INTRODUCTION

This National Statistics release is intended to provide comprehensive information on public spending. Data are arranged thematically by section. Each section contains overview commentary on the statistics being released, statistical tables, and further background information.

The key data being updated in this release are for the years 2013-14 to 2017-18. This release contains the first estimate of 2017-18 outturn. All data in this release are National Statistics and are on an outturn basis. Where major revisions to the data for past years have been made we refer to them in the text accompanying the tables. Further background detail is found in the accompanying background material published alongside this release.

EUROPEAN SYSTEM OF ACCOUNTS 2010 (ESA10)

The Office for National Statistics (ONS) are responsible for producing the National Accounts which measure the economic activity of the whole economy. The UK are legally required to produce these based on a framework specified in the European System of Accounts 2010 (ESA10). Before September 2014 the UK, along with all other Member States, produced accounts using the previous ESA95 framework.

Total Managed Expenditure (TME) is an aggregate drawn from National Accounts that measures the sum of public sector current and capital spending. The move to ESA10 from September 2014 onwards means that the TME aggregate used in the Public Spending Statistics and PESA publications is also now on an ESA 2010 basis.

About ESA 2010:

http://ec.europa.eu/eurostat/web/esa-2010

HM Treasury Public Spending Statistics provide a range of information about public spending. Further detailed explanations are provided in the methodology annex to this bulletin.

The release is classified as National Statistics and conforms to the rules and principles set out in the *Code of Practice for Official Statistics* overseen by the United Kingdom Statistics Authority.

RELATED RELEASES FROM HM TREASURY

- The **PESA command paper** is an annual release, containing plans data for the Spending Review period, alongside the data contained in this release.
- The quarterly Public Spending Statistics update releases update the key series found in this release.

Changes to this release have been made in response to requests from the United Kingdom Statistics Authority and feedback received from users. We welcome further user feedback at: pesa@hmtreasury.gsi.gov.uk

REVISIONS IN THIS RELEASE

All of the data contained in the Public Spending National Statistics are open for revision in every publication. Table 1 below summarises the key revisions in this release.

Revisions to Budgets since July 2017 (£million)	2013-14	2014-15	2015-16	2016-17
Total Managed Expenditure	-3,073	-1,543	2,851	1,410
Total Departmental Expenditure Limits (DEL)	0	0	2	102
Departmental Annually Managed Expenditure (AME)	0	0	100	-1,376
Other AME	-3,073	-1,543	2,748	2,488
Total resource DEL	0	0	2	896
Total capital DEL	0	0	1	-598

Figures for Total Managed Expenditure are taken from the ONS/HM Treasury Public Sector Finances release. The main revisions since last July's publication are:

Changes to Other AME are mainly due to ONS revisions to capital expenditure by public corporations. There are also changes to Local Authority Self-Financed Expenditure (LASFE). These are the result of the inclusion of new ONS data for Housing Associations and outturn data for Local Government. Figures for each year also include revisions to central government debt interest.

Following the introduction of Sector Accounting for Academy Sector the Department for Education (DfE) have updated the data to reflect the underlying budgetary aggregates. This includes expenditure listed by function (chapters 4 and 5) and on local government grants (chapter 7). While DfE and HMT have engaged in quality assurance on these data, due to the number of academies continuing to move between the local government and central government sector further work is needed to provide consistent information across outturn and plans years.

FUTURE DEVELOPMENT OF PUBLIC SPENDING STATISTICS

We would be interested in readers' views on how PESA might be developed to further increase its value to users. Please write to:

CHAPTER 1 DEPARTMENTAL BUDGETS

OVERVIEW

The tables in chapter 1 bring together information on public expenditure within the current budgeting and control framework. This comprises departmental budgets, including all control totals, as well as reconciling from the budgetary framework to the fiscal aggregates in the National Accounts.

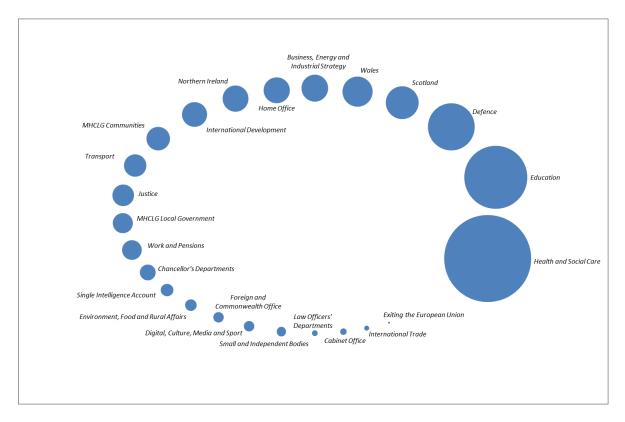

DEPARTMENTAL EXPENDITURE LIMITS

- Total resource DEL in real terms was £331.2bn in 2017-18, a decrease of 1.2 per cent on the previous year.
- Total resource DEL (RDEL) excluding depreciation in real terms was £302.5bn in 2017-18, a fall of 2.2 per cent on the previous year.
- Depreciation in resource DEL was £28.7bn in real terms in 2017-18, an increase of 11.6 per cent on 2016-17.
- Total capital DEL was £55.7bn in real terms in 2017-18, an increase of 6.8 per cent on the previous year.
- Total DEL in real terms fell by 0.9 per cent in 2017-18 from £361.6bn to £358.3bn. The largest reductions in DEL spending in 2017-18 were in Scotland (-£6.4bn, where a section of spending was reclassified to AME) and MHCLG Local Government (-£1.7bn). These were offset by increases in spend for other departments. The largest increases were for Health and Social Care which increased by £2.5bn to £125.2bn (2.0 per cent) and for MHCLG Communities, which increased by £1.3bn (17.0 per cent).

ANNUALLY MANAGED EXPENDITURE

- Resource departmental AME increased by £136.7bn to £433.2bn in real terms in 2017-18. The large rise reflects a change in the long-term discount rate which increases the present value of expected future long-term costs for a one-off accounting charge. The largest increase was in respect of Business, Energy and Industrial Strategy, which increased by £71.6bn, followed by HM Treasury which increased by £25.2bn.
- Capital departmental AME increased by £18.0bn to £21.3bn in 2017-18.

CHART 1 2017-18 Total Departmental Expenditure Limit (TDEL) outturn by department.

Bubble sizes are proportional to the amount of TDEL for each department. TDEL is made up of Resource DEL excluding depreciation plus Capital DEL.

⁽¹⁾ Tax credits include working tax credits, stakeholder pension credits and Child Tax Credits. Child allow ances paid as part of Income Support and Jobseekers' Allow ance are shown within social security benefits. Tax credits include elements that are treated as negative tax in National Accounts.

^{(2) 2017-18} saw a reduction in the "discount rate net of CPI" used to measure the costs of public service pensions accruing over the year on an accounting basis, increasing this figure.

⁽³⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

⁽⁴⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 2.A in Chapter 2.

⁽⁵⁾ Total DEL is given by resource DEL excluding depreciation plus capital DEL.

⁽¹⁾ Real terms figures are the cash figures adjusted to 2017-18 price levels using GDP deflators. The deflators are calculated from the data released by the Office for National statistics on 29 June 2018. The forecasts are consistent with the 2018 Spring Statement.

⁽²⁾ Tax credits include working tax credits, stakeholder pension credits and Child Tax Credits. Child allowances paid as part of Income Support and Jobseekers' Allowance are shown within social security benefits. Tax credits include elements that are treated as negative tax in National Accounts.

⁽³⁾ The change in 2017-18 is due to the reduction in the "discount rate net of CPI" used to measure the costs of public service pensions accruing over the year on an accounting basis.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

⁽⁵⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 2.A in Chapter 2.

⁽⁶⁾ Total DEL is given by resource DEL excluding depreciation plus capital DEL.

⁽¹⁾ The Scottish Government's resource DEL block grant has been adjusted from 2015-16 onwards as agreed in the Scottish Government's Fiscal Framework. From 2015-16 adjustments reflect the devolution of Stamp Duty Land Tax and Landfill Tax. In 2016-17 they reflect the creation of the Scottish Rate of Income Tax. From 2017-18 they reflect the devolution of further income tax powers and revenues from Scottish courts.

⁽²⁾ Figures reflect a change to the long-term discount rate used each year for provisions to maintain compliance with International Financial Reporting Standards.

⁽³⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown. However, the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. Figures in 2013-14 and 2014-15 reflect a change in accounting policy for recognising impairment on the roads network.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

Table 1.4 Resource budgets in real terms⁽¹⁾, 2013-14 to 2017-18

⁽¹⁾ Real terms figures are the cash figures adjusted to 2017-18 price levels using GDP deflators. The deflators are calculated from the data released by the Office for National statistics on 29 June 2018. The forecasts are consistent with the 2018 Spring Statement.

⁽²⁾ The Scottish Government's resource DEL block grant has been adjusted from 2015-16 onwards as agreed in the Scottish Government's Fiscal Framework. From 2015-16 adjustments reflect the devolution of Stamp Duty Land Tax and Landfill Tax. In 2016-17 they reflect the creation of the Scottish Rate of Income Tax. From 2017-18 they reflect the devolution of further income tax powers and revenues from Scottish courts.

⁽³⁾ Figures reflect a change to the long-term discount rate used each year for provisions to maintain compliance with International Financial Reporting Standards.

⁽⁴⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown. However, the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. Figures in 2013-14 and 2014-15 reflect a change in accounting policy for recognising impairment on the roads network.

 $^{(5) \} Transactions \ from \ 2013-14 \ onwards \ have \ been \ affected \ by \ financial \ sector \ interventions, \ see \ Box \ 2.A \ in \ Chapter \ 2.$

⁽¹⁾ Following implementation of ESA10, Network rail is now classified to Central Government. Consequently from 2015-16 there is no longer a Central Government capital grant to Network Rail. The actual expenditure of Network rail appears in the Department for Transport departmental AME budget.

⁽²⁾ In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector.

⁽³⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

⁽¹⁾ Real terms figures are the cash figures adjusted to 2017-18 price levels using GDP deflators. The deflators are calculated from the data released by the Office for National statistics on 29 June 2018. The forecasts are consistent with the 2018 Spring Statement.

⁽²⁾ Following implementation of ESA10, Network rail is now classified to Central Government. Consequently from 2015-16 there is no longer a Central Government capital grant to Network Rail. The actual expenditure of Network rail appears in the Department for Transport departmental AME budget.

⁽³⁾ In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

⁽¹⁾ Total DEL is given by Resource DEL excluding depreciation (Table 1.5) plus Capital DEL (Table 1.8).

⁽²⁾ Following implementation of ESA10, Network rail is now classified to Central Government. Consequently from 2015-16 there is no longer a Central Government capital grant to Network Rail. The actual expenditure of Network rail appears in the Department for Transport departmental AME budget.

