Children looked after return 2017 to 2018: validation checks

**List of the SSDA903 validation checks
which will be applied to all records
covering the period from 1 April 2017
onwards - version 1.1**

June 2018

Contents

Summary	5
Changes to validation rules in 2017 to 2018	6
Codes, Error Messages and Descriptions of Checks	7
Stage 1	7
Annex A	134
Bypassing Errors	134
Annex B	135
Commonly used expressions	135

This document lists the validation checks that will be performed on SSDA903 records from 1 April 2017 onwards. This is a revision from previous years and should be studied with care. All validation checks that will be performed on records that have been loaded into the system are contained in this document; there are no supplementary lists.

The validation checks in this schedule will be performed in two stages. Only if a record passes all the validation checks in stage one, will the validation suite proceed to stage two. Failure to pass all the checks in stage one will bring the validation suite to a halt.

This is version 1.1 and is the first version of the document this year.

For queries on this validation please raise a [service request](#).

Version	Changes
1.0	Baselined version
1.1	<ul style="list-style-type: none"> • Changing reference date example to DD/MM/YYYY throughout (rules 102, 104, 112, 113, 115, 116, 141, 147, 169, 171, 632,1004, 1005) • Amending text references to be non-year specific (157,165-167,179,185-186,188-191,196-198,210,216,218,225,351,354, 426,542-543,545-546, 625,630,634). • 156 – updated coding rule as agreed. and replaced by 586 • 1012 – amended back to 2017 system version of the rule. • Adding one new validation rules (UASC & OC3 (1014)) • Updated the coding rule as agreed (205, 450, 553, 555, 571,169) • Amended rule 186 (so new rule 155 is no longer needed). 155 deleted. • Additional wording to message for 169 so rule 412 is no longer needed. 412 deleted. • 182 range check removed • 187 – confirmed moved to stage 1 and 579 added back into document as missing from v1.0. • Looked after continuously within ‘Commonly used expressions’

Summary

This schedule contains all the validation checks that will be performed on each SSDA903 record. For each check we have provided further comments and, in some cases, background information. These are designed to give the user more information about the context of the validation failure and suggestions on how to correct it.

The validation suite will initially perform all the validation checks listed below under Stage 1. If a record passes all of these checks, the validation will move on to those checks listed under Stage 2. Failure to pass all the tests at stage 1 will halt the validation process. Any errors detected at Stage 1 will need to be addressed and amended before the validation of that record can proceed. The rationale behind performing validation checks in two batches is to prevent errors in certain primary data fields, such as date of birth, triggering numerous validation check failures, all of which are rooted in the incorrect date of birth field. This is particularly a problem in the operation of some Cross Return Validation checks.

Several SSDA903 checks involve time limits. The duration will be calculated in a standardised manner by taking the start date away from the end date. Examples have been given to show how the duration is calculated. In some cases, checks are based on statutory time limits; however, the validation check applied to the SSDA903 record may allow a longer time than is stated on the face of the legislation. This is because the purpose of the SSDA903 validation checks is to identify records which are most likely to be incorrect. They are not designed as checks on court or Social Services practice. If a child really was kept under a legal status for a longer period than the law allows, we would prefer that the statistics reflected reality, rather than insisting that a record be 'doctored' so that it passes a strict validation check but no longer reflected what really happened.

Changes to validation rules in 2017 to 2018

The following table shows the validation rules that have changed since the 2016 to 17 SSDA903 data collection.

New validation rules	Amended validation rules	Deleted validation rules
	102,104,112-113,115-116,141,147,157,165-166,169,171,179	155
586	182	412
1014	185-191	156 (replaced by 586)
	196-198	
	205	
	210	
	216,218, 225, 351, 354, 426, 450	
	542-543	
	545-546	
	553,555	
	571, 625,630, 632,634	
	1004-1005	
	1012	

Codes, Error Messages and Descriptions of Checks

The table which follows consists of:

- The check number (please note that some numbers have been left unused, to accommodate new checks which might be required in the future).
- The error message (as it will appear at the bottom of each SSDA903 record in error).
- Explanatory text consisting of a brief explanation of the coding rule that has been broken, followed by background information or advice to help with correcting the record.

