This statistical release presents information relating to the gender, ethnicity, nationality, religion and age of Military Personnel employed by the Ministry of Defence (MOD). This publication meets the Department's obligations under the Public Sector Equality Duty to provide information on its workforce identified by the Equality Act 2010.

Information is provided on the number of Military Personnel in (defined as the strength), joining (intake) and leaving (outflow) the UK Armed Forces. Statistics are included for UK Regular Forces and Future Reserves 2020 (FR20) personnel. Further statistics can be found in the Excel Tables which accompany this report.

Some statistics which were previously published in the Diversity Dashboard (Military), Annual and Quarterly Personnel Reports, Service Personnel Bulletin 2.01, Annual maternity report and the UK Reserve Forces and Cadets report can now be found in this publication.

Due to the introduction of the Defence Recruitment System, all 1 April 2018 (and 31 March 2018) data is considered provisional and may be revised at a later date. Ethnicity data has been especially effected by this. These figures will be confirmed and where appropriate revised in a future edition of this publication.

Key Points and Trends

### Gender

▲ **10.4%**
Female representation in the UK Regular Forces
As at 1 April 2018
This has increased by 0.2% as part of a longer term trend since 1 April 2017 (10.2%)

▲ **14.3%**
Female representation in the Future Reserves 2020
As at 1 April 2018
This has increased by 0.3 percentage points compared with 1 April 2017 (14.0%)

▲ **12.2%**
Of total intake into the combined UK Regular Forces and the Future Reserves 2020 were female in the 12 months to 31 March 2018
(A 15.0 per cent Female Intake Target for 2020 has been set - see page 4)

### Ethnicity

▲ **7.6%**
Black, Asian and Minority Ethnic (BAME) representation in the UK Regular Forces
As at 1 April 2018
This has increased by 0.4 percentage points since 1 April 2017 (7.2%)

▲ **5.5%**
BAME representation in the Future Reserves 2020
As at 1 April 2018
This has remained stable since 1 April 2017 (5.4%)

▲ **8.4%**
Of total intake into the combined UK Regular Forces and Future Reserves 2020 were BAME in the 12 months to 31 March 2018
(A 10.0 per cent BAME Intake Target for 2020 has been set - see page 4)
Introduction

This publication contains diversity information on the strength, intake and outflow of the UK Regular Forces and the Future Reserves 2020 (FR20) population, both overall and for each of the Services, including the Royal Navy / Royal Marines (RN/RM), Army and Royal Air Force (RAF). Statistics are for trained and untrained personnel unless otherwise stated. Ethnic origin and religion data are self-reported on the Joint Personnel Administration (JPA) database. Any percentages or figures quoted within this report relate to those with a known ethnic origin, religion or nationality unless otherwise stated.

Detailed statistics and historic time series can be found in the Excel tables which accompany this report; further historic statistics will be added in due course. In the meantime, historic statistics can be found in the following archived publications: Monthly, Quarterly and Annual Personnel Reports, UK Reserve Forces and Cadets, Service Personnel Bulletin 2.01, Service and Civilian Bulletin 2.03, UK Armed Forces Maternity Report, Diversity Dashboard (Military) and Quarterly Location Statistics. The glossary contains definitions of terminology used in this publication. The next edition of this publication is provisionally scheduled to be published on GOV.UK at 9:30am on 30th May 2018. A calendar of upcoming MOD statistical releases can be found on GOV.UK.

Note: Due to the introduction of the Defence Recruitment System, 1 April 2018 (and 31 Mar 2018) data is considered provisional and may be revised at a later date. These figures will be confirmed and where appropriate revised in a future edition of this publication.
Background and Context

Diversity statistics are reported to meet the Department’s obligations under the Public Sector Equality Duty to provide information on its workforce in relation to the protected characteristics identified by the Equality Act 2010. Further information relating to the Public Sector Equality Duty can be found at: http://www.equalityhumanrights.com/advice-and-guidance/public-sector-equality-duty/

MOD publicises the importance placed on the Armed Forces being appropriately representative of the diverse society they exist to defend; and states that ‘operational effectiveness depends on cohesion and teamwork, which are enhanced by treating everyone fairly, with dignity and respect’.