⁽³⁾ The Scottish Government's resource DEL block grant has been adjusted from 2015-16 onwards as agreed in the Scottish Government's Fiscal Framework. From 2015-16 adjustments reflect the devolution of Stamp Duty Land Tax and Landfill Tax. In 2016-17 they reflect the creation of the Scottish Rate of Income Tax. From 2017-18 they reflect the devolution of further income tax powers and revenues from Scottish courts.

⁽¹⁾ Figures reflect a change to the long-term discount rate used each year for provisions to maintain compliance with International Financial Reporting Standards.

⁽²⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown. However, the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector. Figures in 2013-14 and 2014-15 reflect a change in accounting policy for recognising impairment on the roads network.

⁽³⁾ The Scottish Government's resource DEL block grant has been adjusted from 2015-16 onwards as agreed in the Scottish Government's Fiscal Framework. From 2015-16 adjustments reflect the devolution of Stamp Duty Land Tax and Landfill Tax. In 2016-17 they reflect the creation of the Scottish Rate of Income Tax. From 2017-18 they reflect the devolution of further income tax powers and revenues from Scottish courts.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2.

⁽⁵⁾ Total departmental expenditure is given by Resource DEL excluding depreciation plus capital DEL plus resource and capital departmental AME.

⁽⁶⁾ Total other expenditure is other AME spend within total managed expenditure.

⁽⁷⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 2.A in Chapter 2.

⁽¹⁾ Real terms figures are the cash figures adjusted to 2017-18 price levels using GDP deflators. The deflators are calculated from the data released by the Office for National statistics on 29 June 2018. The forecasts are consistent with the 2018 Spring Statement.

⁽²⁾ Figures reflect a change to the long-term discount rate used each year for provisions to maintain compliance with International Financial Reporting Standards.

⁽³⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown. However, the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector. Figures in 2013-14 and 2014-15 reflect a change in accounting policy for recognising impairment on the roads network.

⁽⁴⁾ The Scottish Government's resource DEL block grant has been adjusted from 2015-16 onwards as agreed in the Scottish Government's Fiscal Framework. From 2015-16 adjustments reflect the devolution of Stamp Duty Land Tax and Landfill Tax. In 2016-17 they reflect the creation of the Scottish Rate of Income Tax. From 2017-18 they reflect the devolution of further income tax powers and revenues from Scottish courts.

⁽⁵⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions, see Box 2.A in Chapter 2

⁽⁶⁾ Total departmental expenditure is given by Resource DEL excluding depreciation plus capital DEL plus resource and capital departmental AME.

⁽⁷⁾ Total other expenditure is other AME spend within total managed expenditure.

⁽⁸⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 2.A in Chapter 2.

Total Managed Expenditure

⁽¹⁾ Full resource budgeting basis, ie resource plus capital less depreciation. See Table 2.1

⁽²⁾ Transactions have been affected by financial sector interventions. See Box 2A in Chapter 2.

⁽³⁾ Asset Purchase facility and Special Liquidity Scheme.

BACKGROUND TO DEPARTMENTAL BUDGETS

1.1 This chapter brings together information on public expenditure within the current budgeting and control framework. This comprises departmental budgets, including all control totals, as well as reconciling from the budgetary framework to the fiscal aggregates in the National Accounts.

THE BUDGETING AND REPORTING FRAMEWORK

- **1.2 Table 1.1** summarises public expenditure both in terms of the Treasury's budgeting and control framework¹, and in terms of the National Accounts aggregate Total Managed Expenditure (TME) and its components. **Table 1.2** presents the same information in real terms.
- **1.3** There is a fuller description of the budgeting and control framework in **Annex C**. This chapter gives a brief overview.
- **1.4** A clear distinction is made for budgeting between current and capital spending, with departments having separate resource and capital budgets largely based on International Financial Reporting Standards (IFRS). For part of their resource and capital budgets, departments are given firm three year spending limits called Departmental Expenditure Limits (DELs) within which they prioritise resources and plan ahead.
- 1.5 Spending that cannot reasonably be subject to firm multi-year limits, or that relates to certain non-cash transactions, is included in Annually Managed Expenditure (AME). Table 1.1 sets out the main elements of AME. Departmental AME (which is contained in departments' budgets) includes social security spending, and various other items of departmental expenditure. Outside departments' budgets, other AME consists of net expenditure transfers to the EU, locally financed expenditure, debt interest, public corporations' own-financed capital expenditure, and accounting adjustments.

¹ https://www.gov.uk/government/collections/consolidated-budgeting-guidance

RECONCILIATION OF BUDGETING AND NATIONAL ACCOUNTS AGGREGATES

- 1.6 DEL and AME together make up TME, an aggregate that is drawn from the National Accounts, and is defined in National Accounts terms as public sector current expenditure plus public sector gross investment (measured net of sales but gross of depreciation). Note that total public sector depreciation is modelled by the ONS for the National Accounts, while the depreciation referred to in the footnote to **Table 1.1** is depreciation in resource DEL, measured on an IFRS basis.
- **1.7 Table 1.1** shows the reconciliation from the resource and capital budgets to the National Accounts measures of public sector current expenditure and public sector gross investment, respectively. With the deduction of depreciation, the latter reconciles to public sector net investment. **Table 1.2** presents the same information in real terms.
- 1.8 A breakdown of the accounting adjustments used for this reconciliation is shown in **Table** 1.14
- 1.9 Table 1.3 shows the resource budget for each departmental group, with Table 1.4 presenting the same information in real terms. Resource DEL is a control total, which means that departments must manage spending to keep within this total.
- 1.10 Table 1.5 shows resource DEL excluding depreciation as first presented in the Spending Review 2010. The depreciation ring fence is a control total that departments must manage. Table 1.6 presents the same information in real terms.
- **1.11 Table 1.8** shows the capital budget for each departmental group, with **Table 1.9** presenting the same information in real terms. Capital DEL is a control total.

ADMINISTRATION BUDGETS

1.12 Table 1.7 sets out details of administration expenditure in resource DEL for those central government departments that are subject to administration budgets. Administration budgets are set for most civil service departments and are generally designed to contain most back-office functions. These budgets therefore help to drive economy and efficiency in the running of government. Around 65 per cent of administration costs are accounted for by civil service pay, a further 30 per cent is accounted for by procurement of goods and services (e.g. accommodation, equipment, travel). An analysis of administration budgets by economic category is shown in **Table 2.1**.

TOTAL DEL

- 1.13 Table 1.10 shows Total DEL by departmental group. Total DEL is made up of resource DEL excluding depreciation plus capital DEL. Table 1.10 is consistent with Table 1.5 plus Table 1.8. Note that Total DEL is not a control total. Table 1.11 presents the same information as Table 1.10 in real terms.
- **1.14 Table 1.12** presents total expenditure, i.e. the sum of Total DEL and departmental AME, by departmental group. **Table 1.13** presents the same information as **Table 1.12** in real terms.

PUBLIC EXPENDITURE BY SPENDING SECTOR

- **1.15 Table 1.15** shows a breakdown of TME, and within it DEL and AME, between the National Accounts public spending sectors (central government, local government and public corporations).
- **1.16** This breakdown by sector is used in many of the analyses in this publication. In this table current and capital expenditure are added together (net of depreciation).
- **1.17** TME is a consolidated measure of public expenditure, i.e. payments from one sector that are used to finance the expenditure of another sector are excluded from TME, as are the corresponding receipts of the counterparty sector. The split by sector of TME presented in PSS records only the 'own' expenditure components that relate to an individual sector.

CENTRAL GOVERNMENT OWN EXPENDITURE

- **1.18** Central government own expenditure excludes central government spending in support of local government. Loans and capital grants in support of public corporations are also excluded.
- **1.19** However, subsidies to public corporations are included here, as exceptionally these intrapublic sector flows are not consolidated out in the calculation of TME. Central government expenditure includes:
 - departments' own spending;
 - spending of agencies and Arms Length Bodies (ALBs) classified to central government; and
 - spending of the devolved administrations in Scotland, Wales and Northern Ireland.
- **1.20** Central government own expenditure is shown split into DEL, departmental AME, and other AME, including locally financed central government expenditure. This latter category at present only includes expenditure of the Northern Ireland departments financed from regional rates. Further analyses of central government own expenditure are presented in **Chapter 6**.

LOCAL GOVERNMENT EXPENDITURE

- **1.21** Local government expenditure is split according to how it is financed:
 - central government support (which can be in either DEL or AME);
 - locally financed support in Scotland (the proceeds of non-domestic rates in Scotland that are collected and distributed to local authorities by the Scottish Government); and
 - self-financed expenditure. Further analyses of local government expenditure are presented in **Chapter 7**.

PUBLIC CORPORATIONS' EXPENDITURE

- **1.22** The impact of public corporations on the parent department can be either in DEL or departmental AME. For most public corporations, DEL includes:
 - subsidies and capital grants paid;
 - interest and dividends received; and
 - loans and public dividend capital invested.
- **1.23** For self-financing public corporations, grants and subsidies score in DEL and the other items are contained in departmental AME.
- **1.24** Subsidies to public corporations are included in central government own expenditure as they affect central government current expenditure in TME. The total public corporations' expenditure line in this table shows their contribution to TME, which is capital expenditure plus interest and dividends paid to the private sector. Further analyses for public corporations, including information on subsidies, are presented in **Chapter 8**.

CHAPTER 2 ECONOMIC ANALYSES OF BUDGETS

OVFRVIFW

The tables in chapter 2 of Public Spending Statistics present an analysis by economic category of the budgeting aggregates shown in chapter 1. A description of the economic categories referred to below can be found in the main chapter text of the Public Spending Statistics.

RESOURCE DEL

- Total resource DEL in real terms was £331.2bn in 2017-18, a decrease of 1.2 per cent on the previous year. This represents a fall of £0.5bn (0.2 per cent) since 2013-14.
- Staff costs increased by 1.8 per cent in 2017-18, a reflection of the reclassification of academies from local to central government.
- Expenditure on grants to local government totalled £57.2bn in 2017-18, a fall of 4.8 per cent on 2016-17. The two greatest causes of this are the move of schools from local government to academies and the fall in Revenue Support Grant, both occurring in England. The financing of local government expenditure is examined in more detail in chapter 7 of PESA.
- Expenditure on gross current procurement increased by 5.7 per cent in 2017-18. A breakdown of gross current procurement by individual departments is shown in table 2.2.
- Spending on administration, composed mainly of pay and procurement, stood at £9.4bn in 2017-18. This is a fall of 0.2 per cent from the previous year.

RESOURCE AME

- Resource departmental AME increased by £141.7bn to £433.2bn in real terms in 2017-18. The large rise reflects a change in the long-term discount rate which increases the present value of expected future long-term costs for a one-off accounting charge. As part of this, take up of provisions increased from £19.3bn to £101.3 bn.
- The majority of the spending within resource AME is made up of grants to persons and non-profit bodies, which is mainly social security benefits. Expenditure on this heading rose by 1.9 per cent to £200.9bn in 2017-18 from £197.3bn in the previous year.
- Depreciation increased to £12.2bn from -£15.9bn in 2016-17. This is mainly due to fluctuations in the valuation of financial sector interventions held by HM Treasury in 2016-17, which reduced resource departmental AME by £23.1bn in that year.

