Introduction

Background

This document accompanies the findings of wave 16 (2017 to 2018) of the Perceptions Survey and should be read alongside the Perceptions of AS/A levels, GCSEs and Applied General qualifications in England – Wave 16 report. This project was commissioned by Ofqual and managed by YouGov. The design template for charts used in the report was provided by Ofqual.

Context

In 2010, The Apprenticeships, Skills, Children and Learning Act 2009, established Ofqual as an independent statutory body with responsibility for the regulation of general and vocational qualifications in England and vocational qualifications in Northern Ireland, taking over the regulatory role of the Qualifications and Curriculum Authority (QCA).

Ofqual regulates general and vocational qualifications in England (and until May 2016, vocational qualifications in Northern Ireland as well).

Ofqual regulates through recognising and monitoring organisations that deliver qualifications. Ofqual collects and utilises insight on perceptions of qualifications and the qualifications system from the range of stakeholders that work with and use them.

Ofqual has continued (the survey was originally commissioned by the QCA in 2003) to annually assess teachers’, parents’, students’, the general public’s, employers’ and higher education institutions (HEIs)’ perceptions of the A level examination system and, since wave 4 (2005), perceptions of the GCSE system. This large-scale survey is unique in providing a wide overview of perceptions of general and other qualifications from the users of these qualifications.

The first part of the survey focussed on seven measures of confidence in the GCSE system and seven measures of confidence in the AS/A level system. These measures, selected through data analysis by Ofqual¹, have all been asked in a directly comparable way in waves 13, 14 and 15, and the current wave, of the Perceptions Survey, allowing for comparisons of up to four years to be made. For wave 16, the survey was expanded to collect data on the same seven measures for Applied General qualifications as well. The data from these measures have been analysed collectively to form a composite measure of confidence in the GCSE, AS/A levels and Applied General qualifications that can be tracked in future waves.

The second part of the survey asked a series of questions on different topics that covered questions on the 9 to 1 grading scale, the review of marking, moderation and appeals system, special consideration, reasonable adjustments and malpractice for GCSEs and AS/A levels, and appeals against results for Applied General qualifications. In future waves, this part of the survey, as well as the seven measures of confidence for Applied General qualifications, may change to reflect topical issues and qualifications at the time of data collection. As such, in this year’s publication ‘other

¹ See Appendix A for more details of this analysis
qualifications’ in the title refers to Applied General qualifications, and may be different from the ‘other qualifications’ included in past and future waves.

**Geographical coverage**

Ofqual regulates general and vocational qualifications in England. The focus of this project was to gain the perceptions of head teachers, teachers, young people, parents, employers, HEIs and the general public in England. Samples of these groups were drawn from within England only.

**Related statistics and publications**

A number of other statistical releases and publications relate to this one:

- Statistics on key stage 4 results, including GCSEs published by the Department for Education
- Statistics on the attainment of people aged 16 to 19 years, including exam results and performance tables published by the Department for Education

**User feedback**

Ofqual welcomes your comments or suggestions on this version of the Perceptions Survey and how to improve future versions. Please write to Ofqual at statistics@ofqual.gov.uk.

**Project objectives**

The objectives of the project were to investigate head teachers’, teachers’, students’, parents’, the general public’s, employers’ and HEIs’:

- overall perceptions and confidence in GCSE, AS/A level and Applied General qualifications taken by young people; and
- perceptions of a number of topical aspects of the qualifications system for GCSEs and AS/A levels, and for Applied General qualifications.

**Methods and data limitations**

**Overview of method**

Wave 16 of the Perceptions Survey was carried out by YouGov, on behalf of Ofqual. The survey was conducted online using YouGov’s proprietary survey system. This mirrors the approach adopted in wave 13 (2014), wave 14 (2015) and wave 15 (2016) of the Perceptions Survey.

The fieldwork was conducted between 24 October and 1 December, 2017. The fieldwork for wave 16 has been conducted over a comparable time period to wave 15.

