

Statistics Release: Rough Sleeping Statistics, England – Autumn 2011

Non-scheduled revisions: correction to the statistical release

Two figures in the table on page 5 of the release giving a breakdown of the nationality of rough sleepers in London taken from the CHAIN database have been corrected. They are the figures shown for Slovenia and Slovakia which were inadvertently transposed in the original table.

The corrected figures are 58 from Slovakia and 2 from Slovenia. These corrections have no knock-on effects on any other information included in the release or tables.
