Dear Sirs,

You will no doubt be looking at other countries to see what they are doing.

We now have a very good court system. Many SMEs are still unaware of how much has changed and the government should educate through FSB etc. and encourage IP literacy - promote the IPO's very good Equip service.

I suggest the Japanese are quite interesting because they are promoting and subsidising IP insurance, especially so that exporters are protected from overseas infringement actions. We would do well to consider the Japanese set up - we could even liase with them to solve US/Japan issues - building on London's reputation as where the world settles disputes.

We have so much in common with Japan - island nation, a lone trader soon etc., advanced nation, aging population, nuclear-decommissioning issues - it is only natural that we will follow a very similar course.

Yours sincerely