Army Trained Strength

On 29th June 2016, the MOD announced that the Army will in future plan to use Regular and Reserve Phase 1 trained personnel in response to crises within the UK. Following this, the term ‘Trained Strength’ will include all Army personnel trained in the core function of their Service (i.e. those who have completed Phase 1 training). The MOD has consulted on these changes and the resultant impact it will have on this publication and a consultation response was published on 7 November 2016.

Army personnel who have completed Phase 1 training (basic Service training) but not Phase 2 training (trade training), are now considered Trained personnel. This change will enable the Army to meet the SDSR 15 commitment to improve support to UK resilience. The Trained Strength definition for the Royal Navy, RAF, Maritime Reserve and RAF Reserves has not changed, reflecting the requirement for their personnel to complete Phase 2 training to be able to fulfil the core function of their respective Services.

Recent changes to the structure of the UK Armed Forces

In order to meet the manpower reduction targets set out in SDSR 2010, the Three Month Exercise (3ME) and Army 2020 (A2020) a redundancy programme coupled with adjusted recruiting (intake) and contract extensions were set. The redundancy programme is now complete. On 23rd November 2015, the MoD published the National Security Strategy and Strategic Defence and Security Review 2015. SDSR 2015 outlines plans to uplift the size of the Regular Armed Forces, setting targets for a strength of 82,000 for the Army, and increasing the Royal Navy/Royal Marines (RN/RM) and RAF by a total of 700 personnel. The SDDR 2015 Defence Key Facts booklet announced new targets for 2020 for each of the Services. In parallel, there have been increases in the Reserve populations; the Future Reserves 2020 (FR20) programme aims to increase the size of the Reserve Forces. Further personnel statistics and information on these changes can be found in Quarterly Service Personnel Statistics.

Gender

The former Prime Minister announced on 8 July 2016 that the exemption on women serving in ground close combat roles would be lifted, with roles opening up on an incremental basis starting with the Royal Armoured Corps. The decision to lift the exclusion was on the basis of equality of opportunity and maximising talent. Roles that were previously excluded to women were the Royal Marines General Service, the Household Cavalry and Royal Armoured Corps, the Infantry and the Royal Air Force Regiment. From November 2016 women are able to join the Royal Armoured Corps, both Regular and Reserve. The remaining ground close combat roles will open to women in early 2018, once additional health mitigations are in place. The RAF brought this forward and the RAF Regiment Royal Armoured Corps, both Regular and Reserve. The remaining ground close combat roles will open to women in

Ethnic origin and Nationality

Under the SDSR 2010, one of the areas reviewed was the Commonwealth recruitment rules. The MOD reintroduced the five-years UK residency requirement for future new recruits from Commonwealth countries in July 2013. This did not affect personnel already serving, or going through the recruitment process at the time of the announcement, those from the Republic of Ireland or for the Brigade of Gurkhas. More recently, this residency requirement has been waived to allow for 200 Commonwealth citizens per annum to be recruited to fill a limited number of roles in the Regular Armed Forces which require specialist skills. For further information, see the written statement by Minister of State for the Armed Forces on 12 May 2016 and the links below. http://www.parliament.uk/business/publications/written-questions-answers-statements/written-statement/Commons/2016-05-12/HCWS726/ www.gov.uk/government/news/uk-residency-rules-for-armed-forces-recruits www.gov.uk/government/publications/armed-forces-arf/armed-forces-arf--2

Information on the nationality eligibility criteria for each of the Services is available at:

http://www.royalnavy.mod.uk/careers/joining/get-ready-to-join

http://www.army.mod.uk/join/How-to-join.aspx

https://www.raf.mod.uk/recruitment/how-to-apply/eligibility-check/
Measuring Performance Against the 2020 Diversity Intake Targets

Background
Targets were set in summer 2015 to increase the diversity of personnel joining the UK Regular Forces and Future Reserves 2020 by 2020. The 2020 targets are:

- To increase female personnel to 15 per cent of total intake by 2020. This target has been set by the Minister of State for the Armed Forces.
- To increase Black, Asian and Minority Ethnic (BAME) personnel to at least 10 per cent of total intake by 2020, with an eventual target of 20 per cent. This target was set by the Prime Minister as part of the wider BME 2020 Vision.