**Sampling**

The sampling of participants was designed with a view to achieving respondent samples that were representative of the wider population. Fuller details of this sampling procedure and its effectiveness are provided in Appendix A.

The final achieved sample for each of the target groups was as follows:

- 261 head teachers
640 teachers of GCSE, A level and other academic\(^2\) and vocational qualifications\(^3\) offered to people aged 14 to 19 years (referred to throughout this report as teachers)

275 young people, defined as those aged 14 to 19 years who are studying/have studied/will study AS/A levels and/or GCSEs and/or an academic qualification defined as functional skills, Level 1/2 certificates (eg Pearson Level 1/2 BTECs and OCR Cambridge National Certificates), Level 3 tech levels (eg Pearson Level 3 BTECs and OCR Cambridge Technical Certificates) or applied general qualifications

271 parents/carers of students who are taking or who have just taken AS/A levels, GCSEs and/or other academic qualifications described above

250 academic professionals\(^4\) who had knowledge about the process of offering applicants a place on an undergraduate course at their institution (referred to throughout this report as HEIs)

262 senior/middle managers who worked for an organisation that has recruited young people (aged 16 to 25 years) in the past 12 months (referred to throughout this report as employers)

1,015 members of the public

The final achieved samples were structured to be representative of the relevant target populations. We therefore conclude that, based upon the sampling procedures, the samples delivered for head teachers, teachers, the general public, parents, students, HEIs and employers were of high quality. While the sampling approach has aimed to identify groups of participants that are representative, given that a survey of this kind captures the views only of those involved, throughout this report, perceptions attributed to stakeholder groups (for example, teachers, parents etc) are inferred from those who took part in the survey.

Survey design

The wave 16 survey was designed in conjunction with the YouGov project team. The survey covered themes explored in previous waves of the survey, namely, perceptions of qualifications and awareness of changes to the qualification system.

The design of the wave 16 survey was very similar to wave 15.

At the end of the survey, teachers and head teachers who teach Applied General qualifications in schools or colleges were asked four questions. Due to small base sizes for this group within the overall sample collected, the findings for these questions are not reported. The data for these responses are, however, included in the accompanying data tables.

\(^2\) Ofqual defines academic qualifications as qualifications that are assessed by formal examinations and moderated coursework

\(^3\) Ofqual defines vocational qualifications as qualifications that are taught in schools and colleges that prepare students for a particular type of job

\(^4\) This sample consisted of academics and a small number of admissions staff. Please see Appendix A for a description of the sample profile
A copy of all of the questions included in wave 16 of the Perceptions Survey is available in Appendix B.

**Composite confidence measure**

The first section of the report presents a composite confidence measure, which was developed as a means of quantifying overall confidence in GCSE, AS/A level and Applied General qualifications, and comparing any changes over time.

**Method**

The composite confidence measure was calculated based on seven criteria that were measured in waves 14, 15 and 16: understanding, trust, maintenance of standards, preparation for further study, preparation for work, skill development, and accuracy in marking.

These criteria were presented to respondents as seven separate statements within a scale-based question, which ranged from strong agreement to strong disagreement. These questions were asked separately for GCSE, AS/A level and Applied General qualifications. Based on respondents’ selection, responses were assigned a score between 1 and 5 for each of the seven criteria. ‘Don’t know’ responses were excluded from the calculation. The scoring system is detailed below.

- **Strongly agree = 5**
- **Agree = 4**
- **Neither agree nor disagree = 3**
- **Disagree = 2**
- **Strongly disagree = 1**

Next, an average of the individual scores for the seven criteria was calculated for each respondent, which represents the overall confidence measure. This was done separately for GCSE and AS/A level and Applied General qualifications.