CAPITAL BUDGETS

- Capital spending within budgets was £77.0bn in 2017-18, a rise of 41.4 per cent on the previous year. The majority of capital spending occurred within DEL. Within Capital departmental AME net lending and investment to the private sector and abroad moved from -£4.7bn in 2016-17 to £12.9bn in 2017-18. This is mainly in respect of lending to banks together with decreased income from the sale of shares.
- Within capital budgets, support for local government decreased by £1.5bn (-14.6 per cent) in 2017-18. Table 7.3 of PESA breaks this down by country and department. In the same year gross capital procurement increased by £1.8bn (5.2 per cent).

⁽¹⁾ Figures here are based on payments and receipts that score in TME and incorporate the net effect of bulk and individual transfers. The Resource-Accounts-based measure of net public-service pensions is used in Table 1.1.

⁽²⁾ Excludes NHS Trusts' depreciation as exceptionally this is not removed in the calculation of TDEL.

⁽³⁾ Transactions have been affected by financial sector interventions. See Box 2.A for details.

⁽⁴⁾ Payments that release provision include bulk and individual transfers, including the transfer of liabilities within government.

BACKGROUND TO ECONOMIC ANALYSES

2.1 This chapter provides an economic category analysis of the budgeting aggregates presented in **Chapter 1**. All data in this chapter fall within the scope of National Statistics.

WHAT'S NEW

2.2 Following the implementation of the Scotland Act 2016 and the associated fiscal Framework, new budgeting arrangements have been agreed with the Scottish Government which see its spend scored as AME rather than DEL. The new arrangements began at the start of 2018-19. The changes only affect tables in Chapters 2 and 7. In Table 2.1 the block grant paid by the UK Government to the Scottish Government is shown against the Other economic category in both Resource and Capital DEL, offset by a corresponding receipt in Resource and Capital departmental AME. Spending funded by the block grant and the Scottish Government itself, is then shown against economic categories within Resource and Capital departmental AME. As a result, since PESA 2017 most economic categories in DEL will have been revised down, with a corresponding increase in the same categories within departmental AME. Total spending by the Scottish Government is not affected.

ANALYSES OF BUDGETS BY ECONOMIC CATEGORY OF SPENDING

- **2.3 Table 2.1** shows analyses of budgets by economic category of spending, consistent with the budgeting aggregates reported in **Chapter 1**. The breakdowns of resource DEL and resource departmental AME are consistent with **Table 1.3**; administration budgets in resource DEL with **Table 1.7**; and capital budgets with **Table 1.8**.
- **2.4** Brief descriptions of the largest economic categories are given below, including the main differences from the corresponding economic categories presented against the expenditure on services framework in **Tables 5.3 and 6.5**.
- **2.5 Staff costs** includes wages and salaries, employers' social contributions, payments of accruing superannuation liability charges for UK staff and locally engaged staff overseas, and amounts that finance employee contributions to pension schemes. It also includes income from the recovery of secondee costs and payments for contract and agency staff that were formerly treated as procurement expenditure.
- **2.6 Gross current procurement** shows expenditure on goods and services, including accommodation and building management, ICT outsourcing, maintenance and support, travel costs and payments for consultancy and audit services. It also includes the purchase of services from GPs.

- 2.7 Current grants include all transfer payments other than subsidies (see 2.8 below) that are not used to fund capital formation. In Table 2.1 these grants are analysed by recipient: local government; persons and non-profit bodies; and overseas recipients. Current grants to local government are intra-public sector payments that consolidate out of Total Managed Expenditure (TME), which is the government's preferred measure of total public spending. Further information on local government finance is given in Chapter 7. Current grants to persons and non-profit bodies largely comprise social security benefits included in resource departmental AME, as well as funding (usually in DEL) to further and higher education institutions and other non-profit private sector bodies. Current grants abroad are mainly foreign aid, such as programmes to reduce poverty.
- **2.8 Subsidies** are current transfer payments to trading businesses (both private sector companies and public corporations) to provide support for current costs, including payments to farmers under the EU's Common Agricultural Policy as well as subsidies to rail and bus operators. They are given with the objective of influencing their levels of production, their prices, or other factors. Unlike other intra-public sector transactions, subsidies to public corporations are included within TME as the receipt of this funding, and subsequent spending, is included within the calculation of the PC's gross operating surplus (which scores on the revenue side of the National Accounts).
- 2.9 Rentals shows net expenditure on hire and rentals under PFI and non-PFI operating leases.
- **2.10 Depreciation**, also termed capital consumption, represents the amount of capital used up in respect of fixed assets measured on the basis of International Financial Reporting Standards (IFRS). The depreciation lines in **Table 2.1** also include releases from the donated assets and government grant reserves, as well as impairments and downward revaluations of fixed assets. As mentioned above, depreciation now also includes the grant equivalent element of student lending. This is the subsidy implied in student loans being issued at the inflation rate rather than the market interest rate.
- **2.11 Take-up of provisions** are costs in resource budgets recognising that liabilities have been incurred that will more likely than not lead to a future payment, but where the amount and timing of these future payments are uncertain. Upon settling the liability the payment scores to the resource or capital budget according to the economic category of the transaction, whilst an equal and opposite (negative) **release of provisions** scores as a benefit to the resource budget. These lines do not include pension scheme provisions (see below).

Box 2.A: Treatment of financial sector interventions in budgets

In the pre-Budget report of December 2009 the use in fiscal policy of new aggregates excluding the temporary effects of financial interventions was introduced. In these aggregates, banks that are classified to the public sector in the National Accounts (Northern Rock, Bradford & Bingley, Dunfermline, Lloyds Banking Group and Royal Bank of Scotland) are treated as if they are outside the public sector, reflecting the Government's intention to return these banks or their assets to the private sector.

The financial sector interventions are treated as follows in Table 2.1:

Resource budget

- Income from sales of goods and services: -£0.2 billion in 2014-15, £0.0 billion in 2015-16, -£0.1 billion in 2016-17 and -£0.1 billion in 2017-18. This is mainly underwriting commission and guarantee fee income;
- Depreciation: In 2013-14 there an impairment of £13.0 billion. There was a gain of £48.0 billion in 2014-15, £10.5 billion in 2015-16 and £23.1 billion in 2016-17. In 2017-18 there was an impairment of £0.4 billion.
- Other: income of -£4.5 billion in 2013-14, -£0.5 billion in 2014-15, -£6.2 billion in 2015-16, -£1.7 billion in 2016-17 and -£0.5 billion in 2017-18. This is mainly interest paid to government and from the sale of shares.

Capital budget

• Net lending to the private sector: -£4.9 billion in 2013-14, -£3.0 billion in 2014-15, -£11.3 billion in 2015-16, -£3.5 billion in 2016-17 and -£0.9 billion in 2017-18. This is mainly lending to banks and the Financial Services Compensation Scheme and subsequent repayments, and income from the sale of shares in Lloyds Banking Group and the Royal Bank of Scotland.

These transactions score within the HM Treasury AME budget.

2.12 Net public service pensions shows the costs of pensions on a National Accounts basis; that is, payments to pensioners less receipts of contributions by employers and employees. It also includes cash payments and receipts associated with bulk and individual transfers into and out of the scheme. Change in pension scheme liabilities shows increases to the liability as measured on an IFRS basis. This includes changes to current service costs, the non-cash impact of bulk or individual transfers in or out, and purchases of added years. Release of provisions covering payments of pension benefits records a reduction equal and opposite to the pension benefits paid, where these are charged to the provision. The unwinding of the discount rate on pension scheme liabilities shows the increase in the liability as future payments move one year closer to being paid (so the effects of discounting reduce). More information on pensions is included in Annex D, and a reconciliation from IFRS pensions in departmental AME to the National Accounts measure is given in Table D1.

- **2.13 Capital grants** are transfer payments that are usually made on the condition that the recipient uses the funds for capital projects. Capital grants in **Table 2.1** are analysed by the nature of the recipient: persons and non-profit bodies; private sector companies; and overseas recipients. Capital grants to local government and public corporations are included as part of the respective capital support rows (see paragraphs 2.13 and 2.14).
- **2.14 Capital support for local government** shows central government support for local government capital expenditure, comprising capital grants and Supported Capital Expenditure (Revenue). More information is given in **Chapter 7**.
- **2.15 Capital support for public corporations** comprises capital grants, net lending (see paragraph 2.18) and public corporations' market and overseas borrowing where this scores in the parent department's budget.
- **2.16 Gross capital procurement** comprises the acquisition of fixed assets (such as land, buildings and machinery) as well as any net increases in stock (where included in budgets). It is measured gross of depreciation. It includes the pay of civil servants engaged in in-house capital formation that is recorded as capital expenditure, rather than as pay..
- **2.17** Income from sales of capital assets records the sale value (book value plus profit/loss) of any assets, such as land, buildings and machinery, disposed of.
- **2.18 Net lending to private sector** means lending by government net of any repayments of previous lending. It includes transactions in shares of private companies so for example privatisation receipts count as negative net lending.
- **2.19 Other** includes items that are too small or too uncommon to warrant an individual line. These include certain receipts that are usually treated as part of revenue in the National Accounts and certain financial transactions. Write-offs of stock and loans are also recorded here. In **Chapters 5 and 6** they are recorded as capital grants in line with National Accounts.
- **2.20 Table 2.2** shows central government gross current procurement expenditure in budgets by departmental group.
- **2.21 Table 2.3** shows central government own capital procurement, gross of depreciation and before deduction of sales, broken down by departmental group.

CHAPTER 4 TRENDS IN PUBLIC SPENDING

OVERVIEW

The tables in chapter 4 show trends in public spending on a longer run basis than other chapters in release, in nominal terms, real terms (inflation-adjusted) and percentage of GDP terms

Table 4.1 shows long run trends in Total Managed Expenditure (TME) and its Public Sector Current Expenditure (PSCE) and Public Sector Net Investment (PSNI) components back to 1976-77.

Tables 4.2 to 4.4 show total expenditure on services split by high level spending function (health, education, social protection, etc.) back to 1994-95.

TRENDS IN TME, PSCE AND PSNI (TABLE 4.1)

- During 2017-18, Total Managed Expenditure has increased in nominal terms by £17.5bn (2.3 per cent), and also in real (inflation-adjusted) terms by £4.3bn (0.6 per cent).
- Since 1976-77, real terms year-on-year decreases in TME have only occurred in 1977-78, 1985-86, 1988-89, 1996-97, 2011-12, 2013-14 and 2016-17.
- TME as a percentage of GDP, which shows the size of the public sector relative to the size of the whole economy, was 38.4 per cent in 2017-18. This is lowest figure since 2003-04.

