Why work with us?

Our Data and Application Solutions (DAS) framework is designed to provide software led technology solutions or applications that support your (often business critical) horizontal back office systems and data needs. DAS will support you with your complex and extensive off-the-shelf software requirements that could require configuration and integration of systems.

This framework replaces our Local Authority Software Applications & Corporate Software Solutions frameworks, with all elements of these covered under DAS.

Choose CCS and benefit from:

- **Catalogue:**
For software licensing and support renewals via our online catalogue to save you time.
- **Delivery agnostic approach:**
Provides you with the ability to procure against a combination of cloud, on premise and hybrid software applications via one agreement to meet your organisation's specific needs.
- **Fully supportive of new requirements:**
Additional services covered include configuration, implementation, migration, and ongoing maintenance and support.
- **Coverage across the public sector:**
In addition to general enterprise applications, the framework features lots specifically tailored for the requirements of health, social care, blue light, and education sectors.