Finally, an average of the overall scores for all respondents was calculated to produce one confidence measure per stakeholder, each for GCSE, AS/A level and Applied General qualifications. An average of these stakeholder confidence measures was produced to give an overall confidence measure. This method has been applied to the data since wave 13 and allows the comparison of confidence levels over time. The current survey compares overall confidence levels over the three most recent waves of the Perceptions Survey.

**Guidance on analysis**

The survey was undertaken with seven different sample groups. These data have been combined into one ‘All’ group referred to as ‘stakeholders’ in the text of this report. Data for each sample group have been combined and weighted so that each group represents an equal proportion within the ‘stakeholder’ group.

Throughout this report, percentages are rounded to the nearest whole number. Due to rounding, percentages may not always add up to 100%. The report summarises the data for each question...
using charts and tables. The intention of this report is to summarise the main themes in the data and not produce a full replication of the entire data collected.

Reported differences are based on statistical significance testing as tested at the 95% confidence level. Whenever a difference between two groups is reported, this refers to a statistically significant difference.

For the charts reporting proportions of ‘Agree’ and ‘Disagree’ responses, ‘Don’t know’ responses are not included in the figure. As such, proportions may not add up to 100%.

Section specific background information

Section 1: Composite confidence measure

Stakeholders’ confidence in GCSEs, AS/A Levels and Applied General qualifications were calculated separately. All stakeholders were asked to report their levels of agreement with seven statements for GCSE, AS/A Level, and Applied General qualifications relating to: understanding, trust, maintenance of standards, preparation for further study, preparation for work, skill development, and accuracy in marking. The composite confidence measure was calculated based on stakeholders’ levels of agreement with the seven statements.

Section 2: Perceptions of GCSEs

All stakeholders were asked to report their levels of agreement with seven statements about GCSE relating to: understanding, trust, maintenance of standards, preparation for further study, preparation for work, skill development, and accuracy in marking.

Section 3: Perceptions of AS/A levels

All stakeholders were asked to report their levels of agreement with seven statements about AS/A levels relating to: understanding, trust, maintenance of standards, preparation for further study, preparation for work, skill development, and accuracy in marking.

Section 4: Perceptions of Applied General qualifications

All stakeholders were asked to report their levels of agreement with seven statements about Applied General qualifications relating to: understanding, trust, maintenance of standards, preparation for further study, preparation for work, skill development, and accuracy in marking.

Section 5: GCSE 9 to 1 grading scale

A new grading system is being introduced gradually for GCSEs, with the first subjects, mathematics, English language, and English literature, first examined in summer 2017. Since wave 14, including in the current wave, stakeholders were asked about their awareness and knowledge of this new grading system.

Section 6: The review of marking, moderation and appeals against GCSE and AS/A level results

A range of post-results services are currently available to schools and colleges who have concerns about the marks awarded to their students. These services include a clerical check, a review of
marking/moderation, and access to marked scripts for some qualifications. These services were, until recently, known as “Enquiries about Results”. If a centre or private candidate is not happy with the outcomes of the review of marking or moderation, they can submit and appeal for these results. Collectively these services are called Reviews of Marking and Moderation, and Appeals (ROMMA).

Section 7: Special consideration, reasonable adjustments and malpractice for GCSE and AS/A level qualifications

Special consideration is an adjustment to the way in which an examination or assessment is taken, or a post-exam adjustment to a student’s mark or grade to reflect temporary injury, illness or other indisposition at the time of the exam/assessment.

Awarding organisations have a duty to make reasonable adjustments for disabled students taking their qualifications and are made in cases where a student who is disabled would be at a substantial disadvantage in comparison with someone who is not disabled in an assessment. An example of this would be providing a Braille paper.

Any breach of the regulations that might undermine the integrity of an exam constitutes malpractice.

Those head teachers and teachers who teach GCSEs or AS/A levels were asked to what extent they agreed or disagreed with statements about special consideration, reasonable adjustments and malpractice for GCSEs and AS/A levels.

Section 8: Appeals against results for Applied General qualifications

Like for GCSE and AS/A level qualifications, if a centre or private candidate is not happy about the results of a review of marking or moderation for Applied General qualifications they can submit an appeal for these results.

