

# Critical Goods for Government-Secured Freight Capacity: A List of Category 1 Goods

A Category 1 good is one which is critical to preservation of human or animal welfare and/ or national security for the United Kingdom.

The Government-secured freight capacity is intended to support the supply of Category 1 goods which are currently reliant on the short Strait (covering Dover, Folkestone, Calais, Dunkirk, and Coquelles). Where Category 1 goods are currently imported or exported through other UK Ports, these routes should continue to be used.

## Goods which are Category 1 and within consideration of the Government-secured freight capacity at this stage

### Department of Health and Social Care

- Human Medicines, covering Prescription-only, Pharmacy and General Sales List Medicines, clinical trials and children's vitamins (for import and export)
- Medical Devices and Clinical Consumables, considered to be Category 1 (for import and export)
- Vaccines (for import only)
- Nutritional Specialist Feeds, including Infant Milk Formula (for import only)
- Biological materials such as blood, organs, tissues and cells (for import only)

### Department for Environment, Food and Rural Affairs

- All Veterinary Medicines authorised under the Veterinary Medicines Regulation 2013, including finished and un-finished products, and Active Pharmaceutical Ingredients (for import and export)
- It also includes unauthorised medicines permitted for import under the Veterinary Medicines Directorate's Special Import Scheme (for import only)

### Department for Business, Energy and Industrial Strategy

- Critical chemicals or consumables used within the energy sector (for import only)

HM Government

Goods which are Category 1 but are not considered to require access to Government-secured freight capacity at this stage

### **Department for Environment, Food and Rural Affairs**

- Critical food chain dependencies, e.g. chemicals and key additives used within the food supply chain (for import only as required)
- Chemicals for water purification and treatment (for import only as required)

### **Department for Business, Energy and Industrial Strategy**

- Critical chemicals or consumables used within the energy sector (for import only as required)
- Critical spare parts for the energy sector (for import only as required)

### **Ministry of Defence**

- Items required for Military or National Security purposes (for import or export as required)

This list may be subject to further revision or amendment based upon further evidence and emergent needs. It will be kept under review and updated accordingly.