Stage 1

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
101	Gender code is not valid.	The gender data item must be either: 1 = boy, or 2 = girl.	<SEX> must be provided and be a valid value For allowed values please see associated code set.
102 (amended)	Date of birth is not a valid date.	The date should be entered in the format DD/MM/YYYY and should contain a valid date. <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<DOB> must be provided, be in a valid format and contain a valid date Format should be DD/MM/YYYY

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
103	The Ethnicity code is either not valid, or has not been entered	<p>The ethnic origin field must not be blank, and code must be taken from the list supplied in DfE CLA Collection Guide.</p> <p>Valid ethnic origin codes are WBRI, WIRI, WOTH, WIRT, WROM, MWBC, MWBA, MWAS, MOTH, AIND, APKN, ABAN, AOTH, BCRB, BAFR, BOTH, CHNE, OOTH, REFU, NOBT.</p> <ul style="list-style-type: none"> • Check that a valid ethnic origin code has been entered, taken from the list in DfE CLA Collection Guide to the SSDA903; • The old ethnicity codes used in years prior to 2009 are no longer valid codes. 	<p><ETHNIC> must be provided and be a valid value For allowed values please see associated code set.</p>
104 (amended)	Date for Unaccompanied Asylum Seeking Children (UASC) status ceased is not a valid date.	<p>Date should be entered in the format DD/MM/YYYY and, if completed, should contain a valid date.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<p>If provided <DUC> must be in a valid format, contain a valid date and be >= <COLLECTION_START_DATE></p> <p>Format should be DD/MM/YYYY</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
105	Data entry for Unaccompanied Asylum Seeking Children (UASC) status of child is invalid, or has not been completed.	Code for this data item must be either: 0 = child was not a UASC at any time during the year; 1 = child was a UASC at some time during the year.	<UASC> must be provided and be a valid value. For allowed values please see associated code set.
112 (amended)	Date should be placed for adoption is not a valid date.	If the child has been adopted during the year the date should be entered in the format DD/MM/YYYY and should contain a valid date. <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	If provided <DATE_INT> must be in a valid format and contain a valid date Format should be DD/MM/YYYY
113 (amended)	Date matching child and adopters is not a valid date.	If the child has been adopted during the year the date should be entered in the format DD/MM/YYYY and should contain a valid date. <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	If provided <DATE_MATCH> must be in a valid format and contain a valid date Format should be DD/MM/YYYY

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
114	Data entry to record the status of former carer(s) of an adopted child is invalid.	<p>If the child has been adopted during the year the code must be either :</p> <p>0 = not adopted by former foster carer(s); 1 = adopted by former foster carer(s).</p>	<p>If provided <FOSTER_CARE> must be a valid value</p> <p>For allowed values please see associated code set.</p>
115 (amended)	Date of Local Authority's (LA) decision that a child should be placed for adoption is not a valid date.	<p>If it has been decided that the child should be placed for adoption, this date should be entered in the format DD/MM/YYYY and should contain a valid date.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<p>If provided <DATE_PLACED> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>
116 (amended)	Date of Local Authority's (LA) decision that a child should no longer be placed for adoption is not a valid date.	<p>If it has been decided (during the year) that the child should no longer be placed for adoption, this date should be entered in the format DD/MM/YYYY, and should contain a valid date.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<p>If provided <DATE_PLACED_CEASED> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
117	Date of decision that a child should/should no longer be placed for adoption is beyond the current collection year or after the child ceased to be looked after.	If the decision is that a child should/should no longer be placed for adoption, then the date of these decisions cannot be beyond the end of the current collection year or the date they ceased to be looked after.	If provided <DATE_PLACED> and/or <DATE_PLACED_CEASED> must not be > <COLLECTION_END_DATE> or <DEC> of latest episode where <REC> not = 'X1'
118	Date of decision that a child should no longer be placed for adoption is before the current collection year or before the date the child started to be looked after.	If the decision is that a child should no longer be placed for adoption, then the date of this decision cannot be before the start of the current collection year or date they started to be looked after.	If provided <DATE_PLACED_CEASED> must not be prior to <COLLECTION_START_DATE> or <DECOM> of the earliest episode with an <LS> not = 'V3' or 'V4'
119	If the decision is made that a child should no longer be placed for adoption, then the date of this decision and the reason why this decision was made must be completed.	If a child should no longer be placed for adoption, both the date of this decision and the reason why this decision was reached must be recorded.	If either <REASON_PLACED_CEASED> or <DATE_PLACED_CEASED> is provided then both must be provided

