FOOTNOTES

1. Data is provisional and represents 93.7% of all GP practices in England responding to the October 2016 Main GP survey (purple) compared with 91.0% of practices in the same survey month in 2015/16.
2. Data is provisional and represents 94.4% of all GP practices in England responding to the October 2016 Child GP Flu Survey (green) compared with 91.0% of practices in the same survey month in 2015/16.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 93.7% GP practice sample for the main survey and 94.4% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at; https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/529954/Annual_flu_letter_2016_2017.pdf
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2016. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. For Isles of Scilly, City of London and Rutland, the data are aggregated with another Local Authority to ensure that there is no patient disclosure. When presented as their individual local authorities, these areas make up a very small number of practices. Isles of Scilly are combined with Cornwall, City of London is combined with Hackney and Rutland is combined with Leicestershire.
8. All figures are derived from GP systems apart from all 4 year olds in the Essex Area Team where they were vaccinated via a school programme. Data is therefore only available by Essex, Southend and Thurrock Local Authorities and not by CCG for all 4 year olds. Essex LA essentially covers; Mid Essex CCG; North East Essex CCG; West Essex CCG; Basildon and Brentwood CCG; and Castle point and Rochford CCG. Both Southend and Thurrock LAs are co-terminus with Southend and Thurrock CCGs.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

1. Data is provisional and represents 93.7% of all GP practices in England responding to the October 2016 Main GP survey (purple) compared with 91.0% of practices in the same survey month in 2015/16.
2. Data is provisional and represents 94.4% of all GP practices in England responding to the October 2016 Child GP Flu Survey (green) compared with 91.0% of practices in the same survey month in 2015/16.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 93.7% GP practice sample for the main survey and 94.4% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at:
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/529954/Annual_flu_letter_2016_2017.pdf
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2016. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. For Isles of Scilly, City of London and Rutland, the data are aggregated with another Local Authority to ensure that there is no patient disclosure. When presented as their individual local authorities, these areas make up a very small number of practices. Isles of Scilly are combined with Cornwall, City of London is combined with Hackney and Rutland is combined with Leicestershire.
8. All figures are derived from GP systems apart from all 4 year olds in the Essex Area Team where they were vaccinated via a school programme. Data is therefore only available by Essex, Southend and Thurrock Local Authorities and not by CCG for all 4 year olds. Essex LA essentially covers; Mid Essex CCG; North East Essex CCG; West Essex CCG; Basildon and Brentwood CCG; and Castle point and Rochford CCG. Both Southend and Thurrock LAs are co-terminus with Southend and Thurrock CCGs.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

1. Data is provisional and represents 93.7% of all GP practices in England responding to the October 2016 Main GP survey (purple) compared with 91.0% of practices in the same survey month in 2015/16.
2. Data is provisional and represents 94.4% of all GP practices in England responding to the October 2016 Child GP Flu Survey (green) compared with 91.0% of practices in the same survey month in 2015/16.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 93.7% GP practice sample for the main survey and 94.4% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at;
https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/529954/Annual_flu_letter_2016_2017.pdf
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2016. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. For Isles of Scilly, City of London and Rutland, the data are aggregated with another Local Authority to ensure that there is no patient disclosure. When presented as their individual local authorities, these areas make up a very small number of practices. Isles of Scilly are combined with Cornwall, City of London is combined with Hackney and Rutland is combined with Leicestershire.
8. All figures are derived from GP systems apart from all 4 year olds in the Essex Area Team where they were vaccinated via a school programme. Data is therefore only available by Essex, Southend and Thurrock Local Authorities and not by CCG for all 4 year olds. Essex LA essentially covers; Mid Essex CCG; North East Essex CCG; West Essex CCG; Basildon and Brentwood CCG; and Castle point and Rochford CCG. Both Southend and Thurrock LAs are co-terminus with Southend and Thurrock CCGs.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