This statistical release includes monitoring of progress against these targets. Statistics are for the 12 months ending 31 March 2018. Statistics on ethnic origin are self-declared by personnel and are as recorded on the Joint Personnel Administration (JPA) database. Please see Excel Tables 30 and 31 and the single departmental plan for more information: https://www.gov.uk/government/publications/mod-single-departmental-plan-2015-to-2020/single-departmental-plan-2015-to-2020.

Due to the introduction of the Defence Recruitment System (DRS) latest data (especially ethnicity data), are considered provisional and subject to review for this release of Biannual Diversity Statistics.

Female Intake
Since the 12 months ending 31 March 2016, when target monitoring began, the proportion of females joining the UK Regular Forces and Future Reserves 2020 has increased by 1.0 percentage point from 11.2% to 12.2%.

BAME Intake
Since the 12 months ending 31 March 2016, when target monitoring began, the proportion of BAME personnel joining the UK Regular Forces and Future Reserves 2020 has increased by 2.7 percentage points from 5.7% to 8.4%.

A total of 95.3 per cent of intake into the UK Regular Forces and the Future Reserves 2020 combined, had a known ethnicity on intake, in the 12 months to 31 March 2018.

Notes
1. UK Regulars comprise Full time Service personnel, including Nursing Services, but excluding Full Time Reserve Service (FTRS) personnel, Gurkhas, mobilised Reservists, Military Provost Guard Service (MPGS), Locally Engaged Personnel (LEP), Non Regular Permanent Staff (NRPS), High Readiness Reserve (HRR) and Expeditionary Forces Institute (EFI) personnel. Unless otherwise stated, includes trained and untrained personnel.
2. Intake to UK Regular Forces comprises new entrants, re-entrants, direct trained entrants (including Professionally Qualified Officers) and intake from the reserves. It excludes all movements within the Regular Forces; including flows from the untrained to trained strength, transfers between Services and flows from Ranks to Officer due to promotion.
3. Future Reserves 2020 includes volunteer reserves who are mobilised, HRR and volunteer reserve personnel serving on ADC or FTRS contracts. Sponsored Reserves who provide a more cost effective solution than volunteer reserve are also included in the Army Reserve FR20. Non Regular Permanent Staff (NRPS), Expeditionary Forces Institute (EFI) and University Officer Cadets and Regular Reservists are excluded.
4. Intake to Future Reserves 2020 Forces comprises new entrants, Regular to Reserve transfers, Reserve re-joiners, and Reserve personnel joining from another part of the Reserves that are not included in the FR20 target population.
Gender

UK Regular Forces and Future Reserves 2020 Strengths

At 1 April 2018, 10.4 per cent of the UK Regular Forces were female (15,270 personnel), remaining stable since April 2017. Figure 3 shows that the RAF has the greatest proportion of female personnel followed by the RN/RM and the Army. This is partly explained by historic restrictions on roles available to women and the nature of the roles in each of the Services (see Background, page 3).

In comparison, 14.3 per cent of the Future Reserves 2020 were female (5,180 personnel), 3.9 percentage points higher than the UK Regular Forces. The number of females in the Future Reserves 2020 has increased at the same rate as the males and as a result the proportion of females has remained fairly stable since 1 October 2012. Figure 3 shows that the RAF has the greatest female representation for both UK Regular Forces and the Future Reserves 2020.

Figure 3: Proportion of Females in the UK Regular Forces and Future Reserves 2020, at 1 April 2018

At 1 April 2018, there was a greater proportion of female Officers in the Future Reserves 2020 (14.3 per cent) than the UK Regular Forces (10.4 per cent). Compared with the UK Regular Forces, the Future Reserves 2020 has a higher female representation of Officers in every Service as shown in Figure 4. This pattern has remained stable since October 2012.

Since October 2012, the proportion of female Officers in the UK Regular Forces and the Future Reserves 2020 has increased by 0.8 percentage points. There has been a sharp increase of 7.4 percentage points in the proportion of female Officers in the RAF Reserves. The Maritime Reserve has decreased by 2.0 percentage points whereas the Army Reserve has remained broadly stable.

