior to the point of clearance, and vice versa. This may lead to the figures showing fewer SRTI registrations than clearances.

PIP clearance and outstanding times

All average actual times are based on the **median** measure. The median time is the best measure to use when estimating how long people have been waiting to receive PIP. The median time is the middle value if you were to order all the times from lowest value to highest value. The median is presented here instead of the mean, as the mean measure is affected by cases that have been waiting for a very long time, for example, cases where the person has been hard to reach due to being in prison, hospital or failed to attend their assessment on numerous occasions.

Note that average clearance times for individual parts of the claimant journey may not sum to end-to-end times. The end-to-end median time is based on all cleared/in progress cases taken together whereas the volume of cases and distribution of clearance/outstanding times for individual stages will differ from stage to stage. It also follows from this that there may be some instances where an individual part of the claimant journey (e.g. assessment provider stage) has a longer average time than the end-to-end average.

PIP MR Outcomes

Claimants who wish to dispute a decision made on their PIP claim are required to ask the Department to reconsider the decision, before they can lodge an appeal with Her Majesty's Courts and Tribunals Service. MRs can arise for various reasons such as omitting to tell DWP about relevant evidence during the initial decision-making process; this could include not returning forms required as part of the claim.

If the decision under dispute is classed as **'New decision - Award changed'** then as a result of the reconsideration, a new decision has been issued and the award has been changed. This may include claims that were previously disallowed that are now awarded, or claims that had previously been awarded but the reconsideration has resulted in a change in the claim (e.g. revision to an assessment score) and this has affected level of the award.

If the decision is categorised as **'New decision - Award unchanged'** then as a result of the reconsideration, a new decision has been issued but the award remains unchanged. This may include claims where the reconsideration resulted in a change in the claim (e.g. revision to an assessment score) but this change did not affect the level of the award.

If the decision is categorised as **'Decision not revised'** then as a result of the reconsideration, the initial decision was not revised.

'Withdrawn/cancelled' includes all reconsiderations that were withdrawn or cancelled prior to a reconsideration decision being made.

PIP operational roll out

On 8th April 2013, PIP was introduced as a controlled start, for new claims from people living in a limited area in the North West and part of the North East of England.

On 10th June 2013, PIP was introduced for new claims for the remaining parts of Great Britain.

From 28th October 2013, using a structured roll out to postcode areas, DWP has been inviting DLA working age recipients to claim PIP if:

- DWP received information about a change in care or mobility needs which meant their claim had to be renewed;
- the claimant's fixed term award was due to expire;
- children turned 16 years old (unless they have been awarded DLA under the special rules for terminally ill people);
- or the claimant chose to claim PIP instead of DLA.

From October 2015, the remaining DLA working age recipients have started to be invited to claim PIP.
