

fish counting at Riding Mill

River Tyne upstream fish counts

Updated 3 Oct, next update
expected by 15 Nov 2018

The table below shows the daily combined upstream counts for salmon and sea trout at the Environment Agency fish counter at Riding Mill on the main Tyne. The counter began operation in June 1996.

Date	Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
1	0	0	0	0	4	15	158	208	74

Total	0	2	6	138	616	4,327	7,966	9,123	6,158			

Note: a hashtag denotes counter non-operational due to maintenance work, while an asterisk indicates counts are minimum figures due to one or more counting channels being inoperative. Counts in brackets are totals based on estimated usage of non-operational channels. Please acknowledge the Environment Agency as the data source if quoting any of the above figures. This document will be updated regularly but the information may not be the latest calendar month. If you require further information on migratory salmonid stocks in North East, please contact Environmental Monitoring Team on 08708 506506 or email:
