**PHE Syndromic Surveillance Summary**

Produced by the PHE Real-time Syndromic Surveillance team

04 December 2018

**Syndromic surveillance national summary:**

**Reporting week: 26 November to 2 December 2018**

During week 48 there were further seasonally expected increases in respiratory conditions, including cold/flu calls and GP consultations for upper and lower respiratory tract infections. Bronchiolitis indicators remain high in line with laboratory reports for respiratory syncytial virus (RSV).

**Remote Health Advice:**

Cold/flu calls increased slightly in week 48 and are now at low intensity levels in line with seasonal expectations (Figures 2, 2b & 2c).

**GP In Hours:**

During week 48 GP consultations for respiratory conditions including upper and lower respiratory tract infections, and asthma increased in line with seasonally expected levels (figures 1, 5 & 10).

**Emergency Department:**

During week 48 ED attendances for bronchiolitis decreased (figure 6).

**GP Out of Hours:**

There was a continued increase in consultations for bronchitis/bronchiolitis (figure 4), in line with recent increases in laboratory reports for respiratory syncytial virus (RSV).

**RCGP Weekly Returns Service:**

Syndromic surveillance summary notes

- Key messages are provided from each individual system.
- The different syndromic surveillance systems in operation within PHE access data from different areas of the national health care system.
- Each system is able to monitor a different selection of syndromic indicators based upon a different case mix of patients.
- Access to the full version of each syndromic surveillance bulletin is available through the Syndromic Surveillance website found at: https://www.gov.uk/government/collections/syndromic-surveillance-systems-and-analyses; reports will be made available on Thursday afternoons.

Remote Health Advice
A remote health advice syndromic surveillance system that monitors syndromic calls from remote health advice services e.g. NHS 111 each day across England

GP In-Hours Syndromic Surveillance System
A large UK-based general practitioner surveillance system monitoring daily consultations for a range of clinical syndromic indicators

Emergency Department Syndromic Surveillance System (EDSSS)
A national ED network across England monitoring daily attendances and presenting symptoms/diagnoses

GP Out-of-Hours Syndromic Surveillance System (GPOOHS)
A syndromic surveillance system monitoring daily GP out-of-hours activity and unscheduled care across England using a range of clinical syndromic indicators

RCGP Weekly Returns Service (RCGP WRS)
A sentinel GP surveillance network covering England and Wales monitoring weekly consultations for a range of clinical indicators. This surveillance system is coordinated by the RCGP Research and Surveillance Centre

We thank and acknowledge the contribution of all data providers including:

- NHS 111 and NHS Digital
- Participating EDSSS emergency departments
- Royal College of Emergency Medicine
- Advanced Health & Care and the participating OOH service providers
- QSurveillance®, University of Nottingham; EMIS/EMIS practices; ClinRisk®
- TPP, ResearchOne and participating SystmOne GP practices