1. Data is provisional and represents 93.7% of all GP practices in England responding to the October 2016 Main GP survey (purple) compared with 91.0% of practices in the same survey month in 2015/16.
2. Data is provisional and represents 94.4% of all GP practices in England responding to the October 2016 Child GP Flu Survey (green) compared with 91.0% of practices in the same survey month in 2015/16.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 93.7% GP practice sample for the main survey and 94.4% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at; https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/529954/Annual_flu_letter_2016_2017.pdf
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2016. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. For Isles of Scilly, City of London and Rutland, the data are aggregated with another Local Authority to ensure that there is no patient disclosure. When presented as their individual local authorities, these areas make up a very small number of practices. Isles of Scilly are combined with Cornwall, City of London is combined with Hackney and Rutland is combined with Leicestershire.
8. All figures are derived from GP systems apart from all 4 year olds in the Essex Area Team where they were vaccinated via a school programme. Data is therefore only available by Essex, Southend and Thurrock Local Authorities and not by CCG for all 4 year olds. Essex LA essentially covers; Mid Essex CCG; North East Essex CCG; West Essex CCG; Basildon and Brentwood CCG; and Castle point and Rochford CCG. Both Southend and Thurrock LAs are co-terminus with Southend and Thurrock CCGs.
8. Please note that the national total for all 3 year olds at-risk and not at-risk will not add up to the total national figure for all 3 year olds (i.e. which include at-risk and not at-risk). Isle of Wight CCG was removed to ensure that there is no patient disclosure. Isle of Wight CCG is co-terminus with Isle of Wight LA.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.

FOOTNOTES

1. Data is provisional and represents 93.7% of all GP practices in England responding to the October 2016 Main GP survey (purple) compared with 91.0% of practices in the same survey month in 2015/16.
2. Data is provisional and represents 94.4% of all GP practices in England responding to the October 2016 Child GP Flu Survey (green) compared with 91.0% of practices in the same survey month in 2015/16.
3. Where a total for England is quoted (e.g. sum of number of patients registered and number vaccinated) this is taken from the 93.7% GP practice sample for the main survey and 94.4% for the Child GP Flu Survey and is therefore NOT an extrapolated figure for all of England.
4. For definitions of clinical at-risk groups for those aged 6 months to under 65 years, see annual flu Letter published on the GOV.UK at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/529954/Annual_flu_letter_2016_2017.pdf
5. The age under 65 clinical at-risk group data includes pregnant women with other risk factors but excludes otherwise 'healthy' pregnant women and carers.
6. These data include all women already pregnant or becoming pregnant (in the first, second or third trimesters) as diagnosed by a medical professional from 1 September 2016. Accurately identifying this denominator is challenging and denominators may be regarded as over-inclusive as they may include women that become eligible and then ineligible before they are vaccinated. Vaccine uptake for pregnant women is likely to be underestimated.
7. For Isles of Scilly, City of London and Rutland, the data are aggregated with another Local Authority to ensure that there is no patient disclosure. When presented as their individual local authorities, these areas make up a very small number of practices. Isles of Scilly are combined with Cornwall, City of London is combined with Hackney and Rutland is combined with Leicestershire.
8. All figures are derived from GP systems apart from all 4 year olds in the Essex Area Team where they were vaccinated via a school programme. Data is therefore only available by Essex, Southend and Thurrock Local Authorities and not by CCG for all 4 year olds. Essex LA essentially covers; Mid Essex CCG; North East Essex CCG; West Essex CCG; Basildon and Brentwood CCG; and Castle point and Rochford CCG. Both Southend and Thurrock LAs are co-terminus with Southend and Thurrock CCGs.
9. Please note that the national total for all 4 year olds at-risk and not at-risk will not add up to the total national figure for all 4 year olds (i.e. which includes at-risk and not at-risk children). This is due to an area team who was not able to provide a breakdown for at-risk and not at-risk children at this time.
10. A practice was removed from Redbridge LA 4 year old data as it comes under West Essex CCG therefore is included in the Essex Area Team where 4 year olds are being vaccinated via a school programme.

All figures are derived from data as extracted from records on GP systems or as submitted by GP practices or Area Teams and CCGs.