---

5 Being disabled under the Equality Act 2010 is defined as having a physical or mental impairment that has a ‘substantial’ and ‘long-term’ negative effect on the ability to do normal daily activities.
Glossary

**Applied General qualifications**: Applied general qualifications are level 3 qualifications. These include, but are not restricted to, Pearson Level 3 BTECs and OCR Cambridge Nationals.

**Base size**: The number of respondents answering the question.

**Effective base**: When sampling is undertaken, it creates a ‘design effect’ that can impact the reliability of the information collected. The effective base size is the base size that is left when removing this effect. It is used for significance testing.

**General (academic) qualifications** – The definition of AS/A levels needs to state that reformed qualifications have started to be brought in in certain subjects.

**Grading**: The process of grouping students into overall performance categories. Currently, the system for GCSEs and AS/A levels awards a grade of A* (highest), A, B, C, D, E, F, G. Reformed GCSEs will follow a different grading system of 9 to 1, with 9 being the highest grade. For more information on this new grading system, see the [Ofqual website](https://www.gov.uk/government/organisations/ofqual).

**Marking**: The process of giving a student credit for their right answers according to the requirements set out in a mark scheme.

**Sample frame**: The way that the population is structured before a sample for the survey is drawn.

**Statistically significant**: If a result is termed statistically significant, it is unlikely to have occurred at random. The process of determining whether a result is statistically significant is known as significance testing.

**Vocational and technical qualifications**: this term encompasses qualifications that are not ‘general’. These normally have a more vocational focus, and can include qualifications designed to support the development of practical skills in English, maths and ICT (functional skills qualifications) as well as technical, professional or occupational qualifications.

**Weighting**: The process of making some respondents in a survey more or less important than others to accurately reflect their position in the population being surveyed.
Appendix A – Technical report

Appendix A outlines the composition of the achieved sampling and additional information on the methods used in wave 16.

Head teachers and teachers sample

Sample coverage

The sample was designed to be a representative sample of head teachers/deputy heads and teachers of AS/A levels, GCSEs and other academic and vocational qualifications in secondary schools and colleges across England. This provided coverage across the following types of establishment:

- Local authority maintained schools
- Academy and Free schools
- Independent schools
- FE colleges and sixth form centres

To make sure that the survey was representative of establishments teaching qualifications for people aged 14 to 19 years, only certain types of schools/colleges were eligible for the survey. Eligible types of schools and colleges matched the definition used in previous years of the survey, that is, secondary and middle-deemed-secondary schools, academies teaching key stage 4/post-16, independent schools teaching key stage 4/post-16, and post-16 institutions.

Sample frame

The samples of head teachers and teachers were drawn from two sources.

1. Education Company Education list

Firstly, contacts in schools were drawn from the Education Company’s Education List. Containing over 5 million education data profiles, including 400,000 named teachers and lecturers including email addresses, and details and profiles of more than 100,000 schools profiles, this list is the most accurate and comprehensive education data set available anywhere in the UK.

This was used as a database to select contacts in schools to be surveyed. As data is held on school characteristics, this allowed us to develop a sample that was representative of school size, type and region. Sample targets were set and the total sample was structured to meet the proportions relevant to the school population in England. The database contained named contacts with generic school email addresses that allowed the survey to be targeted at specific subject teachers in the specified schools.

2. YouGov Panel

The survey was also conducted using teachers and head teachers registered to the YouGov panel, who have consented to participate in surveys with YouGov. A quota sampling approach was used on to the sample drawn from the YouGov panel to ensure broad representativeness by school type, size and region.
Sample selection

The sample was selected to ensure the representativeness of the results in line with the school and teacher population in England. The sample frame was based upon official government statistics on the school and teacher population. The sample frame was stratified by the following variables:

- School type (maintained, academy, special school / PRU, independent)
- English region

To maintain consistency with the sampling approach used since wave 13 of the Perceptions survey two samples were drawn that differed in characteristics between the head teacher (senior leader) sample and the teacher sample. Whilst drawing a sample of schools was appropriate for the head teacher survey, it was decided that in order to examine the views of a representative sample of teachers in England, this would require selecting multiple teachers working at the larger establishments. This meant that the sampling design for the teacher survey took account of the number of teachers working in each school/establishment.

