

Permit with introductory note

The Environmental Permitting (England & Wales) Regulations 2016

A & C Poultry Ltd
The Poultry Site
Land north-east of Frog Hall Bungalow
Naunton Road
Upton Snodsbury
Worcestershire
WR7 4NU

Permit number

EPR/HP3433YU

The Poultry Site

Permit number EPR/HP3433YU

Introductory note

This introductory note does not form a part of the notice.

The main features of the permit are as follows.

The Poultry Site is situated approximately 1km south-east of Upton Snodsbury, 1km east of Cowsden, 1km north of Naunton Beauchamp and 1km south-west of North Piddle. The installation is approximately centred on National Grid Reference SO 95952 53651.

The installation is operated by A & C Poultry Ltd and comprises three poultry houses, numbered one to three, for free range laying hens. The three poultry houses provide a total combined capacity of 48,000 free range laying hens. Laying hens are brought onto the farm at approximately 16 weeks old at 'point of lay'. The laying cycle is normally 60 weeks, before the birds are then removed, the buildings cleaned down and sterilised ready for the next cycle. Including cleaning of the buildings, the cycle is usually 64 weeks.

The hens exit the houses through 'pop-holes' in the side of the buildings onto crushed stone verandas running along the sides. These verandas prevent packing of the ground by the birds and helps clean the birds' claws on returning to the building from the ranging paddocks. The grassland which forms the ranging area is separated into paddocks which are used on a rotation system to allow the land to regenerate.

Ventilation for the three houses is by roof mounted high velocity ridge fans. The ventilation system is computer controlled to enable a variable rate dependent upon the age and ventilation requirements of the birds. Four gable end fans are also fitted to each house, although these are operated infrequently to maintain temperature, typically in the summer months.

Manure conveyor belts, are installed within each of the poultry buildings to collect the droppings throughout cycle, which limits the build-up of manure that needs to be removed at the end of the cycle. Manure is collected twice a week and taken off site for spreading on land owned by third parties. Dirty water from washing out the poultry houses is channelled into underground collection tanks close to the houses to await export off site. During normal operation (excluding times of clean out) rainwater run-off is routed through an enclosed underground drainage system to the attenuation system (a covered tank and pond). A Hydro-brake located in the attenuation tank controls the flow into the pond, which ultimately discharges into Piddle Brook.

The land around the site is predominantly agricultural and relatively flat. The site gently slopes downhill towards the north-east. Feed is stored on the installation in sealed food bins. Mortalities are collected daily and stored in a secure, vermin proof freezer container on site for removal under the National Fallen Stock Scheme. At the end of the cycle the houses are depopulated, washed and disinfected ready for the next cycle.

A fenced off wetland area downslope of the larger free range poultry ranging areas will be created, to prevent or minimise potentially contaminated runoff from these ranging areas entering Piddle Brook.

There are no Special Area of Conservation (SAC), Special Protection Area (SPA) or Ramsar sites within 5km of the installation. There are nine Sites of Special Scientific Interest (SSSI) within 5km of the installation, and 12 Local Wildlife Sites (LWS) and two Ancient Woodland sites within 2km. An assessment of the impact of emissions has been carried out and the installation is considered to have no adverse effect on the nature conservation sites.

We have reviewed the permit for this installation against the revised BAT Conclusions in the Intensive Farming BAT Conclusions document dated February 2017. The permit conditions and schedules ensure the compliance of this installation with this BAT conclusions document.

