Part II: Certification

The undersigned official veterinarian, hereby certify that:

11.1. The semen collection centre, in which the semen described above was collected, processed and stored for trade is approved and supervised by the competent authority in accordance with Chapter 1(1)(x) and Chapter 1(1)(i) of Annex D to Directive 92/65/EEC;

11.1.1. during the period commencing 30 days prior to the date of first collection of the semen described above until the date the fresh or chilled semen was dispatched or until the 30 days storage period for frozen semen elapsed, the semen collection centre:

11.1.1.1. was situated on the territory or in the case of regionalisation in a part of the territory(1) of a Member State which was not considered to be infested with African horse sickness in accordance with Article 5(2)(a)(b) of Directive 2009/156/EC(3);

11.1.1.2. fulfilled the conditions for a holding laid down in Article 4(5) of Directive 2009/156/EC(3);

11.1.1.3. contained only equidae which were free of clinical signs of equine viral arteritis and contagious equine metritis;

11.1.2. Only equidae satisfying the conditions laid down in Articles 4 and 5 or Articles 12 to 16 of Directive 2009/156/EC(3) have been admitted onto the centre.

11.1.3. The semen described above was collected from donor stallions, which:

11.1.3.1. have not shown any clinical sign of an infectious or contagious disease at the time of admission onto the centre and on the day the semen was collected;

11.1.3.2. have been kept for 30 days prior to the date of semen collection in holdings where no equine has shown any clinical sign of equine viral arteritis or contagious equine metritis during that period;

11.1.3.3. have not been used for natural mating during at least 30 days prior to the date of first semen collection and from the dates of the first sample referred to in points 11.3.5.1., 11.3.5.2. or 11.3.5.3. until the end of the collection period;

11.1.3.4. have undergone the following tests, which meet at least the requirements of the relevant Chapter of the Manual of Diagnostic Tests and Vaccines for Terrestrial Animals of the OIE, carried out on samples taken in accordance with one of the programmes specified in point 11.3.5 in a laboratory recognised by the competent authority:

(1)either  
[11.3.4.1. an agar-gel immuno-diffusion test (Coggins test) for equine infectious anaemia (EIA) with negative result;]

(1)either  
[11.3.4.2. a serum neutralisation test for equine viral arteritis (EVA) with negative result at a serum dilution of one in four;]

and  
[11.3.4.3. an agent identification test for contagious equine metritis (CEM) carried out on two occasions on samples taken with an interval of seven days by isolation of Taylorella equigenitalis]

and  
[11.3.4.2. a virus isolation test for equine viral arteritis (EVA) with negative result at a serum dilution of one in four;]

and  
[11.3.4.2. a virus isolation test for equine viral arteritis (EVA) carried out with negative result on an aliquot of the entire semen of the donor stallion;]

and  
[11.3.4.1. an ELISA for equine infectious anaemia (EIA) with negative result;]

and  
[11.3.4.1. an ELISA for equine infectious anaemia (EIA) with negative result;]

and  
[11.3.4.1. an agar-gel immuno-diffusion test (Coggins test) for equine infectious anaemia (EIA) with negative result;]

11.1.3.5. have been subjected with the results specified in 11.3.4. in each case to at least one of the test programs(4) detailed in points 11.3.5.1., 11.3.5.2. and 11.3.5.3. as follows:

11.1.3.5.1. The donor stallion was continuously resident on the semen collection centre for at least 30 days prior to the date of the first collection and during the period of collection of the semen described above and no equine on the semen collection centre came into direct contact with equine of lower health status than the donor stallion.

The tests described in point 11.3.4. have been carried out on samples taken(5) prior to the first semen collection and at least 14 days following the date of the commencement of the residence period of at least 30 days.

11.1.3.5.2. The donor stallion was resident on the semen collection centre for at least 30 days prior to the date of the first collection and during the period of collection of the semen described above, but has left the centre under the responsibility of the centre veterinarian for a continuous period of less than 14 days, and/or other equidae on the collection centre came into direct contact with equidae of lower health status.

The tests described in point 11.3.4. have been carried out on samples taken(5) prior to the first semen collection of the breeding season or collection period in the year the semen described above was collected and at least 14 days following the date of the commencement of the residence period of at least 30 days, and

11.3.5.3. The donor stallion was resident on the semen collection centre for at least 30 days prior to the date of the first collection and during the period of collection of the semen described above, but has left the centre under the responsibility of the centre veterinarian for a continuous period of less than 14 days, and/or other equidae on the collection centre came into direct contact with equidae of lower health status.