Using the Education List database, a random stratified sample of school contacts was drawn in line with the above parameters. The sample drawn was compared with the DfE school population statistics to ensure they were broadly in line. In total a sample of 8,000 school contacts that matched the sample criteria was drawn at random from the Education List database.

The head teacher sample was drawn at random from the list of eligible schools. As previously discussed the teacher sample was drawn to take into account the numbers of teachers at different types of establishment and multiple teacher contacts were included for schools of a larger size.

Alongside the sample drawn from the Education List database a random sample of 4,000 head teachers (senior leaders) and teachers from the YouGov panel was contacted to take part in the survey. These respondents were contacted at random to take part and sampled to be proportionate to the school population and the teacher population.

Achieved sample size and weighting

The unweighted achieved sample size and breakdown of the samples by key characteristics is shown in Table 1. Alongside this the weighted base and weight factors applied are also shown.

The unweighted base shows the number of completed surveys and the weighted base the adjustments that have been made to correct for any sample bias. The largest weight factor demonstrates where the weighting has had a greater impact due to the unweighted based being lower than what would be expected in a representative sample.

Public, parents and young people’s samples

Sample coverage
The public, parents and young people samples were drawn from the YouGov online panel of over 800,000 adults who have consented to participate in surveys with YouGov.

Three distinct samples were drawn. These were:

1. A nationally representative survey sample of adults aged 16 years or over in England - this was sampled to be representative of the adult population in England using YouGov’s English weighting profile of age interlocked with gender, region and social grade.

2. A survey sample of young people aged 14 to 19 years who were just about to take, were currently taking or had recently taken AS/A levels and/or GCSEs and/or an academic qualification defined as functional skills, Level 1/2 certificates, Level 3 tech levels or Applied General qualifications - this was sampled to be representative of England by gender, age within the age range and region using England representative statistics.

3. A survey sample of parents/carers of young people who met the ‘student’ criteria defined above - this was sampled to be representative of parents by gender, social grade and English region.

Sample frame
The samples of members of the public, parents’ and young people were drawn from the YouGov panel. Over the last ten years, YouGov has carefully recruited a panel of over 800,000 UK adults to take part in our surveys.

Sample selection
The samples were selected to ensure the representativeness of the results in line with the actual population of each sample group in England.

For nationally representative samples, YouGov draws a sub-sample of the panel that is representative in terms of age and gender combined, social class and region, and invites this sub-sample to complete a survey.

YouGov has a proprietary, automated sampling system that invites respondents based on their profile information and how that aligns with targets for surveys that are currently active. Respondents are automatically, randomly selected based on survey availability and how that matches their profile information.

Achieved sample size and weighting
The achieved sample size and breakdown of the public, parents and young people samples by key characteristics and associated weighting factors is shown in Tables 2, 3 and 4.

The unweighted base shows the number of completed surveys and the weighted base the adjustments that have been made to correct for any sample bias. The largest weight factor demonstrates where the weighting has had a greater impact due to the unweighted base being lower than what would be expected in a representative sample.

**Employer sample**

**Sample coverage**

The employer sample was designed to be representative of the English business population by organisation size and sector. The sample definition ensured that only those in middle management and above roles, with the ability to answer on behalf of their organisation were eligible to take the survey. A further criterion was added to ensure that each employer had recruited a young person aged 16 to 24 years in the last 12 months.

