2011 SUMMARY REPORT FOR UK BATHING WATERS MONITORING RESULTS UNDER THE BATHING WATER DIRECTIVE

This report is based on data provided to the European Commission under Article 13 of Directive 76/160/EEC (the Bathing Water Directive), as amended by Article 3 of Directive 91/692/EEC. It provides a summary of the results of the 2011 survey of the quality of United Kingdom bathing waters included within the scope of the Bathing Water Directive.

Section 1: Changes from the 2010 list of designated bathing waters

Eight new bathing waters were designated in 2011:

England:

- Humberston Fitties

Wales:

- Aberdaron
- Abergele (Pensarn)
- Cilborth
- Llanrhystud
- Mwnt
- New Quay North
- Penbryn

No results were recorded at two bathing waters in England where access was closed during the 2011 season: Blackpool North (North West region) and Newhaven (South East region).

The names of 6 bathing waters in England were amended in 2011 to clarify their geographical location:

New name from 2011	Previous name
Bognor Regis (Aldwick)	Bognor Regis
Eastoke	West of Eastoke
Beachlands Central	West Beachlands
Beachlands West	West Hayling
Putsborough	Woolacombe Putsborough
Wallasey	New Brighton

In 2010 the names of 4 bathing waters in Wales were amended, but the changes were omitted from the report:

New name from 2010	Previous name
Amroth Central	Amroth
Marloes Sands	Marloes
Newport North	Newport
Poppit West	Poppit Sands

The Environment Agency's former Thames and Southern regions have merged this year to form South East region.

Section 2: Bathing season and sampling frequency

The bathing season is generally taken as being from 15 May to 30 September in England and Wales and from 1 June to 15 September in Scotland and Northern Ireland. Throughout the UK a minimum of 20 samples are usually taken throughout the season. This is in excess of the minimum requirements of the Directive.

Sampling frequency has been reduced at nine Scottish bathing waters in accordance with footnote (1) of the Annex to the Directive.

Section 3: Coliform parameters

The tables contain a numerical summary of the information required to assess compliance with the Directive's mandatory coliform standards. They are arranged to show the British coastal bathing waters in clockwise order, starting at Southernness, which is the most south-westerly bathing water in Scotland, and proceeding around Scotland, England and Wales to Skinburness in the Environment Agency North West region. The Isle of Wight waters are placed in the report between Highcliffe and Christchurch, that is to say, as the last waters in the Environment Agency South East Region. The Northern Ireland waters are reported in clockwise order from Magilligan to Cranfield Bay. The summary of the information for freshwater bathing waters is given after the information about coastal bathing waters.

For each water, the following information is given:

1. The grid reference

Total coliforms

2. Number of results
3. Median of results
4. Range of results (minimum and maximum)
5. Number of results failing to conform to the Directive's limit value

Faecal coliforms

6. Number of results
7. Median of results
8. Range of results (minimum and maximum)
9. Number of results failing to conform to the Directive's limit value

Deviations from the values referred to in Article 3 may, in accordance with Article 5(2), be excluded from the assessment of compliance, if they arise as a result of abnormal weather conditions. Under this provision, waivers were applied at two bathing waters in Scotland that would otherwise have failed to meet mandatory standards: Dunbar (East), and Elie (Harbour) and Earlsferry.

Section 4: Other mandatory parameters

The tables contain the numerical summary of results for other mandatory parameters covered by the Directive.

The Annex to the Directive provides that these parameters do not have to be measured in every case. The results are given in two columns for each parameter. The first column shows the number of observations and the second, headed "F", the number failing to comply with the Directive's imperative requirements. For surface active substances, the definition of "lasting foam" is as agreed between the Environment Agency and Defra.

Article 8 states that the requirements of the Directive may be waived in the case of certain parameters to take account of local weather, geographical conditions and natural enrichment. Waivers for transparency (indicated by an asterisk) are likely to be permanent. Colour waivers have been applied in a few Scottish cases as indicated.