This permit implements the requirements of the European Union Directive on Industrial Emissions.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit		
Description	Date	Comments
Application EPR/HP3433YU/A001	Duly made 24/07/2017	Application for an intensive farming poultry installation permit.
Additional information received	31/01/2018	Response to 1 st schedule 5 information notice dated 05/12/2017, including: Revised odour management plan, updated risk assessments, information on storage and bunding, additional flood risk information, revised site plan and drainage plan, review of BAT conclusions, further information on energy efficiency, revised noise management plan, revised raw materials inventory, revised accident management plan, waste minimisation review, and details of the package sewage treatment plant.
Additional information received	11/04/2018 and 12/04/2018	Response to 2 nd schedule 5 information notice dated 12/03/2018, including: Updated odour management plan, details of manure management, confirmation of measures to protect pollution risk from flooding, details of bund and tank testing, details of paddock management, BAT conclusion compliance confirmation, updated noise management plan, updated raw materials inventory, updated accident management plan.
Additional information received	11/04/2018 and email dated 30/04/2018	Response to 3 rd schedule 5 information notice dated 06/04/2018, addressing protection of wild birds from pest poisoning, and confirming no metal additives, or antibiotic or hormones are used.
Additional information received	Email dated 18/05/2018	Details of land owned by A & C Poultry Ltd, and details of management of the manure on conveyor belts
Additional information received	Email dated 24/05/2018 and 18/06/2018	Confirmation of compliance with "Rules for farmers and land managers to prevent water pollution"
Additional information received	Email dated 06/07/2018	Confirmation of stock-proof fencing around wetland area and wetland area design
Additional information received	20/07/2018	Drawing showing location of pop holes on site plan, and drawing showing the plan and elevation of the poultry housing
Additional information received	30/07/2018	Email detailing arrangements for rain water runoff from roofs, and the arrangements for transferring manure from the manure belts onto the trailer
Additional information received	18/09/2018	Email confirming timing of worming of the poultry
Permit determined EPR/HP3433YU (Billing reference: PAS reference HP3433YU)	18/10/2018	Permit issued to A & C Poultry Ltd.

End of introductory note

Permit

The Environmental Permitting (England and Wales) Regulations 2016

Permit number

EPR/HP3433YU

The Environment Agency hereby authorises, under regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016

A & C Poultry Ltd (“the operator”),

whose registered office is

**Little Froome Farm,
Avenbury,
Bromyard,
HR7 4RX**

company registration number 08764950

to operate an installation at

**The Poultry Site
Land north-east of Frog Hall Bungalow
Naunton Road
Upton Snodsbury
Worcestershire
WR7 4NU**

to the extent authorised by and subject to the conditions of this permit.

Name	Date
J Linton	18/10/2018

Authorised on behalf of the Environment Agency

Conditions

1 Management

1.1 General management

1.1.1 The operator shall manage and operate the activities:

- (a) in accordance with a written management system that identifies and minimises risks of pollution, so far as is reasonably practicable, including those risks arising from operations, maintenance, accidents, incidents, non-conformances, closure and those drawn to the attention of the operator as a result of complaints; and
- (b) using sufficient competent persons and resources.

1.1.2 Records demonstrating compliance with condition 1.1.1 shall be maintained.

1.1.3 Any person having duties that are or may be affected by the matters set out in this permit shall have convenient access to a copy of the permit.

1.2 Energy efficiency

1.2.1 The operator shall:

- (a) take appropriate measures to ensure that energy is used efficiently in the activities;
- (b) maintain records of fuel and energy consumption used in the activities;

1.3 Efficient use of raw materials

1.3.1 The operator shall:

- (a) take appropriate measures to ensure that raw materials and water are used efficiently in the activities; and
- (b) maintain records of raw materials and water used in the activities;

1.4 Avoidance, recovery and disposal of wastes produced by the activities

1.4.1 The operator shall take appropriate measures to ensure that the waste hierarchy referred to in Article 4 of the Waste Framework Directive is applied to the generation of waste by the activities and that;

- (a) any waste generated by the activities is treated in accordance with the waste hierarchy referred to in Article 4 of the Waste Framework Directive; and
- (b) where disposal is necessary, this is undertaken in a manner which minimises its impact on the environment.

2 Operations

2.1 Permitted activities

2.1.1 The only activity (*activities*) authorised by the permit is (*are*) the activity (*activities*) specified in schedule 1 table S1.1 (the "activities").

2.2 The site

2.2.1 The activities shall not extend beyond the site, being the land shown edged in green on the site plan at schedule 7 to this permit.