**Sample frame**

The employer sample was drawn from the YouGov business panel which contains over 9,000 senior decision makers and 8,000 employees with decision making responsibility for HR / personnel within their organisation.
Sample selection

The sample was selected to ensure the representativeness of the results in line with the business population in England using the following criteria drawn from the Office of National Statistics Business Population Statistics.

Employer size – proportionate number of employers in the 2 to 9, 10 to 49, 50 to 99, 100 to 249 and 250+ employee size band brackets; this was calculated using the percentage on employment that each size band represents rather than the number of enterprises within each.

Sector – broad sector coverage was ensured across the private, public and third/voluntary sectors.

Achieved sample size and weighting

The achieved sample size and breakdown of the employer sample by key characteristics and associated weighting factors are shown in Table 5 below.

The unweighted base shows the number of completed surveys and the weighted base the adjustments that have been made to correct for any sample bias. The largest weight factor demonstrates where the weighting has had a greater impact due to the unweighted based being lower than what would be expected in a representative sample.

HEI sample

Sample coverage

The HEI sample was designed to be representative of the English university population by university type. The type of university was drawn from official Higher Education Statistics Authority statistics and universities who responded to the survey were grouped into the following categories:
Perceptions of A levels, GCSEs and other qualifications in England – Wave 16

- Russell group
- Other old
- Post 1992/new
- Other HEI

The sample definition ensured that only those in academic roles with responsibility for and knowledge of the admissions process were eligible to complete the survey.

Sample frame
The HEI sample was drawn from two sources:

- The YouGov education panel
- HEIs with contacts drawn from the Oscar Research data base of public sector contacts - Oscar Research are the UK Public Sector database specialists. They provide the largest, and most accurate, database of Government and Public Sector contacts and organisations in the UK

Sample selection
The samples were selected to ensure the representativeness of the results in line with the university population in England by university type. No further restrictions were placed on the sample but throughout the fieldwork period responses were monitored by job role and subject specialism to ensure broad coverage across these factors.

Achieved sample size and weighting
The achieved sample size and breakdown of the HEI sample by key characteristics and associated weighting factors is shown in Table 6 below.

The unweighted base shows the number of completed surveys and the weighted base the adjustments that have been made to correct for any sample bias. The largest weight factor demonstrates where the weighting has had a greater impact due to the unweighted based being lower than what would be expected in a representative sample.

Appendix B – Survey

Perceptions of A level qualifications

This first section asks about your perceptions of AS/A level qualifications.

[q4] To what extent do you agree or disagree with the following statements?

- [q4_1] AS/A levels are well understood by people
- [q4_2] AS/A levels are trusted qualifications
- [q4_3] AS/A level standards are maintained year on year
- [q4_4] AS/A levels are good preparation for further study
- [q4_5] AS/A levels are good preparation for work
- [q4_6] AS/A levels develop a broad range of skills for students
- [q4_7] The marking of AS/A levels is accurate

<1> Strongly agree
<2> Agree
<3> Neither agree nor disagree
<4> Disagree
<5> Strongly disagree
<98> Don’t know

Perceptions of GCSE qualifications

This section asks about your perceptions of GCSE qualifications.

[q6] To what extent do you agree or disagree with the following statements?

- [q6_1] GCSEs are well understood by people
- [q6_2] GCSEs are a trusted qualification
- [q6_3] GCSE standards are maintained year on year
- [q6_4] GCSEs are good preparation for further study
- [q6_5] GCSEs are good preparation for work
- [q6_6] GCSEs develop a broad range of skills for students
- [q6_7] The marking of GCSEs is accurate

<1> Strongly agree
<2> Agree
<3> Neither agree nor disagree
<4> Disagree
<5> Strongly disagree
<98> Don’t know

The new 9-1 grading scale

This section asks about your perceptions of GCSE reform. The first results of the reformed GCSEs in English language, English literature and Mathematics were issued in August 2017.

