# Types of interests

## Personal or family financial interest

Personal financial gain or financial gain to a family member (for example, spouse, partner or dependents) through, for example:

- holding a directorship, or other paid position in an organisation related to the work of SACN
- carrying out consultancy or fee-paid work for an organisation related to the work of SACN
- having shareholdings or other beneficial interests in a business related to the work of SACN
- receiving expenses or hospitality to attend conferences or workshops or similar meetings related to the work of SACN, from any organisation other than their employer.
- receiving gifts from organisations related to the work of SACN (consistent with DHSC's policy and procedure on registering of gifts, hospitality and declarations of interest).
- receiving honoraria for meetings or similar, related to the work of SACN.

Members are required to declare all shareholdings of relevance to the work of SACN; however, these could range from having a few shares to having a controlling interest in a business. Therefore, members should declare whether the value of shares held exceeds £5,000 for each organisation, and any active or controlling role in an organisation related to the work of SACN should also be declared. Where the value of shares may fluctuate, the declaration should be made based on the situation as at 1st January each year. This declaration should be for the value of the shares alone, not the cumulative total of shares and any other financial benefit from the same organisation.

Members should declare the funding source of their salaries, should it be derived from an organisation other than their main employer if this connection could be construed as having the potential to influence their judgement in the exercise of their duties.

The holding of financial instruments such as a pension scheme would not be counted as a financial interest provided the member or family member has no influence on the management of the financial instrument.

Members should declare whether or not the cumulative total of all personal financial interests from a single body/source related to the work of SACN exceeds £5,000 per annum.

## **Non-personal financial interest**

Payment or other benefit to an organisation in which a member is employed, which is not received personally but is for work in which a member is directly involved or is directly responsible for, from a body relating to the work of SACN, including:

- a grant or fellowship or other payment to sponsor a post, or contribute to the running costs of the department
- commissioning of research or other work, by a unit in which a member is employed
- funding for, or other contributions to, research
- contracts with, or funding from, OHID.

Members should declare whether or not the cumulative total of all non-personal financial interests in a single body/source exceeds £5,000 per annum.

Members are not required to declare all relevant interests of their co-workers, it is only necessary to declare those in which a member is jointly involved or for which a member has oversight/ responsibility.

## **Personal non-financial interest**

This refers to a situation in which a member has acted in a way such that the public might reasonably believe that he or she may not consider evidence in a fair and unbiased manner. Examples include:

- active advocacy on behalf of an organisation with a strong opinion on a matter under consideration
- other public or published statements expressing a clear opinion about a matter under consideration
- holding office in a professional organisation, charity or advocacy group with a direct interest in a matter under consideration by SACN
- authorship or co-authorship of a document used as evidence in a matter currently under consideration by SACN.

Considering that members are appointed on the basis of their scientific expertise on topics related to the work of SACN, it is expected that papers authored or co-authored by members will be used to inform committee reviews. It is not necessary to include a list of publications or articles in the register of interest, but where a member's paper is considered as part of a review, this should be highlighted in the minutes of the relevant discussion.

If a member has an interest not specified in these notes but which they believe should be declared, they should seek advice from the secretariat.

Information and context are vital to understanding declared interests and communicating these will complement SACN's policy of transparency and openness. A positive and useful way of doing this would be for members to feedback at meetings on relevant aspects of their work outside of SACN, which appear on the register of interests.