TRENDS IN FUNCTIONAL EXPENDITURE (TABLE 4.2 TO 4.4)

- In real terms, spending in eight functions increased whilst spending in two functions fell during 2017-18.
- The largest real terms percentage increases were in **Housing and Community Amenities** (15.3 per cent) and in **Economic Affairs** (6.6 per cent).
- The real terms decreases in spending were in **Social Protection** (-0.6 per cent), and in **Recreation**, **Culture and Religion** (-0.1 per cent).
- Spending on **Health** shows a nominal and real terms increase in 2017-18 (2.3 per cent in nominal terms, 0.5 per cent in real terms).
- For greater detail see Table 5.2, which shows a breakdown of public spending at the sub-functional level.

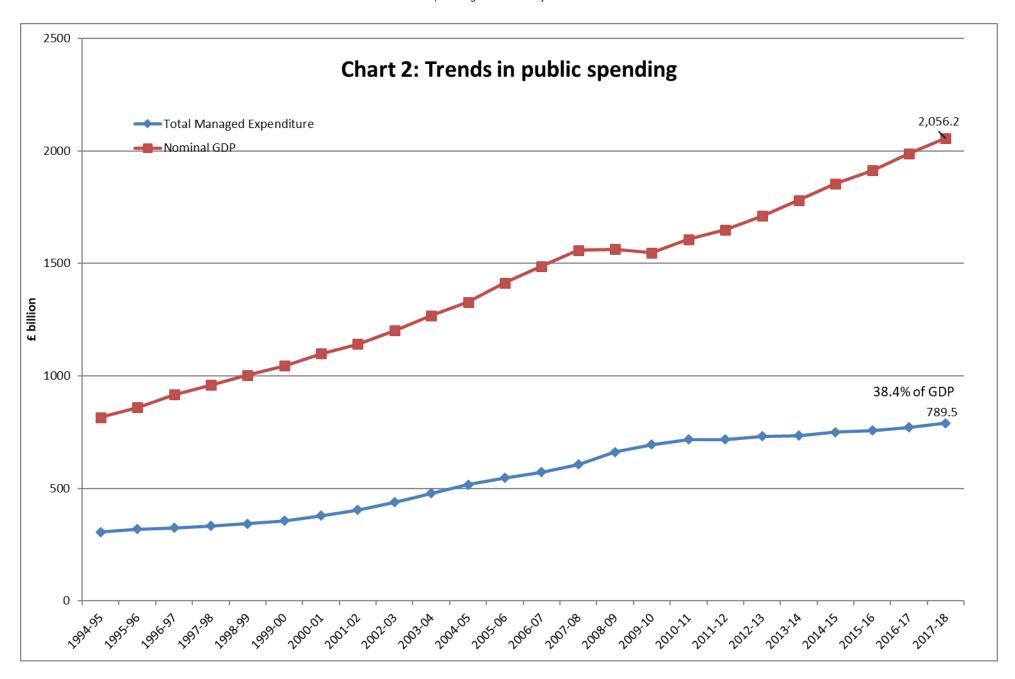

Table 4.1 Public expenditure aggregates, 1976-77 to 2017-18

Outturn data in this table up to 2017-18 fall within the scope of National Statistics

(1) The 2015 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following http://www.nato.int/cps/on/natohg/topics_49198.htm

⁽²⁾ Transactions in 2008-09 onwards have been affected by financial sector interventions. Details are provided in chapter 5 Box 5.A.

⁽³⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year.

⁽⁴⁾ In order to align with ONS data, the transport function now includes expenditure relating to the local government part of the TfL subsidiary, 'Transport Trading Limited'. This data has been obtained from the Office for National Statistics and currently includes expenditure of bodies such as Crossrail and Rail for London from 2011-12 onwards.

⁽⁵⁾ From 2011-12 onwards the 'grant-equivalent element of student loans' is no longer part of the TES framework and has therefore been removed from the Education function. Therefore figures are not directly comparable between 2010-11 and 2011-12. A full explanation of this decision can be found in PESA 2016 Annex E.

⁽⁶⁾ From 2010-11 onwards VAT-based payments are no longer deducted from EU transactions thus bringing these totals in-line with ESA10.

⁽⁷⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

⁽¹⁾ Real terms figures are the nominal figures adjusted to 2017-18 price levels using GDP deflators from the Office for National Statistics (released 29 June 2018).

⁽²⁾ The 2015 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following http://www.nato.int/cps/on/natohg/topics_49198.htm

⁽³⁾ Transactions from 2008-09 onwards have been affected by financial sector interventions. Details are provided in chapter 5 Box 5.A.

⁽⁴⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year.

⁽⁵⁾ In order to align with ONS data, the transport function now includes expenditure relating to the local government part of the TfL subsidiary, 'Transport Trading Limited'. This data has been obtained from the Office for National Statistics and currently includes expenditure of bodies such as Crossrail and Rail for London from 2011-12 onwards.

⁽⁶⁾ From 2011-12 onwards the 'grant-equivalent element of student loans' is no longer part of the TES framework and has therefore been removed from the Education function. Therefore figures are not directly comparable between 2010-11 and 2011-12. A full explanation of this decision can be found in PESA 2016 Annex E.

⁽⁷⁾ From 2010-11 onwards VAT-based payments are no longer deducted from EU transactions thus bringing these totals in-line with ESA10.

⁽⁸⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

⁽¹⁾ GDP until 2017-18 is consistent with the latest figures from the Office for National Statistics (published 29 June 2018).

⁽²⁾ The 2015 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following http://www.nato.int/cps/on/natoho/topics_49198.htm

⁽³⁾ Transactions from 2008-09 onwards have been affected by financial sector interventions. Details are provided in chapter 5 Box 5.A.

⁽⁴⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year.

⁽⁵⁾ In order to align with ONS data, the transport function now includes expenditure relating to the local government part of the TfL subsidiary, 'Transport Trading Limited'. This data has been obtained from the Office for National Statistics and currently includes expenditure of bodies such as Crossrail and Rail for London from 2011-12 onwards.

⁽⁶⁾ From 2011-12 onwards the 'grant-equivalent element of student loans' is no longer part of the TES framework and has therefore been removed from the Education function. Therefore figures are not directly comparable between 2010-11 and 2011-12. A full explanation of this decision can be found in PESA 2016 Annex E.

⁽⁷⁾ From 2010-11 onwards VAT-based payments are no longer deducted from EU transactions thus bringing these totals in-line with ESA10.

⁽⁸⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

BACKGROUND TO TRENDS IN PUBLIC SECTOR EXPENDITURE

- **4.1** The analyses in this chapter show trends in government spending over a longer time span than presented elsewhere in Public Spending Statistics, adjusted as far as possible so that figures for historical outturn years are based on current definitions.
- **4.2** Data in this chapter are a combination of cash and accruals. Data for public sector expenditure on services are on a cash basis up until 1997-98, and on an accruals basis thereafter. All data in this chapter are National Statistics.

WHAT'S NEW

4.3 There have been no significant changes to the presentation of data within this chapter since the summer PSS 2017.

PUBLIC SPENDING AGGREGATES

- **4.4 Table 4.1** shows trends in public spending since 1976-77 in terms of three spending aggregates: public sector current expenditure; public sector net investment; and Total Managed Expenditure (TME). All aggregates are presented in nominal and in real terms and as a per cent of Gross Domestic Product (GDP). Data for a fourth aggregate, public sector depreciation, are shown in nominal terms only.
- **4.5** Outturn data up to 2017-18 for these aggregates are taken from the public sector accounts compiled by the Office for National Statistics (ONS). The public sector accounts are a part of the National Accounts that are updated monthly.

PUBLIC SECTOR EXPENDITURE ON SERVICES BY FUNCTION

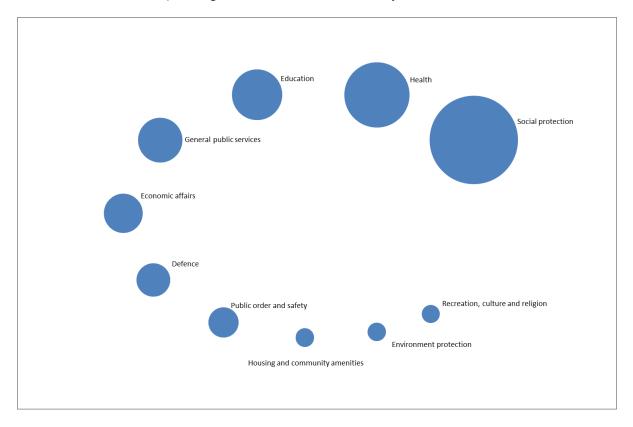

- **4.6** The public spending by function series uses the Total Expenditure on Services spending aggregate (TES). Expenditure on services covers most expenditure by the public sector that is included in TME.
- **4.7** Public sector expenditure on services includes central government spending, but excludes the part that is finance to local government and capital finance to public corporations. This central government own expenditure is then combined with actual spending by local government and public corporations to give total public sector expenditure. Expenditure on services excludes non-cash items such as depreciation and provisions. Derivation of expenditure on services from departments' budgets is available at the end of this release in **Table E.1**.
- **4.8 Table 4.2** shows public sector expenditure on services by United Nations Classification Of the Functions Of Government (COFOG) level 1 from 1994-95. **Tables 4.3 and 4.4** present this in real terms and as a per cent of GDP respectively. These tables cover outturn years up to 2017-18. They also show, in italics, additional Treasury-defined functional divisions that were used prior to the introduction of UN COFOG, but which don't correspond to COFOG level 1.

METHODS AND DATA QUALITY FOR EXPENDITURE ON SERVICE LONG-RUN TABLE

- 4.9 Our aim is for the functional breakdown of spending to be broadly consistent across all tables.
- **4.10** Data in **Tables 4.2, 4.3 and 4.4** for years before 2013-14 are not taken directly from the 'live' public expenditure database that is maintained by government departments (see **Annex A**). Data that precede the most recent five outturn years cease to be 'live' and are archived in a summarised form.
- **4.11** Historical outturn data are not usually subject to adjustment. However, sometimes reclassifications affect the long run functional series. These include ONS decisions for the National Accounts and decisions taken by the Treasury in conjunction with departments to improve the allocation of spending to functions.
- **4.12** Only substantial classification changes are reflected in the historical years, based on the change in spending relative to the size of the function or functions concerned. Reclassifications that are reflected in the historical series are based on archived data. The decision as to the procedure used to implement reclassifications for historical years is taken by Treasury officials after discussions with the relevant government departments, and can sometimes entail a simple percentage split based on the best information available.
- **4.13** It should be noted that the attribution of spending to functions for historical years is less accurate than for live years. In some cases, the presentation of functional numbers as accurate to within £100 million overstates the accuracy of the figures due to rounding. Minor differences in figures or rates of change should be disregarded.

CHAPTER 5 PUBLIC SECTOR SPENDING BY FUNCTION, SUB-FUNCTION AND ECONOMIC CATEGORY

CHART 4 Public Sector spending in 2017-18 broken down by function.

Data are consistent with UN Classification of the Functions of Government framework (COFOG). Each bubble is proportional to the amount spent under each function in 2017-18.

OVERVIEW

The tables in chapter 5 of this release present analysis of total public sector expenditure on services split by function, sub-function and economic category. These presentations are more stable between years than presentations of data by government department on a budgeting basis (Chapters 1 and 2 for example) because they ignore changes in the structure of Government over time.