2.3 Operating techniques

- 2.3.1 The activities shall, subject to the conditions of this permit, be operated using the techniques and in the manner described in the documentation specified in schedule 1, table S1.2, unless otherwise agreed in writing by the Environment Agency.
- 2.3.2 If notified by the Environment Agency that the activities are giving rise to pollution, the operator shall submit to the Environment Agency for approval within the period specified, a revision of any plan or other documentation ("plan") specified in schedule 1, table S1.2 or otherwise required under this permit which identifies and minimises the risks of pollution relevant to that plan, and shall implement the approved revised plan in place of the original from the date of approval, unless otherwise agreed in writing by the Environment Agency.
- 2.3.3 The operator shall maintain and implement a system to record the number of animal places and animal movements.
- 2.3.4 The operator shall ensure that a diet formulation and nutritional strategy is used to reduce the total nitrogen and total phosphorus excreted.
- 2.3.5 The operator shall take appropriate measures in disposal or recovery of solid manure or slurry to prevent, or where this is not practicable, to minimise pollution.
- 2.3.6 Any raw materials or fuels listed in schedule 2 table S2.1 shall conform to the specifications set out in that table.
- 2.3.7 The operator shall ensure that where waste produced by the activities is sent to a relevant waste operation, that operation is provided with the following information, prior to the receipt of the waste:
- (a) the nature of the process producing the waste;
 - (b) the composition of the waste;
 - (c) the handling requirements of the waste;
 - (d) the hazardous property associated with the waste, if applicable; and
 - (e) the waste code of the waste.

2.4 Improvement programme

- 2.4.1 The operator shall complete the improvements specified in schedule 1 table S1.3 by the date specified in that table unless otherwise agreed in writing by the Environment Agency.
- 2.4.2 Except in the case of an improvement which consists only of a submission to the Environment Agency, the operator shall notify the Environment Agency within 14 days of completion of each improvement.

3 Emissions and monitoring

3.1 Emissions to water, air or land

- 3.1.1 There shall be no point source emissions to water, air or land except from the sources and emission points specified in table S3.1 and S3.2.
- 3.1.2 The limits given in schedule 3 shall not be exceeded.
- 3.1.3 Periodic monitoring shall be carried out at least once every 5 years for groundwater and 10 years for soil, unless such monitoring is based on a systematic appraisal of the risk of contamination.

3.2 Emissions of substances not controlled by emission limits

- 3.2.1 Emissions of substances not controlled by emission limits shall not cause pollution. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved emissions management plan, have been taken to prevent or where that is not practicable, to minimise, those emissions.

3.2.2 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to pollution, submit to the Environment Agency for approval within the period specified, an emissions management plan which identifies and minimises the risks of pollution from emissions of substances not controlled by emission limits; and
- (b) implement the approved emissions management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

3.2.3 All liquids in containers, whose emission to water or land could cause pollution, shall be provided with secondary containment, unless the operator has used other appropriate measures to prevent or where that is not practicable, to minimise, leakage and spillage from the primary container.

3.3 Odour

3.3.1 Emissions from the activities shall be free from odour at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved odour management plan, to prevent or where that is not practicable to minimise the odour.

3.4 Noise and vibration

3.4.1 Emissions from the activities shall be free from noise and vibration at levels likely to cause pollution outside the site, as perceived by an authorised officer of the Environment Agency, unless the operator has used appropriate measures, including, but not limited to, those specified in any approved noise and vibration management plan to prevent or where that is not practicable to minimise the noise and vibration.

3.5 Monitoring

3.5.1 The operator shall, unless otherwise agreed in writing by the Environment Agency, undertake the monitoring specified in the following tables in schedule 3 to this permit:

- (a) point source emissions specified in tables S3.1 and S3.2; and
- (b) process monitoring specified in table S3.3.

3.5.2 The operator shall maintain records of all monitoring required by this permit including records of the taking and analysis of samples, instrument measurements (periodic and continual), calibrations, examinations, tests and surveys and any assessment or evaluation made on the basis of such data.

3.6 Pests

3.6.1 The activities shall not give rise to the presence of pests which are likely to cause pollution, hazard or annoyance outside the boundary of the site. The operator shall not be taken to have breached this condition if appropriate measures, including, but not limited to, those specified in any approved pests management plan, have been taken to prevent or where that is not practicable, to minimise the presence of pests on the site.

3.6.2 The operator shall:

- (a) if notified by the Environment Agency, submit to the Environment Agency for approval within the period specified, a pests management plan which identifies and minimises risks of pollution, hazard or annoyance from pests; and
- (b) implement the pests management plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.

