This publication contains statistics on work experience, sector-based work academies and Skills Conditionality. Work experience was introduced in January 2011, whilst sector-based work academies and Skills Conditionality were introduced in August 2011. These opportunities are available to unemployed claimants of Universal Credit (UC), Jobseeker’s Allowance (JSA), those in the Work Related Activity Group (WRAG) of Employment and Support Allowance (ESA) and some other out-of-work benefits. These statistics cover legacy benefits and UC live service claimants. These statistics do not include UC full service claimants.

730,130 work experience starts. Of which 78,910 starts were by UC claimants.

84,990 work experience starts in the last 12 months to November 2017, a 53 percent decrease on the previous year.

330,090 sector-based work academy starts. Of which 40,680 starts were by UC claimants.

36,510 sector-based work academy starts in the last 12 months to November 2017, a 35 per cent decrease on the previous year.

812,980 Skills Conditionality (training) starts. Of which 44,110 starts were by UC claimants.

55,980 Skills Conditionality (training) starts in the last 12 months to November 2017, a decrease of 35 per cent on the previous year.
Opportunities to participate in work experience or sector-based work academies schemes, or other skills-related support through Skills Conditionality with additional Jobcentre Plus work coach support, are available to unemployed claimants of Universal Credit (UC), Jobseeker’s Allowance (JSA), those in the Work Related Activity Group (WRAG) of Employment and Support Allowance (ESA) and some other out-of-work benefits. These opportunities help claimants to gain valuable work-related skills, and aim to improve employability prospects. This statistical publication relates to instances where claimants have been referred to opportunities by Jobcentre Plus and where claimants ‘self-refer’ themselves to appropriate training on a voluntary basis. DWP and DfE publish separate statistics on total Further Education for benefit claimants.

Work experience opportunities have been available since January 2011. Jobcentre Plus works with employers to offer jobseekers the opportunity to overcome barriers to employment through a work experience placement lasting two to eight weeks, with the aim to provide participants with the ‘soft’ skills employers are looking for. Sector-based work academies were introduced in August 2011 in England and January 2012 in Scotland. They are not available in Wales. This scheme offers pre-employment training, a work experience placement and guaranteed job interview for unemployed claimants of UC, JSA or ESA(WRAG), aged 18 years or over, or eligible lone parents aged 18-24 in receipt of Income Support, whose youngest child is under the age of four. These statistics show starts to the training element of these placements. Sector-based work academies are developed in partnership with employers and run in sectors with high volumes of current local vacancies. Jobseekers voluntarily opt to take up a place, but once they agree to take up a placement they must complete the pre-employment training element, attend the job interview and accept any subsequent offer of a job.

Skills Conditionality is a policy that requires unemployed claimants of UC, JSA or ESA(WRAG) to undertake mandatory activity to address an identified skills need which will aid their movement into work. Skills Conditionality is split into three categories: (i) a referral to discuss training options with a training provider (England only); (ii) support and advice via the National Careers Service (England only); and (iii) support to gain skills through training. Training includes basic skills (English, numeracy, literacy), occupational skills, employability skills and English for Speakers of Other Languages (ESOL). An individual can be referred to one or more aspects of training. Skills Conditionality started in August 2011 in England. In Scotland, the scheme started from June 2012 for contracted training provision only and from November 2014 for DWP ad hoc training. In Wales, Skills Conditionality is for basic skills training provision only: Skills for Work (Wales) from October 2012 to February 2014, Work Ready Essential Skills training from May 2014 to June 2015; and DWP ad hoc training from November 2014.

This publication document shows various breakdowns for work experience starts, sector-based work academy (pre-employment training) starts and Skills Conditionality (training) starts. Further breakdowns, including Skills Conditionality referrals, are available in the accompanying tables.

Status of the statistics
These are experimental statistics. Our data analytics show that there isn’t a high demand for these statistics, and so we are proposing to users that this will be the last release in the series. The consultation can be found here: https://www.gov.uk/government/collections/pre-work-programme-and-get-britain-working and will run until the end of September 2018. We will publish the results of this consultation and outcome reached in due course.
Main Findings

From January 2011 – November 2017, there have been 730,130 work experience starts, with 84,990 starts over the last year (December 2016 – November 2017).

For those over 24, there has been an increase in the number starting work experience since mid-2014 as it has increasingly been seen of value to older workers.

There has been a decrease in the number of work experience starts since early 2016 amongst those aged 18-24. A number of factors may influence this trend, including changes in the claimant count, starts to other provision types and prioritisation of funding.

Between December 2015-November 2016 and December 2016-November 2017 the 18-24 claimant count fell by 1 per cent\(^1\).

From August 2011 – November 2017, there have been 330,090 sector-based work academy starts, with 36,510 starts over the last year (December 2016 – November 2017).

This is a decrease of 35 per cent compared to the previous year (December 2015 – November 2016), and mainly reflects decreases in starts amongst the under 50s. Government funding for skills in England was reviewed in 2015, with a greater focus on programmes such as apprenticeships and traineeships.

