

Universal Credit is a payment to help with living costs for those on a low income or out of work. Eligibility for Universal Credit depends on individual circumstances and location.

Universal Credit was introduced in April 2013 in certain pathfinder areas of North West England. Universal Credit is now available in every jobcentre across Great Britain. Roll out was completed in December 2018.

Main story

The number of people on Universal Credit as at 10 January 2019 was 1.6 million. Of these people 560 thousand (34 per cent) were in employment. In November 2018, 1.3 million households were on Universal Credit. The average amount of Universal Credit paid to households on Universal Credit was £650 per month.

130 thousand people started UC In the month up to 10 January 2019

The total number of starts that have been made since Universal Credit began is 2.7 million. The number of starts made to Universal Credit was 130 thousand in the month up to 10 January 2019.

The figures in this chart have been standardised, so may not match figures in the document. Please see the [Background Information and Methodology](#) document for more detail.

1.6 million claimants At 10 January 2019

The number of people on Universal Credit rose to 1.6 million in January 2019. This is a 7 per cent increase from December 2018.

Previously published figures in the time series for People on Universal Credit have been revised in this month's release. Users are advised to obtain the new time series from Stat-Xplore.

1.3 million households At 8 November 2018

In November 2018, 1.3 million households were on Universal Credit. Of these households, 1.1 million (86 per cent) were receiving a Universal Credit payment.

There are a number of reasons why a household may not be in receipt of a payment, one being when someone moves into work and their level of earnings increases to a level where they no longer receive a payment.

What you need to know

This summary contains statistics on Universal Credit covering the period to 10 January 2019. Universal Credit is now available in every jobcentre across Great Britain. Roll out was completed in December 2018.

Universal Credit provides a single payment per household based upon the circumstances of the household. Support for housing costs, children and childcare costs are integrated into Universal Credit, and it also provides additions for disabled people and carers.

The following benefits will be replaced as Universal Credit rolls out:

- Income-based Jobseeker's Allowance
- Income-related Employment and Support Allowance
- Income Support
- Working Tax Credit
- Child Tax Credit
- Housing Benefit

The main features of Universal Credit are:

- Universal Credit is available to people who are in work and on a low income, as well as to those who are out of work.
- Most people will apply online and manage their claim through an online account.
- Universal Credit will be responsive – as people on low incomes move in and out of work, they will get on-going support.
- Most claimants on low incomes will still be paid Universal Credit when they first start a new job or increase their part-time hours.
- Claimants will receive a single monthly household payment, paid into a bank account in the same way as a monthly salary, with some exceptions; support with housing costs will usually go direct to the claimant as part of their monthly payment, although some exceptions apply.

This report contains four measures. **Claims made** counts the number of applications submitted for Universal Credit. Some of these people will go on to **Start** on Universal Credit. **People on Universal Credit** include all those who have started and are still on Universal Credit at the count date (second Thursday of the month). Some people will have their claim terminated either at the request of the individual or if their entitlement to Universal Credit ends. **Households on Universal Credit** are counted as being on Universal Credit where entitlement has been calculated for an assessment period spanning the count date. It includes those who receive a payment, as well as those that don't.

From November 2018, statistics for claims, starts, people and households on Universal Credit has been published quarterly. Data for people on Universal Credit is available via [Stat-Xplore](#) each month.

Please note figures for the latest month (January 2019) are provisional (p) and will be finalised in the next release. See the [Background Information and Methodology](#) document for more detail on the definitions used in this publication.

