Antenatal and newborn screening

- sickle cell and thalassaemia
- infectious diseases in pregnancy (for HIV, hepatitis B and syphilis)
- fetal anomaly (T21, T18, T13 and fetal anomaly ultrasound)
- newborn hearing
- newborn and infant physical examination (for problems with eyes, hearts, hips and testes)
- newborn blood spot (for 9 rare conditions)

See the antenatal and newborn screening timeline: www.gov.uk/guidance/nhs-population-screening-education-and-training

Bowel cancer screening

Offered to men and women aged 60 to 74 every 2 years. Those aged 75 or over can request screening by calling 0800 7076060. In some parts of the country people aged 55 are also invited for a one-off bowel scope screening test.

Diabetic eye screening

Offered annually to people with diabetes aged 12 and over.

Abdominal aortic aneurysm (AAA) screening

Offered to men during the year they turn 65. Older men can self-refer.

Breast screening

Offered to women aged from 50 up to their 71st birthday. Older women can self-refer.

Cervical screening

Offered to women aged from 25 to 49 every 3 years, and to women aged from 50 to 64 every 5 years.