[q70_wave14] Are you aware of the new 9 to 1 grading scale used in new GCSEs?
Perceptions of A levels, GCSEs and other qualifications in England – Wave 16

<1>Yes
<2>No
<3>Don’t know

**#Base: all who are aware of the new grading system**

[Q70b_wave14] Based on your understanding of the 9 to 1 grading scale, what is the best grade that students can get?

<1> 9
<2> 1
<3 fixed> Don’t know

**#Base: all who are aware of the new grading system**

[Q70c] Do you know when the 9 to 1 grading scale will be used for all GCSE subjects?

<1>Yes
<2>No
<3>Don’t know

**#Base: all who know when the 9 to 1 grading scale will be used for all GCSE subjects**

[Q70d] Please select the year in which you think the 9 to 1 grading scale will be used for all GCSEs.

<1> 2018
<2> 2019
<3> 2020
<4> 2021
<5> 2022
<6> Don’t know

---

**The review of marking, moderation and appeals**

[q_review1] Are you aware that there is a review of marking, moderation and appeals system (formerly known as Enquiries about Results and Appeals) for GCSE and AS/A level results?

<1>Yes
<2>No
<3>Don’t know

The following questions are about the review of marking, moderation and appeals system (formerly known as Enquiries about Results and Appeals).

A range of post-results services are currently available to schools and colleges who have concerns about the marks awarded to their learners. These services include a clerical check, a review of marking and access to marked scripts for some qualifications.

**#Base: all who are aware of the appeals system**

[q_review2] To what extent do you agree or disagree with the following statements?

- [q_review2_1] The review of marking, moderation and appeals system (formerly known as Enquiries about Results and Appeals) for GCSEs is fair
- [q_review2_2] The review of marking, moderation and appeals system (formerly known as Enquiries about Results and Appeals) for AS/A levels is fair

<1> Strongly agree
<2> Agree
A number of changes have been made to the review of marking, moderation and appeals system, and more changes are planned for future examination series.

#Base: all who are aware of the appeals system

[Q_review3_dynamic] To what extent do you agree or disagree with the following statement?

I have adequate information about the review of marking, moderation and appeals system (formerly known as Enquiries about Results and Appeals) for GCSEs and AS/A levels

- [1] Strongly agree
- [2] Agree
- [3] Neither agree nor disagree
- [4] Disagree
- [5] Strongly disagree
- [98] Don’t know

#Base: all who are aware of the appeals system

[Q_review4] Are you aware that, for 2017, a school or college whose concerns about marking in an AS or A level were not addressed during a review of marking could appeal to the exam board on the ground of a marking error as well as on the ground of a procedural failing by the exam board?

- [1] Yes
- [2] No
- [3] Don’t know

Special consideration, reasonable adjustments and malpractice for AS/A levels and GCSEs

The following questions are about special considerations and reasonable adjustments.

#Base: Teachers and Head teachers who teach GCSEs or AS/A levels

[GQ1] To what extent do you agree or disagree with the following statements? (Please click on the icon if you want to see an explanation. Please click the icon again to remove the explanation)

- [GQ1_1] I have adequate information about the arrangements that are available for a GCSE or AS/A level student that is eligible for special consideration

- [GQ1_2] In the current special consideration system, the right arrangements are made for the right GCSE and AS/A level students

- [GQ1_3] Special consideration makes the qualification system fairer for all GCSE and AS/A level students

- [GQ1_4] I have adequate information about the adjustments that are available for a GCSE or AS/A level disabled student that is eligible for reasonable adjustments

- [GQ1_5] Currently, the right reasonable adjustments are made for the right GCSE and AS/A level disabled students

- [GQ1_6] Reasonable adjustments make the qualification system fairer for all GCSE and AS/A level students
Perceptions of A levels, GCSEs and other qualifications in England – Wave 16

Definitions shown to respondents
* Defined as: 'Special consideration is a post-examination adjustment to a candidate’s mark or grade to reflect temporary illness, temporary injury or some other event outside of the candidate’s control at the time of the assessment, which has had, or is reasonably likely to have had, a material effect on a candidate’s ability to take an assessment or demonstrate his or her normal level of attainment in an assessment.