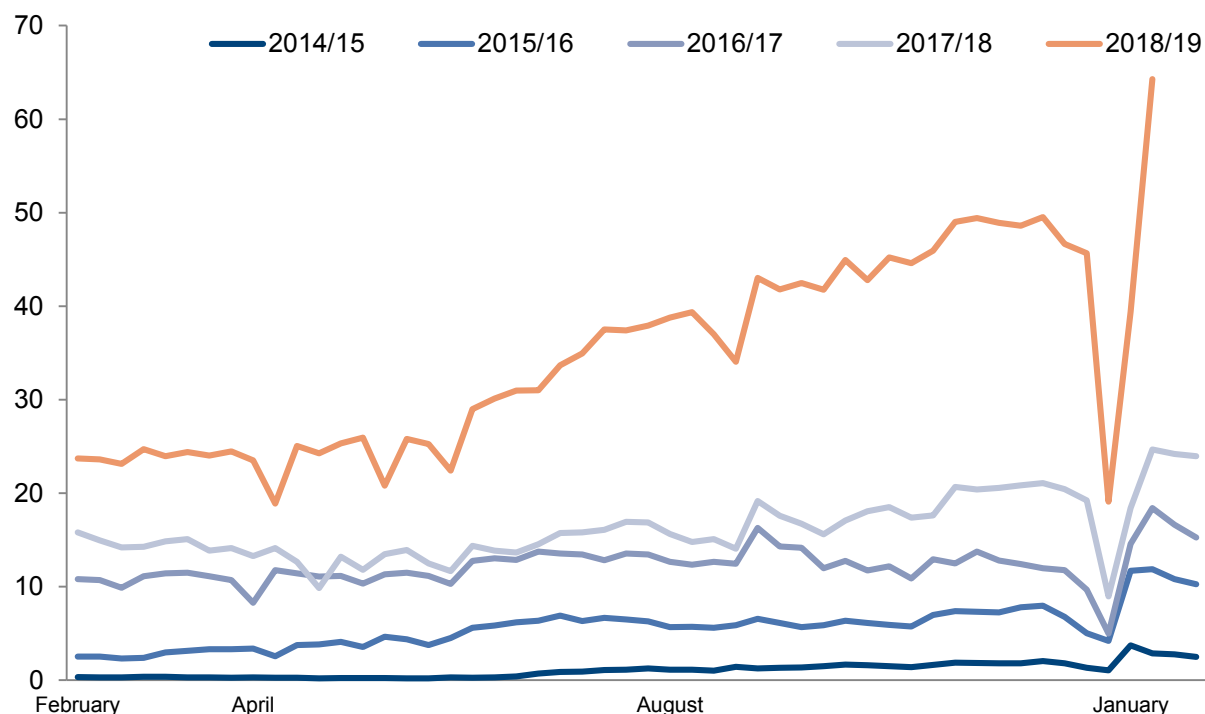

Claiming Universal Credit

Total claims made have reached 3.6 million

New claims per week, February to January of each year up to 10 January 2019

Weekly number of claims

Thousands

The total number of claims made for Universal Credit in the four weeks up to 10 January 2019 was 170 thousand, with an average of 42 thousand claims per week. Generally, more claims are made for Universal Credit on weekdays, compared to weekends. The total number of claims made for Universal Credit has now reached 3.6 million.

Since Universal Credit began, there has been a seasonal trend involving a large drop in the number of claims around the Christmas period. Similar yet smaller dips are also noticeable over the Easter period and the other Bank Holiday periods of each year. In 2018/19 there was an increase in the number of claims in line with the expanded roll out of Universal Credit full service.

Claims made for Universal Credit reached a daily peak of 13 thousand on Monday 7 January 2019, and a weekly peak of 64 thousand in the week ending 10 January 2019.

Claims to Universal Credit are now available in every jobcentre across Great Britain. Roll out was completed in December 2018.

See **Table 1.1** for summary statistics and [Stat-Xplore](#) for the complete data series.

How people claim Universal Credit

People will usually make a claim for Universal Credit online, during which initial claim verification will take place. The claim date is the date that a claimant completes this process and submits their claim. After making a claim, an initial interview will take place with the claimant, where the eligibility for Universal Credit will be confirmed and the claimant will accept a [Claimant Commitment](#). At this point, a claimant will be recorded as starting Universal Credit. Not all people who make a claim for Universal Credit will go on to start, however the statistics for claims used in this publication include all claims made to Universal Credit.

Starts to Universal Credit

Half of starts to Universal Credit in January were from females

Starts per month to Universal Credit by gender, at 11 January 2018 and 10 January 2019

A total of 130 thousand starts were made to Universal Credit in the month up to 10 January 2019.