FUNCTIONAL TABLES

- In nominal terms, spending in all ten functions increased in 2017-18.
- The largest increases in percentage terms, were in Housing and community amenities (17.3 per cent), Economic affairs (8.4 per cent) and General public services (7.7 per cent).
- In percentage terms, the smallest increases in functional spend were in **Social protection** (1.1 per cent), **Recreation**, **culture and religion** (1.6 per cent) and **Health** (2.3 per cent).

SUB-FUNCTIONAL TABLES

- The £1.8bn increase in **Housing and community amenities** was driven by a £1.7bn increase in *Housing development*, £1.2bn of which was due to greater *local authority housing*.
- The largest nominal spending increase by function was in **General public services** (£4.9bn, 7.7 per cent), where *Public sector debt interest* rose by £4.4bn.
- The **Public order and safety** increase of £1.5bn (5.0 per cent) was chiefly due to £1.2bn more being spent on police services other than immigration and citizenship.
- The greatest portion of the £4.1bn (8.4 per cent) increase in **Economic Affairs** spending was taken by *Railways* (£2.0bn, 13.1 per cent), although *National roads* (£500m, 12.0 per cent) and *Local public transport* (£143m, 5.7 per cent) both also rose.

(f) Official Development Assistance (ODA) is the internationally-agreed classification of foreign aid financing and is measured in accordance with international standards agreed by the Organisation for Economic Co-operation and Development (OECD). The UN COFOG measure of Foreign economic aid presented in this table is quite different from the UN ODA measure and therefore not comparable. For example the UN ODA measure include financial transactions such a loans, whereas the UN COFOG measure does not. Also, the UN ODA analysis is on a calendar year rather than financial year basis. A link to the latest ODA release is provided here:

 $\underline{https://www.gov.uk/government/statistics/provisional-uk-official-development-assistance-as-a-proportion-of-gross-national-income-2016 and the results of the results of$

⁽²⁾ Debt interest figures show gross payments to the private sector and overseas.

⁽³⁾ Bank of England public debt transactions shows data in respect of the Asset Purchase Facility and Special Liquidity Scheme.

⁽⁴⁾ The 2016 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following link:

⁽⁵⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions. Details are provided in chapter 5 Box 5.A.

⁽⁶⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The sub-functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year.

⁽⁷⁾ In order to align with ONS data, the transport function now includes expenditure relating to the local government part of the TfL subsidiary, 'Transport Trading Limited'. This data has been obtained from the Office for National Statistics and currently includes expenditure of bodies such as Crossrail and Rail for London from 2011-12 onwards.

⁽⁸⁾ The level of detail required for COFOG level 2 is not yet available in England and Wales. Health spending is therefore presented using HM Treasury's own sub-functional classification.

⁽⁹⁾ The Department for Education is currently recording all central government academy expenditure as 'Secondary Education', across all years presented. While secondary schools currently account for the largest population in the academy sector, it is recognised that this will also cover some schools in primary and other functional categories. In future editions of PESA the Department for Education will look to improve apportionment of spending across the education categories.

⁽¹⁰⁾ Social exclusion n.e.c. includes Child and Working Tax Credits. Also included here are Universal Credit additional costs that were previously scored in 10.9 Social protection n.e.c.

⁽¹¹⁾ An explanation of why the EU transactions are defined in TES in this way is given in Annex E. Complete transactions with the institutions of the EU are shown in Table C.1.

⁽¹²⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

Total Managed Expenditure ⁽⁷⁾	733,813	750,445	756,767	771,986	789,49

⁽¹⁾ Expenditure on services by function and sector is available in the appropriate sectoral chapter; for central government see Table 6.8; for local government see Table 7.4; for public corporations see Table 7.4; for public corporations see Table 9.8; for local government see Tabl (2) Debt interest figures include Bank of England public debt transactions in respect of the Asset Purchase Facility and Special Liquidity Scheme.

⁽³⁾ The 2075 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following link: http://www.nato.int/cps/on/natoho/topics-4988.htm.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions. See chapter 5 Box 5.A for details

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions. See cnapter 5 BOXDA for details.
(5) Following implementation of ESA 2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year.
(6) In order to align with ONS data, the transport function now includes expenditure relating to the local government part of the TfL subsidiary, 'Transport Trading Limited'. This data has been obtained from

the Office for National Statistics and currently includes expenditure of bodies such as Crossrail and Rail for London from 2011-12 onwards. (7) This excludes the temporary effects of banks being classified to the public sector. See Box 5.4 for details.

(1) Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown, however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis shown includes Network Rail spending from 2015-16 and is therefore only included within 'Capital Procurement' from that year.

BACKGROUND TO PUBLIC SECTOR SPENDING BY FUNCTION

5.1 The analyses in this chapter present public sector expenditure for the years 2013-14 onwards, adjusted so that figures for all years are based on current definitions. All data are National Statistics and are based on the expenditure on services framework (explained in **Annex E**).

WHAT'S NEW

- **5.2** Since PESA 2017 the layout of table 5.1 has changed to display local government separate of central government departments. In addition to this, current-only and capital-only versions of this table (5.1a and 5.1b respectively) are included within PESA for the first time. In past editions of PESA, table 5.1 showed local government spending allocated to the most relevant departmental group.
- 5.3 There have been a minor changes to the names of three departments: Health; Communities and Local Government; and Culture, Media and Sport have become Health and Social Care; Housing, Communities and Local Government and Digital, Culture, Media and Sport.

CLASSIFICATION CHANGES

5.4 For this year's publication there are no significant changes to classification to report.

RELATIONSHIP BETWEEN FUNCTIONAL SERIES AND DEPARTMENTS

5.5 Tables 5.1, 5.1a and **5.1b** show public sector expenditure on services by function split across the different government departmental groups for 2017-18. Departmental spending can be spread across a variety of functions, particularly in the case of the devolved administrations.

PUBLIC SECTOR EXPENDITURE ON SERVICES BY SUB-FUNCTION

- **5.6 Table 5.2** provides the most detailed functional analysis of public sector expenditure on services. The tables are presented in a format generally consistent with the level 2 breakdown of the United Nations' Classification Of the Functions Of Government (UN COFOG). The table also shows, in italics, additional Treasury-defined sub-functional divisions that were used prior to the introduction of UN COFOG, but which do not map directly to COFOG level 2. Further information on UN COFOG is available from the United Nations' website¹.
- **5.7** The sub-function analysis of health is presented against HM Treasury's own sub-functional classification. This is because the NHS in England and Wales (not applicable to Scotland or Northern Ireland) is neither financed nor organised along the lines of COFOG level 2, so capturing the required additional information is not currently possible.

_

¹ https://unstats.un.org/unsd/cr/registry/regcst.asp?Cl=4

PUBLIC SECTOR EXPENDITURE ON SERVICES BY ECONOMIC CATEGORY

- **5.8** The economic significance of public spending, such as its impact on GDP, depends on its nature; firstly whether it is current or capital, but also whether it is, for example, a transfer payment or expenditure on goods and services. **Table 5.3** breaks down expenditure on services into its component economic categories.
- **5.9** The presentation of economic categories in **Table 5.3** is broadly consistent with the economic categories used by the Office for National Statistics for the National Accounts. Brief descriptions of each category within expenditure on services are given below. Except where specifically stated, these categories are consistent with the definitions of the corresponding economic categories presented against the budgeting framework in **Table 2.1**:
 - pay includes wages and salaries, employers' social contributions, payments of accruing superannuation liability charges for UK staff and locally engaged staff overseas, and amounts that finance employee contributions to pension schemes. It also includes income from the recovery of secondee costs. Unlike Chapter 2, it does not include payments for contract and agency staff which are treated as procurement instead;
 - gross current procurement includes expenditure on goods and services, including payments for contract and agency staff, and payments for consultancy and audit services. Expenditure on hire and rentals under PFI and non-PFI operating leases, shown as Rentals in Chapter 2, are included here. Income from the sales of goods and services is now shown separately;
 - **current grants to persons and non-profit bodies** are payments to these recipients that do not fund capital formation. They are mainly social security payments but also comprise grants to further and higher education institutions and other non-profit private sector bodies.
 - **current grants abroad** are mainly foreign aid, such as programmes to reduce poverty. They also include the EU transactions set out in **Table 5.2**;
 - **subsidies** are payments by government to trading businesses (both private sector and public corporations) to provide support for current costs, including payments to farmers under the EU's Common Agricultural Policy as well as subsidies to rail and bus operators. They are given with the objective of influencing their levels of production, their prices, or other factors;
 - **net public service pensions** are the costs of pensions on a National Accounts basis; that is, payments to pensioners less receipts of contributions by employers and employees. More information on pensions is included in **Annex D**;
 - **public sector debt interest** reflects the debt interest payments to the private sector, so it excludes intra-public sector payments. These payments do not form part of departmental budgets so are not included within **Table 2.1**;
 - capital grants are transfer payments to the private sector that are usually made on the condition that the recipient uses the funds for capital projects;

- gross capital procurement comprises the acquisition of fixed assets (such as land, buildings and machinery) as well as any increases in stock. It is measured gross of depreciation; and
- income from sales of capital assets is the sale value of any assets, such as land, buildings and machinery, disposed of.

PUBLIC SECTOR EXPENDITURE ON SERVICES SPLIT BY CURRENT AND CAPITAL SPENDING

5.10 Table 5.4 gives a functional (COFOG level 1) breakdown of the current and capital expenditure of the public sector for the years from 2013-14. A functional split by sector is available in **Chapter 6** (central government), **Chapter 7** (local government) and **Chapter 8** (public corporations). The split between capital and current follows the National Accounts definition.

PUBLIC SECTOR GROSS PROCUREMENT BY FUNCTION

- **5.11 Table 5.5** shows public sector gross current procurement by COFOG level 1 function. This is a breakdown of the figure shown in **Table 5.3** and is defined on a National Accounts basis, as described above. Procurement of goods and services by one public sector body from another are included in this table.
- **5.12 Table 5.6** shows public sector gross capital procurement by COFOG level 1 function, and receipts from sales of fixed assets. These are defined on a National Accounts basis, as described above. Figures for asset sales are shown separately for central government, local government and public corporations, as well as for general government, which comprises central government and local government. Receipts, which are at sales value (i.e. book value plus profit or loss), are split between fixed and intangible asset classes, and exclude receipts from sales of financial assets, which are not included within expenditure on services. Sales of assets between public sector bodies are included in this table.

Box 5.A: Treatment of financial sector interventions in expenditure on services

In December 2009 the ONS created an alternative measure of Public Sector Net Borrowing (PSNBex). This treated the classification of banks to the public sector (Northern Rock, Bradford & Bingley, Dunfermline, Lloyds Banking Group and Royal Bank of Scotland) as temporary, reflecting the Government's intention to return these banks to the private sector. As a result, these institutions are treated as if they are outside the public sector.