---

\(^1\) NOMIS: [https://www.nomisweb.co.uk/](https://www.nomisweb.co.uk/)
Main Findings

From August 2011 – November 2017, there have been 686,800 Skills Conditionality (Initial Provider Interview) starts, 812,980 Skills Conditionality (Training) starts and 891,600 Skills Conditionality (National Careers Service) starts.

Starts to these aspects of Skills Conditionality have been decreasing since January 2014, reflecting the trend in the claimant count.

An individual can start one or more aspect of Skills Conditionality, so they can appear in either or all of Initial Provider Interview, Training or National Careers Service.

An individual can also start one or more aspect of Skills Conditionality (Training), so they can appear in either or all of occupational training, basic skills training, ESOL or other.

Starts to occupational training have decreased by 40% in comparison to the previous year (December 2015 – November 2016).

Occupational training refers to Occupational training funded by the Education and Skills Funding Agency in England. Basic skills training refers to training on English, numeracy and literacy skills. ESOL refers to English for Speakers of Other Languages. Other training refers to DWP contracted ad-hoc skills provision and skills for work Wales between October 2012 and February 2014.

Characteristics of individuals* starting work experience
January 2011 – November 2017

Main findings

Half (231,170) of the individuals starting a work experience are **women** and **3 in 10** have a **self-declared disability**.

As at November 2017, **40 per cent** of the JSA claimant count was female**2**.

**Almost 1 in 10** (42,100) participating in work experience are **aged 50 plus** and **1 in 5** are from **ethnic minorities**.

The proportion of people **aged 18-24** starting a work experience placement between January 2011 and November 2017 was **63 per cent** which is greater than the proportion of people **aged 18-24** starting a sector-based work academy, **41 per cent**.

The proportion of those **aged 25-49** who started a work experience placement is **28 per cent**.

As at November 2017, **57 per cent** of the JSA claimant count was aged **25-49****3**.

Characteristics of individuals* starting sector-based work academies
August 2011 – November 2017

Main findings

Around a third of individuals starting a sector-based work academies are women, a quarter have a self-declared disability and 1 in 5 are from ethnic minorities.

Of the people who started on sector-based work academies, 64 per cent are male, whilst a smaller proportion of males started on work experience, 51 per cent.

41 per cent of those participating in sector-based work academies are aged 18-24.

As at November 2017, 10 per cent of the JSA claimant count was aged 18-24.

Source: LMS Opportunities March 2018, NOMIS

Note: values in charts may not add to 100 per cent due to missing values and rounding.

*Universal Credit data is excluded from all individual-level data as some of these demographic breakdowns are not collected in our administrative datasets.

---

4 NOMIS: https://www.nomisweb.co.uk/
**Main findings**

Of the 1,854,540 individuals starting Skills Conditionality between August 2011 and November 2017, almost 4 in 10 are women (697,930) and 3 in 10 have a self-declared disability (568,920).

1 in 5 participating in Skills Conditionality are aged 50+ and 3 in 4 are white.

Of the people who started on Skills Conditionality 23 per cent are aged 18-24, which is a smaller proportion when compared with those starting work experience (63 per cent) and sector-based work academies (41 per cent).

As at November 2017, 10 per cent of the JSA claimant count was aged 18-24.

Source: LMS Opportunities March 2018, NOMIS

Note: values in charts may not add to 100 per cent due to missing values and rounding.

*Universal Credit data is excluded from all individual-level data as some of these demographic breakdowns are not collected in our administrative datasets.
Breakdown of programmes by benefit type

Work experience starts by benefit type
Thousands

- Starts by UC claimants
- Starts excluding UC claimants

Sector-based work academy starts by benefit type
Thousands

- Starts by UC claimants
- Starts excluding UC claimants

Skills Conditionality (training) starts by benefit type
Thousands

- Starts by UC claimants
- Starts excluding UC claimants

Main findings

Starts by UC live service claimants are still the minority of starts to Employment Schemes. Between December 2016 and November 2017 UC claimants composed 38% of starts to Work Experience, 41% of starts to sector-based work academies and 25% of starts to Skills Conditionality (training).

These statistics currently only cover Universal Credit live service and do not include UC full service, which covers a wider range of claimant types. As of November 2017, around 200 out of over 700 Jobcentre Plus offices were delivering UC through the full service, whilst live service was operational across all other parts of the country. The full service continues to be rolled out to further job centres across the country.

Despite UC live service being restricted to certain claimant types, it covers the majority of people currently on UC.

About these statistics

These official statistics have been compiled using the March 2018 DWP Labour Market System opportunities database, the December 2017 Work Service Platform and the March 2018 National Benefits Database.

The Employment Schemes are currently an experimental statistical series, which means it is not assessed as a National Statistic. All official statistics should comply with all aspects of the Code of Practice for Official Statistics. Statistics are awarded National Statistics status following an assessment by the Office for Statistics Regulation. The Office for Statistics Regulation considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate. National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

Our data analytics show that there isn’t a high demand for these statistics, and so we are proposing to users that this will be the last release in the series. The consultation can be found here: https://www.gov.uk/government/collections/pre-work-programme-and-get-britain-working and will run until the end of September 2018. We will publish the results of this consultation and outcome reached in due course.