Of all starts in the month up to 10 January 2019, 50 per cent were by females and 50 per cent were by males. The proportion of females on Universal Credit has grown in line with the roll out of full service.

In the month up to 10 January 2019, the London and Essex Jobcentre Plus group accounted for the majority of people starting Universal Credit (16 per cent) of the total number of starts, followed by North and East Midlands (13 per cent).

Starts per month to Universal Credit by age band, at 11 January 2018 and 10 January 2019

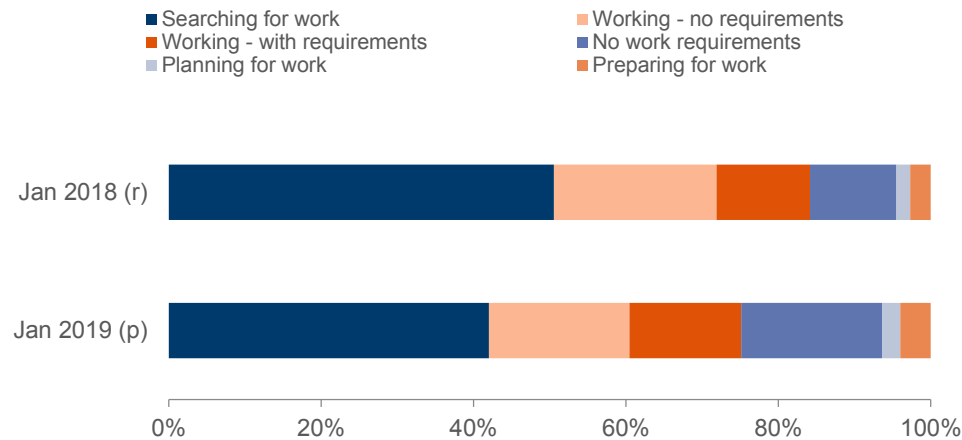

Of all starts in the month up to 10 January 2019, the 25-49 age group had the most starts at 60 per cent. The proportion of starters aged 50 and over in the month up to 10 January 2019 was 20 per cent, compared to 19 per cent in the equivalent month in 2018.

See the [Background Information and Methodology](#) document for more details. See [Table 2.1](#) for summary statistics and [Stat-Xplore](#) for the complete data series.

People on Universal Credit

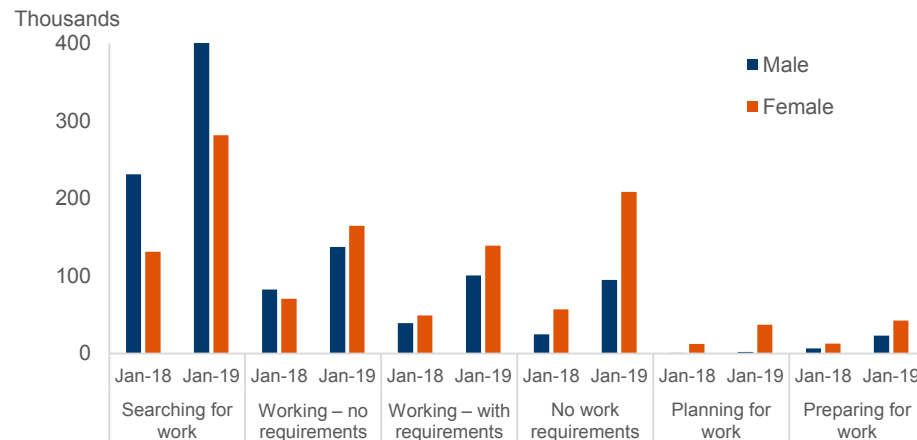

There is a decreasing trend in the proportion of people on Universal Credit in the Searching for Work conditionality regime, which now accounts for less than half of the people on Universal Credit

People on Universal Credit by conditionality regime, at 11 January 2018 and 10 January 2019

Of the 1.6 million people on Universal Credit as of 10 January 2019, 42 per cent (690 thousand) were in the Searching for Work conditionality regime, compared to 51 per cent (390 thousand) in January 2018. During the same period, the proportion of people in each of the remaining conditionality regimes have continued to increase with the exception of “Working – no requirements”.

