Making homes happen

Homes England at MIPIM

Partners in Place - Our 2019 Programme

Partners in Place

We're at MIPIM Cannes to support ambitious local areas to promote investment opportunities and get more homes built.

One of the cornerstones of our new [Strategic Plan](#) is offering expert support for priority locations and helping to deliver more ambitious local plans.

We're involved in various regional activities at this year's event as part of our 'Partners in Place' programme, supporting city regions, growth areas and county councils. We want to further develop our shared interests with local areas and demonstrate how we can combine our tools and resources to increase the pace of delivery.

We stand ready to create ambitious partnerships that can unlock developments and increase certainty for investors and developers – delivering more homes in places where people want to live.

Share our ambition? Speak to us at the event or contact us by emailing enquiries@homesengland.gov.uk and including 'MIPIM Cannes' in the subject line.

Please note titles, speakers, timings and all other details listed on this programme are subject to change. Please consult the full MIPIM Cannes 2019 programme for details on the location of each session. You can also visit mipim.com for detailed programme information.
