AUTHORIZED AMENDMENT

Note to provide a summary/overview of the amendment and to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.

The input here should be your 'one minute' to explain what, why and how.

The TAE RA 5000 Series was published in Aug 16. A number of RFCs have subsequently been received which form the basis for this post-implementation review. In addition, a number of EMAR 21 related

amendments have been incorporated into the RA 5800 series, which was constructed using EMAR 21 as its baseline.

Under the new update protocol, updates will be batched into bi-annual updates. This update affects 21 RAs sufficient to warrant a NAA.
