EXPLANATORY NOTE

(This note is not part of the Order)

This Order, which has effect in relation to supplies made on or after 1st October 2019, applies a VAT reverse charge to construction services.

As a general rule, it is the supplier of goods or services who is required to account for VAT on those supplies. However, section 55A of the Value Added Tax Act 1994 (c.23) (customers to account for tax on supplies of goods or services of a kind used in [missing trader fraud]) requires the recipient, not the supplier, to account for and pay tax on the supply of any goods and services which are of a description specified in an order made by the Treasury for that purpose. This accounting requirement is commonly referred to as the “reverse charge”.

Article 2 defines certain terms that appear in this Order.

Article 3 provides that the reverse charge will apply to services of a description specified in article 4 and that the supplies specified in article 8 are excepted from the reverse charge.

Article 4 specifies construction services as being services to which the reverse charge applies.

Articles 5 to 7 define construction services, specifying what services are and are not included within the term.

Article 8 provides for exceptions so that the reverse charge will only apply where construction services are supplied to other construction businesses.

Article 9 contains further provision to define terms used in article 8.