The number of people on Universal Credit, by conditionality regime and gender, 10 January 2019

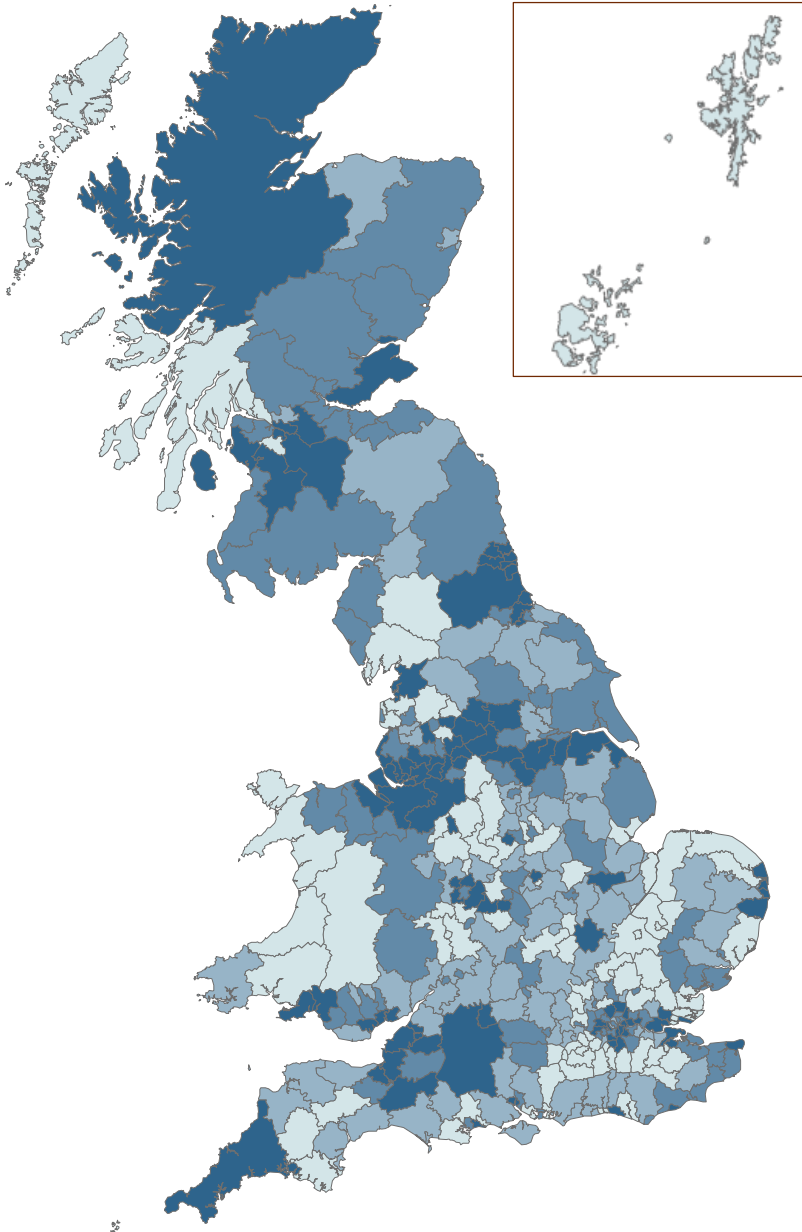

Of those in the “Working – no requirements” conditionality regime, 54 per cent (160 thousand) were female at January 2019 compared to 46 per cent (71 thousand) at January 2018.

Please note that the conditionality breakdown measures what regime an individual is in on the count date. This may not be representative of the entire assessment period for that individual. Conditionality regime figures are not the same as the employment breakdown, which shows whether an individual has had earnings during their assessment period. The two breakdowns should only be used together with caution.

See the [Background Information and Methodology](#) document for more information on conditionality regimes.

Where Universal Credit claimants live

The North West region, where roll out started, has the largest number of Universal Credit claimants

The adjacent map shows people on Universal Credit by local authority as of 10 January 2019.

