# **General Information**

1.1 This document sets out the approved procedures to be used for growing trials, tests and assessments as required by the current Protocol for Official Examination of Value for Cultivation and Use for Minor Crops.
2. Scope
2.1 These procedures apply to all varieties of Minor Crops. Minor crops are defined as those where the average number of candidates in the last 3 years was 5 coress, or the number of varieties on the National List is 10 or less. J. UK FOR

## 3. Responsibilities

## 3.1 Procedures Development Group

The Procedures Development Group is responsible to reviewing these procedures annually and making amendments for which it has ponsibility, in accordance with the provisions of the VCU Protocol for Minor Crops

## 3.2 Organisers and Operators

·	~Q`	
British Society of Plant Bre	eeders Ltd	(BSPB)
BSPB House	•	
114 Lancaster Way Bush	ess Park	
Ely	Tel No	01353 653846
Cambs	Fax No	01353 661156
CB6 3NX	Email	jeremy.widdowson@bspb.co.uk

3.2.2 The Trials Organiser is responsible for ensuring all VCU Protocol and Procedures requirements are followed and liaison with all Operators carrying out trials for National List purposes, including supply of seed and data handling.

3.2.3 Data Handling Operator

And Handling Operator identified by the Trials Organiser is responsible for trials organiser is responsible for trials or the second se The Vata Handling Operator identified by the Trials Organiser is responsible for trial 3.2.4 Growing Trial Operators, Seed Handling Operators and Quality Testing Operators.

The Trials Organiser is responsible for identifying potential Growing Trial Operators and Quality Testing Operators to carry out trials and tests as determined by the Procedures Development annual review in accordance with the VCU Protocol, and these 3.3 VCU Protocol and Proced

Ø

3.3.1 The Trials Organiser will forward any reports on VCU Protocol or rocedures noncompliance to APHA within 1 week of receipt. The Trials Organiser will obtain authorisation from APHA for any actions, including those necessary to remedy noncompliances, which are not within the requirements of the VCV Protocol. Such actions must be recorded as non-compliance. Where emergency action is required and APHA staff are not available (eg evenings/weekends) the Trials Organiser should act but report this to APHA at the earliest opportunity. Where GMOs are concerned the arrangements are as detailed in section 3.4.

## 3.4 Procedures for GM varieties

The National Authorities and Trials Organiser will develop procedures for GM 3.4.1 varieties if an application for a GM candidate variety is received.

## 3.5 Processing of Seed

3.5.1 The Trials Organiser is cosponsible for organising the processing of seed of candidate varieties submitted by the applicant, and seed of control, or other reference varieties, in accordance with the requirements set out in these Procedures and the current VCU Protocol. The Trials Organiser will ensure that any seed treatments or additives are approved for the purpose. Seed treatment products for use in National List trials are listed in Appendix 2 of each Annex which describes the Growing Trials. Tests and Assessment Procedures applicable to each minor crop.

## 3.6 Dispetch of Seed

3 The Trials Organiser will arrange for seed to arrive at the Seed Handling Operator by the relevant deadline. The Seed Handling Operator is responsible for processing and Odispatch of seed to Growing Trial Operators and DUS testing centres (including, where appropriate, foreign testing authorities) within the relevant deadlines. Dates are given in Appendix 3 of each Annex which describes the Growing Trials, Tests and Assessment Procedures applicable to each minor crop.

## 3.7 Monitoring of Growing Trial Operators and Seed Handling Operators – Documentation

3.7.1 The Trials Organiser will take any necessary action to enforce deadline dates and guality standards for required documentation.

\* Procedure 3.7.2 The Trials Organiser will ensure Growing Trial Operators and Seed Handling Operators have access to all current protocols and procedures relevant to them and that they are notified of any amendments.

## 3.8 Seed Quantities

3.8.1 The Trials Organiser will determine the quantity of seed required for all VCD and trials in each annual series, including authentication, and will notify the applicant of quantities and delivery addresses. the

### 3.9 Labelling of seed

3.9.1 The Trials Organiser is responsible for ensuring all seed is charly labelled with variety name/breeders reference and AFP number.

## 3.10 Seed Quality

3.10.1 Seed submitted for VCU testing should meet the standards for the final generation of seed given in the appropriate seed regulations in respect of germination, analytical purity and content of other seeds and any other impurities. The seed must be free of adventitious genetically modified presence and accompanied by a declaration to this effect.

# 4. Summary of Growing Trials, Tests and Assessment Procedures for Migor Crops

4.1 The number of trials and ite locations are as detailed in Appendix 4 of each Annex which describes the Goving Trials, Tests and Assessment Procedures applicable to each minor crop.

4.2 Control variaties are listed in Appendix 5 of each Annex which describes the Growing Trials, Tests and Assessment Procedures applicable to each minor crop.

any samples that may be required for analysis. 4.3 The Vials Organiser is responsible for informing the Growing Trial Operators of the additional characters, which must be recorded as and when requested by applicants, and

# 5. Seed Handling Procedures

## 5.1 Responsibilities

5.2.1 Seed Handling Operators will receive a sowing list from the Trials Organiser, along with instructions as to which seed treatments or additives may be used. A list of seed treatments is at Appendix 2 of each Annex which describes the Growing Triated Assessment Procedures applicable to each minor crop

off against the sowing list as it arrives. The Trials Organiser and Apdicant should be notified of any damage to the packaging, loss of seed or identification problems that would effect the validation of the trial.

5.2.3 Once seed has been treated, it must be kept safely until required for drilling, authentication and quality control.

5.2.4 Seed Handling Operators must record use of reatment chemicals in accordance with best practice and in full observance of all manufaturers' recommendations and relevant statutory obligations. Any seed treatment equipment used must be fit for the purpose, properly calibrated, set up and operated in accordance with the manufacturer's recommendation.

5.2.5 Cross contamination must be avoided by ensuring equipment is clean between weighing and treatments.

5.2.6 A record must be kert of chemicals used and date of treatment.

5.2.7 Seed treatment would take place as near to the drilling date as possible.

# 6. Auther Rication of VCU Seed

6.1 APHA Mill notify the Seed Handling Operator of the DUS Test Centre to which a sample of each variety should be sent for authentication. Details of the size of sample can be found in Section B of each minor crop Annex.

2 All samples must be kept under suitable conditions for the authentication procedures required and must be clearly labelled and sealed.

6.3 If the level of off-types recorded in DUS tests or VCU authentication of a candidate exceeds 10%, the VCU tests will be considered invalid.