Figure 5: UK Regular Forces split by Gender and NATO Rank, as at 1 April 2018

Figure 5 shows the representation of females in the UK Regular Forces by NATO rank. Within Other Ranks, there is a fairly similar proportion of females across the senior (9.7 per cent) and junior (9.9 per cent) NATO ranks. However, within the Officers Rank, female representation in Junior Officer ranks is 9.8 percentage points higher than the Senior Officers.
Gender

Intake and Outflow

UK Regular Forces

In the 12 months to 31 March 2018, 1,320 female personnel joined the UK Regular Forces; 10.7 per cent of total intake. This has increased by 1.3 percentage points compared with the 12 months to 31 March 2017. Intake of female personnel is higher for Officers (15.0 per cent), than for Other Ranks (10.1 per cent).

In the 12 months to 31 March 2018, female intake was:

⇒ 270 personnel (8.8 per cent) into the RN/RM
⇒ 740 personnel (10.2 per cent) into the Army
⇒ 320 personnel (15.2 per cent) into the RAF

Figure 6 shows that the same number of females are joining the armed regular forces as are leaving. Therefore net flow is zero.

Female personnel accounted for 8.7 per cent of all outflow from the UK Regular Forces in the 12 months to 31 March 2018, a decrease of 0.4 percentage points compared with the 12 months to 31 March 2017 (9.1 per cent).

Future Reserves 2020

In the 12 months to 31 March 2018, 860 female personnel joined the Future Reserves 2020; this is 15.5 per cent of total intake. Intake of female personnel is higher for Officers (19.6 per cent), than for Other Ranks (14.7 per cent).

In the 12 months to 31 March 2018, female intake was:

⇒ 100 personnel (14.0 per cent) into the FR20 Maritime Reserve population
⇒ 600 personnel (14.2 per cent) into the FR20 Army Reserve population
⇒ 160 personnel (23.1 per cent) into the FR20 RAF Reserve population

Figure 7 shows that the number of females joining the Future Reserves 2020 has fallen by 160 personnel since the 12 months to 31 March 2017. The number of female personnel joining the Future Reserves 2020 (intake) was initially lower than the number of females leaving (outflow). A crossover occurred in the 12 months to 30th September 2014, since then intake of female personnel has remained greater than outflow; Resulting in the number of females on strength increasing.
Ethnic Origin and Nationality

UK Regular Forces and Future Reserves 2020 Strengths

Black, Asian and Minority Ethnic (BAME) personnel accounted for 7.6 per cent of the UK Regular Forces (10,970 personnel), at 1 April 2018. Since 2009, Gurkha personnel have been able to transfer into the Army; this can partially explain the larger proportion of BAME personnel in the Army compared with the other UK Regular Services, see Figure 8.

As at 1 April 2018, 5.5 per cent of the Future Reserves 2020 (1,970 personnel) declared a BAME ethnicity.

For both the UK Regular Forces and the Future Reserves 2020, the Army and Army Reserve represent the largest parts of the UK Armed forces and also have the greatest proportion of BAME personnel; accounting for more than 80.0 per cent of all BAME personnel.

At 1 April 2018, 95.5 per cent of the UK Regular Forces and 98.9 per cent of the Future Reserves 2020 had a UK Nationality. The difference in Nationality between the UK Regular Forces and the Future Reserves 2020 can partially be explained by different eligibility requirements, (see background page 3).

Figure 8: Ethnicity of UK Regular and Future Reserves 2020 Personnel as at 1 April 2018

At 1 April 2018, BAME personnel represented:

⇒ 2.4 per cent of Officers and 8.7 per cent of Other Ranks in the UK Regular Forces. Compared to April 2017 this has remained stable for the Officers but has increased by 0.4 percentage points in the Other Ranks.

⇒ 4.0 per cent of Officers and 5.9 per cent of Other Ranks in the Future Reserves 2020. Since April 2017 this has increased by 0.3 percentage points for the Officers but has remained stable in the Other Ranks.

