## 13. Method Statement

To accompany this application we require a report or method statement that clearly describes how the proposed works will interfere with the badger setts and also demonstrates how any mitigation work will be carried out.

We would appreciate it if you do not use spiral binding for your report or Method Statement as this affects the ease with which we can scan or copy the document.

All reports must contain the following information (if not already provided in the application form):

### 1. Location of archaeological or preservation work

- Give the full postal address of the land where work is proposed.
- Give the six figure grid reference of the centre of the site, including the two grid letters found on the legend or corner of the map i.e. NZ835762.
- Give the name of the Scheduled Monument
- Provide the County Sites and Monument Record Number (under S1 of the Ancient Monuments and Archaeological Areas Act 1979).

### 2. Map and site details

- Include an appropriately scaled map that shows the site location in relation to the nearest street or town. This map, or an additional larger scale map if necessary, should also show locations of all setts on the site. Aerial photographs of the site are also helpful.
- Setts should be named or numbered and referred to in the legend or report.
- Give the likely status of the setts (whether main, subsidiary, annexe or outliers) and whether they are active or not. State the number of entrance holes at each sett.
- Indicate and specify which setts are to be disturbed, damaged, destroyed or obstructed. Specify any setts that will be re-opened at the end of the works.
- Show the location of any mitigation work e.g. artificial setts, new foraging habitat, water sources etc.

### 3. Survey information

Give details (including methods and results) of the survey undertaken to identify the location, number and status of the setts that will be affected by the proposed work.

### 4. Work schedule

Give a detailed schedule for all proposed sett interference, stating how and when each badger sett will be affected and indicating the type of machinery or tools to be used and the distance from the sett(s). Explain the rationale for the necessary badger interference. The dates of any proposed mitigation work must also be included (if applicable).

### 5. Maintenance and monitoring

Explain how you will:

- i. Monitor badger activity to ensure that badgers do not regain access to excluded setts before and during site clearance and sett destruction.
- ii. Monitor the proposed work to ensure that all licence conditions are met.

**14. Supplementary Information**

*Please provide any additional information you may have to support your application.*

Any person found guilty of such an offence is liable, on summary conviction, to imprisonment for a term not exceeding six months or to a fine not exceeding level 5 on the standard scale, or to both. Regarding other wildlife legislation, we will look to provisions in the Fraud Act 2006 (as amended) in respect of applicants making any false representations.**

**17. Annex - Application Notes**

*Applicant*

The applicant is the person submitting the application (usually the landowner or occupier) who, if the licence was granted, would become the licensee. The applicant may appoint agents to produce the application pack and act on their behalf. A person with specific skills and knowledge of the species concerned, such as a consultant ecologist, must be appointed to assist in the preparation and the delivery of the proposals that ensure the species protection requirements can be met.

*Licensee*

The "Licensee" named on the licence is responsible for ensuring that all activities carried out on site in relation to the licence comply with the terms and conditions of the licence. However, all persons authorised to act under the licence must comply with the licence and its conditions (see Regulation 58(1) of the 2010 Regulations (as amended)). This means that all authorised persons have a responsibility for ensuring that the licence terms and conditions, including any annex special conditions, are understood and complied with. Failure to do so could lead to prosecution.

*Consultant/Named Ecologist*

The "Named Ecologist" is a professional ecological consultant who has satisfied Natural England that they have the relevant skills, knowledge and experience of the species concerned and is responsible for undertaking and/or overseeing the work undertaken in respect of the licensed species. The 'Named Ecologist' has a responsibility for ensuring that the licence is complied with. They are responsible for advising the licensee on the suitability and competence of any Accredited Agents or Assistants employed on site to undertake the required duties and may include the direct supervision of Assistants where appropriate. More information about the experience required to become a named ecologist can be found here:

[http://webarchive.nationalarchives.gov.uk/20140605090108/http://www.naturalengland.org.uk/Images/bat-mitigation-guidance\\_tcm6-10534.pdf](http://webarchive.nationalarchives.gov.uk/20140605090108/http://www.naturalengland.org.uk/Images/bat-mitigation-guidance_tcm6-10534.pdf)

### *Accredited Agent*

An “Accredited Agent” is a suitably trained and experienced person who is able to carry out work under a licence without the personal supervision of the Named Ecologist. Any Accredited Agent must be appointed by the Licensee and be in possession of a letter signed by the Licensee confirming their appointment. Agents shall carry a copy of the said letter when acting under the licence and shall produce it to any police or Natural England officer on request.

### *Assistants*

An “Assistant” is a person assisting a Named Ecologist or Accredited Agent. Assistants are only authorised to act under this licence whilst they are under the direct supervision of either the Named Ecologist or an Accredited Agent.
