Seasonal influenza vaccine uptake amongst GP Patients in England

Provisional monthly data for
1 September 2015 to 31 January 2016

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection request.

Seasonal Flu Vaccine Uptake (GP) 2015/16 - DATA ON GP REGISTERED PATIENTS

PROVISIONAL end of January 2016 cumulative uptake data for England on influenza vaccinations given from 1 September 2015 to 31 January 2016

NATIONAL	Response Summary

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

1. Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15 Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.
2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at; https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf
3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

1. Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15

Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.

2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf

3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015.

Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

1. Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15

Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.

2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf

3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015.

Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

Data Source: ImmForm website: Registered Patient GP practice data

Influenza Immunisation Vaccine Uptake Monitoring Programme

Public Health England (PHE)

Seasonal Flu Vaccine Uptake (GP) 2015/16 - DATA ON GP REGISTERED PATIENTS

PROVISIONAL end of January 2016 cumulative uptake data for England on influenza vaccinations given from 1 September 2015 to 31 January 2016

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

1. Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15 Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.

2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at; https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf

3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015.

Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

5. Some figures have been excluded to ensure that there is not patient disclosure.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

- Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15 Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.
- For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf
- The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
- These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
- Some figures have been excluded to ensure that there is not patient disclosure.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

Seasonal Flu Vaccine Uptake (GP) 2015/16 - DATA ON GP REGISTERED PATIENTS

PROVISIONAL end of January 2016 cumulative uptake data for England on influenza vaccinations given from 1 September 2015 to 31 January 2016

FOOTNOTES

This collection has received approval from the Standardisation Committee for Care Information (SCCI), the new national gateway body for care information collection requests.

1. Data is provisional and represent 98.8% of all GP practices in England responding to the January 2016 survey compared with 99.9% of practices in the same survey month in 2014/15. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 98.8% GP practice sample and is therefore NOT an extrapolated figure for all of England.

2. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu letter published on the GOV.UK at:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/418428/Annual_flu_letter_24_03_15_FINALv3_para9.pdf

3. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.

4. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2015.

Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.

5. Some figures have been excluded to ensure that there is not patient disclosure.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.