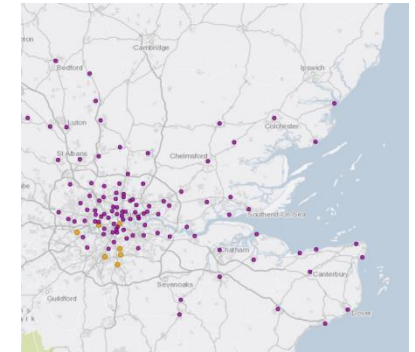

Key: The darker areas of the map are local authorities with higher numbers of Universal Credit claimants, while the lighter areas are the local authorities with fewer Universal Credit claimants.

Where you live

Find information about your Jobcentre Plus office in our interactive map.

Please click [here](#) to access the interactive map.

The interactive map shows the number of people on Universal Credit by Jobcentre Plus office, per region, as can be seen in the adjacent example. Key statistics can be viewed by clicking on the Jobcentre Plus office.

Please note that this map will be unavailable on a monthly basis from 12.30 p.m on the day before each monthly release of People on Universal Credit figures. The map will be updated and made available to users at 9.30 a.m on the day of the monthly release of new figures for People on Universal Credit. For future release dates, see the [statistics calendar](#).

Households receiving Universal Credit

1.3 million households were on Universal Credit at November 2018

In November 2018, 1.3 million households were on Universal Credit. More than four in five of these households (1.1 million) were receiving a payment.

There are a number of reasons why a household may not be in receipt of a payment, one being when someone moves into work and their level of earnings means that they no longer receive a payment. Universal Credit is responsive to changing circumstances, and provides support to people both in and out of work. Universal Credit payments can easily be restarted up to six months after a household's last payment.

Percentage of households on Universal Credit who are receiving a payment, 8 November 2018

The average amount of Universal Credit paid to households is £650 per month

Mean monthly amount of Universal Credit paid by family type, 8 November 2018

In November 2018, the average amount of Universal Credit paid to households on Universal Credit was £650 per month. This is the mean award for households where Universal Credit is in payment.

For households with children, higher average payments are a result of entitlement to support for one or more children, and a higher proportion with entitlement to support for housing.

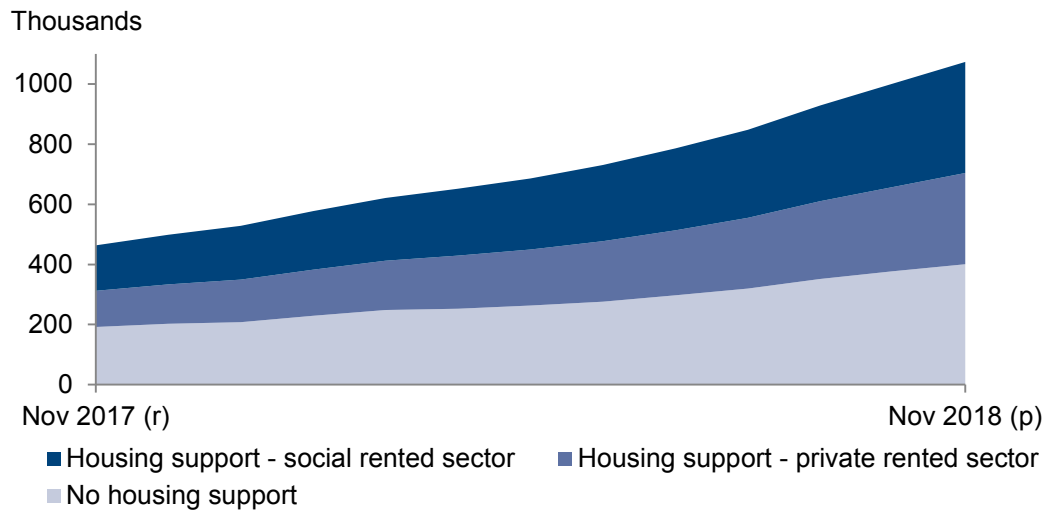

The mean is affected by a small number of households receiving relatively large payments of Universal Credit: In November 2018, 46 thousand households received a monthly payment of over £1500. This was 4 per cent of all households in payment.