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
120	The reason for the reversal of the decision that the child should be placed for adoption code is not valid.	If completed, the reason why the decision to place the child for adoption has been reversed must contain a code from RD1-RD4.	If provided <REASON_PLACED_CEASED> must be a valid value For allowed values please see associated code set.
131	Data entry for being In touch after leaving care is invalid.	If care leaver information is provided then an 'in touch' value must be returned, and data entry must be one of: YES, NO, DIED, REFU, NREQ or RHOM.	If provided <IN_TOUCH> must be a valid value For allowed values please see associated code set.
132	Data entry for activity after leaving care is invalid.	If reporting on a child's activity after leaving care, data entry must be a valid code in the range: F1, P1, F2, P2, F3, P3, G4, G5, G6 or 0.	If provided <ACTIV> must be a valid value For allowed values please see associated code set.

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
133	Data entry for accommodation after leaving care is invalid.	<p>If reporting on a child's accommodation after leaving care, data entry must be:</p> <p>B, C, D, E, G, H, K, R, S, T, U, V, W, X, Y, Z or 0.</p> <p>Each accommodation code should also be suffixed with 1 (considered suitable) or 2 (considered unsuitable).</p>	<p>If provided <ACCOM> must be a valid value</p> <p>For allowed values please see associated code set.</p>
134	Data on adoption should not be entered for the OC3 cohort.	If returning OC3 data for child then adoption information must not be completed.	<p>134 - If any of <IN_TOUCH>; <ACTIV> or <ACCOM> are provided then <DATE_INT>; <DATE_MATCH>; <FOSTER_CARE>; <NB_ADOPTR>; <SEX_ADOPTR> and <LS_ADOPTR> must not be provided</p>
141 (amended)	Date episode began is not a valid date.	<p>If completed date episode began must be a valid date and should be entered in the format DD/MM/YYYY.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<p>If provided <DECOM> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
142	A new episode has started, but the previous episode has not ended.	<p>Date and reason the previous episode ceased must be completed, before a new episode can start.</p> <ul style="list-style-type: none"> • Check the date the last episode ended and complete the previous episode accordingly. 	For any episode prior to the current episode both <DEC> and <REC> must be provided
143	The reason for new episode code is not a valid code.	If completed reason for new episode must be coded S, P, L, T, U or B.	<p>If provided <RNE> must be a valid value</p> <p>For allowed values please see associated code set.</p>
144	The legal status code is not a valid code.	If completed the legal status must contain a code in the range C1, C2, D1, E1, V2, V3, V4, J1, J2, J3, L1, L2, or L3.	<p>If provided <LS> must be a valid value</p> <p>For allowed values please see associated code set.</p>
145	Category of need code is not a valid code.	If completed the Child in Need (CIN) field must contain a code in the range N1 to N8.	<p>If provided <CIN> must be a valid value</p> <p>For allowed values please see associated code set.</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
146	Placement type code is not a valid code.	<p>If completed, the placement type of each episode must contain a code from the range:</p> <p>A3-A6, P1-P3, K1, K2, H5, R1-R3, R5, S1, T0-T4, U1-6, Z1.</p>	<p>If provided <PL> must be a valid value</p> <p>For allowed values please see associated code set.</p>
147 (amended)	Date episode ceased is not a valid date.	<p>The date should be entered in the format DD/MM/YYYY, and should be a valid date.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY 	<p>If provided <DEC> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>
148	Date episode ceased and reason episode ceased must both be coded, or both left blank.	<p>The date and reason an episode ceased should either both be coded or both be left blank.</p> <ul style="list-style-type: none"> • Check which item is missing; If the episode is an open episode, still continuing at the end of the statistical year, both these items must be left blank. 	<p>If <DEC> or <REC> is provided then both <DEC> and <REC> must contain a value</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
149	Reason episode ceased code is not valid.	Where reason episode ceased is completed it must be coded by E11, E12, E2, E3, E4A, E4B, E13, E41, E43, E44, E5, E6, E7, E8, E9, E14, E15, E16 or X1.	If provided <REC> must be a valid value For allowed values please see associated code set
151	All data items relating to a child's adoption must be coded or left blank.	The data items relating to an adoption should either be coded (all of them) or left blank (all of them). • Enter missing data.	If any of <DATE_INT> ; <DATE_MATCH> ; <FOSTER_CARE> ; <NB_ADOPTR> ; <SEX_ADOPTR> or <LS_ADOPTR> are provided, then all must be provided
153	All data items relating to a child's activity or accommodation after leaving care must be coded or left blank.	Data items relating to activity or accommodation after leaving care should either be coded (all of them) or left blank (all of them). • Enter missing data.	Where any of <IN_TOUCH> ; <ACTIV> or <ACCOM> is provided, all must be provided

