

# AEMS

AEMS is a dashboard and mobile app that will allow you to track and monitor your energy usage and business operations.

## What AEMS can do for you?

- Help you gain an understanding of where and how you are using your energy.
- Highlight the role energy plays within your business.
- Discover carbon saving opportunities within your business.

## What are the benefits of using AEMS?

- Improve more than just your energy usage. Increase efficiency and drive growth.
- Tailored energy saving hints and tips and personalised business insights.
- Stay one step ahead with timely alerts. Be predictive, not reactive.
- Set strategies to reduce waste that are based on data from your business.
- Promote energy saving and 'green' values in your brand.
- ....and many more.

## Piloting the tool

From **March 2019**, we are looking for trial sites, particularly small and independent businesses, in the retail and hospitality sector to join our pilot.

## How to join

Joining is free and simple, all you need to do is register your details at **myaems.com** or call Gemma on +44 (0)1992 814655.

## All we need from you:

- 1) Access to your energy data
- 2) Trial the tool
- 3) Provide us with your feedback

hello@myaems.com  
www.myaems.com

## App Objectives

- Drive action
- Better control over energy costs
- Relevant to the user
- Integrate seamlessly within daily duties
- Leverage on smart metering

## App Benefits

- Tailored to SME hospitality operations
- Correlated to industry metrics, e.g. room nights
- Actionable tips to achieve energy, emission and cost savings
- Latest performance at a quick glance
- Empowers the whole team to reduce energy

## Trial the app for free from April 2019

- All we need is your latest bill and consent to connect your sites' energy use with the App
- Use app for free to track performance and to save energy and costs
- Participation in short feedback surveys during your trial
- Open to hotels, hostels, restaurants, pubs, cafes...

# E-CAT

## ENERGY COMPARISON & ADVICE TOOL

### TARGET SECTORS

### WHAT IS E-CAT?

An online energy management tool for small non-domestic customers providing:

- **Real-time data** on electricity usage
- **Real-time feedback** comparing your consumption with benchmarks of similar organisations
- Tailored energy **efficiency advice**
- A range of additional features

### TRIALLING E-CAT

- Trial will run from **Mar 2019 to Jan 2020**
- **Easy installation** of energy monitoring clamps or send us your half-hourly meter data
- **£50 reward** for taking part and providing feedback through a brief survey and follow-up telephone call

#### CONTACT:

Jonathan Stokeld

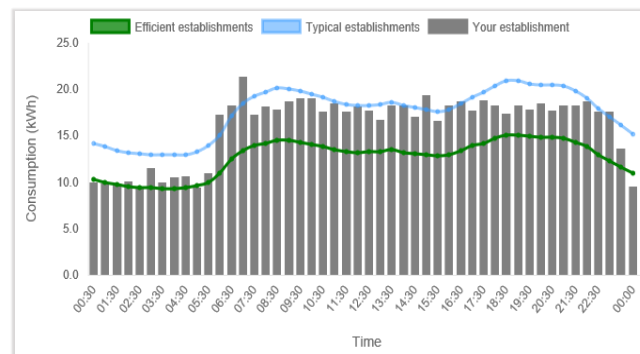

T: +44 (0)1223 855 249

[jonathan.stokeld@element-energy.co.uk](mailto:jonathan.stokeld@element-energy.co.uk)

### BENEFITS

- **View and understand** your energy usage
- See **how you compare to other organisations** of the same type and size
- Receive feedback on **actionable energy efficiency** improvements
- Helps you reduce your energy usage and **save money**

Your energy usage was **less** than for typical establishments this day!