** Defined as: ‘Being disabled under the Equality Act 2010 is defined as having a physical or mental impairment that has a ‘substantial’ and ‘long-term’ negative effect on the ability to do normal daily activities.

*** Defined as: ‘The Equality Act 2010 requires an awarding body to make reasonable adjustments where a candidate, who is disabled within the meaning of the Equality Act 2010, would be at a substantial disadvantage in comparison to someone who is not disabled. The awarding body is required to take reasonable steps to overcome that disadvantage. An example would be a Braille paper which would be a reasonable adjustment for a vision impaired candidate who could read Braille.

The following questions are about malpractice.

#Base: Teachers and Head teachers who teach GCSEs or AS/A levels

[GQ2] To what extent do you agree or disagree with the following statements?
- [GQ2_1] I have adequate information about what constitutes malpractice for GCSEs and AS/A levels
- [GQ2_2] I know to whom I should report an incident of malpractice for GCSEs and AS/A levels
- [GQ2_3] I am confident that incidents of malpractice are fairly investigated for GCSEs and AS/A levels
- [GQ2_4] I am confident malpractice is properly reported when it happens in GCSEs and AS/A levels

Perceptions of Applied General qualifications

The next few questions are about Applied General qualifications.

Applied General qualifications include, but are not restricted to, Pearson BTECs and OCR Cambridge Nationals. They are taught in schools and colleges at level 3 (key stage 5) and are identified by the Department for Education as ‘Applied Generals’ for the purpose of performance table reporting.

[Q8] To what extent do you agree or disagree with the following statements?
- [Q8_1] Applied General qualifications are well understood by people
- [Q8_2] Applied General qualifications are trusted qualifications
- [Q8_3] Applied General qualifications standards are maintained year on year
- [Q8_4] Applied General qualifications are good preparation for further study
- [Q8_5] Applied General qualifications are good preparation for work
- [Q8_6] Applied General qualifications develop a broad range of skills for students
- [Q8_7] The marking of Applied General qualifications is accurate

<1> Strongly agree
<2> Agree
<3> Neither agree nor disagree
<4> Disagree
<5> Strongly disagree
<98> Don’t know

**Appeals against results for Applied General qualifications**

[Q9] Are you aware of the appeals against results process for Applied General qualifications in schools and colleges?
<1> Yes
<2> No
<3> Don’t know

The following questions are about appeals against results for Applied General qualifications.

**#Base: all who are aware of the appeals against results process**

[Q10] To what extent do you agree or disagree with the following statements?

- [Q10_1] I have adequate information about the appeals against results process for Applied General qualifications taught in schools and colleges
- [Q10_2] I am confident that appeals are dealt with fairly for Applied General qualifications in schools and colleges

<1> Strongly agree
<2> Agree
<3> Neither agree nor disagree
<4> Disagree
<5> Strongly disagree
<98> Don’t know

**Malpractice in Applied General qualifications**

These last questions are about malpractice in Applied General qualifications.

**#Base: Teachers and Head teachers who teach Applied General qualifications in schools or colleges**

[Q11] To what extent do you agree or disagree with the following statements?

- [Q11_1] I have adequate information about what constitutes malpractice for Applied General qualifications taught in schools and colleges
- [Q11_2] I know to whom I should report an incident of malpractice for Applied General qualifications taught in schools and colleges
Perceptions of A levels, GCSEs and other qualifications in England – Wave 16

-[Q11_3] I am confident that incidents of malpractice are fairly investigated for Applied General qualifications taught in schools and colleges
-[Q11_4] I am confident malpractice is properly reported when it happens in Applied General qualifications taught in schools and colleges

<1>Strongly agree
<2>Agree
<3>Neither agree nor disagree
<4>Disagree
<5>Strongly disagree
<98>Don’t know