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
157 (amended)	Child is aged 4 years or over at the beginning of the year or 16 years or under at the end of the year and Strengths and Difficulties (SDQ) 1 has been recorded as the reason for no Strengths and Difficulties (SDQ) score.	<p>If the child has been looked after continuously for 12 months at 31 March of the current collection and is aged 4 years or over at 1 April of the current collection or 16 years or under at 31 March of the current collection, and does not have an SDQ score, then the reason for no score cannot be SDQ1.</p> <p>If the child was aged under 4 or over 17 at date of the latest assessment then no form should be returned: use reason SDQ1.</p> <ul style="list-style-type: none"> • Check that the correct reason for no SDQ score has been recorded; SDQ2 - SDQ5 would be valid reasons for children aged 4 to 16 at the date of the last assessment.; • Check that the date of birth recorded for the child is correct. 	<p>If <CONTINUOUSLY_LOOKED_AFTER> = 'Y' and <DOB> >= 4 years prior to <COLLECTION_START_DATE> and <DOB> <= 16 years prior to <COLLECTION_END_DATE> and <SDQ_SCORE> not provided then <SDQ_REASON> should not be 'SDQ1'</p> <p>Note: <CONTINUOUSLY_LOOKED_AFTER> has been amended (see Annex B)</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
158	Child has received an intervention for their substance misuse problem but the additional item on whether an intervention was offered has been completed.	If a child has been recorded as receiving an intervention for their substance misuse problem then the additional item on whether an intervention was offered should be left blank.	Where <INTERVENTION_RECEIVED> = '1' then <INTERVENTION_OFFERED> should not be provided
159	Child has not received an intervention for their substance misuse problem and the additional item on whether an intervention was offered has not been completed.	If a child has been recorded as not receiving an intervention for their substance misuse problem then the additional item on whether an intervention was offered should be completed as well.	Where <SUBSTANCE_MISUSE> = '1' and <INTERVENTION_RECEIVED> = '0' then <INTERVENTION_OFFERED> must be provided

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
164	Distance is not valid. Please check a valid postcode has been entered.	<p>The distance must be between 0.0 and 999.9 If the distance is unavailable please register this as 999.9.</p> <p>This field must be completed for all placements, unless the child is being looked after under legal status V3 or V4. For all placements active or beginning after 31 March 2015 it should be entered unless the legal status is V3 or V4 (looked after under an agreed series of short term placements - respite).</p>	<p>If <LS> not = 'V3' or 'V4' then <PL_DISTANCE> must be between '0.0' and '999.9'</p> <p>Note: <PL_DISTANCE> is a calculated value based on Postcode</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
165 (amended)	Data entry for Mother status is invalid.	<p>Code for this data item must be either:</p> <p>0 = child is not a mother; 1 = child is a mother.</p> <ul style="list-style-type: none"> • This field should indicate whether the child was a mother or not on 31 March and must be completed for all female children looked after during the year ending 31 March of the current collection (unless the child is being looked after under an agreed series of short term placements – legal status V3 or V4). • This field should be left blank and not recorded as '0' for male looked after children. 	If provided <MOTHER> must be a valid value