You could be more efficient - your energy usage was higher than for efficient establishments this day

**elementenergy**

# Energy Sparks

**We help schools become more energy efficient**

**An online, school-specific energy analysis tool and energy education programme**

**Analysis for savings:** automatic charting and analysis of schools' energy consumption patterns using up to date smart meter data, providing advice on how to save energy

**Alerts:** automatic notification of changes in energy consumption

**Education:** 60+ Eco-team and curriculum focussed pupil led energy education and saving activities built into the website

**Supports all school users:** pupils, teachers, management, building managers, governors, parents in saving money and energy

*"Engaging with Energy Sparks has been a really worthwhile experience. Not only has the school saved money, the children have become more aware of the ways that they can help to reduce energy use. The website is a great resource for adults and children with activities and data which allow children to apply their mathematical and scientific skills and knowledge. I would highly recommend it to any other school."*

Jennie Nixon, Head of School, Whiteways Primary School, Sheffield

**We are offering a free trial until January 2020**

To find out more, please contact us at [hello@energysparks.uk](mailto:hello@energysparks.uk)

# GLOWPRO

## Real-time energy monitoring puts you in control

- No more bill shock
- Identify equipment inefficiency before it fails
- Ensure customer comfort
- Help your staff do their jobs more efficiently
- Identify impact of behaviour patterns and respond (eg. cooking eqpt. on hrs before service starts)
- Smart meter not required for Trial (clamp solution available), easy self-install either way
- Three inter-connected applications designed to meet very different user needs

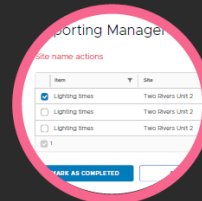

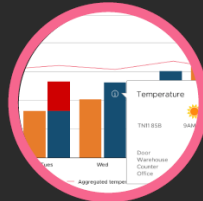

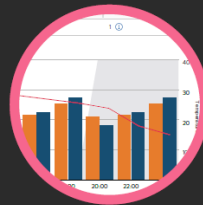

### Assure

Oversight, business planning, billing control

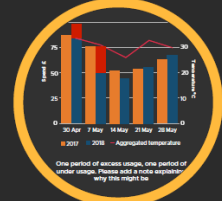

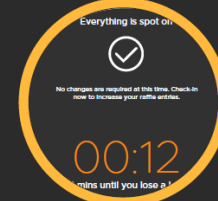

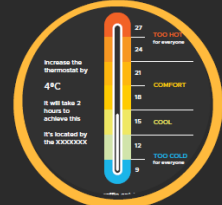

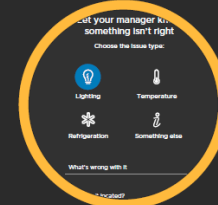

### Reflect

Manage billing, consumption and staff in one site or many

### React

For staff on floor to support operational efficiency, customer comfort: energy not priority for them

**Untapped** turns data from your smart meter into actionable insights that can help you save money. The programme provides simple energy saving advice and activities tailored to your school.

 **energy**  **savings**  **learning**

## BENEFITS

- ✓ Access bespoke reports on your energy use
- ✓ Access tailored cost-saving advice based on your energy data
- ✓ Compare your energy use to other schools in the region
- ✓ Set targets and track your progress
- ✓ Earn awards and engage pupils in energy efficiency activities
- ✓ Engage the whole school with energy data and maximise learning
- ✓ Access content and learning materials to bring energy efficiency to life

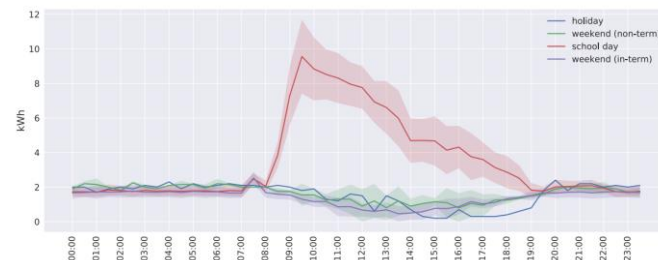

## JOIN THE TRIAL

We are looking for schools who would like to join the trial programme and find out how we could help your school save.

Please join the pilot trial by contacting [info@untappedschools.com](mailto:info@untappedschools.com)

**Automated advanced analytics from the Untapped platform could help you save energy**

[untappedschools.com](https://untappedschools.com)

Help your pupils take their micro:bit coding to the next level by:

- wirelessly controlling smart devices
- using microbits to track and monitor energy and heat usage around the school

To register your interest in becoming one of our test schools who will receive **FREE** equipment and lesson plans go to **[energyinschools.co.uk](https://energyinschools.co.uk)**
