

Review of information about how to improve education for people with disabilities.

This is Easy Read information.

This report looks at what information is available about how we can improve education for people with disabilities.

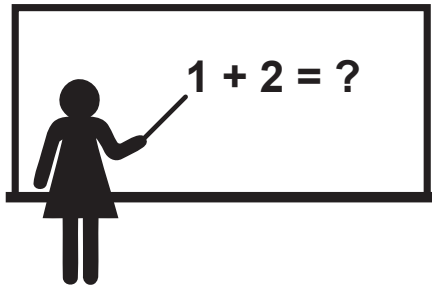

- There are many people in the world with disabilities.

- About 1 in 7 people have a disability.

- About 1 in 20 children have a disability.

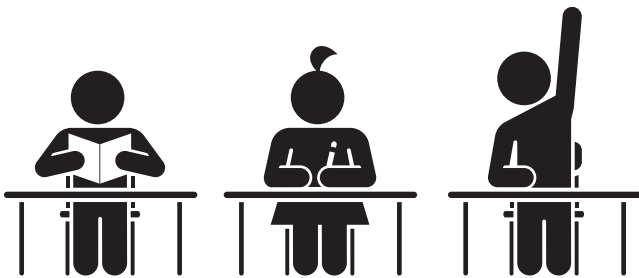

- People with disabilities are not always treated the same as other people. This is not fair.
- People with disabilities have a right to education.
- A good education can bring lots of benefits, like a job and the chance to earn more money.
- Many people with disabilities do not go to school.
- Many people with disabilities do worse at school than people without disabilities.

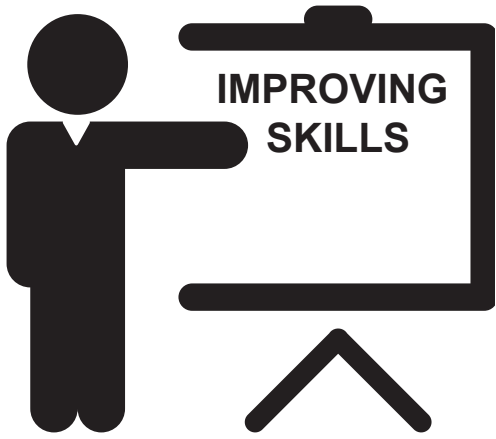

We looked for information about what can be done to help make sure people with disabilities go to school and carry on learning throughout their lives.

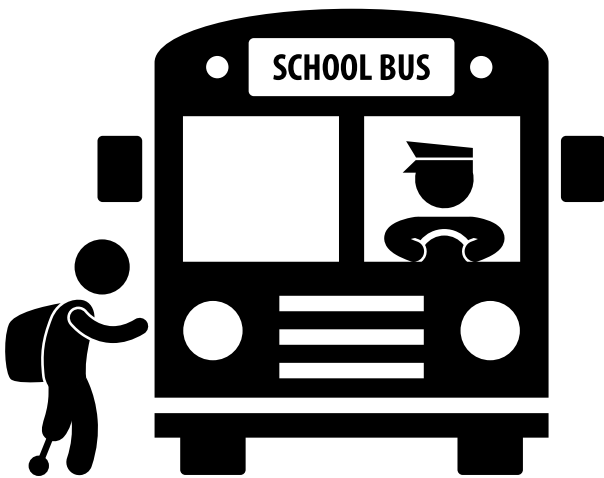

- We found 24 reports that included this information.

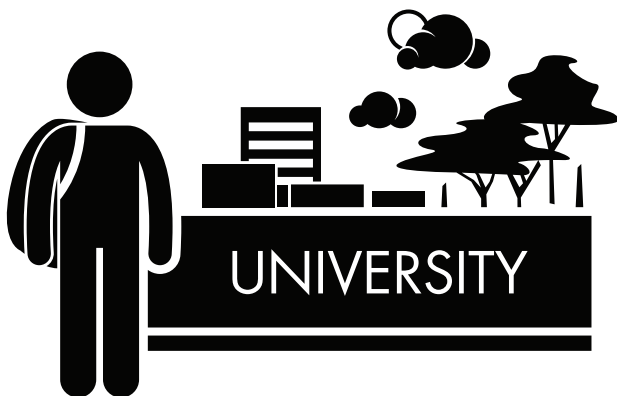

- Most of the reports looked at how to improve the skills of young children with disabilities.

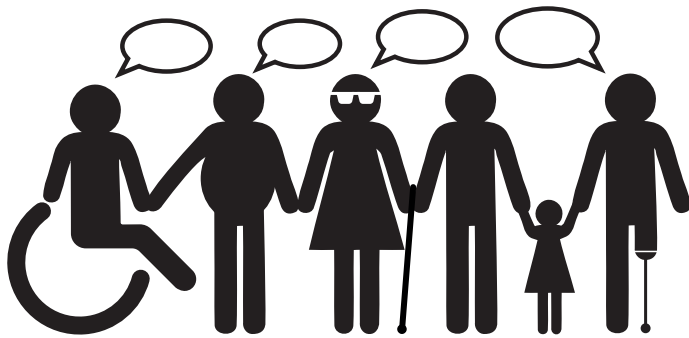

- Some of the reports looked at training for parents and teachers to improve the skills of children with disabilities.

- Not many of the reports looked at what can be done to help very young or older children go to school.

- None of the reports looked at what can be done to help adults carry on learning throughout their lives.

- We need more information about what can be done to help people with disabilities to go to school and carry on learning throughout their lives.
- People with all types of disabilities should be involved in decisions about how to solve problems that affect them.