The financial sector interventions are treated as follows in Table 5.3:

Current expenditure on services

• income from sales of goods and services: £0.03 billion in 2013-14, £0.2 billion in 2014-15, Nil in 2015-16, £0.06 billion in 2016-17 and £0.05 billion in 2017-18.

The other transactions shown in **Box 2.A** do not have an impact on the expenditure on services framework because they either take the form of financial transactions which do not constitute spending (as one asset is exchanged for another), or they are offset by imputed recoveries in the National Accounts (such as the liabilities borne by the Financial Services Compensation Scheme).

CHAPTER 6 CENTRAL GOVERNMENT OWN EXPENDITURE

OVERVIEW

The tables in chapter 6 of Public Spending Statistics (PSS) present analyses of central government own expenditure. This is spending by government departments and other central government bodies on their own activities. Central government support for local government and capital support for public corporations is not included.

Tables 6.1 to 6.3 show central government expenditure on a budgeting basis, consistent with the data shown in chapters 1 to 3.

Tables 6.4 to 6.6 show expenditure on services, consistent with chapters 4 and 5 of PSS.

EXPENDITURE IN BUDGETS

- Central government own expenditure within DEL reached £284.8bn in 2017-18, from £278.6bn in 2016-17, a rise of 2.2 per cent.
- Expenditure within AME stood at £414.9bn in 2017-18. This is a rise from £257.4bn in 2016-17, but this year has been affected by a change in the discount rate, which caused a one-off increase in non-cash costs in 2017-18 budgets.

EXPENDITURE ON SERVICES

- Central government's own current expenditure on services increased to £537.6bn in 2017-18, from £520.3bn the previous year. Capital expenditure on services increased from £42.7bn in 2016-17 to £49.1bn in 2017-18.
- It can be shown in **Table 6.4** that **Social protection** and **Health** account for more than half of all of central government own expenditure. In 2017-18 spending on **Social protection** increased to £213.3bn compared to £209.8bn in the previous year.
- Expenditure on Central government debt interest stood at £54.7bn in 2017-18, up 12.5 per cent from £48.7bn in 2016-17.
- Expenditure on Current grants to persons and non-profit bodies, which is mainly composed of social benefits, rose to £214.8bn in 2017-18 from £214.5bn in 2016-17.

⁽¹⁾ Shown on a full resource budgeting basis, i.e. resource DEL less depreciation plus Capital DEL.(2) Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently from 2015-16 there is no longer a Central Government capital grant to Network Rail within DEL. The actual expenditure of Network Rail appears in the Department for Transport Resource departmental AME budget. In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector.

⁽³⁾ Transactions have been affected by financial sector interventions. See Box 2.A for details.

⁽⁴⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

⁽¹⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently Central Government own current expenditure includes Network Rail spending in all years shown. However, the actual expenditure of Network Rail appears in the Department for Transport Resource departmental AME budget from 2015-16.

 $^{(2) \} Transactions \ have \ been \ affected \ by \ financial \ sector \ interventions. \ See \ Box \ 2.A \ for \ details.$

⁽¹⁾ In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014. This is included in Capital departmental AME as lending to the private sector.

⁽²⁾ Transactions have been affected by financial sector interventions. See Box 2.A for details.

⁽³⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

⁽f) Official Development Assistance (ODA) is the internationally-agreed classification of foreign aid financing and is measured in accordance with international standards agreed by the Organisation for Economic Co-operation and Development (OECD). The UN COFOG measure of Foreign economic aid presented in this table is quite different from the UK ODA measure and therefore not comparable. For example the UK ODA measure include financial transactions such a loans, whereas the UN COFOG measure does not. Also, the UK ODA https://www.gov.uk/government/statistics/provisional-uk-official-development-assistance-as-a-proportion-of-gross-national-income-2016.

 $^{(2) \} Central\ government\ debt\ interest\ figures\ show\ gross\ payments\ to\ the\ private\ sector\ and\ o\ verseas.$

⁽³⁾ The 2015 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO http://www.nato.int/cos/on/natoho/topics_49188.htm.

⁽⁴⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions. Details are provided in Box 5.A.

⁽⁵⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The sub-functional analysis only includes Network Rail (6) The level of detail required for COFOG level 2 is not yet available in England and Wales. Health spending is therefore presented using HM Treasury's own sub-functional classification.

⁽⁷⁾ The Department for Education is currently recording all central government academy expenditure as 'Secondary Education', across all years presented. While secondary schools currently account for the largest population in the academy sector, it is recognised that this will also cover some schools in primary and other functional categories. In future editions of (8) Social exclusion n.e.c. includes Child and Working Tax Credits. Also included here are Universal Credit additional costs that were previously scored in 10.9 Social protection n.e.c.

⁽⁹⁾ An explanation of why the EU transactions are defined in TES in this way is given in Annex E. Complete transactions with the institutions of the EU are shown in Table C.1.

⁽¹⁰⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

⁽¹⁾ Transactions have been affected by financial sector interventions. See Box 5.A for details.

⁽²⁾ Following implementation of ESA10, Network Rail is now classified to Central Government. Consequently from 2015-16 there is no longer a Central Government capital grant to Network Rail within DEL. The actual expenditure of Network Rail appears in the Department for Transport Resource departmental AME budget. In 2014-15 the Government put in place a loan arrangement in advance of Network Rail's formal reclassification to the Public Sector in September 2014.

⁽³⁾ This excludes the temporary effects of banks being classified to the publ; ic sector. See Box 5.A for details.

⁽¹⁾ The 2015 Spending Review continued the commitment to meet the NATO investment pledge to spend 2% of GDP on Defence for the rest of this decade. This is evaluated using the NATO definitions of Defence spending rather than the UN COFOG definitions that are used in this table. The UN COFOG and NATO measures of Defence use different definitions and are therefore not comparable. For example, the NATO Defence figures include pensions whereas in COFOG these are included in Social Protection. Details and figures on NATO Defence expenditures can be found at the following link:

http://www.nato.int/cps/on/natohq/topics 49198.htm

⁽²⁾ Transactions from 2013-14 onwards have been affected by financial sector interventions. See Box 5.A for details.

⁽³⁾ Following implementation of ESA2010, Network Rail is now classified to Central Government. Consequently Total Managed Expenditure (TME) includes Network Rail spending in all years shown however the actual expenditure of Network Rail only appears in the Department for Transport budget from 2015-16. The functional analysis only includes Network Rail spending from 2015-16 and is therefore only included within 'Total Expenditure on services' from that year onwards.

⁽⁴⁾ This excludes the temporary effects of banks being classified to the public sector. See Box 5.A for details.

BACKGROUND TO CENTRAL GOVERNMENT OWN EXPENDITURE

- **6.1** This section provides summary analyses of central government own expenditure, which comprises the expenditure of government departments and other central government bodies on their own activities. Central government, as defined by the Office for National Statistics (ONS) for the National Accounts, includes the devolved administrations, executive agencies and Arms Length Bodies (ALBs), health trusts and academies.
- **6.2** In addition to staff pay and procurement, central government own expenditure includes grants and subsidies paid to individuals and enterprises in the private sector and subsidies to public corporations. It excludes central government support for local government and support for the capital expenditure of public corporations. These data are shown in **Chapters 7 and 8**.
- **6.3** Central government own expenditure accounts for about 75 per cent of Departmental Expenditure Limits (DEL) and about 90 per cent of departmental Annually Managed Expenditure (AME).
- **6.4 Tables 6.1 to 6.3** are presented against the budgeting framework, **Tables 6.4 to 6.6** are presented against the expenditure on services framework.

WHAT'S NEW

6.5 There have been no significant changes since PSS July 2017 affecting tables in this chapter.

CENTRAL GOVERNMENT OWN EXPENDITURE BY DEPARTMENT

6.6 Table 6.1 gives a departmental breakdown of central government own expenditure. Expenditure in DEL is shown separately from expenditure in departmental AME. DEL expenditure in this table is shown on a full resource budgeting basis, which is given by resource DEL plus capital DEL less depreciation (including impairments) in DEL. In a number of areas, for example education, transport, and law and order, a relatively large proportion of expenditure is by local government, with only a relatively small proportion spent directly by central government - some of which will be recorded by Scotland, Wales or Northern Ireland. Other AME includes locally financed expenditure in Northern Ireland that by convention is classified as central government.

CENTRAL GOVERNMENT OWN RESOURCE AND CAPITAL EXPENDITURE BY DEPARTMENT

6.7 Tables 6.2 and 6.3 show the resource and capital elements of **Table 6.1**, respectively. Expenditure for each departmental group is therefore shown on a budgeting basis, while the final line in each table shows total central government own expenditure on a National Accounts basis. The lower section of each table shows the adjustments required to move from the budgeting framework to the National Accounts framework.

CENTRAL GOVERNMENT OWN EXPENDITURE ON SERVICES BY SUB-FUNCTION

6.8 Table 6.4 shows central government own expenditure by sub-function, within the expenditure on services framework. Expenditure on services is an overall measure of public spending that is close to TME, and so broadly represents total current and capital expenditure as in the National Accounts. Full details are available in **Annex E** of PESA 2018.

CENTRAL GOVERNMENT OWN EXPENDITURE ON SERVICES BY ECONOMIC CATEGORY

6.9 Table **6.5** shows central government own expenditure by economic category, set within the framework of expenditure on services. An explanation of the different economic categories is available in **Chapter 5**.

CENTRAL GOVERNMENT OWN CURRENT AND CAPITAL EXPENDITURE ON SERVICES BY FUNCTION

6.10 Table 6.6 shows central government own current and capital expenditure on services by function. This shows the capital and current split on a National Accounts basis.

CHAPTER 7 LOCAL GOVERNMENT FINANCING AND EXPENDITURE

OVERVIEW

Chapter 7 analyses central government support for local government within budgets (tables 7.1 to 7.3) and local government expenditure on services (tables 7.4 to 7.8). It deals primarily with Great Britain, as most equivalent spending in Northern Ireland is central government spending carried out by Northern Ireland departments.

CENTRAL GOVERNMENT SUPPORT FOR LOCAL GOVERNMENT

- Total central government support in DEL was £65.3bn in 2017-18, down from £69.4bn the year before. Support in AME increased to £47.3bn from £45.1bn over the same period.
- Capital support for local government decreased to £8.7bn in 2017-18, from £10.2bn the year before.

LOCAL GOVERNMENT EXPENDITURE ON SERVICES

- Total local government current expenditure on services was £132.0bn in 2017-18, marginally lower than £132.4bn in 2016-17. Total capital expenditure on services was up from £18.2bn to £19.5bn over the same period.
- As shown in table 7.4, local government current expenditure on social protection was £54.7bn in 2017-18, down from £55.2bn the year before. Over the same period, spending on education increased slightly to £41.0bn from £40.9bn.
- Local government capital expenditure on transport decreased to £5.6bn in 2017-18 from £6.2bn in 2016-17.
- A breakdown of local government expenditure by economic category is shown in table 7.8. Spending on pay, which amounted to £62.0bn in 2017-18, accounts for just under 41 per cent of all spending on services by local government. The majority of this was within the education and public order and safety functions.