Figure 9: Percentage of BAME and White personnel with UK and Non-UK Nationalities as at 1 April 2018
Ethnic Origin and Nationality

Intake and Outflow

UK Regular Forces

BAME personnel accounted for 9.1 per cent of intake into the UK Regular Forces in the 12 months to 31 March 2018, see Figure 10. In the 12 months ending 31 March 2018, the proportion of BAME personnel of a Non-UK Nationality joining the UK Regular Forces has increased from 44.9 per cent to 52.7 per cent against the same time period last year, which is largely explained by the Army utilising all it’s foreign and commonwealth quota.

Figure 10: BAME, UK BAME and Non-UK BAME Intake to and Outflow from UK Regular Forces

BAME personnel represented 5.4 per cent of outflow from the UK Regular Forces in the 12 months to 31 March 2018, a decrease of 0.2 percentage points in the 12 months ending 31 March 2017 (Figure 10). Note: Introduction of DRS may account for the decrease in BAME intake.

Future Reserves 2020

BAME personnel represent 6.7 per cent of intake in the 12 months ending 31 March 2018, this is an increase of 0.7 percentage points since the 12 months ending 31 March 2017.

Figure 11: BAME intake to the Future Reserve 2020 by Service

Figure 11 shows that since the 12 months ending 30th September 2013 the proportion of intake who are BAME in:

- The FR20 Maritime Reserve population has increased by 2.0 percentage points to 5.3 per cent
- The FR20 Army Reserve population has increased by 0.7 percentage points to 7.2 per cent
- The FR20 RAF Reserve population has decreased by 0.8 percentage points to 5.3 per cent
UK Regular Forces and Future Reserves 2020 Strengths

At 1 April 2018, 70.7 per cent of the UK Regular Forces and 73.9 per cent of the Future Reserves 2020 declared a Christian religion. Both have seen a decrease in the last year of 2.3 and 0.9 percentage points respectively, which is also in line with the long term decreasing trend. The distribution of religion representations are fairly similar across both the UK Regular Forces and Future Reserves 2020, shown in Figure 12.

Figure 12: Religion of the UK Regular Forces and Future Reserves 2020 as at 1 April 2018

At 1 April 2018 the proportion of personnel declaring no religious affiliation was 26.6 per cent (38,840 personnel) in the UK Regular Forces and 23.8 per cent (8,430 personnel) in the Future Reserves 2020; an increase of 2.1 and 0.8 percentage points respectively since 1 April 2017, following the long term trend.
**Age**

**UK Regular Forces and Future Reserves 2020 Strengths**

As at 1 April 2018, 23.6 per cent of the UK Regular Forces and 13.9 per cent of the Future Reserves 2020 were under 25 years old. In the last year, this has decreased by 0.4 percentage points in the UK Regulars and 0.9 in the Future Reserves 2020. Of the Officers, 7.5 per cent of the UK Regular Forces and 5.3 per cent of the Future Reserves 2020 were under 25 years old.

Figure 15 indicates that Officers in the UK Regular Forces are generally younger than Officers in the Future Reserves 2020. As at 1 April 2018 the average age for Officers in the UK Regular Forces was 37 years old compared to the Future Reserves 2020 where the average age was 43 years old. Similarly, Figure 16 shows that the average age of Other Ranks in the UK Regular Forces is also generally younger than the Future Reserves 2020. As at 1 April 2018 the average age for the UK Regular Forces Other Ranks was 6 years younger than the Future Reserves 2020.

In the 12 months to 31 September 2016, half of those joining the Future Reserves 2020 had previously served in the UK Armed Forces (Quarterly Service Personnel Statistics, table 7b). This could explain, in part, why the age profile is higher for the Future Reserves 2020.

**Average age** statistics are calculated using the mean. Age is age at last birthday. Average ages as at 1 April 2018 were:

<table>

See tables 4 and 17 for more information.
Age

Intake and Outflow

In the 12 months ending 31 March 2018, 11.5 per cent of intake to the UK Regular Forces were Officers (1,420 personnel). Figure 17 shows that, of this total, 8.4 per cent were aged 30 and over and the remaining 91.6 per cent were aged 18 to 29. Officer intake age profiles are heavily influenced by personnel joining having left higher education, with 60.8 per cent of all officer intake occurring between ages 20 and 24.

A notable peak in the outflow for Officers can be seen at ages 50-54. Pre-2015, a full career engagement lasted until age 55; a limited number of Armed Forces personnel could serve beyond the age of 55.