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
166 (amended)	Date of review is invalid or blank	<p>The date should be entered in the form DD/MM/YYYY and should contain a valid date. The date of review should be in the collection year.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY. 	<p>If provided <REVIEW> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>
167	Data entry for Participation is invalid or blank.	<p>If a review was held in the collection year this field should not be left blank and the code must be in the range PN0 -PN7.</p> <ul style="list-style-type: none"> • Check that a valid participation code has been entered that has been taken from the DfE CLA Collection Guide. 	<p>Where <REVIEW> is provided then <REVIEW_CODE> must also be provided and be a valid value</p> <p>For allowed values please see associated code set.</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
168	Unique Pupil Number (UPN) is not valid. If unknown, default codes should be UN1, UN2, UN3, UN4 or UN5.	<p>The UPN must be 13 characters long (the first character is a capital letter other than I, O or S, and the remaining characters numeric, or if the UPN is temporary then the last character must be a letter).</p> <p>If it is unknown one of the default codes in the range UN1 - UN5 should be used.</p>	If provided, <UPN> must either be 13 characters, where the first character must be alpha and a capital letter but not 'I'; 'O' or 'S', and the next 12 characters must be numeric OR if unknown <UPN> must be a valid value (For allowed values please see associated code set)
169 (amended)	Local Authority's (LA) of placement is not valid or is missing. Please check a valid postcode has been entered.	<p>LA of placement code must be a valid LA Education code or one of the default codes for children placed outside England: NIR, WAL, SCO, NUK or CON.</p> <ul style="list-style-type: none"> It should be entered for all placements active or beginning after 31 March of the previous collection unless the legal status is V3 or V4 (looked after under a series of short term placements). 	<p>If <LS> not 'V3' or 'V4' then <PL_LA> must be provided and a valid value.</p> <p>Note: <PL_LA> is derived from the provided postcode <PL_POST></p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
171 (amended)	Date of birth of mother's child is not a valid date.	<p>The date should be entered in the form DD/MM/YYYY and should contain a valid date.</p> <ul style="list-style-type: none"> • Check you have entered a valid date and it is in the right format, i.e. DD/MM/YYYY. 	<p>If provided <MC_DOB> must be in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY</p>
174	Mother's child date of birth is recorded but gender shows that the child is a male.	<p>Date of birth of child, can only be entered if gender is female and mother status = 1.</p> <p>1 = child is a mother.</p>	<p>If <SEX> = '1' then <MC_DOB> should not be provided</p>
175	The number of adopters code is not a valid code.	<p>Code for this data item must be either:</p> <p>1 = child has been adopted by 1 person; 2 = child has been adopted by 2 persons.</p>	<p>If provided <NB_ADOPTR> must be a valid value</p> <p>For allowed values please see associated code set.</p>
176	The gender of adopters at the date of adoption code is not a valid code.	<p>Where gender of adopters at the date of adoption is completed it must be coded by M1, F1, MM, FF or MF.</p>	<p>If provided <SEX_ADOPTR> must be a valid value</p> <p>For allowed values please see associated code set.</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
177	The legal status of adopters code is not a valid code.	Where legal status of adopters is completed, it must be coded by L0, L11, L12, L2, L3 or L4.	If provided <LS_ADOPTR> must be a valid value For allowed values please see associated code set.
178	Placement provider code is not a valid code.	If completed placement provider of each episode must contain a code from the range: PR0-PR5. <ul style="list-style-type: none"> • The placement provider code should be left blank if the record is only recording the young person's activity and accommodation after leaving care. • The placement provider code should be left blank for children in any of the following placements: T0, T1, T2, T3, T4 or Z1. 	If provided <PLACE_PROVIDER> must be a valid value and should not be provided if <PL> = 'T0'; 'T1'; 'T2'; 'T3' or 'Z1' For allowed values please see associated code set.

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
179 (amended)	Placement location code is not a valid code.	<p>If completed placement location of each episode must be coded as IN or OUT.</p> <p>This field should be completed for all placements active or beginning after 31 March in the previous collection year unless the legal status is V3 or V4 (looked after under a series of short term placements).</p>	<p>If <LS> not = 'V3' or 'V4' then <PL_LOCATION> must be provided and a valid value.</p> <p>Note <PL_LOCATION> is a derived field based on postcode</p>
180	Data entry for the Strengths and Difficulties Questionnaire (SDQ) score is invalid.	If completed the SDQ score should be in the range 0-40.	If provided <SDQ_SCORE> should be a numeric whole number in the range 0-40