4 Information

4.1 Records

4.1.1 All records required to be made by schedules 3, 4 and 5 to this permit shall:

- (a) be legible;
- (b) be made as soon as reasonably practicable;
- (c) if amended, be amended in such a way that the original and any subsequent amendments remain legible, or are capable of retrieval; and
- (d) be retained, unless otherwise agreed in writing by the Environment Agency, for at least 6 years from the date when the records were made, or in the case of the following records until permit surrender:
 - (i) off-site environmental effects; and
 - (ii) matters which affect the condition of the land and groundwater.

4.1.2 The operator shall maintain convenient access, in either electronic or hard copy, to the records, plans and management system required to be maintained by this permit.

4.2 Reporting

4.2.1 The operator shall send all reports and notifications required by the permit to the Environment Agency using the contact details supplied in writing by the Environment Agency.

4.2.2 A report or reports on the performance of the activities over the previous year shall be submitted to the Environment Agency by 31 January (or other date agreed in writing by the Environment Agency) each year. The report(s) shall include as a minimum:

- (a) a review of the results of the monitoring and assessment carried out in accordance with the permit including an interpretive review of that data;
- (b) the performance parameters set out in schedule 4 table S4.2 using the forms specified in table S4.3 of that schedule.

4.2.3 Within 28 days of the end of the reporting period the operator shall, unless otherwise agreed in writing by the Environment Agency, submit reports of the monitoring and assessment carried out in accordance with the conditions of this permit, as follows:

- (a) in respect of the parameters and emission points specified in schedule 4 table S4.1;
- (b) for the reporting periods specified in schedule 4 table S4.1 and using the forms specified in schedule 4 table S4.3; and
- (c) giving the information from such results and assessments as may be required by the forms specified in those tables.

4.2.4 The operator shall, unless notice under this condition has been served within the preceding four years, submit to the Environment Agency, within six months of receipt of a written notice, a report assessing whether there are other appropriate measures that could be taken to prevent, or where that is not practicable, to minimise pollution.

4.3 Notifications

4.3.1 In the event:

- (a) that the operation of the activities gives rise to an incident or accident which significantly affects or may significantly affect the environment, the operator must immediately :—
 - (i) inform the Environment Agency,
 - (ii) take the measures necessary to limit the environmental consequences of such an incident or accident, and

- (iii) take the measures necessary to prevent further possible incidents or accidents; and
 - (b) of a breach of any permit condition the operator must immediately :—
 - (i) inform the Environment Agency, and
 - (ii) take the measures necessary to ensure that compliance is restored within the shortest possible time;
 - (c) of a breach of permit condition which poses an immediate danger to human health or threatens to cause an immediate significant adverse effect on the environment, the operator must immediately suspend the operation of the activities or the relevant part of it until compliance with the permit conditions has been restored.
- 4.3.2 Any information provided under condition 4.3.1(a)(i), or 4.3.1 (b)(i) where the information relates to the breach of a limit specified in the permit, shall be confirmed by sending the information listed in schedule 5 to this permit within the time period specified in that schedule.
- 4.3.3 Where the Environment Agency has requested in writing that it shall be notified when the operator is to undertake monitoring and/or spot sampling, the operator shall inform the Environment Agency when the relevant monitoring and/or spot sampling is to take place. The operator shall provide this information to the Environment Agency at least 14 days before the date the monitoring is to be undertaken.
- 4.3.4 The Environment Agency shall be notified within 14 days of the occurrence of the following matters, except where such disclosure is prohibited by Stock Exchange rules:
- Where the operator is a registered company:
- (a) any change in the operator’s trading name, registered name or registered office address; and
 - (b) any steps taken with a view to the operator going into administration, entering into a company voluntary arrangement or being wound up.
- Where the operator is a corporate body other than a registered company:
- (c) any change in the operator’s name or address; and
 - (d) any steps taken with a view to the dissolution of the operator.
- In any other case:
- (e) the death of any of the named operators (where the operator consists of more than one named individual);
 - (f) any change in the operator’s name(s) or address(es); and
 - (g) any steps taken with a view to the operator, or any one of them, going into bankruptcy, entering into a composition or arrangement with creditors, or, in the case of them being in a partnership, dissolving the partnership.
- 4.3.5 Where the operator proposes to make a change in the nature or functioning, or an extension of the activities, which may have consequences for the environment and the change is not otherwise the subject of an application for approval under the Regulations or this permit:
- (a) the Environment Agency shall be notified at least 14 days before making the change; and
 - (b) the notification shall contain a description of the proposed change in operation.
- 4.3.6 The Environment Agency shall be given at least 14 days notice before implementation of any part of the site closure plan.