In November 2018, 57 per cent (620 thousand) of Universal Credit awards were paid to single people without children, whilst just 34 thousand awards (3 per cent) were paid to couples without children.

Over time, a growing proportion of Universal Credit awards have been paid to households with children. In November 2017, 28 per cent of awards were paid to households with children. By November 2018, this had risen to 40 per cent. This is due to the continuing roll out of Universal Credit to a wider range of claimant types throughout 2018.

More than half of all households receiving a payment of Universal Credit are entitled to support for housing

Number of households receiving a payment of Universal Credit by housing support entitlement and tenure, November 2017 – November 2018

Universal Credit pays for different sorts of support required by the household, but in order to be entitled to this support certain conditions have to be met.

More information can be found here: <https://www.gov.uk/universal-credit/what-youll-get>

Support for housing helps households with costs such as rent or the interest charged on a mortgage. Around 680 thousand households that received a payment of Universal Credit in November 2018 were entitled to support for housing - 63 per cent of all households in payment.

In November 2018, 54 per cent of households receiving a payment of Universal Credit with entitlement to support for housing were in the social rented sector, compared to 45 per cent in the private rented sector.

Around 1 per cent of households fall in to the 'other or unknown' category for tenure. This includes households in owner occupied accommodation receiving support for mortgage interest.

Proportion of households receiving a payment of Universal Credit with entitlement to support for housing costs by Managed Payment to Landlord and Scottish Choice Direct Payment to Landlord, 8 November 2018

Universal Credit, including support for housing costs, is usually paid directly to the household in a single payment. Where this is not suitable, landlords and claimants can apply for housing costs to be paid directly to the landlord via a Managed Payment to Landlord. In Scotland only, claimants can choose a Direct Payment to Landlord via Universal Credit Scottish Choices.

In November 2018, 20 per cent of households that were entitled to support for housing costs, had a Managed Payment to Landlord in place.

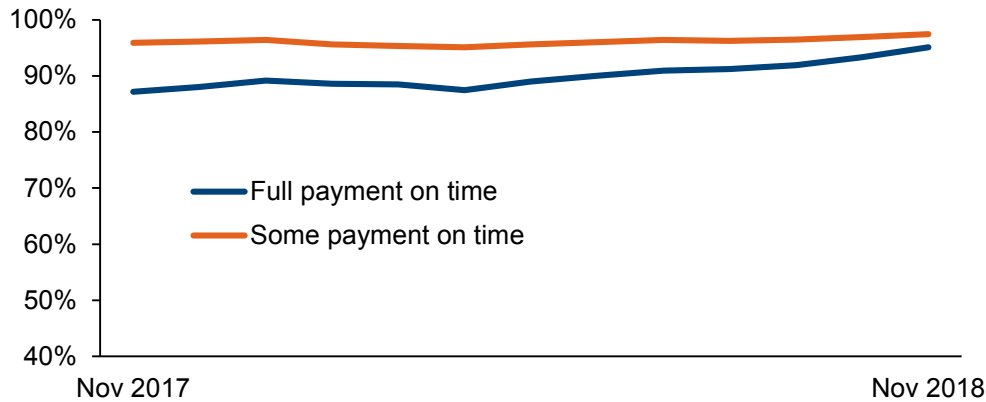

There were 11 thousand Direct Payment to Landlords made as a result of a Universal Credit Scottish Choice, less than 2 per cent of all households in Great Britain that are entitled to housing costs in November 2018.

In exceptional circumstances, payment of Universal Credit can be divided between two members of the household. This is known as a Split Payment. In November 2018, around 20 households on Universal Credit received a Split Payment. Where it is identified that one monthly payment is not suitable for a household, it may be possible to have their Universal Credit divided over the month to be paid more frequently i.e. twice monthly or, exceptionally, four times a month. Around 3 per cent (35 thousand) of households on Universal Credit received a payment in this way in November 2018, including those that have chosen to be paid more frequently via Universal Credit Scottish Choices (23 thousand). Please see the [Background Information and Methodology](#) for more information.