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	Coding Rule
181	Data items relating to children looked after continuously for 12 months should be completed with a 0 or 1.	<p>The fields:</p> <ul style="list-style-type: none"> Convicted Health check Immunisations Dental check Health assessment Substance misuse Intervention received Intervention offered <p>should, if completed, be coded as 0 or 1.</p>	<p>If any of <CONVICTED>; <HEALTH_CHECK>; <IMMUNISATIONS>; <TEETH_CHECK>; <HEALTH_ASSESSMENT>; <SUBSTANCE MISUSE>; <INTERVENTION_RECEIVED> or <INTERVENTION_OFFERED> have been provided then they must be a valid value</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
624	Date of birth of the first child contradicts the date of birth of the first child previously recorded.	If a child has been recorded as being a mother in a previous year then the date of birth of the first child must be consistent between years, except when comparing to year ending 31 March 2006 if the date of birth of the first child was recorded as an approximate date.	If provided <MC_DOB> and previous year <MC_DOB> not Null, <MC_DOB> must = previous year <MC_DOB>
625 (amended)	Date of birth of the first child is beyond the end of this reporting year or the date the child ceased to be looked after.	If a child has been recorded as being a mother in the latest reporting year then the date of birth of the first child must not be beyond the end of this reporting year (31 March of the current collection) or the date the child ceased to be looked after.	If provided <MC_DOB> must not be > <COLLECTION_END> or <DEC> of latest episode
626	Child was reported as a mother but the date of birth of the first child is before the current year which contradicts with the mother status recorded last year.	If a child has been recorded as being a mother in the latest reporting year and the date of birth of the first child is in a previous year, then the mother status must be consistent between the year the mother's child was born and the latest year.	If <MOTHER> = '1' and previous year <MOTHER> = '0' or Null then <MC_DOB> must be >= <COLLECTION_START>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
628	<p>Motherhood details are not required for care leavers who have not been looked after during the year.</p>	<p>Mother status field should be left blank for young people for whom care leaver information is returned.</p> <p>However, if the care leaver also had episode information recorded for this collection year, motherhood status should be returned.</p>	<p>If no episode record for current year and any of <IN_TOUCH>, <ACTIV> or <ACCOM> have been provided then <MOTHER> should not be provided</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
630 (amended)	Information on previous permanence option should be returned.	<p>A new episode has started in the latest reporting year, with the reason for new episode being S, therefore data for items relating to previous permanence option must be returned.</p> <p>Data items:</p> <ol style="list-style-type: none"> 1. Previous permanence option; 2. LA code where previous permanence option was arranged (unless previous permanence option is Z1); 3. Date of order (unless previous permanence option is Z1). <p>Must be returned for all children starting to be looked after 1 April of the current collection, this includes children with legal status of V3 or V4</p>	If <RNE> = 'S' then <PREV_PERM> must be provided as should <LA_PERM> and <DATE_PERM> if <PREV_PERM> is not = 'Z1'

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
631	Previous permanence option not a valid value.	<p>Previous permanence option not a valid value.</p> <p>Valid values are:</p> <p>P1 = Adoption; P2 = Special Guardianship Order (SGO); P3 = Residence Order (RO); P4 = Unknown; Z1 = No previous permanence option.</p>	<p>If provided <PREV_PERM> must be a valid value</p> <p>For allowed values please see associated code set.</p>
632 (amended)	Date of previous permanence order not a valid value.	<p>Date should be entered in the format DD/MM/YYYY and should contain a valid date. The date should be before the start of this current episode of care.</p> <p>Acceptable value where date is not known will include zz where zz is day, month or year value).</p>	<p>If provided <DATE_PERM> should be prior to <DECOM> and in a valid format and contain a valid date</p> <p>Format should be DD/MM/YYYY or one or more elements of the date can be replaced by zz if part of the date element is not known</p>

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
633	Local Authority (LA) code where previous permanence option was arranged is not a valid value.	The LA code should be a valid LA code or one the following codes: NIR = Northern Ireland; NUK = Outside of the UK; SCO = Scotland; WAL = Wales.	Where provided <LA_PERM> must be a valid value
634 (amended)	There are entries for previous permanence options but child has not started to be looked after from 1 April of the current collection onwards.	There are entries in either the fields for previous permanence option but the child has no episode indicating that a period of care started after 1 April of the current collection.	If <PREV_PERM> or <LA_PERM> or <DATE_PERM> provided then at least 1 episode must have a <DECOM> later than 01/04/2015
635	There are entries for date of order and Local Authority (LA) code where previous permanence option was arranged but previous permanence code is Z1.	If there was no previous permanence option arranged there cannot be a date or order or a LA code where previous permanence option was arranged.	If <LA_PERM> and/or <DATE_PERM> provided then <PREV_PERM> must also be provided

New Error Code	Message to be Shown on Validation Report	Coding Rule (and comments which will be provided as guidance for LA staff)	
636	Date of previous permanence order is after the child started to be looked after.	Check that the date of the previous permanence order is not after the date the child started to be looked after.	DATE_PERM> must not be after <DECOM> of the earliest episode with an <LS> not = 'V3' or 'V4'

Annex A

By-passing Errors

The following errors can be by-passed. Errors which can be by-passed are those where the data is unusual but could be correct as it reflects the actual situation. It would not be expected that data which triggers errors outside of this list would be correct and only those errors listed below can be by-passed. All requests to bypass an error must be entered on the notes section of the CLA system and then you will need to notify the Helpdesk via the [service request form](#). Please note that requests to bypass errors should only be made once you have completed your final data load.