4.4 Interpretation

- 4.4.1 In this permit the expressions listed in schedule 6 shall have the meaning given in that schedule.
- 4.4.2 In this permit references to reports and notifications mean written reports and notifications, except where reference is made to notification being made “immediately”, in which case it may be provided by telephone.

Schedule 1 – Operations

Table S1.1 activities		
Activity listed in Schedule 1 of the EP Regulations	Description of specified activity	Limits of specified activity
Section 6.9 A(1)(a)(i) Rearing of poultry intensively in an installation with more than 40,000 places	The rearing of poultry in a facility with a capacity for 48,000 free range layer places.	From receipt of birds, raw materials and fuels onto the site to removal of birds and associated wastes from site.

Table S1.2 Operating techniques		
Description	Parts	Date Received
Application EPR/HP3433YU/A001	Response to question 8a “technical standards” in part B3.5 of the application form, and “Appendix 4: Technical Standards” in supporting documentation.	Duly Made 31/01/2018
Response to Schedule 5 Notice dated 05/12/2017	Response to questions: 4 - dust control, and questions 5 & 6 – storage tanks and bunding. Hydro-Logic Services document reference “L0027” dated 24 January 2018	31/01/2018
Response to Schedule 5 Notice dated 12/03/2018	Response to questions: 3 – measures to minimise pollution during rainfall, 7 – flood risk measures, 12 and appendix 11 – Compliance with Best Available Techniques (BAT) conclusions, under Directive 2010/75/EU of the European Parliament and of the Council, for the intensive rearing of poultry or pigs, Appendix 9, Odour management plan reference “A & C Poultry Ltd/EP/Appendix 9 V003”, Appendix 10, Noise management plan reference “A & C Poultry Ltd/EP/Appendix 10 V003”.	11/04/2018 and 12/04/2018
Additional information received	Details of management of the manure on conveyor belts	Email dated 18/05/2018
Additional information received	Confirmation of compliance with “Rules for farmers and land managers to prevent water pollution, published 2 April 2018 ”	Emails dated 24/05/2018 and 18/06/18
Additional information received	Confirmation of stock-proof fencing around wetland area and wetland area design.	Email dated 06/07/2018
Additional information received	Arrangements for rain water runoff from roofs, and the arrangements for transferring manure from the manure belts onto the trailer	Email dated 30/7/18

Table S1.3 Improvement programme requirements		
Reference	Requirement	Date
IC1	<p>Submit a written report to the Environment Agency for technical assessment and approval. The report must contain the results of a review of the surface water treatment efficacy of the 'wetland area' created in the ranging fields, and assess whether any additional mitigation is appropriate. The review must include monthly monitoring of the upstream (of any discharge from the site) and downstream quality of the Piddle Brook. The upstream and downstream monitoring of the brook must be monthly spot tests, meet MCERT standards and include the following parameters:</p> <p>Biological Oxygen Demand (BOD)</p> <p>Ammoniacal Nitrogen</p> <p>Suspended Solids, and</p> <p>Phosphorus</p> <p>If the review highlights deterioration in piddle brook, with respect to these parameters, then the report must assess whether any additional mitigation is appropriate. The report must contain dates for the implementation of individual measures identified.</p> <p>The notification requirements of condition 2.4.2 will be deemed to have been complied with on submission of the plan.</p> <p>You must implement the report as agreed, and from the date stipulated by the Environment Agency.</p>	12 months, from the introduction of poultry onto the site

Schedule 2 – Waste types, raw materials and fuels

Table S2.1 Raw materials and fuels	
Raw materials and fuel description	Specification
---	---