Payment timeliness - Universal Credit full service only

95 per cent of paid Universal Credit full service claims were paid in full on time

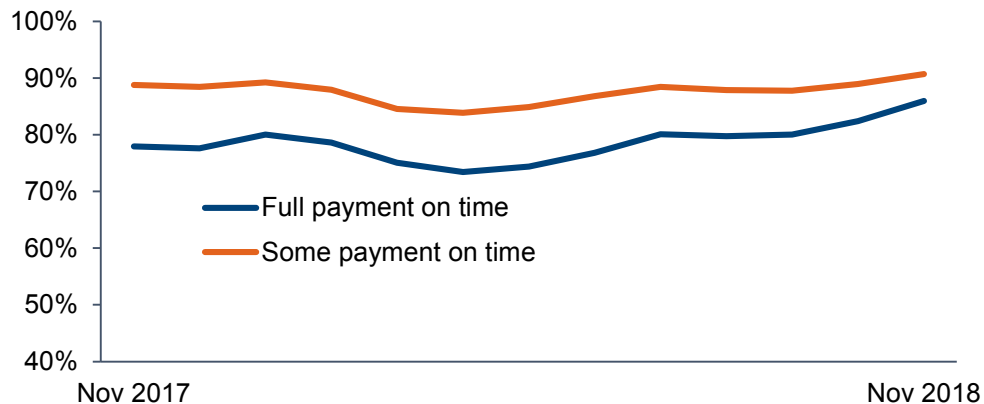

Proportion of paid UC full service claims that were paid on time (all claims) – November 2017 to November 2018

Of the households on Universal Credit full service in November 2018, 97 per cent that were paid received some payment on time. This compares to 96 per cent that received some payment on time in November 2017.

For households on Universal Credit full service in November 2018, 95 per cent of households that have been paid received full payment on time. This compares to 87 per cent in November 2017.

Proportion of paid UC full service claims that were paid on time (new claims) - November 2017 to November 2018

Of the households with new claims to Universal Credit full service in November 2018, 91 per cent that were paid received some payment on time. This compares to 89 per cent that received some payment on time in November 2017.

For households with new claims to Universal Credit full service in November 2018, 86 per cent of households that have been paid received full payment on time. This compares to 78 per cent in November 2017.

Payment timeliness is lower when looking at new claims than when looking at all claims. There are a number of one-off verification processes that must be completed by the claimant and by DWP at the start of the claim – to confirm the current circumstances of the claimant (or both claimants in a joint claim) and their entitlement to UC. Payment timeliness is therefore liable to be lower for new claims.

See **Table 6.1** for complete data series.

About these statistics

These official statistics have been compiled using data from systems within local offices and records of Universal Credit benefit payments made by the Department.

These and other new data sources will, in time, allow a progressively wider range of breakdowns to be published as new IT systems are introduced. The methodology used and definitions of the official statistics may be updated within subsequent releases, along with information on the impact of any changes to the time series already released. A [strategy](#) for the release of official statistics on Universal Credit was first published in September 2013 and last updated in January 2018.

These statistics have been developed using guidelines set out by the UK Statistics Authority, and are new [official statistics](#) undergoing evaluation. They have, therefore, been designated as Experimental Statistics. Users are invited to [comment](#) on the development and relevance of these statistics at this stage.

Figures contained within this publication are subject to rounding unless otherwise stated. Percentages shown are calculated using figures prior to rounding. Please see the [Background Information and Methodology](#) document for details on the level of rounding applied, which is dependent on the magnitude of the figure being quoted.

Roll out and migrating claimants from other benefits onto Universal Credit

Universal Credit was introduced in 2013 and was rolled out in stages across Great Britain by postcode area. See table 4.1 for a full list of Jobcentre Plus offices by the date they implemented Universal Credit Full Service.

The roll out process was completed in December 2018 and Universal Credit is now available in every jobcentre across Great Britain. By 2023 all existing legacy claimants will have moved on to Universal Credit.

Information on Universal Credit roll out can be found here: <https://www.gov.uk/government/publications/universal-credit-transition-to-full-service>
