## Footnotes

r. Revised p. Provisional

The tables refer to the number of individuals whose personal pension (including stakeholder pension) has received a contribution during the year, either from themselves, an employer, or a government mimimum contribution. Years 2001-02 to 2005-06 can now be found on the National Archives website.
 A "-" denotes nil or negligible.

3. Components may not sum to their total due to rounding.

## Notes on the table

i. The table shows individuals contributing to a personal pension by country and government office region. The data is derived from annual personal pension information submitted to HM Revenue & Customs by pension providers in respect of each individual scheme member

ii. The data is collected primarily for compliance purposes and contains details of contributions made by, or on behalf of individuals. Providers have only been required to report in the detail published since 2001-02. Prior to 6 April 2001, the self-employed claimed any relief due on their contributions through Self Assessment and providers did not have to report details of these individuals. Therefore analyses on a comparable basis are not available for years prior to 2001-02.

iii. As well as containing individual details, such as name and date of birth, the data also contains their National Insurance number. Using this it is possible to aggregate across those who have arrangements with one or more providers. Therefore, unlike tables PEN2, 2.1 & 2.2 which are based on aggregate returns from providers and can only record numbers of contributors, these results are presented in terms of numbers of individuals

In Indicates of interfaces. In Indicates of interfaces. In Indicates of interfaces of interfaces of the interface of the inte

use UK nigures.
v. The table relates to the number of individuals who have a recorded contribution in the year - either individual, employer or minimum.
Whilst in theory the data should give us details of all individuals, in practice due to incorrect or missing data less than 100% of records are available for analysis. Simple grossing has been used to remedy this shortfall.
vi. All statistical tables PEN1 – PENS containing information on personal pensions no longer contains any information relating to master trusts. Data for master trusts has been removed from all tables for this year's publication – reflecting the fact that master trusts are in fact occupational pension schemes, even though HMRC receives information on these schemes from administrative relief at source pension data.