The tests described in point 11.3.4. have been carried out on samples taken(5) prior to the first semen collection of the breeding season or collection period in the year the semen described above was collected and at least 14 days following the date of the commencement of the residence period of at least 30 days, and

(1) either  
[one of the tests described in point 11.3.4.2. for equine viral arteritis was last carried out on a sample taken(5) not more than 30 days before the semen described above was collected, ]

(1) either  
[a virus isolation test for equine viral arteritis was carried out with negative result on an aliquot of the entire semen of the donor stallion taken(5) not more than six months before the semen described above was collected and a blood sample taken on the same date(5) reacted positive in a serum neutralisation test for equine viral arteritis at a serum dilution of more than one in four,]

and

(1) either  
[one of the tests described in point 11.3.4.2. for equine viral arteritis was last carried out on a sample taken(5) not more than 30 days before the semen described above was collected, ]

(1) either  
[a virus isolation test for equine viral arteritis was carried out with negative result on an aliquot of the entire semen of the donor stallion taken(5) not more than six months before the semen described above was collected and a blood sample taken on the same date(5) reacted positive in a serum neutralisation test for equine viral arteritis at a serum dilution of more than one in four,]

and

11.1.3.5.4. for contagious equine metritis was last carried out on samples taken(5) not more than 60 days before the semen described above was collected.

11.1.3.5.5. The tests described in point 11.3.4. have been carried out on samples taken(5) prior to the first semen collection of the breeding season or collection period in the year the semen described above was collected, and

11.1.3.5.6. The tests described in point 11.3.4. were last carried out on samples taken(5) not less than 14 days and not more than 90 days after the collection of the semen described above.

11.3.6. have undergone the testing provided for in point 11.3.5. on samples taken on the following dates:

(1) either [11.4. No antibiotics were added to the semen;]

(1) or [11.4. The following antibiotic or combination of antibiotics was added to produce a concentration in the final diluted semen of not less than(6) : ]

11.5. The semen described above was:

11.5.1. collected, processed, stored and transported under conditions which comply with the requirements of Chapters 11.1(1) and 111.1(1) of Annex D to Directive 92/65/EEC;

11.5.2. sent to the place of loading in a sealed container in accordance with point 1.4 of Chapter 111.1(1) of Annex D to Directive 92/65/EEC and bearing the number indicated in Box 1.23.

#### Notes

**Part 1:**

<table>
<thead>
<tr>
<th>Box</th>
<th>1.12.</th>
<th>place of origin shall correspond to the semen collection centre of origin of the semen.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Box</th>
<th>1.13.</th>
<th>place of destination shall correspond to the semen collection or storage centre or to the holding of semen destination.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>

</table>

<table>
<thead>
<tr>
<th>Box</th>
<th>1.31.</th>
<th>donor identity shall correspond to the official identification of the animal.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Date of collection shall be indicated in the following format: dd/mm/yyyy.</th>
</tr>
</thead>
</table>

**Part II:**

Guidance for the completion of Table in 11.3.6:

**Abbreviations:**

- EIA-1  Equine infectious anaemia (EIA) testing first occasion
- EIA-2  EIA testing second occasion
- EVA-1  Equine viral arteritis (EVA) testing on blood sample first occasion
- B1
- EVA-2  EVA testing on blood sample second occasion
- B2
- EVA-  EVA testing on semen sample first occasion
- S1
- EVA-  EVA testing on semen sample second occasion
- S2
- Contagious equine metritis (CEM) testing first occasion first sample

1. **Certificate reference number**

2. **Local reference number**:

   - CEM-11
   - CEM-12
   - CEM-21

**Instructions:**
- For each semen identification in column A in the example below, the test programme (11.3.5.1., 11.3.5.2. and/or 11.3.5.3.) must be described in column B and columns C and D must be completed with the dates required.

The dates when samples were taken for laboratory testing prior to the first collection of the semen described above as required in 11.3.5.1., 11.3.5.2. and 11.3.5.3., are entered in the upper line of columns 5 to 9 of the table, this being the boxes marked with EIA-1, EVA-B1 or EVA-S1 and CEM-11 and CEM-12 in the example below.

The dates when samples were taken for repeat laboratory testing as required in accordance with 11.3.5.2. or 11.3.5.3. are entered in the lower line of columns 5 to 9 in table, this being the boxes EIA-2, EVA-B2 or EVA-S2 and CEM-21 and CEM-22 in the example below.

<table>

<td>EIA-1</td>
</tr>
</tbody>
</table>

1. **Delete as appropriate.**
2. **Only approved semen collection centres listed in accordance with Article 11(4) of Council Directive 92/65/EEC on the Commission website:**
3. **OJ L 192, 23.7.2010, p. 1.**
4. **Cross out the programme(s) that do(es) not apply to the consignment.**
5. **Insert date in table in point 11.3.6 (follow Guidance in Part 11 of the Notes).**
6. **Insert names and concentrations.**

The colour of the stamp and signature must be different from that of the other particulars in the certificate.