⁽¹⁾ Receipts from the EU offset in budgets against the subsequent payment to local government.

⁽²⁾ Includes lottery grants.

⁽³⁾ By convention, non-domestic rates income (NDRI) in Scotland (equivalent to non-domestic rate payments in England and Wales) is shown in PESA as locally raised central government support, as it is finance raised in Scotland rather than funding from Whitehall.

⁽⁴⁾ From 2015-16 national non-domestic rates in Wales became classified as locally raised, prior to that they formed part of departmental DEL. 2015-16 includes borrowing to reform the HRA.

⁽¹⁾ Academies are now treated as part of central government, and so their expenditure falls within pay and procurement and is no longer recorded within grants for local government.

⁽²⁾ By convention, non-domestic rates income (NDRI) in Scotland (equivalent to non-domestic rate payments in England and Wales) is shown in PESA as locally raised central government support, i.e. It is finance raised in Scotland rather than funding from Whitehall.

⁽¹⁾ Debt interest is not allocated to individual countries, so is only included in the total UK figures. It excludes all intra-public sector debt interest payments.

BACKGROUND TO LOCAL GOVERNMENT FINANCING AND EXPENDITURE

- 7.1 This chapter describes central government support for local government within budgets (Tables 7.1 to 7.3) and local government expenditure on services (Tables 7.4 to 7.8). It deals primarily with Great Britain most equivalent spending in Northern Ireland is central government spending carried out by Northern Ireland departments. Where relevant, district council spending in Northern Ireland is included in this chapter.
- 7.2 All data are covered by National Statistics protocols.
- 7.3 Central government support data for all years are final outturn figures.
- **7.4** Local government spending data for all years up to 2016-17 are final outturn. Data for 2017-18 are based on provisional outturns and budget plans.

WHAT'S NEW

7.5 Since PSS July 2017, financing of the Scottish Government has been largely moved from DEL to AME, causing large changes to those totals in table 7.1. The net effect of this on total levels is zero.

THE FINANCING OF LOCAL GOVERNMENT EXPENDITURE

- **7.6** Central government support for local government expenditure is provided in two main forms: capital and current grants and the redistribution of non-domestic rate payments. Grant support may be non-specific, e.g. Revenue Support Grant, or related to specific services, e.g. schools grant. From April 2013 in England a non-domestic rates retention scheme was introduced allowing local authorities to keep a proportion of the rates they collect along with growth in the revenue that is generated in their area. Local government expenditure can also be financed by Supported Capital Expenditure (Revenue), equivalent to supported borrowing in Scotland. However, this was discontinued in England as of 31 March 2011.
- 7.7 Local authorities also raise finance locally, largely through council tax, receipts from sales of assets, contributions from developers, sales, fees and charges and borrowing. By convention, Scottish Non-Domestic Rates Income (NDRI) is shown in Public Spending Statistics (PSS) as locally financed central government support in other AME, as it is raised in Scotland rather than funded by Whitehall.
- **7.8** Funding provided to local government by the EU is channelled through departmental budgets but is not treated as central government support in PSS. This is because the receipts from the EU offset in budgets against the subsequent payment to local government, so this funding forms part of the accounting and other adjustments that are required to reconcile the departmental budgeting data to an aggregate drawn from the National Accounts.
- **7.9 Table 7.1** shows current and capital support provided to local government within each country in the UK, according to whether support is in DEL or AME. As noted above, further adjustments are made to these budgeting aggregates to reconcile with total local government expenditure in the National Accounts.

SUPPORT FOR LOCAL GOVERNMENT CURRENT SPENDING

7.10 Central government support for current expenditure on local services is largely provided through:

- Revenue Support Grant (RSG) a non ring-fenced grant paid to local government in England, Scotland and Wales;
- non-domestic (business) rate payments the proceeds of National Non-Domestic Rates (NNDR) are pooled separately in England and Wales, and then redistributed. As noted above, equivalent payments in Scotland are considered to be locally financed rather than central government support. From 1 April 2013 local authorities in England will retain a proportion of this income; Also, from 2015-16 Welsh non-domestic rates move from central government DEL support to locally raised finance, and
- other specific and special grants such as the schools grant and police grant, which fund part of the current expenditure on a specific service or activity.
- 7.11 Table 7.2 shows the above support by country, departmental group and grant.

SUPPORT FOR LOCAL GOVERNMENT CAPITAL PROGRAMMES

7.12 Central government support for local government capital expenditure comprises capital grants and Supported Capital Expenditure (Revenue) up to 31 March 2011 in England, equivalent to supported borrowing in Scotland. The latter enables local authorities to borrow or use other forms of credit to finance capital expenditure, with central government providing a revenue stream to support repayment of principal and interest. This is distinct from prudential borrowing where local authorities finance any additional borrowing from their own available resources. **Table 7.3** shows the components of central government capital support within the United Kingdom by country and department.

DATA SOURCES AND DATA QUALITY

7.13 The central government support for local government shown in **Tables 7.1 to 7.3** is taken from finance data loaded onto the Treasury spending database by departments, consistent with their resource accounts.

LOCAL GOVERNMENT EXPENDITURE

- **7.14** Total local government expenditure is defined as the contribution of local government to Total Managed Expenditure (TME). TME is a consolidated measure in the sense that most transactions between parts of the public sector are excluded. For example, total local government expenditure defined here excludes capital grants paid to public corporations and interest paid to central government. Local government expenditure accounts for around one quarter of TME.
- **7.15** Local government have considerable discretion to determine the level, pattern, and standard of the main services subject to the financial resources available, including the implications for local taxation, and in some cases subject also to central government regulation and inspection of the service provided.

LOCAL GOVERNMENT EXPENDITURE ON SERVICES

- **7.16** The measure of local government spending that is analysed by function and economic category in PSS is local government expenditure on services. It is largely equivalent to the National Accounts measure of local government expenditure, which is also shown in the tables. **Annex E** gives more information on expenditure on services.
- 7.17 The functional categories in **Tables 7.4 to 7.7** are based on the UN Classification Of the Functions Of Government (COFOG) and are consistent with the functional categories used in other PSS chapters:
 - Table 7.4 presents total local government expenditure by function;
 - Table 7.5 shows local government current expenditure by country and function;
 - Table 7.6 shows gross capital expenditure, split by country and function. Gross indicates that it is before sales of capital assets and depreciation; and
 - Table 7.7 shows local government capital receipts within the United Kingdom, again by country and function.
- **7.18 Table 7.8** shows local government expenditure by country and economic category. The economic categories are broadly consistent with those used by the ONS for the National Accounts. These are described in **Chapter 5**.

DATA SOURCES AND DATA QUALITY

- **7.19** The local government expenditure shown in **Tables 7.4 to 7.8** is based on revenue (current) and capital data collections completed by local authorities and sent to the Ministry of Housing, Communities and Local Government (MHCLG) and devolved administrations. These departments carry out quality assurance on the data received, produce aggregate results for publication, and supply this information to the Treasury.
- **7.20** Information is sought from all local authorities, who derive the material from the accounting records used to produce audited accounts. However, detailed expenditure breakdowns may be of lower quality because of inconsistencies of classification by respondents and resource constraints on quality assurance.
- **7.21** Spending information received from local government is described in terms of local authority services (education, roads etc). The Treasury assign spending to the COFOG functional categories used in PSS. In general the read-across from service categories to COFOG categories is relatively clear, but in some cases it is less straightforward and assumptions are applied.
- **7.22** Although the quality of the local government expenditure data in PSS is good enough to provide a broad picture of local government spending, the quality is likely to be lower than the quality of the central government data in PSS. Figures are shown to the nearest £1m so that users performing calculations on the numbers do not introduce errors due to working on rounded numbers.
- **7.23** The Treasury are working with MHCLG and the ONS to improve the quality and timeliness of local government spending data.

CHAPTER 8 PUBLIC CORPORATIONS

OVERVIEW

Chapter 8 analyses the impact of public corporations on departmental budgets and expenditure on services.

Tables 8.1 and **8.2** examine the impact on departmental budgets (DEL and departmental AME), breaking this down by economic category and departmental group.

Tables 8.3 to **8.5** analyse capital spending by public corporations. They break the expenditure down by individual public corporations as well as by function and economic category. Debt interest payments to the private sector, which is the only public corporation current spending that forms part of Total Managed Expenditure (TME), is also included.

- Public corporations' capital expenditure was £16.3bn in 2017-18, down from £17.0bn the year before.
- Out of this total, expenditure by the Housing Revenue Account (for England, Scotland and Wales) was £3.8bn, up from £3.2bn the previous year.
- The other main contributors to public corporations' capital expenditure were Housing Associations, London Underground (as Transport Trading Limited) and Scottish Water.
- Public corporations' expenditure on debt interest was £2.6bn in 2017-18 compared with £3.8bn in 2016-17.

BACKGROUND TO PUBLIC CORPORATIONS

- **8.1** This chapter sets out what public corporations are, recent developments affecting them, how they are controlled, and how they are scored in public expenditure.
- 8.2 All data in this chapter to 2017-18 are National Statistics.

WHAT'S NEW

8.3 The Office for National Statistics has concluded that registered providers of social housing in England are private, market producers and as such were re-classified to the private non-financial corporations sector. This classification took effect from 16 November 2017. Prior to that date they were classified as public corporations. **Table 8.3** includes data for all Housing Associations before and after this classification change.

DEFINITION OF PUBLIC CORPORATIONS

- **8.4** Public corporation is a term from National Accounts, which are based on the European System of Accounts (ESA10). The Office for National Statistics (ONS) therefore determines which bodies are public corporations. A body will be classified as a public corporation where:
 - it is classified as a *market body* a body that derives more than 50% of its production cost from the sale of goods or services at economically significant prices. Some charge for regulatory activities, where these provide a significant benefit to the person paying the fee, for example through quality testing;
 - it is controlled by central government, local government or other public corporations; and
 - it has substantial day to day operating independence so that it should be seen as an institutional unit separate from its parent departments.

SELF FINANCING PUBLIC CORPORATIONS (SFPCS)

- **8.5** The Treasury has designated some public corporations SFPCs. To be classified as an SFPC, the public corporation must normally trade mainly with non-government customers and not perform regulatory functions. In other words, its income must be from selling goods and services into a competitive market rather than from regulatory fees. It must trade profitably and not require subsidies or other financial support from its parent department.
- **8.6** SFPCs normally score in departmental AME rather than in DEL though any subsidies and grants exceptionally paid to them would score in DEL. They also have greater and more individually tailored financial flexibilities. Some SFPCs are also trading funds.

TRADING FUNDS

8.7 Where activities of a government department generate income from the supply of goods and services, those parts of the department may be designated trading funds by Parliament on the application of the Government. Trading funds may keep unspent funds from one year to the next without having to surrender surpluses to the Exchequer at the end of each year.