Figure 17: UK Regular Officer intake and outflow by Age for the 12 months ending 31 March 2018

In the 12 months ending 31 March 2018, 16.1 per cent of intake to the Future Reserves 2020 were Officers (900 personnel). Figure 18 shows that, of this total, 74.3 per cent were aged 30 and over and the remaining 25.7 per cent were aged 18 to 29. Within this time period, personnel aged 20-24, have had the highest intake and outflow. There is a larger intake of personnel in the age group of over 50 in comparison to the UK Regular Forces, this could be explained by the different eligibility requirements between UK Regulars Forces and Future Reserves 2020.

Figure 18: Future Reserves 2020 Officer intake and outflow by Age for the 12 months ending 31 March 2018
Sexual Orientation (Declaration Rates)

UK Regular Forces

As at 1 April 2018, 19.2 per cent of Regular service personnel declared a sexual orientation. There were 23.9 per cent of Officers and 18.1 per cent of Other Ranks declaring a sexual orientation.

Figure 19 shows a service breakdown of the overall declaration rate across the UK Regular Forces, with RAF having the highest rate (26.7%), followed by Royal Navy/Royal Marines and Army at 20.8% and 15.4% respectively.

Figure 19: Declaration rate across UK Regular Forces split by service, as at 1 April 2018

Future Reserves 2020

As at 1 April 2018, 5.2 per cent of service personnel have declared a sexual orientation. The declaration rate is higher amongst officers (10.3%) when compared with Other Ranks (3.9%).

Figure 20 shows the breakdown of the declaration rate by each service. FR20 Maritime Reserve have the highest proportion (11.5%), followed by FR20 RAF Reserves and FR20 Army Reserves at 8.9% and 3.4% respectively.

Figure 20: Declaration rate across Future Reserves 2020 split by service, as at 1 April 2018

The sexual orientation breakdowns, recorded on JPA, will be provided in future edition of this publication once declaration rates reach a high enough percentage to be representative.

Rounding

Figures in this publication (apart from maternity statistics and detailed ethnicity statistics) have been rounded to the nearest 10, though numbers ending in a “5” have been rounded to the nearest multiple of 20 to prevent the systematic bias caused by always rounding numbers upwards. For example; a value of “25” would be rounded down to “20” and a value of “15” would be rounded up to “20”.

Additionally, totals and sub-totals are rounded separately and so may not equal the sums of their rounded parts. Percentages are calculated from unrounded data and presented to one decimal place.

The MOD Disclosure Control and Rounding policy is published on GOV.UK at the following link: [https://www.gov.uk/government/publications/defence-statistics-policies](https://www.gov.uk/government/publications/defence-statistics-policies)

Revisions

Corrections to the published statistics will be made if errors are found, or if figures change as a result of improvements to methodology or changes to definitions. When making corrections, we will follow the Ministry of Defence [Statistics Revisions and Corrections Policy](https://www.gov.uk/government/publications/defence-statistics-policies). All corrected figures will be identified by the symbol “r”, and an explanation will be given of the reason for and size of the revision. Corrections which would have a significant impact on the utility of the statistics will be corrected as soon as possible, by reissuing the publication. Minor errors will also be corrected, but for convenience these corrections may be timed to coincide with the next annual release of the publication.

There are no regular planned revisions of this Bulletin.
**Further Information**

**Useful definitions**

**Christian** includes personnel declaring a Christian or Christian Tradition religion.

**No religion** includes personnel who have self-identified as having no religion on JPA, including personnel declaring themselves as Agnostic, Atheist, Humanist and Secularist. This does not include personnel with an unrecorded religion.

**UK Nationality** includes any individuals whose nationality is recorded on the Joint Personnel Administration (JPA) database as Anguilla, Bermuda, British, British Hong Kong, British Overseas Territories, British Antarctic Territory, British Indian Ocean Territory, British Virgin Islands, Cayman Islands, Falkland Islands, Gibraltar, Montserrat, Pitcairn Islands, Saint Helena, Ascension and Tristan da Cunha, South Georgia and the South Sandwich Islands or Turks and Caicos Islands. More details can be found on the gov.uk website.