Schedule 3 – Emissions and monitoring

Emission point ref. & location	Source	Parameter	Limit (including unit)	Reference Period	Monitoring frequency	Monitoring standard or method
Roof fan (high velocity) outlets on poultry houses shown on the site layout plans in schedule 7	Poultry houses 1-3	---	---	---	---	---
Gable end fan outlets on poultry houses shown on the site layout plans in schedule 7	Poultry houses 1-3	---	---	---	---	---
Vent from fuel tank as shown on the site layout plans in schedule 7	Diesel tank	---	---	---	---	---
Diesel generator as shown on the site layout plans in schedule 7	Exhaust	---	---	---	---	---

Emission point ref. & location	Source	Parameter	Limit (incl. unit)	Reference Period	Monitoring frequency	Monitoring standard or method
W1, discharge to Piddle Brook north-east of poultry houses, as indicated on the site plan in schedule 7 NGR: SO 96142 53829.	Rainwater run-off routed via an enclosed system with conveyance channels and pipes to the attenuation system, and wetland overflow which then drains to Piddle Brook.	---	---	---	---	---
Infiltration trench associated with the impermeable section of the access track shown on Figure 3 of the submitted Hydrologic document.(Document Ref: L0027)	Rainwater runoff routed to an infiltration trench located at least 1m above groundwater.	---	---	---	---	---

Table S3.3 Process monitoring requirements					
Emission point reference or source or description of point of measurement	Parameter	Limit (incl. Unit)	Monitoring frequency	Monitoring standard or method	Other specifications
Laying Hens in poultry houses 1 to 3	kg N excreted/animal place/year	0.8 kg N/animal place/year	Annually	Using a mass balance of nitrogen based on the feed intake, dietary content of crude protein, and animal performance or Estimation by using manure analysis for total nitrogen content	For all poultry houses
	kg P ₂ O ₅ excreted/animal place/year	0.45 kg P ₂ O ₅ animal place/year	Annually	Using a mass balance of phosphorus based on the feed intake, dietary content of crude protein, total phosphorus and animal performance or Estimation by using manure analysis for total phosphorus content	For all poultry houses
Laying Hens non-cage housing system in poultry houses 1 to 3	Kg NH ₃ /animal place/year	0.13 kg NH ₃ /animal place/year	Annually	Estimation using a mass balance based on the excretion and the total nitrogen present at each manure management stage	For all poultry houses
Laying Hens in poultry houses 1 to 3	Dust	n/a	Annually	Estimation using emission factors	For all poultry houses

Schedule 4 – Reporting

Table S4.1 Reporting of monitoring data			
Parameter	Emission or monitoring point/reference	Reporting period	Period begins
Process monitoring Parameters as required by condition 3.5.1	---	Every 12 months	1 January

Table S4.2 Performance parameters		
Parameter	Frequency of assessment	Units
Ammonia	Annually	kgNH ₃ /animal place/year
Total Nitrogen excreted	Annually	kgN excreted/animal place/year
Total Phosphorus excreted	Annually	kgP ₂ O ₅ excreted/animal place/year
Dust atmospheric mass emissions	Annually	PM10 kg/year

Table S4.3 Reporting forms		
Media/parameter	Reporting format	Date of form
kg NH ₃ /animal place/year	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	20/09/18
kg N excreted/animal place/year & kg P ₂ O ₅ excreted/animal place/year	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	20/09/18
Dust atmospheric mass emission	Form Process Monitoring 1 or other form as agreed in writing by the Environment Agency	20/09/18

Schedule 5 – Notification

These pages outline the information that the operator must provide.

Units of measurement used in information supplied under Part A and B requirements shall be appropriate to the circumstances of the emission. Where appropriate, a comparison should be made of actual emissions and authorised emission limits.

If any information is considered commercially confidential, it should be separated from non-confidential information, supplied on a separate sheet and accompanied by an application for commercial confidentiality under the provisions of the EP Regulations.

Part A

Permit Number	
Name of operator	
Location of Facility	
Time and date of the detection	

(a) Notification requirements for any malfunction, breakdown or failure of equipment or techniques, accident, or emission of a substance not controlled by an emission limit which has caused, is causing or may cause significant pollution	
To be notified within 24 hours of detection	
Date and time of the event	
Reference or description of the location of the event	
Description of where any release into the environment took place	
Substances(s) potentially released	
Best estimate of the quantity or rate of release of substances	
Measures taken, or intended to be taken, to stop any emission	
Description of the failure or accident.	