- **8.8** Most trading funds are classified by ONS as public corporations in the National Accounts. DVLA is the only trading fund that is treated as a central government body in the National Accounts, and therefore in PSS.
- **8.9** Trading funds are not directly subject to central government administration costs controls. The budgeting treatment of trading funds that are public corporations is normally the same as that of other public corporations.

THE BUDGETING CONTROL FRAMEWORK

- **8.10** The following transactions with and in respect of public corporations accountable to Ministers are normally included in departmental budgets:
 - subsidies paid to the public corporation by the department (in resource DEL);
 - capital grants paid to the public corporation by the department (in capital DEL);
 - interest and dividends received from the public corporation (resource DEL, or resource AME if an SFPC);
 - equity purchase in and withdrawals from public corporations (capital DEL, or capital AME if an SFPC) – included with net lending in Table 8.1;
 - loans and public dividend capital (PDC) invested in the public corporation (capital DEL, or capital AME if an SFPC) also included with net lending in **Table 8.1**;
 - public corporations' market and overseas borrowing (PCMOB) where, exceptionally, it is permitted (capital DEL, or capital AME if an SFPC); and
- **8.11** The **Crown Estate** is an SFPC. Uniquely the routine subsidy that is paid to it to cover administration costs is in AME rather than DEL, and the dividends that the Treasury receives from it are recorded outside budgets.
- **8.12** When PCs are government departments in their own right, as is the case for some trading funds, they will normally be assigned a parent department for budgeting purposes, and the budgetary scoring described above will apply, including the cost of capital charge.
- **8.13 Public corporations controlled by local government** include the businesses reporting to Transport for London and local authority airports such as Manchester. DEL and departmental AME include central government support to local government (in **Chapter 7**), some of which may be used by them to support public corporations. However, this is not identified in PSS as relating to public corporations. Therefore the whole of their capital expenditure is included in the public corporations' own-financed capital expenditure line in other AME. They are also included in the bottom line of **Tables 8.1**, **8.3**, **8.4** and **8.5**, which show the total contribution of all public corporations' own expenditure to Total Managed Expenditure (TME).

- **8.14 Table 8.1** shows the impact on departmental budgets (DEL and departmental AME) of public corporations accountable to Ministers. It also shows a reconciliation to the impact of all public corporations, including those accountable to local government, on TME. In this presentation PC gross investment in TME is shown to be the sum of:
 - government capital support in budgets (investment grants and net lending to PCs);
 - PCMOB in budgets; and
 - public corporations' own-financed capital expenditure.

Grants and subsidies in budgets also include those paid to public corporations under schemes that are generally available to the private sector. Any loans between departments and their PCs that are written off by mutual consent will also be shown here.

8.15 Table 8.2 shows the budgetary information in Table 8.1 split by department group.

THE NATIONAL ACCOUNTS

- **8.16** TME measures the current and capital expenditure of the public sector as a whole. It is taken from National Accounts compiled by the ONS. In relation to public corporations, TME includes:
 - subsidies paid to public corporations;
 - the capital expenditure of public corporations, net of sales of assets;
 - changes in public corporations' stocks; and
 - interest and dividends paid by public corporations to the private sector and abroad.
- **8.17** TME is a consolidated measure of public expenditure and so most transactions between different sectors are excluded. This applies to capital grants and net lending paid by central government to public corporations, and interest and dividend flows between general government and public corporations. However, payments of subsidies to, and purchases of goods and services from, public corporations form part of TME as the use of this funding feeds into the calculation of public corporations' gross trading surplus, which scores as an income (or revenue) item in the public sector accounts.
- **8.18** Grants and subsidies given by public corporations to the private sector and overseas, including debt write-offs by mutual consent, are imputed to general government expenditure in National Accounts, as grant-giving is not held to be a normal function of a commercial body.
- **8.19** Note that the impact of public corporations on departmental budgets differs from their impact on TME. Accounting adjustments are used to move from DEL *plus* departmental AME *plus* own-financed capital expenditure (other AME) to TME (see **Annex D** for a full explanation of the accounting adjustments).

- **8.20 Table 8.3** shows the capital expenditure of each major public corporation sponsored by a central government department, and of the biggest public corporations accountable to local government. It also identifies those that are self-financing public corporations or trading funds. The table does not identify separately small public corporations controlled by central government departments nor most public corporations under local authority control their capital expenditure is included in the accounting adjustments. The figures include the purchase of assets, less sales, plus any capital grants paid by a public corporation net of any received from the private sector or abroad.
- **8.21 Tables 8.4 and 8.5** show the capital expenditure from **Table 8.3** broken down by function and economic category respectively. They also include the debt interest payments to the private sector, which is the only public corporation current spending that forms part of TME.

SOURCES OF DATA AND DATA QUALITY

- **8.22** Information in **Tables 8.1** and **8.2** forms part of departments' budgets and so should be of good quality. **Annex A** has more information.
- **8.23** Information on public corporations' capital expenditure is largely sourced from public corporations by departments who in turn supply the data to the Treasury. Our aim is to publish capital spending data for all public corporations accountable to Ministers. However, information is provided by departments primarily for PESA and the PSS and does not form part of a control total. The only appearance in a departmental publication will normally be within the regional expenditure tables in departmental reports. Information in **Tables 8.3 to 8.5** may therefore not be as up to date or accurate as the information in the other tables in this chapter.

FURTHER INFORMATION

8.24 More information is available in the departmental reports of government departments and in the annual reports and accounts of individual public corporations. A fuller list of public corporations is available on the ONS website² in *Sector classification for the National Accounts*.

² http://www.ons.gov.uk/ons/rel/na-classification/national-accounts-sector-classification/index.html

CHAPTER 9 PUBLIC EXPENDITURE BY COUNTRY AND ADDITIONAL TABLES

9.1 The Country and Regional Analysis (CRA) is published each autumn. As a result there are no new substantive data on regional spending for this PSS release. However, the four headline tables of the latest CRA release (CRA 2017) have been included below. To view the entire release please see link:

https://www.gov.uk/government/statistics/country-and-regional-analysis-2017

9.2 Additionally we have included several other tables which complement the tables shown in this release. In particular we have included the GDP deflators used to calculate the real terms tables through the rest of this document. The CRA-based tables in this chapter are based on GDP deflators that were current at their time of original publication.

⁽¹⁾ Per head figures calculated using the latest mid-year population estimates from the ONS. See Annex within the CRA 2017 release for details.

⁽²⁾ Real terms figures are the nominal figures adjusted to 2016-17 price levels using GDP deflators from the Office for National Statistics (released 29 September 2017).

Table C.1 Transactions with the institutions of the EU, 2013-14 to 2017-18

					£ million
	2013-14	2014-15	2015-16	2016-17	2017-18
	outturn	outturn	outturn	outturn	outturn
GNI based contribution	13,845	14,154	12,570	11,440	11,761
UK abatement	-4,130	-4,811	-4,068	-4,757	-4,547
VAT-based payments to the EU (1)	2,163	2,316	2,751	2,477	2,974
Net expenditure transfers to the EU	11,879	11,658	11,253	9,160	10,188
Receipts to cover collection costs in respect of collecting Traditional Own Resources (TOR) ⁽²⁾	-733	-743	-771	-357	-698
to give contribution to TME (1)	11,146	10,915	10,482	8,803	9,490
TOR ⁽²⁾	2,933	3,006	3,085	3,366	3,413
Gross contribution to the EU budget	14,079	13,921	13,567	12,169	12,903
Public sector EU receipts (3)	-3,856	-4,690	-2,811	-4,081	-4,126
Net contributions to the EU budget	10,223	9,231	10,756	8,088	8,777
less Other attributed costs ⁽⁴⁾	79	-	-	-	-
Net payments to EU institutions	10,143	9,231	10,756	8,088	8,777

⁽¹⁾ VAT-based payments to the EU are included in the TME subtotal, reflecting changes in the European System of Accounts 2010.

⁽²⁾ TOR comprises customs duties (including those on agricultural products) and sugar levies.

⁽³⁾ Receipts are shown here on a cash basis. EU receipts in budgets are on an accruals basis.

⁽⁴⁾ The UK's contribution to the cost of EU aid to states outside the EU is attributed to departmental budgets.

Table D.1 Pay-as-you-go public service pensions schemes in AME and in TME, 2013-14 to 2017-18

					£ million
	2013-14	2014-15	2015-16	2016-17	2017-18
	outturn	outturn	outturn	outturn	outturn
Departmental AME (GAAP basis)

GDP DEFLATORS AND POPULATION NUMBERS

GDP DEFLATORS

F.1 A number of the tables in this publication give figures in real terms. Real terms figures are the current price outturns or plans adjusted to a constant price level by excluding the effect of general inflation as measured by the GDP deflator at market prices. The real terms figures in this publication are given in 2017-18 prices. The GDP deflators used in this publication are those given below. The most up to date deflators can be found on the GOV.UK website³.

Table F.1 GDP deflators and money GDP

Financial year	GDP deflator at	t market prices	Money GDP
	2017-18 = 100	Per cent change on previous year	£ million
1976-77	17.190	13.92	142,000
1977-78	19.556	13.77	165,996
1978-79	21.746	11.20	192,181
1979-80	25.416	16.88	232,495
1980-81	30.287	19.16	267,471
1981-82	33.469	10.51	297,954
1982-83	35.908	7.29	327,120
1983-84	37.615	4.75	357,828
1984-85	39.736	5.64	385,681
1985-86	41.919	5.49	423,462
1986-87	43.653	4.14	455,085
1987-88	46.094	5.59	510,371
1988-89	49.082	6.48	569,310
1989-90	52.863	7.70	627,117
1990-91	57.195	8.20	676,943
1991-92	60.480	5.74	712,877
1992-93	62.010	2.53	734,387
1993-94	63.518	2.43	778,018
1994-95	64.286	1.21	815,769
1995-96	66.261	3.07	859,841
1996-97	68.594	3.52	916,578
1997-98	69.048	0.66	959,331
1998-99	69.939	1.29	1,003,372
1999-00	70.206	0.38	1,045,091

2009-10	87.866	1.42	1,547,137						
2010-11	89.501	1.86	1,606,602						
2011-12	90.678	1.31	1,650,370						
2012-13	92.503	2.01	1,710,685						
2013-14	94.200	1.83	1,781,350						
2014-15	95.411	1.28	1,855,049						
2015-16	96.173	0.80	1,912,472						
2016-17	98.323	2.24	1,989,162						
2017-18	100	1.71	2,056,207						
GDP Deflator:	Financial years taken from (DNS series L8GG.							
Money GDP:	Taken from ONS series BKTI								

F.2 Please note that these deflators do not apply to the real terms Country and Regional Analysis (CRA) tables 9.3 and 9.4 that were originally published in November 2017.

POPULATION NUMBERS BY COUNTRY AND REGION

F.3 The population numbers used in Chapters 9 are derived from ONS's mid-year estimates as used in the November 2017 Country and Regional Analysis release. This can be found at the link below:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/657987/Country_and_Regional_Analysis_November_2017.pdf

ONS's most recent mid-year population estimates for the UK are directly available from the link below:
