

Preliminary flood risk assessment: London Borough of Barking and Dagenham

This addendum by London Borough of Barking and Dagenham (2017) updates the council's preliminary flood risk assessment report published in 2011. Read the addendum in conjunction with the [preliminary assessment report](#).

Addendum

The preliminary flood risk assessment (PFRA) and flood risk areas (FRAs) for London Borough of Barking and Dagenham were reviewed during 2017, using all relevant current flood risk data and information.

Past flood risk

There have not been any pluvial flood events since the publication of the original PFRA report in December 2011 that have added to or changed the London Borough of Barking and Dagenham's understanding of significant flood risk in their Lead Local Flood Authority (LLFA) area.

Future flood risk

An update to the Environment Agency's Risk of Flooding from Surface Water map, along with modelling conducted by a neighbouring borough has provided the LLFA with a better understanding of the surface water flood risk. Guidance on climate change, specifically for use in the planning process and with regards to the Thames Estuary have provided the Council with new information to improve the understanding of the future impact of climate change on flood risk. Updates to the Level 1 and Level 2 Strategic Flood Risk Assessment has provided new information on long term developments to improve the Council's understanding of flood risk.

Flood risk areas (FRAs)

The following FRA has been identified for the purposes of the Flood Risk Regulations (2009) second planning cycle:

- Greater London. The FRA covers small areas of the borough to the north and east.

Other changes

There are no other changes consider important in relation to the assessment of flood risk in the area.