(b) Notification requirements for the breach of a limit	
To be notified within 24 hours of detection	
Emission point reference/ source	
Parameter(s)	
Limit	
Measured value and uncertainty	
Date and time of monitoring	
Measures taken, or intended to be taken, to stop the emission	

Time periods for notification following detection of a breach of a limit	
Parameter	Notification period

(c) Notification requirements for the detection of any significant adverse environmental effect	
To be notified within 24 hours of detection	
Description of where the effect on the environment was detected	
Substances(s) detected	
Concentrations of substances detected	
Date of monitoring/sampling	

Part B – to be submitted as soon as practicable

Any more accurate information on the matters for notification under Part A.	
Measures taken, or intended to be taken, to prevent a recurrence of the incident	
Measures taken, or intended to be taken, to rectify, limit or prevent any pollution of the environment which has been or may be caused by the emission	
The dates of any unauthorised emissions from the facility in the preceding 24 months.	
Name*	
Post	
Signature	
Date	

* authorised to sign on behalf of the operator

Schedule 6 – Interpretation

“accident” means an accident that may result in pollution.

“application” means the application for this permit, together with any additional information supplied by the operator as part of the application and any response to a notice served under Schedule 5 to the EP Regulations.

“authorised officer” means any person authorised by the Environment Agency under section 108(1) of The Environment Act 1995 to exercise, in accordance with the terms of any such authorisation, any power specified in section 108(4) of that Act.

“building” means a construction that has the objective of providing sheltering cover and minimising emissions of noise, particulate matter, odour and litter.

“emissions to land” includes emissions to groundwater.

“emissions of substances not controlled by emission limits” means emissions of substances to air, water or land from the activities, either from the emission points specified in schedule 3 or from other localised or diffuse sources, which are not controlled by an emission limit.

“EP Regulations” means The Environmental Permitting (England and Wales) Regulations SI 2016 No.1154 and words and expressions used in this permit which are also used in the Regulations have the same meanings as in those Regulations.

“groundwater” means all water, which is below the surface of the ground in the saturation zone and in direct contact with the ground or subsoil.

‘Hazardous property’ has the meaning in Annex III of the Waste Framework Directive.

“Industrial Emissions Directive” means DIRECTIVE 2010/75/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 24 November 2010 on industrial emissions.

‘List of Wastes’ means the list of wastes established by Commission Decision 2000/532/EC replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste, as amended from time to time.

“Manure and slurry” have the following meaning:

- Manures may be either slurries or solid manures.
- Slurries consist of excreta produced by livestock whilst in a yard or building mixed with rainwater and wash water and, in some cases, waste bedding and feed. Slurries can be pumped or discharged by gravity.
- Slurry includes duck effluent, seepage from manure and wash water.
- Solid manures include farmyard manure (FYM) and comprise material from straw-based housing systems, excreta with lots of straw/sawdust/woodchips in it, or solids from mechanical separators.
- Most poultry systems produce solid manure (litter).
- Solid manure can generally be stacked.

“pests” means Birds, Vermin and Insects.

Operator: A&C Poultry Ltd

Facility: The Poultry Site

Form Number: Process Monitoring 1 / 20/09/18

Reporting of other performance indicators for the period **DD/MM/YYYY** to **DD/MM/YYYY**

Ammonia emissions

Animal type/housing	Emission Factor utilised in kg NH ₃ /animal place /year	Total Value for animal type/housing type in kg NH ₃ /year
		Total value for each animal type/housing
Total	---	Aggregate value to provide total installation emissions

Operator's comments:

Nitrogen excretion

Animal type	Emission Factor utilised in kg N/animal place /year	Total Value for animal type/housing type in kg N excreted/year
		Total value for each animal type
Total	---	Aggregate value to provide total installation emissions

Operator's comments:

Phosphorus excretion

Animal type	Emission Factor utilised in kg P ₂ O ₅ /animal place /year	Total Value for animal type/housing type in kg P excreted/year
		Total value for each animal type
Total	---	Aggregate value to provide total installation emissions

Operator's comments:

Dust emissions

Animal type	Emission Factor utilised in kg PM10 dust/animal place /year	Total Value for animal type/housing type in kg PM10 dust /year
		Total value for each animal type
Total	---	Aggregate value to provide total installation emissions