Error numbers of by-passable errors are given in the table below:

Stage 1	Stage 2				
115	205	333	406	503	627
166 - 168		335 336	431	516	628
		358 - 359	433	553	
		361 - 363	435	555	
		370 - 373	442	557	
		376 - 377	445	559	
		380	450 – 451		
		383	453		
		386			
		388			
		390			
		396 – 399			

Annex B

Commonly used expressions

This section contains commonly used expressions such as 'Series of short term placements', and a technical description of what these terms mean when validating rules. This allows the reference name for that expression to be used in the technical validation rules rather than having to write lengthy rules each time. It will also ensure that if the calculation for the expression changes it will only need to be amended in one place.

Data Item Name	Tag	Technical Description
Collection start date	<COLLECTION_START_DATE>	<p><COLLECTION_START_DATE> = '01/04/YYYY'</p> <p>Example: For the collection year 2016/2017 <COLLECTION_START_DATE> = '01/04/2016'</p>
Collection end date	<COLLECTION_END_DATE>	<p><COLLECTION_END_DATE> = '31/03/YYYY'</p> <p>Example: For the collection year 2016/2017 <COLLECTION_END_DATE> = '31/03/2017'</p>
Current collection year	<CURRENT_COLLECTION_YEAR>	<p><COLLECTION_START_DATE> to <COLLECTION_END_DATE></p> <p>Example: For the collection year 2016/2017 <COLLECTION_START_DATE> = '01/04/2016' and <COLLECTION_END_DATE> = '31/03/2017' so <CURRENT_COLLECTION_YEAR> = '01/04/2016 to 31/03/2017'</p>
Start date looked after	<START_DATE_LOOKED_AFTER>	<p>If no episode has <LS> = 'V3' or 'V4' <START_DATE_LOOKED_AFTER> = <DECOM> of latest episode with <RNE> = 'S'. If any episode has <LS> = 'V3' or 'V4' then <START_DATE_LOOKED_AFTER> = <DECOM> of first episode after the final episode with <LS> = 'V3' or 'V4'</p>
Placed for adoption	<PLACED_FOR_ADOPTION>	<p>If <PL> = 'A3'; 'A4'; 'A5' or 'A6' then <PLACED_FOR_ADOPTION> = 'Y'</p>

Data Item Name	Tag	Technical Description
Adopted	<ADOPTED>	If <REC> = 'E11' or 'E12' then <ADOPTED> = 'Y'
Period of care	< PERIOD_OF_CARE>	<p>1. Non-Respite - All episodes that run consecutively where <LS> is not = 'V3' or 'V4'. <PERIOD_OF_CARE> is calculated from the <DECOM> of the first episode in the sequence to the <DEC> of the last episode in the sequence where <DEC> is not = 'X1' OR <COLLECTION_END_DATE> if the <DEC> of the last episode in the sequence is Null</p> <p>2. Respite - All episodes that run consecutively where <LS> is = 'V3' or 'V4'. <PERIOD_OF_CARE> is calculated from the <DECOM> of the first episode in the sequence to the <DEC> of the last episode in the sequence where <DEC> is not = 'X1' OR <COLLECTION_END_DATE> if the <DEC> of the last episode in the sequence is Null</p>
Looked after continuously	<LOOKED_AFTER_CONTINUOUSLY>	<p>If count of episodes in current year = '0' or any episode in <CURRENT_COLLECTION_YEAR> has <LS> = 'V3' or 'V4' or any episode in <CURRENT_COLLECTION_YEAR> <REC> provided and not = 'X1' or any episode <RNE> = 'S' and <DECOM> > <COLLECTION_START_DATE> Then <LOOKED_AFTER_CONTINUOUSLY> = 'N' else <LOOKED_AFTER_CONTINUOUSLY> = 'Y'</p>
Ceased to be looked after	<CEASED_TO_BE_LOOKED_AFTER>	<DEC> of the current episode is not null and <REC> is not = 'X1' or null
